

23 April 2026 – Toronto, Canada

24 April 2026 – Perth, Western Australia

March 2026 Quarterly Report

More strong gold and copper drilling results at Golden Eye

Successful A\$25m capital raise completed; Drilling to test new targets as part of the ongoing strategy to grow and upgrade the resource and drive the Chibougamau Project towards development

Highlights

Capital Raising

- Capital raising totalling A\$25 million via a share Placement to institutional and sophisticated investors was completed at a price of A\$0.16 per share, representing a 5.9% discount to the last sale price of A\$0.17 per share
- Strategic investor Ocean Partners, the Company's second-largest shareholder prior to this raising, strongly supported the Placement, reflecting its belief in the value of the Chibougamau Copper-Gold Project and its insights into global copper supply
- Funds from the Placement will be used for resource growth, resource conversion, exploration of multiple prospects including Joe Mann and Gwillim, ongoing permitting work, study completion, some early works at the milling infrastructure and working capital

Chibougamau Copper-Gold Project

- The main exploration focus for the first quarter was Golden Eye with drilling completed from an engineered ice platform with 3 rigs (see Figure 1 on page 3); The program totalled 5,632m
- Post quarter-end, drilling at Golden Eye returned high-grade intervals which reconcile well against the block model. These results¹ include:
 - 5.9m at 28.8g/t AuEq (24.8g/t Au, 2.7% Cu & 31.5g/t Ag) (LDR-26-12A);
 - Including 1.0m at 105.5g/t AuEq (102.9g/t Au, 1.4% Cu & 53.0g/t Ag)
 - 7.7m at 4.0g/t AuEq (2.7g/t Au, 0.8% Cu & 8.2g/t Ag) (LDR-26-12A);
 - 11.5m at 4.3g/t AuEq (2.5g/t Au, 1.1% Cu & 26.1g/t Ag) (LDR-26-13); and
 - Including 0.8m at 31.2g/t AuEq (13.3g/t Au, 11.9% Cu & 141.8g/t Ag)
 - 6.7m at 5.9g/t AuEq (4.4g/t Au, 1.0% Cu & 9g/t Ag) (LDR-26-14)
 - Including 2.0m at 13.8g/t AuEq (10.3g/t Au, 2.4% Cu & 21.0g/t Ag)
- Cygnus has identified two gold prospects (Gwillim and Joe Mann) with known gold mineralisation and plans an exploration campaign for Q2 (following standard permitting) as part of its push to continue growing the Chibougamau Project resource base

- The **Gwillim** prospect, located just 12km from the Chibougamau processing facility, has returned several high-grade gold intersections which require follow up drilling. These intersections² include:
 - 7.6m @ 38.1g/t Au from 314.9m (87-KOD-18);
 - 15.2m @ 9.4g/t Au from 155.1m (87-KOD-1); and
 - 16.4m @ 8.3g/t Au from 168.3m (87-KOD-10)
- The **Joe Mann** prospect is a historic high-grade gold mine which produced 1.2Moz @ 8.3g/t Au.³ The project has an Inferred Resource⁴ of 0.7Mt at 6.0g/t Au for 143koz but significant regional potential remains near surface with historical intersections² of:
 - 0.7m @ 480.2g/t Au from 92.3m (H-118);
 - 3.8m @ 20.8g/t Au from 287.2m (H-214); and
 - 8.4m @ 6.3g/t Au from 175.6m (H-374)
- Joe Mann is ideally located in the middle of gold-rich ground that recently led to IAMGOLD's acquisition of Northern Superior Resources for C\$267.4M
- Cygnus continues to identify drill targets through the ongoing review of historical data and drill logs using Cygnus' innovative custom-built AI solution
- Work is ongoing to incorporate the current Mineral Resource Estimate into an updated scoping study which will also reflect higher metal prices

James Bay Lithium

- With an improvement in lithium prices, the Company has seen new in-bound interest in its well-located James Bay lithium project; This includes Pontax, which currently hosts Inferred Mineral Resources of 10.1Mt at 1.04% Li₂O reported in accordance with the JORC Code⁵
- While the principal focus is the Chibougamau Copper Gold Project, Cygnus will investigate options, when and if they arise, to drive value that it believes is currently not represented in the Company's valuation for its lithium portfolio

Corporate

- The Company ended the quarter well-funded with A\$33.3m in cash and liquid investments.

Cygnus Executive Chairman David Southam said: "The March quarter was very successful for Cygnus as we implemented our twin strategies of growth through exploration and advancement of the project.

"The capital raising was completed at a tight discount in volatile markets. The raising, which was strongly endorsed by our cornerstone shareholder, Ocean Partners, has set us up to continue our path to significant growth from a well-funded position.

"Drilling centred around Golden Eye, with three rigs working at peak capacity. This culminated in some very strong assays shortly after the end of the quarter. These included high-grade gold, copper and silver intervals over 100g/t AuEq over 1m. With these results reconciling well vis à vis the resource model, we are looking forward to potentially upgrading more Inferred resources into the Indicated category".

Cygnus Metals Limited (ASX: CY5; TSXV: CYG; OTCQB: CYGGF) (“Cygnus” or the “Company”) is pleased to report on its activities during the March 2026 quarter. Exploration progressed across multiple fronts at several projects with a focus on both resource extensions and discovery (Figure 3).

CHIBOUGAMAU COPPER-GOLD PROJECT

Golden Eye

At Golden Eye, drilling over the quarter targeted both resource conversion and extension, with the aim of expanding the current Mineral Resource. In total 15 holes have been drilled for 5,632m.

The recently released results are from infill drilling and include significant high-grade intersections of up to 105.5g/t AuEq over 1.0m (Figure 2).¹ These high-grade gold intercepts are complemented by impressive copper grades of up to 11.9% over 0.8m, plus silver grades of up to 142g/t over 0.8m. Significant results¹ include:

- **5.9m at 28.8g/t AuEq (24.8g/t Au, 2.7% Cu & 31.5g/t Ag) (LDR-26-12A);**
 - **Including 1.0m at 105.5g/t AuEq (102.9g/t Au, 1.4% Cu & 53.0g/t Ag)**
- **7.7m at 4.0g/t AuEq (2.7g/t Au, 0.8% Cu & 8.2g/t Ag) (LDR-26-12A);**
- **11.5m at 4.3g/t AuEq (2.5g/t Au, 1.1% Cu & 26.1g/t Ag) (LDR-26-13); and**
 - **Including 0.8m at 31.2g/t AuEq (13.3g/t Au, 11.9% Cu & 141.8g/t Ag)**
- **6.7m at 5.9g/t AuEq (4.4g/t Au, 1.0% Cu & 9g/t Ag) (LDR-26-14)**
 - **Including 2.0m at 13.8g/t AuEq (10.3g/t Au, 2.4% Cu & 21.0g/t Ag)**

The infill drilling reconciles well against the block model and further confirms the strong continuity of the gold mineralisation to a 50m spacing. Results from the recent drilling will be used to update the Mineral Resource and convert more resources to the Indicated category. The Golden Eye Mineral Resource currently contains **0.5Mt at 5.6g/t AuEq** for 91koz AuEq (Indicated) and **1.2Mt at 4.6g/t AuEq** for 182koz AuEq (Inferred).⁴

The drill program at Golden Eye has now concluded, although two rigs are expected to continue drilling over the next quarter at other targets in the project portfolio. The strategy remains focussed on resource growth and resource conversion to drive the Chibougamau Project forward towards development and deliver maximum returns to shareholders.

Figure 1: Three drill rigs completing the Golden Eye resource conversion program on the engineered ice pad (March 2026).

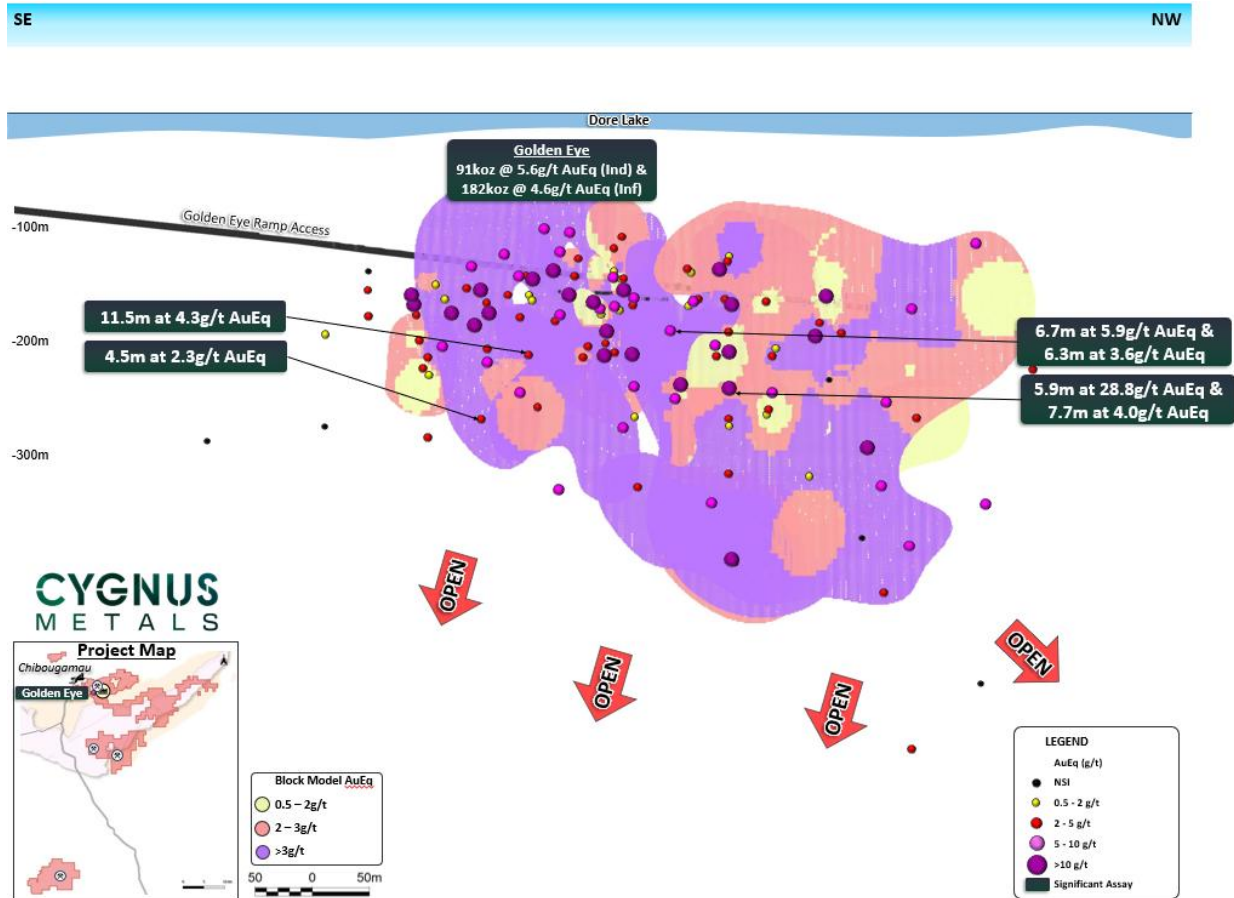

Figure 2: Golden Eye resource with recent infill results of up to 5.9m @ 28.8g/t AuEq.¹

Gwillim and Joe Mann

The Company also has a strong focus on defining new resources and making discoveries. Two key areas identified as high priority are gold targets Joe Mann and Gwillim. Data compilation in these areas has highlighted significant potential with follow-up work planned to test the historic mineralisation utilising drilling and new geophysics.

At Joe Mann, the Company has commenced a detailed Induced Polarisation (“IP”) survey along major regional structures to identify walk-up drill targets for Q2 this year (Figure 4). Cygnus is targeting analogous gold mineralisation to IAMGOLD’s Nelligan Complex, which is located just 10km west of the project and contains 4.3Moz Au (M&I) and 7.5Moz Au (Inferred).⁴

This IP survey will help to generate further drill targets in addition to some of the high-grade historic gold intersections which also require follow up.¹ These include:

- **0.7m @ 480.2g/t Au from 92.3m (H-118)**
- **3.8m @ 20.8g/t Au from 287.2m (H-214)**
- **8.4m @ 6.3g/t Au from 175.6m (H-374)**

At Gwillim, permits are underway for drilling to commence in the current quarter. Drilling at Gwillim will be co-funded by 50% JV partner Alamos Gold, which has a market capitalisation of ~C\$25B. Gwillim is just 12km from the Chibougamau processing facility and has high potential for defining new resources. Initial drilling will focus on following up high-grade historic gold intersections¹ such as:

- **7.6m @ 38.1g/t Au from 314.9m (87-KOD-18)**
- **15.2m @ 9.4g/t Au from 155.1m (87-KOD-1)**
- **16.4m @ 8.3g/t Au from 168.3m (87-KOD-10)**

The Chibougamau area has well-established infrastructure, giving the Project a significant headstart as a copper-gold development opportunity. This infrastructure includes a 900,000tpa processing facility, local mining town, sealed highway, airport, regional rail infrastructure and 25kV hydro power to the processing site. Significantly, the Chibougamau processing facility is the only processing facility within a 250km radius.

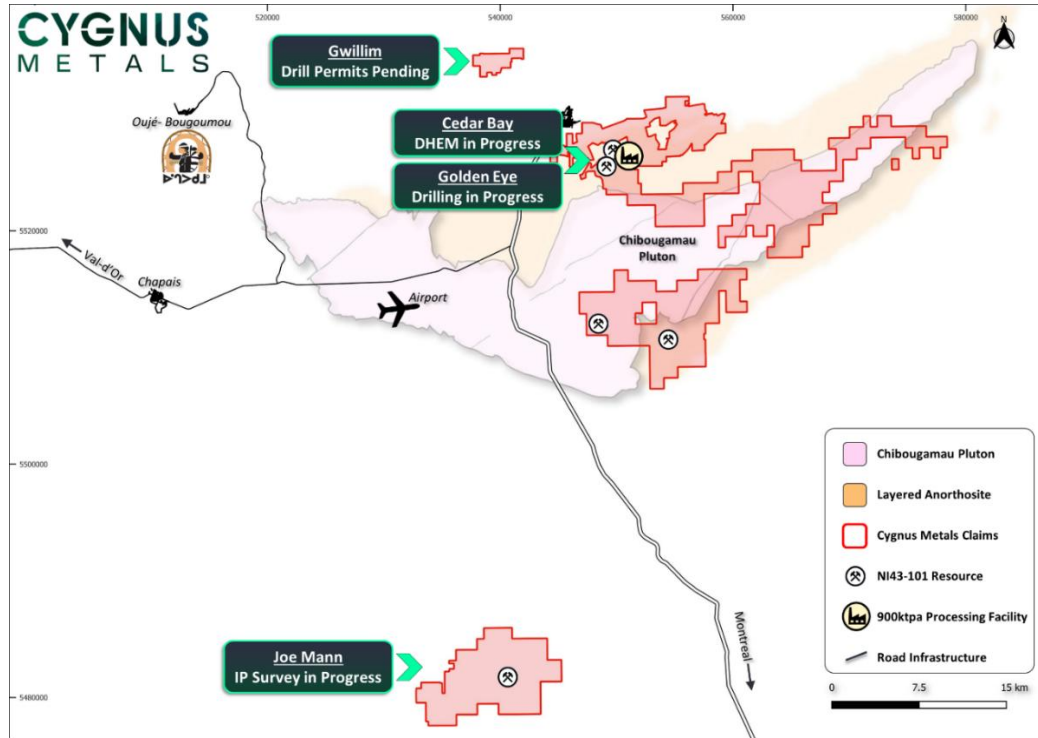

Figure 3: Exploration progressing across multiple fronts with a focus on both resource extensions and discovery.

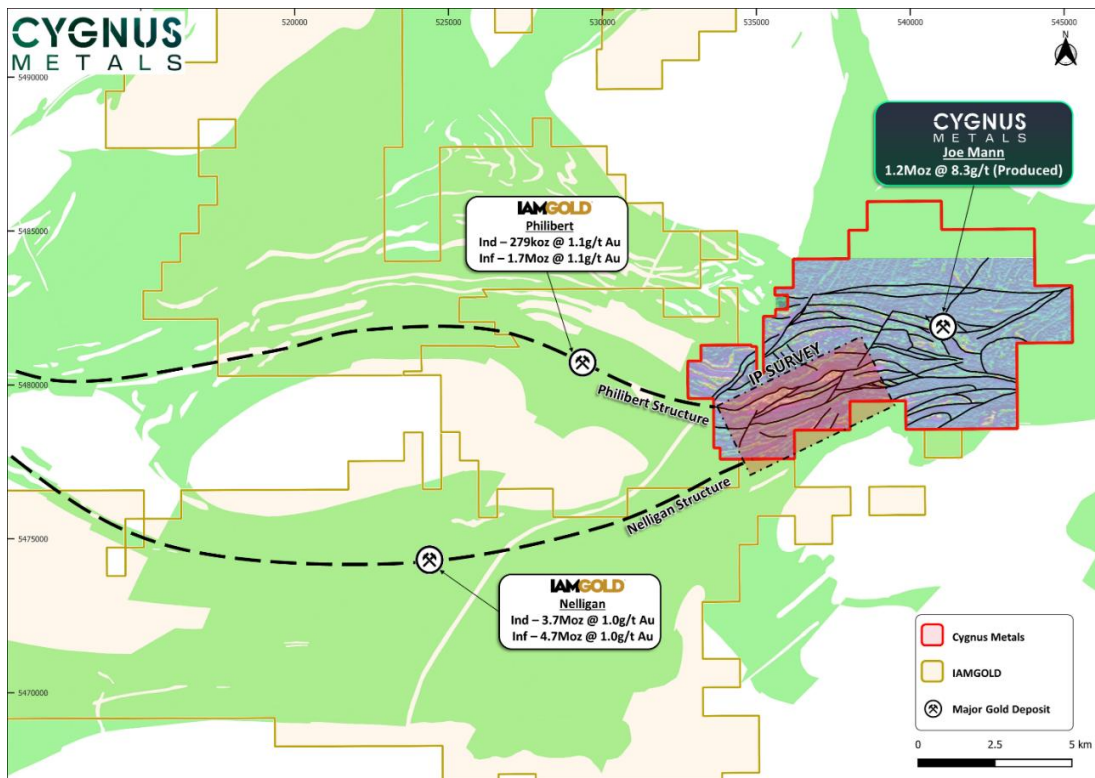

Figure 4: Joe Mann IP survey covering key regional structures from nearby IAMGOLD's major deposits Nelligan and Philibert.⁷

Scoping Study/ Preliminary Economic Assessment

With the MRE update resulting in a 78% increase in the Measured and Indicated Mineral Resources, the Company also sees significant value in continuing to advance the Project with an updated Scoping Study / PEA (Doré Copper had previously completed a PEA in 2022).⁶ The updated Scoping Study / PEA is in progress. Pending on the Golden Eye drilling results and potential changes to the quantum of Indicated resources, the materiality of Golden Eye in an updated PEA may increase. Accordingly, further optimisation may be required in the Scoping Study / PEA given the close proximity of Golden Eye to the milling infrastructure.

Community

During the quarter, Cygnus continued to actively support First Nations and community activities. This included participation in various positive meetings with First Nations and community representatives as part of the drilling and environmental permitting process and regarding the Company’s 2026 exploration plans.

Figure 5: Sponsorship of local Ouje Bougoumau Snow Mobile Challenge.

Environment Social Impact Assessment

Studies and field works at the Corner Bay and Devlin areas were completed to provide further baseline characterisation of hydrology, hydrogeology and soil conditions was completed in Q3 2025. The analysis of the sampled materials and collected information was in progress in Q4 2025. A Spring Q2 2026 field sampling program is planned for at Copper Rand and Golden Eye. These activities are required to understand the baseline conditions and are a requirement of the Quebec government Environmental Social Impact Assessment (“ESIA”).

JAMES BAY PROJECTS

There were no substantive exploration activities undertaken on the Company's Auclair, Pontax and Sakami Lithium Projects during the first quarter.

AUSTRALIAN PROJECTS

There were no substantive exploration activities undertaken on the Company's tenements in Western Australia during the first quarter.

CORPORATE

Cash Position and Movements

As quarter end, Cygnus held A\$31.8 million in cash and cash equivalents (31 December 2025: A\$13.4 million). Refer to Appendix B of this release for the financial analysis of selected items within the Appendix 5B.

Listed Investments

The Company has 1,650,000 TSXV listed shares in joint venture partner Stria Lithium Inc ("Stria") which represents approximately 4% of the total issued capital in Stria.

As at 31 March 2026, the value of the investment (based on a closing price of C\$0.84 per Stria share) was approximately A\$1.45 million.

This announcement has been authorised for release by the Board of Directors of Cygnus.

ABOUT CYGNUS METALS

Cygnus Metals Limited (ASX: CY5, TSXV: CYG) is a diversified critical minerals exploration and development company with projects in Quebec, Canada and Western Australia. The Company is dedicated to advancing its Chibougamau Copper-Gold Project in Quebec with an aggressive exploration program to drive resource growth and develop a hub-and-spoke operation model with its centralised processing facility. In addition, Cygnus has quality lithium assets with significant exploration upside in the world-class James Bay district in Quebec, and REE and base metal projects in Western Australia. The Cygnus team has a proven track record of turning exploration success into production enterprises and creating shareholder value.

FORWARD LOOKING STATEMENTS

This release may contain certain forward-looking statements and projections regarding estimated, resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives. Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond Cygnus' control. Cygnus makes no representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projections based on new information, future events or otherwise except to the extent required by applicable laws. While the information contained in this release has been prepared in good faith, neither Cygnus or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this release. Accordingly, to the maximum extent permitted by law, none of Cygnus, its directors, employees or agents, advisers, nor any other person accepts any liability whether direct or indirect, express or limited, contractual, tortious, statutory or otherwise, in respect of the accuracy or completeness of the information or for any of the opinions contained in this release or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this release.

COMPETENT PERSON AND COMPLIANCE STATEMENTS

The scientific and technical information in this news release has been reviewed and approved by Mr Louis Beaupre, the Quebec Exploration Manager of Cygnus, a “qualified person” as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects.

The information in this release that relates to the Mineral Resource Estimate for the Chibougamau Project reported in accordance with the JORC Code 2012 and NI 43-101 was released by Cygnus in an announcement titled ‘Major Resource Update’ released to the ASX on 17 September 2025. Details of the Mineral Resource Estimate are included in Table 1.

The information in this announcement that relates to previously reported Exploration Results at the Company’s projects have been previously released by Cygnus Metals in ASX Announcements as noted in the text and End Notes.

Individual grades for the metals included in the metal equivalents calculations for the Mineral Resource Estimate, as well as the price assumptions, metallurgical recoveries and metal equivalent calculations themselves, are in Appendix B of this release. Individual grades for the metals included in the metal equivalents calculation for the exploration results are in the original market announcements. Metal equivalents for exploration results have been calculated at a copper price of US\$8,750/t, gold price of US\$2,350/oz and silver price of US\$25/oz, with copper equivalents calculated based on the formula $CuEq(\%) = Cu(\%) + (Au(g/t) \times 0.77258) + (Ag(g/t) \times 0.00822)$. Metallurgical recovery factors have been applied to the copper equivalents calculations for the exploration results, with copper metallurgical recovery assumed at 95% and gold metallurgical recovery assumed at 85% based upon historical production at the Chibougamau Processing Facility, and the metallurgical results contained in Cygnus’ announcement dated 28 January 2025. It is the Company’s view that all elements in the copper and gold equivalent calculations have a reasonable potential to be recovered and sold.

Cygnus Metals is not aware of any new information or data that materially affects the information in the said announcements, and in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons’ findings are presented have not been materially modified from the original market announcements.

END NOTES

1. Refer to Cygnus’ ASX announcement titled “High-grade assays results from Golden Eye deposit” dated 16 April 2026.
2. Refer to Cygnus’ ASX announcement titled “Two new mineralised gold prospects for resource growth” dated 20 January 2026.
3. Historic production statistics for the Chibougamau area are recorded in Leclerc. F, Harris. L. B, Bedard. J. H, Van Breeman. O and Goulet. N. 2012, Structural and Stratigraphic Controls on Magmatic, Volcanogenic, and Shear Zone-Hosted Mineralization in the Chapais-Chibougamau Mining Camp, Northeastern Abitibi, Canada. Society of Economic Geologists, Inc. Economic Geology, v. 107, pp. 963–989.
4. Refer to Cygnus’ ASX announcement dated 17 September 2025 and subsequent technical report dated 31 October 2025 titled “NI 43-101 Technical Report Chibougamau Hub and Spoke Complex, Québec, Canada” prepared in accordance with National Instrument 43-101 Standards of Disclosure for Mineral Projects (“NI 43-101”) and the Joint Ore Reserves Committee (JORC) Code (2012 Edition).
5. Refer to Cygnus’ ASX announcement entitled ‘Maiden Resource at Pontax Project’ released to the ASX on 14 August 2023 regarding the Inferred Mineral Resource Estimate of 10.1Mt at 1.04% Li₂O at Pontax Central. The Pontax Central Project hosts Inferred Mineral Resources of 8.27Mt at 1.02% Li₂O reported in accordance with NI 43-101.
6. The outcomes of the PEA were first announced by Doré Copper Mining Corp. on 10 May 2022 and the comprehensive technical report underpinning the PEA was announced by Doré in accordance with the requirements of NI 43-101 on 15 June 2022. The Technical Report was prepared by BBA Inc. with several consulting firms contributing to sections of the study, including SLR, SRK Consulting (Canada) Inc. and WSP Inc. The Technical Report and the announcement are available on Doré’s website (www.dorecopper.com/en/investors/newsreleases) and SEDAR. Cygnus cautions that the PEA is a preliminary technical, conceptual and economic study undertaken by Doré of the initial evaluation and potential development of the Chibougamau Project. It is at scoping study level only, which is based on a lower level of technical assessment that is not sufficient to support the estimation of Ore Reserves and is inherently uncertain. The production targets and forecast financial information disclosed in the PEA are underpinned by Measured Mineral Resources (approximately 1.17%), Indicated Mineral Resources (approximately 32.10%) and Inferred Mineral Resources (approximately 66.73%). However, Cygnus is not able to disclose the outcomes of the PEA as the significant proportion of Inferred Resources included in the Life of Mine means that pursuant to ASX and ASIC guidance there is not considered to be sufficiently reasonable grounds for the production targets and forecast financial information disclosed in the PEA. Accordingly, Cygnus is not disclosing the production targets and forecast financial information reported in the PEA and cautions investors against making investment decisions based on such targets and forecasts.
7. Refer to IAMGOLD’s news release dated 17 February 2026.

APPENDIX A - Financial Analysis of selected items within the Appendix 5B

App 5B reference	ASX description reference	Summary
1.2(a)	Payments for exploration & evaluation (if expensed)	This represents: <ol style="list-style-type: none"> i. exploration and other non-corporate expenditure incurred on pending or prospective tenements and project areas; or ii. shared expenditure not readily attributable to a specific tenement or project area.
1.2(d)	Staff costs	Relates to Perth and Canadian office staff and director costs.
1.2(e)	Administration and corporate costs	This item relates to costs for and associated with operating the Company's Perth office and includes listing and compliance costs (ASIC, ASX and share registry), audit fees, insurance, office occupancy and business development costs.
1.2(f)	Care and maintenance and associated site administration and staff costs	These are costs associated with operating the Canadian subsidiaries' site office and care and maintenance costs incurred at the Copper Rand processing facility and maintenance at other site locations.
1.8	Other (refundable tax payments)	This represents the net (payment)/refund of Australian and Canadian GST and other state and provincial sales taxes during the period.
2.1(d)	Payments for exploration and evaluation (capitalised)	Payments during the quarter related to drilling and related costs incurred at granted exploration tenure at the Chibougamau Project and James Bay Projects, Canada.
2.2(c)	Proceeds from disposal of property, plant and equipment	Disposal of an Australian light vehicle.
2.5	Government grants and tax incentives	Receipt of Canadian Government grant proceeds in relation to the Critical Minerals Infrastructure Fund.
3.1	Proceeds from issues of shares	The Company completed a share placement to institutional and sophisticated investors during the March quarter.
3.3	Proceeds from exercise of options	A number of unlisted share options were exercised during the March quarter.
3.4	Transaction costs related to the issue of shares	Share issue costs incurred during the period in relation to the share placement reported at 3.1 above.
6.1	Aggregate amount of payments to related parties and their associates	Payments (A\$242,730) relate to fees, salary and superannuation paid to executive and non-executive directors.

APPENDIX B – Mineral Resource Estimate for the Chibougamau Project as at 17 September 2025

Notes:

1. Cygnus' Mineral Resource Estimate for the Chibougamau Copper-Gold project, incorporating the Corner Bay, Devlin, Joe Mann, Cedar Bay, and Golden Eye deposits, is reported in accordance with the JORC Code and the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") (2014) definitions in NI 43-101.
2. Mineral Resources are estimated using a long-term copper price of US\$9,370/t, gold price of US\$2,400/oz, and silver price of US\$30/oz, and a US\$/C\$ exchange rate of 1:1.35.
3. Mineral Resources are estimated at a CuEq cut-off grade of 1.2% for Corner Bay and 1.5% CuEq for Devlin. A cut-off grade of 1.8 g/t AuEq was used for Cedar Bay and Golden Eye; and 2.0 g/t AuEq for Joe Mann.
4. Corner Bay bulk density varies from 2.85 tonnes per cubic metre (t/m³) to 3.02t/m³ for the estimation domains and 2.0 t/m³ for the overburden. At Devlin, bulk density varies from 2.85 t/m³ to 2.90 t/m³. Cedar Bay, Golden Eye, and Joe Mann use a bulk density of 2.90 t/m³ for the estimation domains.
5. Assumed metallurgical recoveries are as follows: Corner Bay copper is 93%, gold is 78%, and silver is 80%; Devlin copper is 96%, gold is 73%, and silver is 80%; Joe Mann copper is 95%, gold is 84%, and silver is 80%; and Cedar Bay and Golden Eye copper is 91%, gold is 87%, and silver is 80%.
6. Assumptions for CuEq and AuEq calculations (set out below) are as follows: Individual metal grades are set out in the table. Commodity prices used: copper price of US\$9,370/t, gold price of US\$2,400/oz and silver price of US\$30/oz. Assumed metallurgical recovery factors: set out above. It is the Company's view that all elements in the metal equivalent calculations have a reasonable potential to be recovered and sold.
7. CuEq Calculations are as follows: (A) Corner Bay = grade Cu (%) + 0.68919 * grade Au (g/t) + 0.00884 * grade Ag (g/t) ; (B) Devlin = grade Cu (%) + 0.62517 * grade Au (g/t) + 0.00862 * grade Ag (g/t); (C) Joe Mann = grade Cu (%) + 0.72774* grade Au (g/t); and (D) Golden Eye and Cedar Bay = grade Cu (%) + 0.78730* grade Au (g/t) + 0.00905 * grade Ag (g/t).
8. AuEq Calculations are as follows: (A) Corner Bay = grade Au (g/t) + 1.45097* grade Cu(%) + 0.01282* grade Ag (g/t); (B) Devlin = grade Au (g/t) + 1.59957* grade Cu(%) + 0.01379* grade Ag (g/t); (C) Joe Mann = grade Au (g/t) + 1.37411* grade Cu (%); and (D) Cedar Bay and Golden Eye = grade Au (g/t) + 1.27016 * grade Cu (%) + 0.01149 * grade Ag (g/t).
9. Wireframes were built using an approximate minimum thickness of 2 m at Corner Bay, 1.8 m at Devlin, 1.2 m at Joe Mann, and 1.5 m at Cedar Bay and Golden Eye.
10. Mineral Resources are constrained by underground reporting shapes.
11. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
12. Totals may vary due to rounding.

APPENDIX C - Cygnus Metals Limited's Tenements (as at 30 September 2025)

Notes: CM = Mining Concession; BM = Mining Lease; CDC = Exploration Claim.

Chibougamau Project - Quebec, Canada

5.5 Cash and cash equivalents at end of quarter (should equal item 4.6 above)	31,874	13,351

6. Payments to related parties of the entity and their associates

- 6.1 Aggregate amount of payments to related parties and their associates included in item 1
- 6.2 Aggregate amount of payments to related parties and their associates included in item 2

**Current quarter
\$A'000**

243

-

Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.

7. Financing facilities <i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
7.1 Loan facilities	-	-
7.2 Credit standby arrangements	-	-
7.3 Other (please specify)	-	-
7.4 Total financing facilities	-	-
7.5 Unused financing facilities available at quarter end		-
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		
N/A		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (Item 1.9)	(2,127)
8.2 Capitalised exploration & evaluation (Item 2.1(d))	(3,105)
8.3 Total relevant outgoings (Item 8.1 + Item 8.2)	(5,232)
8.4 Cash and cash equivalents at quarter end (Item 4.6)	31,874
8.5 Unused finance facilities available at quarter end (Item 7.5)	-
8.6 Total available funding (Item 8.4 + Item 8.5)	31,874
8.7 Estimated quarters of funding available (Item 8.6 divided by Item 8.3)	6.09

8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

1. Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: N/A

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: N/A

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: N/A

Compliance statement

- This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- This statement gives a true and fair view of the matters disclosed.

Date: 24 April 2026

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
