

28 April 2026

Eleventh Month Seaweed Trading Results – Strong Rebound as Seasonal Conditions Improve

Highlights

- **Gross sales of IDR 4,215,000,000 (approximately A\$369,737) for the eleventh trading period (15 March 2026 – 14 April 2026)**
- **Month-on-month increase of approximately 68.1% compared to Month 10**
- **Aggregate gross sales of approximately A\$2.94 million generated over the Company’s first eleven months of trading operations**
- **Significant improvement in trading performance as conditions transition out of the wet season**
- **Improved harvest volumes and quality supporting increased trading activity**
- **Continued stable demand across domestic and export markets**

Results Overview

The Board of BPH Global Ltd (**ASX: BP8**) advises that it has recorded gross sales of IDR 4,215,000,000 (approximately A\$369,737) for the eleventh trading period from 15 March 2026 to 14 April 2026 based on fulfilled purchase orders with payments pending settlement under standard trading terms.

Aggregate gross sales generated over the Company’s first eleven months of trading are now approximately A\$2.94 million, continuing to demonstrate the growth trajectory of the Company’s Indonesian seaweed trading platform.

Month 11 trading performance reflects a clear transition out of the peak rainy season in Makassar. Improved weather conditions have supported increased seaweed harvesting activity, with better product availability and quality enabling higher trading volumes.

The easing of prior seasonal and cultural factors, including the conclusion of Ramadan and associated holiday periods, has also contributed to the normalisation of trading activity across the Company’s customer base.

Underlying demand fundamentals remain strong, with stable customer relationships maintained across both domestic and export channels.

Operational Positioning

With Makassar now moving into more favourable dry season conditions, the Company expects continued improvement in harvesting consistency and trading volumes in the near term.

The Company continues to focus on:

- Strengthening engagement with Makassar-based farmer networks;
- Improving procurement consistency as conditions stabilise; and
- Supporting reliable supply into both domestic and export markets.

The Company remains well positioned to capitalise on improved conditions through:

- Increased purchasing of seaweed from local farmers;
- Expansion of independent trading volumes via its Makassar platform;
- Strengthening long-term farmer partnerships; and
- Responding efficiently to growing customer demand.

The Company will continue to provide monthly updates on sales volumes from its Indonesia-based seaweed operations.
