PME signs 5-year, A\$23M contract with University of Maryland Medical System

8 April 2026

HIGHLIGHTS

- **PME signs 5-year, A\$23M contract with the University of Maryland Medical System**
- **Contract is for Visage 7 Viewer and Visage 7 Workflow**
- **Visage 7 platform to be implemented in the cloud**
- **Transaction-based model with potential upside**

Leading health imaging company Pro Medicus Limited [ASX: PME] today announced its wholly-owned U.S. subsidiary, Visage Imaging, Inc., has signed a 5-year, A\$23M contract with the University of Maryland Medical System (UMMS).

UMMS delivers comprehensive health care services throughout Maryland and includes collaboration with specialists from the University of Maryland School of Medicine. The UMMS network includes the University of Maryland Medical Center, the Marlene and Stewart Greenebaum Comprehensive Cancer Center, the University of Maryland Children's Hospital and the world renowned, R Adams Cowley Shock Trauma Center. Dr. R Adams Cowley is considered the pioneer of trauma care and gave the world the concept of the "Golden Hour".

Based on a transactional licensing model, the contract will see the company's cloud-based Visage 7 Enterprise Imaging Platform ("Visage 7"), including Visage 7 Viewer and Visage 7 Workflow, implemented across UMMS, providing a single, unified enterprise imaging platform for diagnostic interpretation.

Planning for the rollout is to commence immediately and will be based on Visage's proven cloud-based implementation process, with go-live targeted for early in the 2027 calendar year.

“UMMS provides cutting-edge, innovative patient care across the state of Maryland,” said Dr Sam Hupert, Pro Medicus CEO. “They join an ever growing list of Visage 7 clients to opt for our fully cloud-based platform, which, as a result of our CloudPACS strategy, is becoming the standard in the North American healthcare IT market.”

“The global shortage of radiologists is driving healthcare institutions to adopt enterprise imaging platforms that maximise radiologist efficiency and subspecialty workflows with the added security and scalability of the cloud. We will provide that for UMMS across its academic, community and specialty hospital clinical footprint.”

Dr. Hupert continued, “Our pipeline remains strong and spans all market segments.”
