MB GOLD

Drilling commenced at Marble Bar Gold Project

Key Highlights

- **Reverse Circulation (RC) drill program has now started at the highly prospective Marble Bar Gold Project**
- **Initial ~6,000m program targeting high-priority Twin Veins and Douglas Find prospects**
- **Program designed to build upon compelling historical intercepts and advance understanding of gold mineralisation**

MB Gold Limited (**ASX | MBG**), "**MB Gold**" or the "**Company**") is pleased to announce its ~6,000-metre Reverse Circulation (RC) drill program has now commenced at the Company's highly prospective Marble Bar Gold Project in the Pilbara region of Western Australia.

The RC program will primarily focus on the high-priority Twin Veins and Douglas Find prospects. These areas are strategically located within a structurally complex zone surrounding a granite intrusive on the northwest margin of the Mt Edgar Batholith and are key to unlocking the project's significant gold potential.

Logan Barber, CEO of MB Gold, commented: "The commencement of drilling marks a pivotal moment for MB Gold. We are genuinely excited to have a drill rig turning on site at Marble Bar, following detailed preparatory work designed to build on compelling historical intercepts at Twin Veins and Douglas Find."

This program is a critical step in MB Gold's strategy to drive discovery and resource delineation within its Marble Bar tenements.

The Company expects the program to take 6-7 weeks to complete, with initial results expected to be available in June/July.

About MB Gold Limited:

MB Gold Limited is focused on gold exploration in the highly prospective Marble Bar region of Western Australia. The Marble Bar Gold Project (MBGP) is strategically located northeast of Marble Bar, within the Archean Pilbara Craton. The package spans the northwest margin of the Mt Edgar Batholith, a geologically significant zone with high potential for gold mineralization. The project boasts a 12km strike length of gold-in-soil geochemical anomalies, which are offset by late-stage faulting. Existing drill intercepts have already returned positive gold results.

MB Gold benefits from excellent infrastructure and accessibility adjacent to and into the project area. The site is just 150km from Port Hedland via the sealed Marble Bar Road, 40km from the Marble Bar townsite, and 60km from AIM Mining Corporation's Warrawoona Operations.
