### Rock Phosphate – powder Powder (4 minus & 30 minus mesh)

Raw rock phosphate crushed to a powder form of various mesh sizes for direct application to fields using a custom applicator or lime spreader, or as a raw ingredient for blended fertilizer requirements.

### Rock Phosphate – micronized Micronized Powder (325 mesh)

Raw rock phosphate crushed to a micronized powder form for use in fertigation or drip irrigation. Create a suspension by adding citric acid and rock phosphate to water, agitating until dissolved.
