

MARKET RELEASE

Date: 23 April 2026

NZX: GNE / ASX: GNE

[FY26 Q3 Performance Report and Updated Guidance](#)

Genesis Energy delivered a strong operating performance during the third quarter ended 31 March 2026 and continues to execute well against its Gen35 strategy. Strong operational performance was supported by above-average storage levels throughout the quarter. National lake levels are currently sitting at **117% of average** (as at 21 April 2026), providing strong momentum heading into Q4.

Q3 FY26 Performance highlights

- Hydro generation of **745 GWh, up 264 GWh on pcp**, supported by favourable hydrology and above-average storage levels through the quarter.
- Thermal generation of **236 GWh, down 716 GWh on pcp**, as Unit 5 remained largely offline due to market conditions and disciplined fuel management, with available gas redirected to higher-value industrial customers.
- Total customers of **491,532, down 6.6% on pcp**, reflecting ongoing portfolio optimisation as Genesis prioritises margin quality over volume.
- Electricity netback of **\$173/MWh, up 11.2% on pcp**, driven by improved pricing outcomes and a continued focus on margin quality, including portfolio optimisation and value-over-volume strategies.
- Total electricity sales of **1,380 GWh, down 94 GWh on pcp**, primarily reflecting lower customer numbers and a deliberate shift toward higher-value segments.
- The coal stockpile remains high at **>1 million tonnes**, with supply chains stable and replacement coal not currently impacted by export restrictions, supporting security of supply.
- Kupe production impacted by unplanned outages, with underlying performance otherwise in line with operator expectations.

Strategic progress

Genesis continues to make progress on its Gen35 strategy, including:

- Advancement of battery energy storage system (BESS) at Huntly, with Stage 1 nearing commissioning and Stage 2 reaching FID.
- Continued progress across the solar development pipeline, including construction commencement at Tihori (Edgecumbe) and further advancement at Leeston and Rangiriri.
- Tariki Gas Storage preliminary economic evaluation completed, with technical studies and joint venture discussions progressing.
- Progress on digital transformation programmes, including billing and CRM platform upgrades through release 2 and 3.

- Agreement with Natures Flame executed to validate project economics and support ongoing development of Biomass
- Ongoing development of customer flexibility and electrification initiatives, including growth in EV plan customers

These initiatives support Genesis' transition to a more flexible, lower-emissions generation portfolio while enhancing customer offerings.

Customer portfolio

During the quarter, Genesis completed the integration of Frank into the Genesis brand, consolidating its retail offering under a single brand and simplifying the customer proposition.

The reduction in customer numbers reflects Genesis' targeted rebalancing of supply and demand, with a continued focus on improving margin quality across the portfolio. This approach is beginning to unlock value through improved unit economics and more efficient allocation of energy resources.

Outlook and guidance

Genesis Energy has updated its FY26 normalised EBITDAF guidance to **\$515 million–\$545 million**, from **\$490 million–\$520 million**. All other FY26 guidance remains unchanged.

The guidance update is driven primarily by strong cost discipline, improved hydrology and more favourable wholesale market conditions, supporting reduced thermal generation and lower fuel and carbon costs.

This guidance remains subject to hydrological conditions, gas availability and pricing, plant reliability, and no material changes to market conditions.

About Genesis Energy:

Genesis Energy (NZX: GNE, ASX: GNE) is a diversified New Zealand energy company. Genesis sells electricity, reticulated natural gas and LPG and is one of New Zealand's largest energy retailers with approximately 500,000 customers. The Company generates electricity from a diverse portfolio of thermal and renewable generation assets located in different parts of the country. Genesis also has a 46% interest in the Kupe Joint Venture, which owns the Kupe Oil and Gas Field offshore of Taranaki, New Zealand. Genesis had revenue of NZ\$3.7 billion during the 12 months ended 30 June 2025. More information can be found at www.genesisenergy.co.nz

FY26 Q3 Performance Report

Disclaimer

This report has been prepared by Genesis Energy Limited (“Genesis Energy”) or (“the Company”) for information purposes only and relates to the operational performance of the Company for the third quarter of the financial year ending 30 June 2026. The information contained in this report is unaudited.

This disclaimer applies to this report. For these purposes, “report” means this document and the information contained within it, as well as the verbal or written comments of any person presenting it.

This report is of a general nature and does not purport to be complete nor does it contain all the information required for an investor to evaluate an investment.

This report might contain forward-looking statements. Forward-looking statements could include projections and may include statements regarding Genesis Energy’s intent, belief or current expectations in connection with its future operating or financial performance or market conditions. Forward-looking statements in this report may also include statements regarding the timetable, conduct and outcome of the general strategy of Genesis Energy, statements about the plans, targets, objectives and strategies of Genesis Energy, statements about the industry and the markets in which Genesis Energy operates and statements about the future performance of, and outlook for, Genesis Energy’s business.

Any indications of, or guidance or outlook on, future earnings or financial position or performance and future distributions are also forward-looking statements.

Forward-looking statements in this report are not guarantees or predictions of future performance, are based on current expectations and involve risks, uncertainties, assumptions, contingencies and other factors, many of which are outside Genesis Energy’s control, are difficult to predict, and which may cause the actual results or performance of Genesis Energy to be materially different from any future results or performance expressed or implied by such forward-looking statements. This risk of inaccuracies may be heightened in relation to forward-looking statements that relate to longer timeframes, as such statements may incorporate a greater number of assumptions and estimates. Genesis Energy gives no warranty or representation in relation to any forward-looking statement, its future financial performance or any future matter. Forward-looking statements speak only as of the date of this report.

Forward-looking statements can generally be identified by the use of words such as “approximate”, “project”, “foresee”, “plan”, “target”, “seek”, “expect”, “aim”, “intend”, “anticipate”, “believe”, “estimate”, “may”, “should”, “will”, “objective”, “assume”, “guidance”, “outlook” or similar expressions.

Genesis Energy is subject to disclosure obligations under the NZX Listing Rules that requires it to notify certain material

information to NZX for the purpose of that information being made available to participants in the market. This report should be read in conjunction with Genesis Energy’s periodic and continuous disclosure announcements released to NZX, which are available at www.nzx.com.

While all reasonable care has been taken in compiling this report, to the maximum extent permitted by law, Genesis Energy accepts no responsibility for any errors or omissions, and no representation is made as to the accuracy, completeness or reliability of the information, in this report. This report does not constitute financial, legal, financial, investment, tax or any other advice or a recommendation and nothing in this report should be construed as an invitation for any subscription for, or purchase of, securities in Genesis Energy.

All references to “\$” are to New Zealand dollars, unless otherwise stated.

Except as required by law, or the rules of any relevant securities exchange or listing authority, Genesis Energy is not under any obligation to update this report at any time after its release, whether as a result of new information, future events or otherwise.

Performance Highlights

Retail

Total Electricity Sales

1,380 GWh

94 GWh decrease on pcp¹

Total Customers⁴

491,532

6.6% decrease on pcp

Electricity Netback

\$173/MWh

11.2% increase on pcp

Wholesale

Hydro Generation

745 GWh

264 GWh increase on pcp

PPA Electricity Generation³

264 GWh

35 GWh increase on pcp

Thermal Generation

236 GWh

716 GWh decrease on pcp

Kupe²

Kupe Gas Sales

1.1PJ

0.6 PJ decrease on pcp

Kupe LPG Sales

5.1kt

2.2 kt decrease on pcp

Oil Production

23 kbbl

36% decrease on pcp

1. PCP refers to Q3 FY25 unless otherwise stated.

2. Represents Genesis' 46% share of Kupe JV volumes.

3. Includes JV and third party PPAs

4. In line with strategic focus on margin quality and targeted rebalancing of supply and demand is starting to unlock value. We have moved to one brand under Genesis, with the amalgamation of Frank and Ecotricity's product ranges

Gen35: Progress

Billing & CRM Re-platform

- ✓ Release 2 mass market on track, with residential migrations beginning in Q2 FY27
- ✓ Release 3 C&I on track, with contract finalisation underway with the preferred platform vendor
- ✓ Completed integration of Frank into Genesis, with customer number movements in line with expectations.

Customer Flexibility

- ✓ Peak flex maintained at 56MW
- ✓ EV Flex product - build underway

Electrification of Transport

- ✓ EV Plan customers have grown 42% vs pcp
- ✓ ChargeNet secured NIFF funding to support accelerated public charging rollout
- ✓ EV registrations more than doubled in the last quarter vs Q2 FY26

Onshore Wind

- ✓ Castle Hill Wind selection of preferred transmission route underway.

Offshore Wind

- ✓ MoU with Taranaki Offshore Partners operationalised.

Solar

- ✓ Tihori (formerly Edgecumbe) solar farm construction commenced
- ✓ Leeston solar farm progressing on track toward target FID
- ✓ Rangiriri solar farm pre-FID phase commenced
- ✓ Foxton Solar Farm application to Fast Track panel accepted

BESS

- ✓ Huntly Stage 1 equipment installation complete; commissioning approaching and on track
- ✓ Huntly Stage 2 has reached FID

Gas

- ✓ Market conditions supported Unit 5 remaining offline into Q3; gas redirected to industrial customers
- ✓ Tariki Gas Storage preliminary economic evaluation complete; advancing technical studies and negotiations with the Tariki JV

Biomass

- ✓ Agreement with Natures Flame signed to validate economics and progress project development

On track to deliver digital Investment “Big Rock” initiatives within the \$145m¹ envelope:

✓ Retail Billing & CRM modernisation

✓ Finance Management System replacement

✓ Wholesale & Markets Trading systems upgrades

Notes: (1) Phasing of project spend between FY26/FY27 years is evolving in line with different phases of delivery; \$145m excludes ~\$15m annualised spend for on-going digital programme; \$145m is subject to SaaS accounting conventions & is gross of any costs deferred to prepayments

Development Pipeline & Progress

Project	Capacity / Duration	Status	Total Project Capex ¹	Commentary
Operational	63 MW_p		\$104m	
Lauriston solar farm	63 MW _p	Operating	\$104m ²	Operational
Committed growth capex	236 MW		\$371m	
★ Huntly BESS stage 1	100 MW / 200 MWh	Under construction	\$135m	COD Q1 FY27 / under budget
Tihori ³ solar farm ⁴	136 MW _p	FID delivered	\$236m	On track / on budget
★ Huntly BESS stage 2	100 MW / 200 MWh	FID delivered	\$106m	FID – Apr 2026
Progressed growth opportunities	438 MW		\$670 – 730m	
Leeston solar farm ⁴	67 MW _p	Consented ⁵	\$100 – 120m	On track – FID expected Q4 FY26
Rangiriri solar farm ⁴	271 MW _p	Consented ⁶	\$470 – 490m	On track – FID expected H2 FY27
Discretionary growth opportunities – firming⁷	50 – 100 MW		\$250 – 400m	
★ Gas storage	N/A	Under active review		Discussions ongoing
★ Biomass	N/A	Under active review		Discussions ongoing
★ Huntly unit 7 peaker	~50 – 100 MW	Under review		No further update
Discretionary growth opportunities – renewables	720 MW+		\$1.1 – 1.2bn	
Foxton solar farm ⁴	220 MW _p	Fast-track consenting		On track
Castle Hill wind farm	300 MW	Consented		No further update
Early-stage wind prospects	~200 MW	Early-stage prospecting		No further update
Early-stage hydro enhancement	N/A	Early-stage prospecting		No further update
Joint Equity / PPAs	~1,000 MW			
Yinson wind partnership	~1,000 MW	Early-stage equity options		No further update

★ Projects that directly address New Zealand's need for additional firming capacity

Notes: (1) Capex estimate now extended to FY32 (2) Project financed with ~\$13m equity funding by Genesis; (3) Formerly known as Edgecumbe; (4) Genesis is targeting 500 MW of solar opportunities; (5) Core solar farm consents in place; consents for substation extension to be acquired; (6) Stages 1 & 2 (collectively 228 MWp) are consented. Consents are still to be acquired for Stage 3 (43 MWp); (7) Excludes 300 MW of additional BESS options

Operational Update

Q3 Performance:

- Hydro Generation of 745 GWh (+55% vs pcp)
- Genesis lake levels decreased from 122% of average at 31 December to 109% of average at 31 March

Planned outage campaigns in progress, including:

- Kaitawa G6 penstock recoating & main inlet valve refurbishment
- Rangipo G6 overhaul – turbine, governor, main inlet valve
- Piripaua G5 external penstock coating

Huntly planned outage campaigns in progress, including:

- Unit 2 Cold Survey

Coal

- Stockpile remains high at >1 million tonnes
- Replacement supplies currently not impacted by any export restrictions. We are working closely with our suppliers to minimise impacts if conditions change
- Arranging a trial burn of Australian coal as an alternative to Indonesian supply and to improve ash specification

Generation

- Thermal generation of 236 GWh (-75% vs pcp)
- Market conditions and disciplined gas management allowed U5 to remain off for most of the quarter, generating 40 GWh (-92% v pcp)

LPG:

Two new LPG depots progressing:

- **Drury:** On track, with commissioning continues and operational handover expected Q4 FY26
- **Dunedin:** Focus on detailed design and operational requirements continues
- A new LPG bobtail tanker is now operating in Christchurch, increasing the fleet to seven
- LPG fuel supply chains remain in place, with no impact on volumes or delivery schedule. Prices are internationally exposed and may be impacted by geopolitical events.
- Total LPG Retail Sales YTD 30kt

Kupe JV:

- Two plant outages in Jan/Feb totalling 16 days.
- Excluding plant outages production has been in line with operator forecast
- Continue to work with the Operator on asset optimisation

Kupe Gas Sales Volume (Genesis Share, PJ)

Kupe Oil Production Volume (Genesis Share, kbbl)

Brent Crude Oil Spot Price (USD/bbl)

Glossary – Performance

Electricity	
Retail Resi Electricity	Sales of electricity to residential customers
Retail SME Electricity	Sales of electricity to small business customers
Retail C&I Electricity	Sales of electricity to commercial and industrial customers
Ecotricity Electricity	Sales of electricity to Ecotricity customers
Wholesale Electricity Sales	Sale of generated electricity and residential rooftop solar onto the spot market, excluding PPA settlements and ancillary revenue
Total Derivative Settlements	Net settlement of electricity derivatives including PPAs, hedges, options, market making obligations and discretionary trading
Generation Costs - Total	Direct generation costs, inclusive of fuels and carbon
Retail Purchases	Purchases of electricity on spot market for retail customers
Transmission and Distribution Costs	Total electricity transmission and distribution costs, connection charges, electricity market levies and meter leasing
Gas	
Retail Resi Gas	Sales of gas to residential customers
Retail SME Gas	Sales of gas to small business customers
Retail C&I Gas	Sales of gas to commercial and industrial customers
Wholesale Sales	Sales of gas to wholesale customers
Cost of Gas	Purchase of gas for sale (excludes gas used in electricity generation)
Transmission and Distribution Costs	Total gas transmission and distribution costs, gas levies and meter leasing
LPG	
Bottled LPG Sales	Represents 45kg LPG bottle sales
SME & Other Bulk LPG sales	Represents SME and other bulk and third party distributors
Wholesale LPG Sales	Sales of LPG to wholesale customers
LPG Cost	Purchase of LPG for sale
Kupe	
Oil Sales	Sale of crude oil
Gas Sales	Sale of gas
LPG Sales	Sale of LPG

Glossary – Operational metrics

Wholesale	
Electricity CFD Purchases – Wholesale (GWh)	Settlement volumes of generation hedge purchases, including exchange traded and OTC contracts. Excludes PPAs, active trading, Financial Transmissions Rights (FTRs) and Cap/Collar/Floor contracts
Electricity CFD Purchase Price – Wholesale (\$/MWh)	Average price paid for Electricity Financial Contract Purchases – Wholesale
Electricity CFD Sales – Wholesale (GWh)	Settlement volumes of generation hedge sales, including exchange traded and OTC contracts. Excludes PPAs, active trading, Financial Transmissions Rights (FTRs) and Cap/Collar/Floor contracts
Electricity CFD Sale Price – Wholesale (\$/MWh)	Average price paid for Electricity Financial Contract Sales – Wholesale
Generation Emissions	Carbon emissions due to coal and gas electricity generation
Generation Carbon Intensity (tCO ₂ /GWh)	Carbon emissions (tCO ₂) produced per unit of total electricity generated (GWh)
Rankine Output	Electricity generated in the Huntly Rankine units
Rankine's Fuelled by Coal (%)	The proportion of coal used in the Rankine units
Total Gas Purchases (PJ)	Total gas purchases
Total Coal Purchases (PJ)	Coal purchases have been converted from tonnes to PJ using the shipments' Calorific Value
Gas Used In Internal Generation (PJ)	Gas consumed in electricity generation
Weighted Average Gas Burn Cost (\$/GJ)	Total cost of gas burnt divided by generation from gas fired generation, excluding emissions
Coal Used In Internal Generation (PJ)	Results may be revised to reflect changes in coal kilo tonnes to PJ conversion rate and volume methodology.
Weighted Average Coal Burn Cost (\$/GJ)	Total cost of coal burnt divided by generation from coal fired generation, excluding emissions
Operational Coal Stockpile – closing balance (kt)	The coal stockpile closing balance in tonnes at Huntly Power Station, less the Security Products Stockpile.
Security Products Stockpile – closing balance (kt)	Refers to Huntly Firming Option (HFO) and Market Security Options (MSO). Stored energy refers to virtual stockpile volumes ordered by counterparties and is expressed in kilotonnes of coal equivalents as at period end.
Power purchase agreements	
Electricity (GWh)	Energy purchased through long term agreements with generator
Average Price Received for Generation - GWAP (\$/MWh)	Price received at production node
Corporate	
Total Recordable Injuries	12-month rolling Total Recordable Injuries including Lost Time Injuries, Restrictive Work Injuries and Medical Treatment Injuries
Employees FTE	Number of full-time equivalent employees, excluding those on parental leave or a career break
Contractors FTE	Number of full-time equivalent contractors, excluding statement of work contractors.
Core FTE	Total number of full-time equivalent employees, excluding employees working on time-bound digital projects.
Digital FTE	Total number of full-time equivalent employees working on time-bound digital projects, based on hours worked.
Total FTE	Total number of full-time equivalent employees, including contractors, excluding employees on parental leave or a career break
Kupe	
Oil Production	Production of crude oil
Oil Price realised (USD/bbl.)	The underlying benchmark crude oil price that is used to set the price for crude oil sales
LPG Production Yield (T/TJ)	Tonnes of LPG produced relative to each TJ of gas produced
LPG Production	Production of LPG

Glossary – Operational metrics

Retail	
Brand Net Promoter Score – Genesis Energy	Based on survey question “How likely would you be to recommend Genesis to your friends or family?” Calculated on 3 month rolling basis.
Interaction Net Promoter Score - Genesis	Based on survey question “Based on your recent interaction with Genesis, how likely would you be to recommend Genesis to your family/friends?” Calculated on 3 month rolling basis.
Customers	Electricity and gas and LPG customers are defined by single customer view, regardless of number of connections (ICP’s)
ICP	Installation Connection Point, a connection point that is both occupied and has not been disconnected (Active-Occupied)
Gross Customer Churn	Defined as residential customers instigating a trader switch or home move
Net Customer Churn	Defined as percentage of residential customers that finalise in a period.
Resi, SME, C&I	Residential, small and medium enterprises and commercial & industrial customers
Netback (\$/MWh, \$/GJ, \$/tonne)	Customer EBITDAF by fuel type plus respective fuel purchase cost divided by total fuel sales volumes, stated in native fuel units (excluding corporate allocation costs and Technology & Digital cost centre)
