

## Features and Benefits

[Home \(https://canadianphosphate.com\)](https://canadianphosphate.com) > [Rock Phosphate Fertilizer \(https://canadianphosphate.com/fertilizer/\)](https://canadianphosphate.com/fertilizer/) > Features and Benefits

**Canadian Phosphate Limited has strategically acquired some of the highest quality rock phosphate deposits across North America in order to deliver the best quality to its customers.**

**01**

**Locally sourced and manufactured across North America**

**02**

**High Phosphorous Analysis**

More than 20% total  $P_2O_5$

Cost effective, reliable supply supporting local communities.

[High Analysis](#)

# 03

## **Organically certified**

For use in organic, regenerative, and conventional farming

[Sustainable, Regenerative and Organic Approved](#)

# 04

## **Extended Availability**

Provides consistent supply over entire crop cycle whilst building soil P<sub>2</sub>O<sub>5</sub> reserves for the following seasons.

[Functional on most crops and soils](#)

# 05

## **Naturally Present Minerals**

Calcium and Silica to improve crop health, moisture stress and plant defense against pests and disease.

[High Analysis](#)

# 06

## **Free of Soil Damaging Salts**

Salt index <7 versus chemical fertilizers which are >30. Seed safe.

[Safely Replenishes the Soil](#)

# 07

## **Better Soil Tilth and Health**

Enhanced microbial health and populations for feeding plants more effectively.

[Safely Replenishes the Soil](#)

# 08

## **Reduced Losses**

Significantly reduced leaching and run off into waterways due to extended release of nutrients.

[Sustainable, Regenerative and Organic Approved](#)

# 09

## **Competitive Pricing**

Locally mined, manufactured without the necessity for billion dollar facilities to 'beneficiate' the product.

# 10

## **Environmentally Sound**

95% efficiency use of rock phosphate as a natural resource compared with synthetically enhanced phosphates which have a 1:4 ratio of

Competitive Price

use – for every 4 tons of rock phosphate processed, only 1 ton is utilized while the remaining 3 tons end up as radioactive stockpiles across the countries of manufacturing.

Safely Replenishes the Soil
