

Quarterly Activities Report

Highlights

- **1,179m diamond drilling completed at Tansey Gold Project in Southeast Queensland; targeting high-grade, large-scale epithermal gold mineralisation in proximity to existing underground gold mine; assay results pending**
- **Las Opeñas Gold Project driller engaged; drilling to commence in April**
- **~\$1.4m cash at 31 March 2026 and 13 April 2026**
- **NewPeak owns ~4.3m Lakes Blue Energy NL (ASX:LKO) shares which closed at \$0.55 per share on 13 April 2026**

NewPeak Metals Limited (**NPM**, **NewPeak** or the **Company**) is pleased to provide a summary of the Company's activities for the quarter ended 31 March 2026 and subsequent events to the date of this announcement.

Tansey Gold Project – Drilling completed, assay results pending

Drilling commenced on 21 January 2026 at NewPeak subsidiary Goldstrike Mining Pty Ltd's 100%-owned Tansey Gold Project (EPM 26368) in southeast Queensland, with a total of 1,179m drilled across four diamond drill holes. Drill core was transported to the ALS laboratory in Brisbane in February for preparation and testing, with assay results expected to be received later this month.

NewPeak is targeting high-grade, large-scale gold mineralisation adjacent to and beneath the historic South Burnett Gold Mine, which was mined to a depth of ~80 metres in the 1940s and remains untested for significant depth extension. More information on Tansey can be found in NPM's ASX Announcement dated 11 July 2025.

Las Opeñas Gold Project – Drilling to commence later this month

NewPeak's 100%-owned Las Opeñas project in San Juan Province, Argentina features a reinterpreted 800m x 600m breccia zone which has previously been drilled to relatively shallow depths, with historical drilling leading to intercepts such as 115m @ 0.58g/t Au from 18m to end of hole (*GMD ASX Announcement dated 21 August 2014*).

NewPeak intends to undertake deeper drilling across a broader zone on this breccia area, which appears to form part of a rhyolitic complex associated with phreatic breccias and strong argillic alteration. Prospectivity is enhanced given the presence of two distinct mineralisation phases, namely broad, silver-dominated mineralisation pervasive in phreatic breccias, then gold-silver-polymetallic mineralisation hosted in discrete hydrothermal breccias, which appear to strengthen downhole. The scale of the breccia mapped at surface and the regional structural setting are also encouraging ingredients for a potential gold-dominant, polymetallic breccia system.

Subsequent to the quarter, driller Ecominera was engaged to undertake a minimum 2,500m diamond drill program. A camp is being erected in the nearby town of Malimán De Abajo, and roadworks / drill pad preparations are nearly complete. Drilling is expected to commence in April.

Lakes Blue Energy Shareholding – Production Testing Update

As outlined in Lakes Blue Energy NL (**Lakes or LKO**) announcement dated 19 March 2026, with regards to its planned production testing of the Wombat-5 well, Lakes' Wombat-5 well encountered three strong gas zones within a 1,500m horizontal section across a broad package of gas saturated sands.

Lakes concluded that additional operations would be required to establish full gas flow from the wellbore. An extended pressure build-up phase of the approved well test program had commenced concurrently with the regulatory approval, with work expected to provide longer-term pressure buildup data to assist in evaluating reservoir properties. Following completion of the extended pressure build-up program, and subject to regulatory approval, Lakes intended to return to the well and implement a perforation program in the completed horizontal reservoir interval.

NewPeak currently holds ~4.3m LKO shares, which had a last close price of \$0.55 on 13 April 2026.

Other Projects

CACHI GOLD PROJECT

The Company is prioritising drilling at Las Opeñas in the near term and does not plan significant exploration at Cachi during the next quarter.

TREUER RANGE

NewPeak is considering options for its 100% owned Treuer Range uranium project in the Ngalia Basin, Northern Territory, including introduction of a third party or divestment.

GEORGE RIVER

NewPeak is considering options for its 100% owned George River Uranium, Rare Earth Elements (REE) and Scandium project, which is a large portfolio of claims totalling an expansive area of 23,184 hectares across Quebec and Labrador, Canada, including introduction of a third party or divestment.

Corporate

NewPeak finished the quarter with \$1.4m cash. The Company holds shares in listed securities including ~4.3m Lakes Blue Energy NL (ASX:LKO) shares which closed at \$0.55 per share on 13 April 2026.

NewPeak's Appendix 5B (Quarterly Cashflow Report) attached includes an amount in item 6.1 which constitutes executive (\$82.5k) and non-executive (\$25k) directors' fees paid during the Quarter.

During the period, the Company spent \$800k on exploration activities.

8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: The Company expects it will continue to have approximately the current level of cash flows for the time being and notwithstanding this will continue to assess its future expenditure with consideration to available cash resources.	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: The Company maintains equity investments in listed companies, which represents a potential step to raise further cash to fund its operations. The Company will continue to monitor its equity investments together with its ongoing operating cashflows.	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: The Company expects that it will be able to continue its operations and to meet its business objectives based on the Company's intention to seek additional funding via the potential for further divestment(s) of equity investments and / or a potential reduction in expenditure and / or a potential equity capital raising.	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>
