Dear Madam

**REPORT ON ACTIVITIES FOR THE QUARTER ENDED 31 MARCH 2026**

During the quarter ended 31 March 2026 Biotron Limited (Biotron' or 'the Company') achieved the following:

- Completed the integration of Sedarex Limited (Sedarex) into Biotron from a corporate and operational perspective.
- Progressed preparation of a submission for the European Medicines Agency (EMA) requesting scientific advice relating to the European regulatory pathway for SedRx, a next-generation general anaesthetic being developed by Sedarex.
- Progressed preliminary work to assess an assessment of the utility of the SedRx product for treatment of an additional neuroscientific indication.
- Demonstrated activity of Biotron's lead compound for Hepatitis B virus (HBV) against Hepatitis Delta Virus (HDV).
- Successfully completed the shortfall for the Entitlement Offer, raising an additional \$878,000 before costs.
- Appointed Dr Graeme Wald as Non-Executive Director.

During the quarter under review Biotron completed the integration of Sedarex into Biotron from a corporate and operational perspective, following the completion of the acquisition of Sedarex in December 2025.

Sedarex holds global patents for SedRx, a safer, next-generation general anaesthetic. SedRx contains alfaxalone which is the active ingredient (API) of a proven general anesthesia Althesin that was marketed in Europe for 14 years and had 50% share of the day care market in the UK. SedRx eliminates past safety risks associated with Althesin and maintains cognitive abilities post-anaesthetic procedure. This new formulation has proven superior safety and cognitive outcomes versus leading anaesthetics in Phase 1 and pilot Phase 2a studies, with FDA backing for a 505(b)(2) pathway and potential European Medicines Agency (EMA) abridged approval.

During the quarter under review, Biotron has worked closely with an international regulatory advisory group on a submission to the EMA scientific advisory committee requesting advice relating to the European regulatory pathway for SedRx. Good progress is being made, and Biotron expects to receive formal guidance in advance of the 31 July 2026 deadline set out under the terms of the acquisition agreement.

In addition to the late-stage general anaesthetic opportunity offered by SedRx, Sedarex has additional new indications in the high growth neuroscientific field under development. While the current focus is on the submission to the EMA for the general anaesthetic indication, progress has continued on this new indication throughout the first quarter of 2026, primarily relating to sourcing drug product for animal studies.

During the quarter under review the Company reported that BIT-HBV001, its lead anti-Hepatitis B (HBV) candidate, is active against Hepatitis Delta Virus (HDV).

HDV is a satellite virus of HBV; it only infects people with HBV infection. Worldwide an estimated 12-60 million people are infected with HDV. Co-infection with HBV and HDV is associated with the most severe form of viral hepatitis, often leading to rapid progression to cirrhosis, liver failure, or hepatocellular carcinoma. There is a significant unmet need to address what is the most severe of hepatitis infections.

In this latest study, the antiviral effects of BIT-HBV001 on HDV replication were examined in cells co-infected with HDV and HBV. BIT-HBV001 inhibited HDVAg production (markers of HDV infection) by ~85% compared to drug-free, virus-infected controls.

The study was performed at SCRIPPS Institute San Diego, CA, USA.

As reported previously, BIT-HBV001 had shown strong antiviral activity against the HBV in a range of cell-based assays, with that activity confirmed in two different animal models of hepatitis liver diseases and infection.

The demonstration that BIT-HBV001 also targets HDV opens up additional treatment pathways for serious HBV infection in a population that is in need of effective treatment strategies. Inhibition of HDVAg production in HBV/HDV co-infected cells supports the continued development of BIT-HBV001 as a candidate component of future “functional-cure” therapies for HBV infection.

In late January 2026 the Company closed the non-renounceable rights issue first announced on 15 October 2025, after the allotment of the shortfall under the Rights Issue. The fully allocated shortfall raised \$878,733 bringing the total raised under the issue to \$1,524,594 (before costs).

On 30 March 2026 the Company appointed Dr Graeme Wald as Non-Executive Director. Mr Robert B. Thomas retired as a Director in February 2026.

## **Expenditures**

As disclosed in the Company's Quarterly Cash Flow Report, expenditure on research and development activities during the quarter totaled \$128,000 and \$142,000 of related staff costs. As disclosed in the Company's Quarterly Cash Flow Report, payments to related parties and their associates during the quarter totaled \$142,000 for director fees, salaries and superannuation payments.

This announcement has been authorised by the Board of Directors.

By order of the Board.

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
