

## Quarterly Activities Report 31 March 2026

### Highlights

- **Continued strategic review of project portfolio and capital allocation priorities**
- **Ongoing assessment of value-accretive opportunities, including potential partnerships and asset-level transactions**
- **Focus on cost discipline and preservation of cash reserves**

Codrus Minerals Limited (**ASX:CDR**) (“Codrus” or “the Company”) is pleased to provide an update on activities for the period ended 31 March 2026 (“March Quarter” or “Quarter”) across its exploration portfolio, which includes gold, copper, rare earth and uranium assets located in the United States, Australia and Canada.

During the Quarter, the Company did not undertake field exploration activities across its project portfolio. The period was focused on internal technical review, strategic planning and capital management initiatives aimed at positioning the Company for future exploration and growth.

### Bull Run Gold Project – Oregon, USA

Following completion of the 2025 reconnaissance drilling program, the Company has continued to review results and refine its geological understanding of the project.

- **High-grade molybdenum assays up to 4.2% Mo at Bull Run, reinforcing significant polymetallic upside** (refer to ASX announcement dated 13 May 2025)
  - **Lady May Zone:**
    - **2.5% to 4.2% Molybdenum**, suggesting a valuable polymetallic system
  - **Whited Zone:** 0.8% Molybdenum.
- Rock chip results confirm Mo mineralisation associated with hydrothermal alteration typical of porphyry-related Cu ± Au ± Mo systems, supporting potential for a broader mineralised system.
- Coincident soil Mo anomalies and IP chargeability, suggesting potential for additional Mo mineralisation beyond the Lady May and Whited zones.
- Follow-up field program being designed for Bull Run to advance molybdenum targets toward drill testing.

## Project Background and Geological Setting

The Bull Run Gold Project (see **Figure 1**) is located in Baker County, eastern Oregon, approximately 5 miles south of Unity. The Project comprises 102 claims, with the Company holding a 100% legal and beneficial interest in 91 claims and being party to the Record Mine Option Agreement over a further 11 claims.

The Project has a history of intermittent vein gold production dating back to ~1929 and is situated within the Ironside Mountain Inlier. The local geology comprises ultramafic–mafic and sedimentary rocks intruded by the Grouse Creek and Bull Run granodiorites, and multiple andesitic to dacite dyke swarms, with widespread porphyry-style alteration and mineralisation recognised in the broader district.

**Figure 1.** Location of the Bull Run Project in Oregon USA.

## Karloning Rare Earths (Western Australia) - High-Grade Critical Metals Confirmed

The Company has commenced a detailed desktop review of historical data at the Karloning Project in Western Australia, which is guiding the design of an overlit re-assay program focused on tantalum (Ta) and niobium (Nb) mineralisation.

Initial observations from the review indicate the presence of potentially significant Ta–Nb mineralisation within the broader Karloning system, which has previously demonstrated rare earth element (REE) mineralisation through drilling.

The consistency of historical data is also being assessed as part of the review process, with the aim of improving confidence in the existing dataset.

### Multi-Commodity Critical Minerals System

The ongoing review is supporting the interpretation of Karloning as a prospective multi-commodity pegmatite system. In particular, it is reinforcing a potential link between previously identified shallow clay-hosted REE mineralisation and an underlying pegmatite source that may be enriched in tantalum and niobium.

Previous drilling at Karloning, including approximately 2,000m of RC drilling and ~80 aircore holes, has outlined significant shallow REE mineralisation, supporting the view of a large mineralised system.

This evolving geological interpretation suggests the potential for a vertically integrated mineralised system, encompassing both REE and Ta–Nb mineralisation, subject to further validation.

The **Karloning Project** (see **Figure 2**) is located in the Wheatbelt region of Western Australia and hosts a large, prospective pegmatite system. Historical drilling programs, including Reverse Circulation (RC) and Aircore (AC) drilling, have identified widespread shallow clay-hosted REE mineralisation across the project area.

**Figure 2.** Location of the Karloning Rare Earths Project, Western Australia

## Jasper Wedge Uranium Project – Saskatchewan, Canada

No field exploration was undertaken at the Jasper Wedge or Nanuk Uranium Projects during the Quarter.

Following the 2024 field program, key findings included:

- **Target Selection:** Targets were identified based on a combination of structural features from historical airborne magnetics and AeroTEM data, gas anomalies detected via Sentinel-2 hyperspectral imaging, and anomalies from a recent UAV magnetics survey.
- **Sampling Overview:** A total of 305 samples were collected across targets JW6A, JW7, and JW10, comprising:
  - 143 soil samples
  - 160 Soil Gas Hydrocarbon (SGH) samples
  - 2 rock chip samples
- **Additional Work:** Geological mapping and reconnaissance were also carried out across other target areas to support ongoing exploration planning.

### Jasper Wedge Soil Geochemistry Findings:

- **Uranium Levels:** Soil assays returned uranium values ranging from 1.0 to 2.7ppm U, broadly consistent with, or slightly above, typical Athabasca Basin background levels (~1–2ppm U).<sup>1</sup>
- **Masking Elements:** Elevated thorium and vanadium were identified in several samples, which may suppress or obscure uranium anomalism in conventional geochemical interpretation.
- **Anomaly Detection:** Element ratio analysis (including U<sup>2</sup>/Th) was applied to reduce masking effects, highlighting uranium anomalism and supporting the prospectivity of targets JW6A, JW7 and JW10.

### Jasper Wedge Rock Chip Results and Exploration Implications:

- Strongly anomalous uranium rock chips were returned from targets **JW6A** and **JW10**, with results of **5.3ppm U** and **4.6ppm U**, respectively.<sup>1</sup> Samples were collected from radioactive quartz pebble conglomerates and sandstone boulders.
- These results are considered highly encouraging and are consistent with exploration models in the **Eastern Athabasca Basin**, where major deposits such as **Rabbit Lake** and **Key Lake** were historically advanced by tracing radioactive glacial boulder trains.
- The Company will provide further updates as exploration at Jasper Wedge progresses.

The Company continues to assess prior geochemical and geophysical datasets, including anomalism identified in earlier programs, which highlighted prospective uranium targets.

Internal work focused on:

- Refinement of target areas
- Evaluation of exploration methodologies
- Planning for future field programs

---

<sup>1</sup> Refer to Codrus' ASX Announcement dated 29 January 2025.

## Project Background and Geological Setting

The 100% owned Jasper Wedge Uranium Project (see **Figure 3**), MC0016116, covers an area of 2,099 hectares and is located within the world-class Athabasca Basin uranium province in northern Saskatchewan, Canada, approximately 45km south-east of the high-grade Cigar Lake uranium mine, operated by Cameco.<sup>2</sup>

Along with the Company's **Nanuk Uranium Project** in Quebec, Canada (see **Figure 3**), the Jasper Wedge Uranium Project provides the Company with an exciting opportunity for growth and diversification into the global uranium sector, with these two projects situated in two of Canada's highly prospective, uranium-rich mineral provinces. No exploration was undertaken at the Nanuk Uranium Project during the Quarter.

**Figure 3.** Location of Jasper Wedge Uranium Project and Nanuk Uranium Project, Canada.

## Corporate Update

As at the end of the Quarter, the Company held A\$324,000 in cash and 7,850,000 Moho Resources NL (ASX:MOH) shares.

The Company maintained a disciplined approach to expenditure during the quarter, with a focus on preserving cash and maintaining operational flexibility.

In January 2026, the Company entered into a Data Acquisition Agreement in relation to the Red Gate Project. On 14 January 2026, the Company surrendered tenement E31/1096 and completed the sale of the associated exploration data for total cash consideration of \$110,000 (inclusive of GST).

<sup>2</sup> <https://www.cameco.com/businesses/uranium-operations/canada/cigar-lake>

During the Quarter, the Company's MOH shareholding was released from escrow and the Company disposed of 7,150,000 MOH shares, generating cash proceeds of approximately \$57,000.

On 12 January 2026, the Company announced that Maddison Cramer had been appointed Company Secretary and Jack Dowland had been appointed Chief Financial Officer following the resignation of Jamie Byrde as Company Secretary. Jamie Byrde remains a Non-Executive Director of the Company.

## Compliance

For the purpose of ASX Listing Rule 5.3.1, exploration and evaluation expenditure during the Quarter was \$51,000, materially comprising the exploration activity outlined in this Quarterly report and the payment of option fees in relation to the Bull Run Gold Project.

For the purpose of ASX Listing Rule 5.3.2, the Company confirms that there were no mining production and development activities during the Quarter by the Company.

For the purposes of ASX Listing Rule 5.3.5, payments were made to related parties or their associates (refer to Item 6.1 of Appendix 5B) consisting of Directors' fees, salaries and superannuation totalling \$65,000.

## Codrus Minerals Tenements

Refer to Appendix One for the status of CDR's tenements.

**This announcement was authorised for release by the Board of Codrus Minerals.**

## Compliance Statements

This announcement contains references to Exploration Results, all of which have previously been included in previous market announcements made by the Company. The Company confirms that it is not aware of any new information or data that materially affects the information in the said announcement. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements. The information in this announcement that relates to previous exploration results for the Projects is extracted from the following ASX announcements:

- Middle Creek Project Update, 15 December 2025
- Drilling Completed at Bull Run Gold Project, USA - 14 October 2025
- Drilling Commences at Bull Run Gold Project, USA - 3 June 2025
- Codrus Secures Funding to Advance Bull Run Gold Project, USA - 19 May 2025 • Large IP Targets Enhance the Bull Run Gold Project, USA - 13 May 2025
- Drill Permit Received, High Grade Bull Run Gold Project, USA - 2 May 2025
- Exploration Update: Targets Identified at Jasper Wedge Uranium Project 16 September 2024
- Exploration Commences at Jasper Wedge Uranium Project - 24 July 2024
- Codrus Acquires Two Uranium Projects in Canada -5 April 2024

## Forward Looking Statements

Various statements in this announcement constitute statements relating to intentions, future acts and events. Such statements are generally classified as "forward looking statements" and involve known and unknown risks, uncertainties and other important factors that could cause those future acts, events and circumstances to differ materially from what is presented or implicitly portrayed herein. Although the forward-looking statements contained in this release reflect management's current beliefs based upon information currently available to it and based upon what management believes to be reasonable assumptions, such forward looking statements are estimates for discussion purposes only and should not be relied upon. Codrus' performance may be influenced by a number of factors which are outside the control of the Company, its directors, staff or contractors. The Company does not make any representations and provides no warranties concerning the accuracy of the projections, and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise, except to the extent required by applicable laws.

8.4	Cash and cash equivalents at quarter end (item 4.6)	324
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	324
8.7	<b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	1.96
	<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
	Answer: Yes.	
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
	Answer: Yes - the Company manages its cash flow through ongoing budgeting, forecasting and financial reporting processes, using that information to make decisions about the Company's activities and to determine the form and timing of securing funds when required. The Company is confident that it will be continuing to do so based on previous experiences and track record.	

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

	8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?
	Answer: Yes – the Company expects to continue its operations and to meet its business objectives as it is confident that it will be able to raise sufficient funds as and when required and will align its exploration programs with budget over the next quarter. This expectation is based on previous track record of securing funds as and when required.
	<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>

**Compliance statement**

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

The Board of Directors

Authorised by: .....  
 (Name of body or officer authorising release – see note 4)

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
