ASX Announcement (ASX: AMX)

MetroMap ACV Reaches \$13.1 Million. Subscription Growth Accelerates Across Government, Utilities and Partner Program

Aerometrex Limited (ASX: AMX) is pleased to report that MetroMap Annual Contract Value (ACV) has reached \$13.1 million at the end of Q3 FY26.

This growth is underpinned by recent wins across government and utilities sectors and growth in the partner program. The result is up from the \$12.29M reported at the end of December 2025 and reflects the continued execution of Aerometrex's subscription-led growth strategy.

The diversification of MetroMap's customer base continues to strengthen the durability and predictability of recurring revenue, with the subscription model structurally designed to grow as customer usage grows.

Aerometrex Managing Director and CEO Rob Veitch said:

"Reaching \$13.1 million ACV at the end of Q3 continues our strong growth. With less than a year since we passed the \$10m milestone, it's clear the investments we have made in our product, sales and marketing are paying off. Government and utilities represent exactly the kind of sustainable, compounding opportunity we have been building towards and helps to grow our Average Revenue per Subscriber

The Company enters Q4 FY26 with a significant pipeline and remains focused on converting these opportunities. MetroMap is now serving a broader range of industries than at any point in the Company's history, spanning government, utilities, property, environmental management and urban planning with each new use case further demonstrating the platform's versatility and strengthening the long-term depth of the subscription base.

This announcement has been authorised for release by the Board of Aerometrex Limited.
