

Quarterly Activities Report

For the period ending 31st March 2026

Connected Minerals Limited (**ASX: CML**) (**Connected, Connected Minerals or the Company**) is pleased to provide shareholders its Quarterly Activities Report for the three-month period ending 31st March 2026.

Namibia

In Namibia, Connected Minerals maintains a portfolio of assets comprising two granted exclusive prospecting licences (**EPL**) **Etango North-East Project** and **Swakopmund Project**.

Connected’s Namibian portfolio, located in the country’s most prolific uranium producing province, represents a strategic land position, given the portfolio’s close proximity to known uranium mines and deposits and benefits from excellent regional infrastructure.

Etango North-East Project

The Etango North-East Project is located in the western part of Namibia and covers 30km². Connected has to date completed Phases 1 and 2 drilling programmes. The Phase 2 drilling programme which was completed in 2020/21 comprised 23 holes for 3,134 metres.

Connected reported positive results with 17 of the 23 Phase 2 holes returning economic uranium grades, which combined with the results from Phase 1¹, provided Connected with an 80+% drilling success rate to date at the Project.

Both Phase 1 and Phase 2 drilling successfully intersected multiple, stacked and mineralised, Alaskites (leucogranite) which further reinforces the Company's view that the geology at Etango North-East follows the model of Bannerman Energy's world-class Etango deposit.

¹ CML ASX Announcement 26 May 2025, "Strong Grades Delivered in Maiden Drilling at Etango North-East Uranium Project"

Following the two successful programmes carried out in 2025, mineralisation at Etango North-East remains open at depth and along strike.

Further exploration programmes at Etango North-East are currently under review.

Swakopmund Project

No work was carried out at Swakopmund this quarter.

Western Australia

Located in the Great Southern Region, the Pallingup Project is considered prospective for REE and heavy minerals and comprises two granted exploration licences; E70/6165 totalling 16 sub-blocks for ~ 45km², and E70/6731 totalling 15 blocks for ~43km².

CML geologists have interpreted up to two carbonatites, from a proprietary Total Magnetic Intensity (TMI) aeromagnetic survey dataset, at Pallingup which may have the potential to host REEs.

The Company continues to engage with landowners to negotiate land access agreements for the next field season.

Pilbara Assets

CML continues its review of its Pilbara assets, reevaluating any future budgets associated with these projects.

Corporate

Financial

At the end of the quarter the Company held cash of approximately \$2.8M with no debt.

Operating cash outflows were lower than last quarter due to a reduction of administrative overheads. Staff costs were \$113k, exploration costs of \$142k, with administration and corporate costs of \$79k. Focus mining royalty received was \$100k.

Related party payments reported in Item 6.1 of the Appendix 4C of \$36k represent directors' fees and corporate management fees paid during the quarter.

This announcement has been authorised for release by the Board of Directors.

Notes:

1. The expenditure figures shown are as confirmed at section 3 of the Company's pre-quotations disclosure announcement dated 23 October 2024.

About Connected Minerals Limited

Connected Minerals Limited (ASX: CML) is an Australian-headquartered company which focuses on the exploration and potential development of a portfolio of projects in Namibia and Western Australia. The Company is targeting uranium discoveries through two granted exclusive prospecting licences (EPL) in the most prolific uranium producing province in Namibia. Connected Minerals also maintains 100% of the legal and beneficial ownership in four granted exploration licences in Western Australia which demonstrate multi-commodity potential.

Competent Person's Statement and Previously Reported Information

The information in the referenced announcements footnoted at 1 above that relate to exploration results have previously been released on the ASX. The Company confirms that it is not aware of any information or data that materially affects the information included in the market announcements, and that all material assumptions and technical parameters continue to apply. The Company confirm that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

The information in this announcement that relates to exploration results is based on and fairly represents information and supporting documentation, and has been reviewed and approved by Mr Herbert Roesener, a competent person who is a member of the South African Council for Natural Scientific Professions (SACNAP), a JORC Recognised Professional Organisation. Mr Roesener is a consultant to Connected Minerals Limited. Mr Roesener has sufficient experience that is relevant to the style of mineralisation and type of deposits under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the JORC Code. Mr Roesener has provided his prior written consent as to the form and context in which the exploration results and the supporting information are presented in this announcement.
