

2026 Ignite Investment Summit Presentation

Infini Resources Limited (ASX:I88) (“Infini” or the “Company”) advises of its participation at the Ignite Investment Summit 2026 being held this week in Hong Kong.

Chief Executive Officer, Mr. Rohan Bone, will be presenting at the Conference on Thursday, 16 April 2026, to discuss and present the Company, in particular its Canadian Uranium Project Portfolio. To learn more about this announcement, click [here](#).

A copy of Infini’s presentation is attached following.

Forward Looking Statements

This announcement may contain certain forward-looking statements and projections. Statements regarding I88’s plans with respect to its mineral properties and programs are forward-looking statement. Such forward-looking statements/projections are estimates for discussion purposes only and should not be relied upon. Forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. There can be no assurance that I88’s plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that I88 will be able to confirm the presence of additional mineral resources, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of I88’s mineral properties. Infini Resources Limited does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projections based on new information, future events or otherwise, except to the extent required by applicable laws. While the information contained in this report has been prepared in good faith, neither Infini Resources Limited or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement.

ASX: I88

Disclaimers

These presentation materials and any accompanying verbal presentation (together, the Presentation Materials) have been prepared by Infini Resources Limited (Company, IFR, Infini Resources) as at 10 April 2026 and statements are current only as at that date. Information in the Presentation Materials remains subject to change without notice. The Company has no responsibility or obligation to inform you of any matter arising or coming to its notice, after the date of this document, which may affect any matter referred to in this document. By receiving the Presentation Materials, you acknowledge and represent to the Company that you have read, understood and accepted the terms of this disclaimer. It is the responsibility of all recipients of these Presentation Materials to obtain all necessary approvals to receive these Presentation Materials and receipt of the Presentation Materials will be taken by the Company to constitute a representation and warranty that all relevant approvals have been obtained.

NOT AN OFFER; These Presentation Materials are for information purposes only. The Presentation Materials do not comprise a prospectus, product disclosure statement or other offering document under Australian law (and will not be lodged with the Australian Securities and Investments Commission) or any other law. The Presentation Materials also do not constitute or form part of any invitation, offer for sale or subscription or any solicitation for any offer to buy or subscribe for any securities nor shall they or any part of them form the basis of or be relied upon in connection therewith or act as any inducement to enter into any contract or commitment with respect to securities. In particular, these Presentation Materials do not constitute an offer to sell or a solicitation to buy, securities in the United States of America.

NOT INVESTMENT ADVICE; The Presentation Materials are not investment or financial product advice (nor tax, accounting or legal advice) and are not intended to be used for the basis of making an investment decision. Recipients should obtain their own advice before making any investment decision.

SUMMARY INFORMATION; The Presentation Materials do not purport to be all inclusive or to contain all information about the Company or any of the assets, current or future, of the Company. The Presentation Materials contain summary information about the Company and its activities which is current as at the date of the Presentation Materials. The information in the Presentation Materials is of a general nature and does not purport to contain all the information which a prospective investor may require in evaluating a possible investment in the Company or that would be required in a prospectus or product disclosure statement or other offering document prepared in accordance with the requirements of Australian law or the laws of any other jurisdiction, including the United States of America. While reasonable care has been taken in relation to the preparation of the Presentation Materials, none of the Company or its directors, officers, employees, contractors, agents, or advisers nor any other person (Limited Party) guarantees or makes any representations or warranties, express or implied, as to or takes responsibility for, the accuracy, reliability, completeness or fairness of the information, opinions, forecasts, reports, estimates and conclusions contained in this document. No Limited Party represents or warrants that this document is complete or that it contains all information about the Company that a prospective investor or purchaser may require in evaluating a possible investment in the Company or acquisition of shares in the Company. To the maximum extent permitted by law, each Limited Party expressly disclaims any and all liability, including, without limitation, any liability arising out of fault or negligence, for any loss arising from the use of or reliance on information contained in this document including representations or warranties or in relation to the accuracy or completeness of the information, statements, opinions, forecasts, reports or other matters, express or implied, contained in, arising out of or derived from, or for omissions from, this document including, without limitation, any financial information, any estimates or projections and any other financial information derived therefrom.

FORWARD LOOKING STATEMENTS; This Presentation Materials may contain certain forward-looking statements and projections. Statements regarding I88's plans with respect to its mineral properties and programs are forward-looking statement. Such forward-looking statements/projections are estimates for discussion purposes only and should not be relied upon. Forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. There can be no assurance that I88's plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that I88 will be able to confirm the presence of additional mineral resources, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of I88's mineral properties. Infini Resources Limited does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projections based on new information, future events or otherwise, except to the extent required by applicable laws. While the information contained in this report has been prepared in good faith, neither I88 or

any of its directors, officers, agents, employees or advisers give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement.

COMPLIANCE STATEMENT; This announcement contains information on the Portland Creek Project extracted from ASX market announcements dated 10, 15 & 29 January 2024, 19 February 2024, 3 and 28 May 2024, 1, 10 and 22 July 2024, 14 October 2024, 23 December 2024, 30 January 2025, 26 March 2025, 4, 12, 14 and 28 July 2025, 3 September 2025, 9 and 13 October 2025, 21 November 2025, 12 and 24 December 2025, 12 January 2026 and 9 February 2026 reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). This announcement contains information on the Company's Reynolds and Reitenbach Lake Projects extracted from market announcement released to the ASX market announcements platform on 25 February 2025, 2 June 2025, 19 and 24 July 2025, 19 August 2025, 8 and 22 September 2025, 2 and 3 October 2025, 26 November 2025, 23 December 2025, 19 and 28 January 2026, 19 and 31 March 2026 reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). The original market announcements are available to view on www.infiniresources.com.au and www.asx.com.au. The Company is not aware of any new information or data that materially affects the information included in the original market announcement.

CAUTIONARY STATEMENT; The Company has defined the mineralisation in the field by using hand held pXRF technology to analyse drill samples in real time. This allows for immediate on-site decisions to be made to adjust drilling strategies. While pXRF readings provide a useful indication of mineral content and approximate grades, they are not a substitute for laboratory-derived assay grades and will not be used in any resource estimation. All drill intercepts will be sent to an independent laboratory for accurate analysis, with assay results expected in the current quarter. Portable pXRF results reported are considered semi-quantitative, as such, results from pXRF analysis are stated as indicative only, provide confirmation that mineralisation is present however may not be representative of elemental concentration within the material sampled and are preliminary to subsequent confirmation (or otherwise) by geochemical laboratory analysis. Results of pXRF analyses are included for reference, and laboratory assays will be provided when these become available. Limitations include; very small analysis window, possible inhomogeneous distribution of mineralisation, analytical penetration depth, possible effects from irregular rock surfaces. Results are not considered to be entirely representative of the rock samples, as the analyses were made of what were interpreted to be areas on drill samples with potential to be uranium. The analyses were carried out on drill core specimens and not ground powders. The pXRF is calibrated periodically against prepared standards. The samples that are the subject of this report will be submitted for laboratory assay and some variation from the results presented herein should be expected. Caution should be exercised until the official assay laboratory results have been received. While these preliminary results provide compelling evidence of mineralisation, the Company notes that assay confirmation remains pending and further exploration is required to determine the continuity and thickness of mineralised zones, which will be critical in defining the economic potential of the mineralisation. The Company cautions that visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analysis where concentrates or grades are the factor of principal economic interest. Visual estimates also potentially provide no information regarding impurities or deleterious physical properties relevant to valuations. The presence of uranium minerals, including uraninite, is based on field observations, pXRF and scintillometer readings only. These indicators are preliminary in nature and should not be considered a substitute for laboratory analysis. The identification of uranium mineralisation remains conceptual until confirmed through geochemical assay and mineralogical reporting from accredited laboratories.

JORC CODE; It is a requirement of the ASX Listing Rules that the reporting of exploration results, ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves ("JORC Code"). Investors outside Australia should note that while reporting in this document complies with the JORC Code, they may not comply with the relevant guidelines in other countries. Information contained in this document describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws.

ACCEPTANCE; By attending a presentation or briefing, or accepting, accessing or reviewing this document you acknowledge, accept and agree to the matters set out above.

AUTHORISATION; This document has been authorised for release by the Company's Board of Directors.

Shareholder Breakdown

Targeting high-impact discoveries in Tier-1 jurisdictions

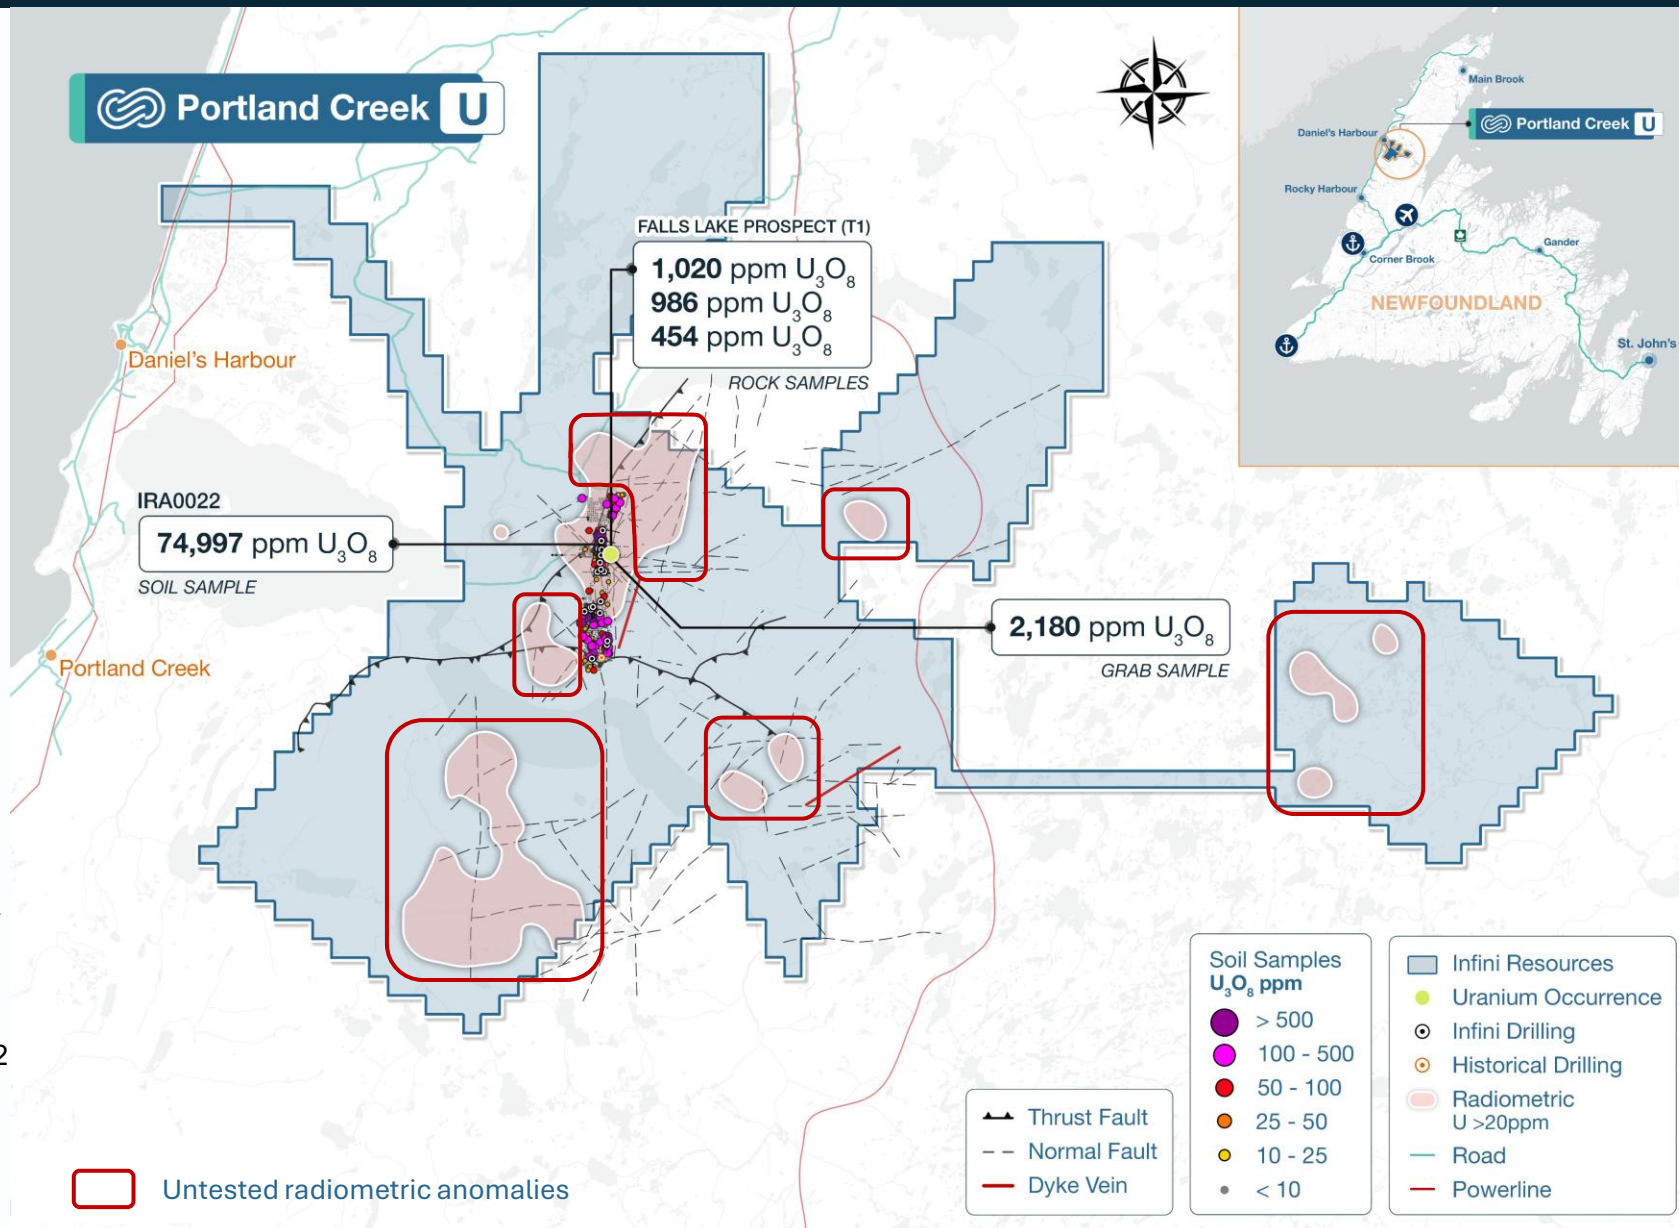

- ▶ Portfolio of projects offering substantial discovery upside in Tier-1 jurisdictions.
- ▶ First mover advantage for potential large-scale discoveries in Newfoundland and margins of Athabasca Basin.
- ▶ World-class team with proven uranium experience across Canada and Australia.
- ▶ We are active, agile and data-driven, with a clear purpose to unlock value quickly and efficiently.

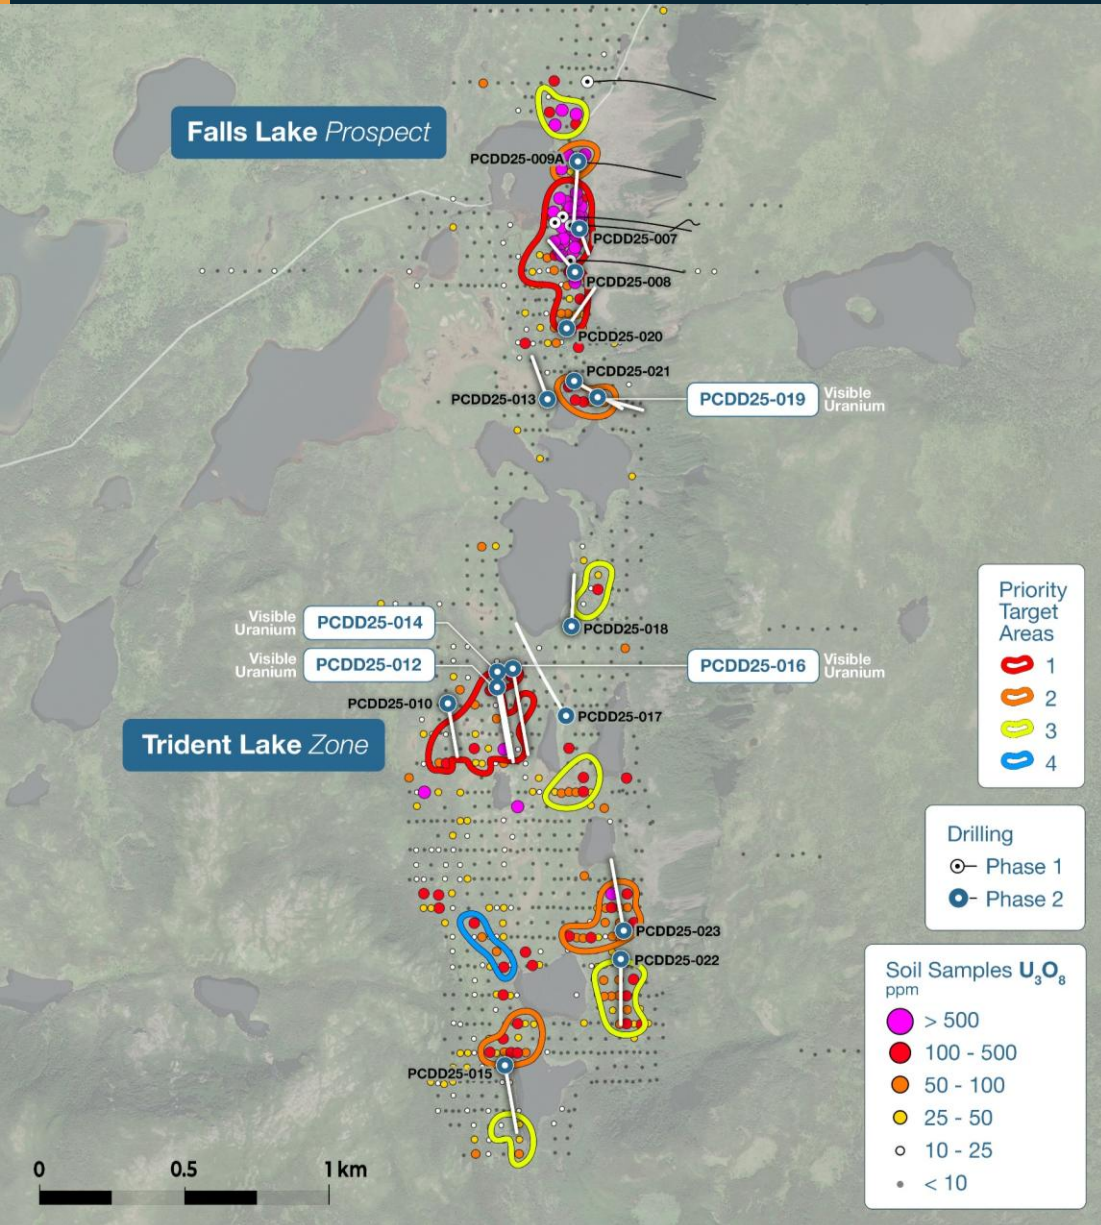

Portland Creek: A district-scale greenfield discovery opportunity

- ▶ Significant 328 km² adjacent to existing power & transport infrastructure.
- ▶ Greenfield opportunity largely underexplored since the 1970's.
- ▶ Shear-hosted uranium system with polymetallic potential (Mo, Cu, Zn).
- ▶ Multiple highly anomalous uranium zones identified, with soils up 74,997 ppm (7.5%) U₃O₈.
- ▶ What have we completed recently?
 - Phase 2 drilling complete for a total of ~5,300 drill metres.
 - Expanded project footprint by 179 km² covering additional targets.

Visible uranium identified across multiple P2 holes >1 km apart

- ▶ Uranium mineralisation intersected across multiple drillholes located over >2 km apart, confirming a multi-kilometer scale hydrothermal system.
- ▶ Widespread hydrothermal alteration, structurally controlled uranium mineralisation and polymetallic pathfinders indicate proximity to a potentially higher-grade uranium source.
- ▶ Extensive pipeline of high-priority targets across a 320 km² project footprint, with many remaining untested.

PCDD25-012, 252 ppm U_3O_8 @ 270.0m

PCDD25-014, 124 ppm U_3O_8 @ 28.0m

Assays confirm structurally controlled uranium system

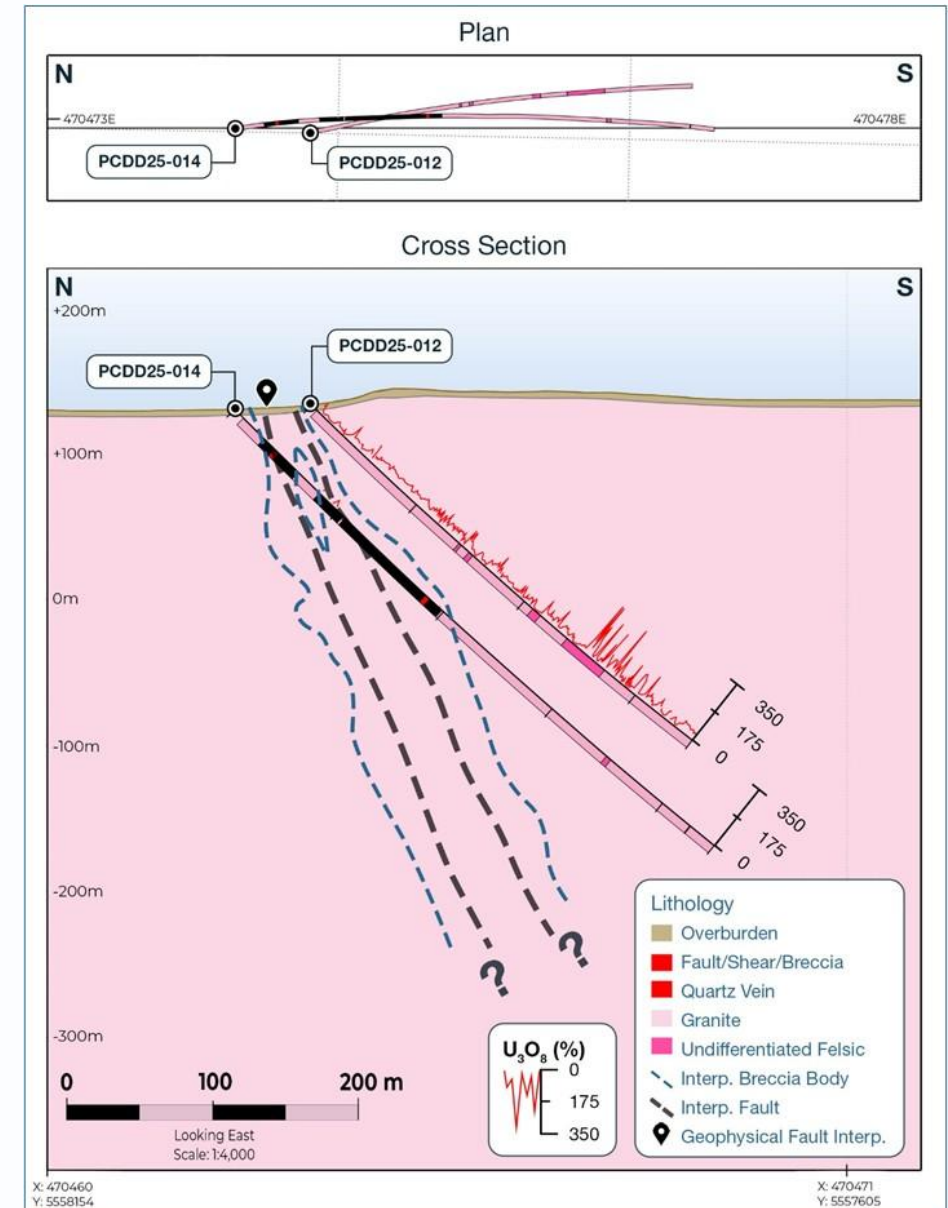

► Exploration upside rationale:

- Assays up to 347 ppm U_3O_8 confirm uranium mineralisation directly correlated to structural controls, confirming exploration model.
- Trace uranium mineralisation and hydrothermal alteration suggests proximity to a potential higher-grade source.
- Origination of 7.5% U_3O_8 soils not yet identified, geophysics results to support target vectoring.

► Plans at Portland Creek for 2026

- Complete project-wide airborne geophysics survey, expected Q2 CY2026.
- Commence field program in Q2 CY2026 to ground-truth structural features and targets.
- Undertake Phase 3 drill program in Q2/Q3 CY2026, estimate >5k drill metres.

Reynolds & Reitenbach Lake: Early-stage Athabasca potential

- ▶ Massive 766 km² landholding located on the eastern margins of the Athabasca Basin.
- ▶ Projects underexplored since the 1970's and only ~50 km from Rabbit Lake and Eagle Point deposits.
- ▶ Major structural corridor prospective for basement-style mineralisation.
- ▶ EM anomalism interpreted to extend for over 80 km with conductors as shallow as 20 m.
- ▶ What have we completed recently?
 - Maiden field programs, identifying 1.90% U₃O₈ Titus Prospect coincident with EM conductors.
 - Expanded project footprint by 89 km² covering extensions of EM conductors & additional ~20 x 5 km prospective corridor.
 - Engaged a Strategic Technical Advisor with >20 years Athabasca Basin expertise to help refine and strengthen targeting ahead of maiden drill program.

► Exploration upside rationale:

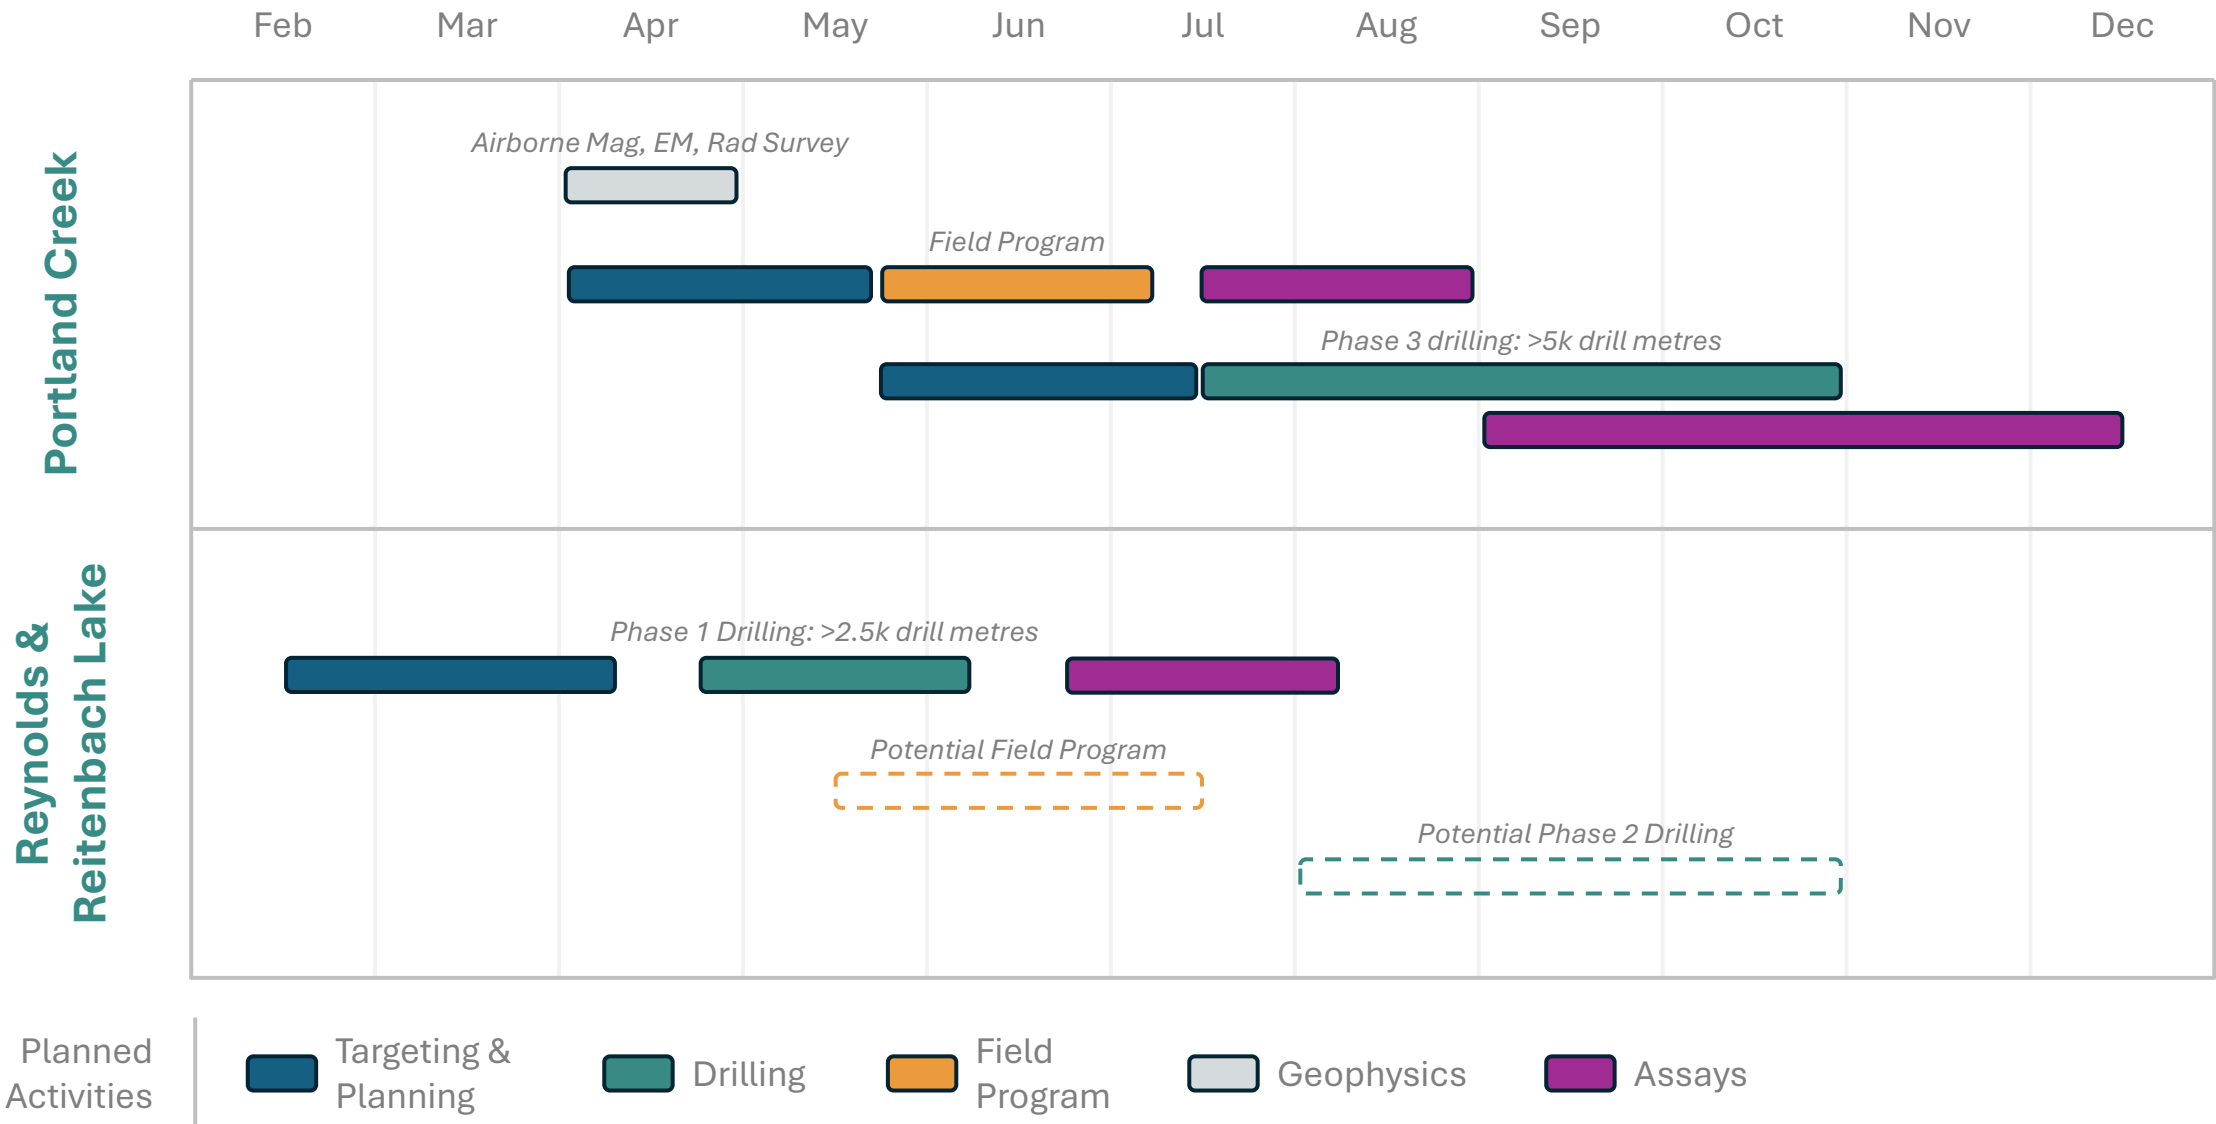

- EM conductors interpreted as shallow and steeply dipping graphitic horizons, potential traps for mineralisation.
- Multiple zones of uranium anomalism associated with EM conductors, structural features and magnetic anomalies.

► Plans at Reynolds and Reitenbach Lake for 2026:

- Receipt of final exploration permits, expected April 2026.
- Mobilise geological and drilling contractors to site, April / May 2026.
- Commence maiden drill program in Q2 CY2026, estimate >2.5k drill metres initially.
- Potential field program to ground-truth additional targets in Q2/Q3 CY2026.
- Potential Phase 2 drill program in Q3/Q4 CY2026.

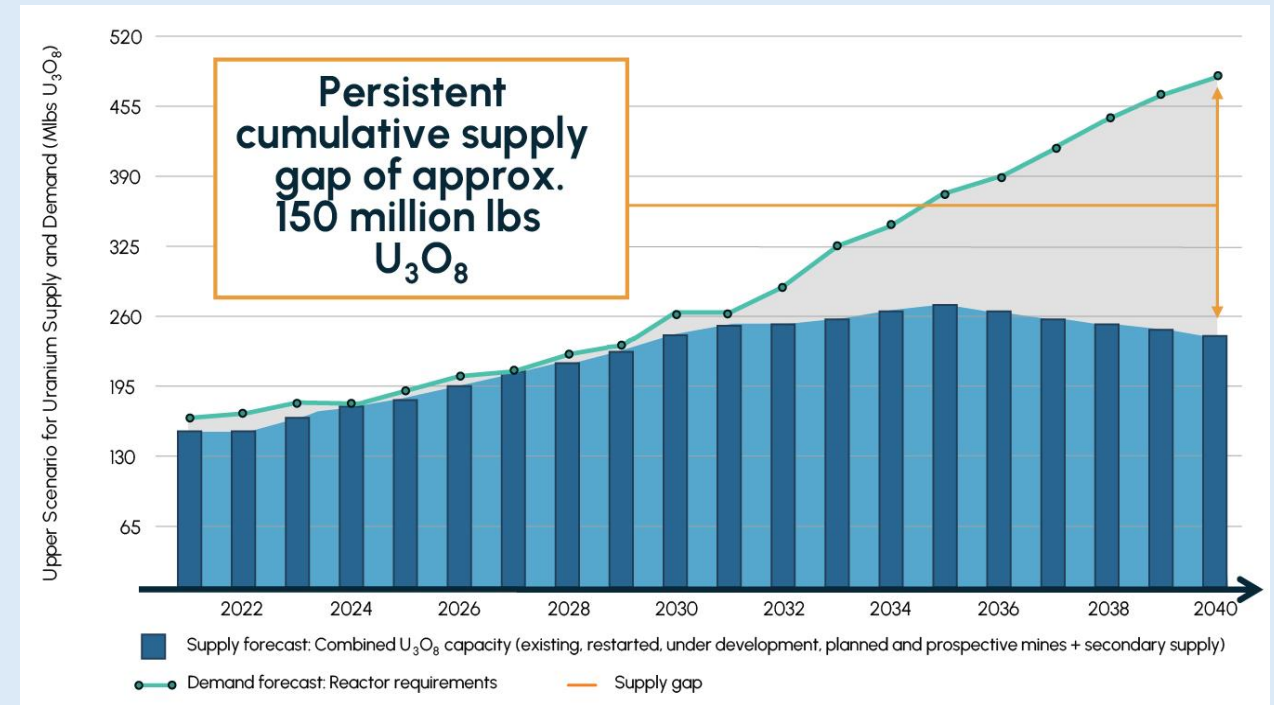

2026: A year of transformational growth and development at I88

Infini positioned for discovery, powered by demand

- ▶ U mineralisation confirmed at Portland Creek demonstrates district-scale potential as targeting continues to be refined.
- ▶ Scale and confluence of anomalism at Reynolds and Reitenbach Lake supportive of potential discovery at margins of Athabasca Basin.
- ▶ High-impact discovery potential with +2 drill campaigns planned for 2026.
- ▶ Supportive uranium market fundamentals underpin continued price upside.
