Disclaimer

This presentation has been prepared by Stellar Resources Limited (ASX: SRZ) (SRZ or the Company). It contains general information about the Company's activities current as at the date of the presentation. The information is provided in summary form and does not purport to be complete. This presentation is not to be distributed (nor taken to have been distributed) to any persons in any jurisdictions to whom an offer or solicitation to buy shares in the Company would be unlawful. Any recipient of the presentation should observe any such restrictions on the distribution of this presentation and warrants to the Company that the receipt of the presentation is not unlawful. It should not be considered as an offer or invitation to subscribe for or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities. No agreement to subscribe for securities in the Company will be entered into on the basis of this presentation or any information, opinions or conclusions expressed in the course of this presentation. This presentation is not a prospectus, product disclosure document or other offering document under Australian law or under any other law. It has been prepared for information purposes only and is not a recommendation as to whether to invest in SRZ shares. The information contained in this presentation is not investment or financial product advice and is not intended to be used as the basis for making an investment decision. The presentation has been prepared without taking into account the investment objectives, financial situation or particular needs of any particular person. Unless otherwise specified, data and tables set out in this presentation are based on SRZ management estimates.

This presentation does not include all available information on SRZ, and any potential investor should also refer to SRZ's Annual Reports and ASX releases and take independent professional advice before considering investing in SRZ. For more information about Stellar Resources Limited, visit the website at www.stellarresources.com.au.

The Company confirms that it is not aware of any new information or data that materially affects the information contained in this presentation and, in the case of mineral resource estimates announced on 23 February 2026, 4 September 2023, 16 May 2019 and 12 March 2014, all material assumptions and technical parameters underpinning the estimates included in this presentation continue to apply and have not materially changed. The Company confirms that all the material assumptions underpinning the production target, and all forecast financial information derived from the production target made in the Company's 3 September 2024 ASX Announcement "Updated Heemskirk Tin Scoping Study" and included in this presentation continue to apply and have not materially changed.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of SRZ or its directors, or any of their employees or agents, nor any other person accepts any liability, including, without limitation, any liability arising out of fault of negligence, for any loss arising from the use of the information contained in this presentation. In particular, no representation or warranty, express or implied is given as to the accuracy, completeness or correctness, likelihood of achievement or reasonableness or any forecasts, projections, prospects or returns contained in this presentation nor is any obligation assumed to update such information. Such forecasts, prospects or returns are by their nature subject to significant uncertainties and contingencies. Past performance is no guarantee of future performance.

This presentation may contain "forward-looking statements" within the meaning of securities laws of applicable jurisdictions. Forward-looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "believe", "continue", "objectives", "outlook", "guidance" or other similar words, and include statements regarding certain plans, strategies and objectives of management and expected financial performance.

These forward-looking statements involve known and unknown risks, uncertainties and other factors, many of which are outside the control of SRZ and any of its officers, employees, agents or associates. Actual results, performance or achievements may vary materially from any projections and forward-looking statements and the assumptions on which those statements are based. Readers are cautioned not to place undue reliance on forward-looking statements and SRZ assumes no obligation to update such information.

Cautionary Statement

Scoping Study Parameters

The Scoping Study referred to in this announcement has been undertaken for the purpose of ascertaining whether a business case can be made to proceed to more definitive studies on the viability of the Heemskirk Tin Project. It is a preliminary technical and economic study of the potential viability of project and is based on low level technical and economic assessments that are not sufficient to support the estimation of ore reserves. Further exploration and evaluation work and appropriate studies are required before Stellar will be in a position to estimate any ore reserves or to provide any assurance of an economic development case.

The Scoping Study referred to in this announcement has been undertaken to determine the potential viability of the Heemskirk Project comprising a tin mine and processing plant constructed in Tasmania, Australia, and to reach a decision to proceed with more definitive studies. The Study for the Project has been prepared to an intended accuracy level of $\pm 35\%$. The results should not be considered a profit forecast or production forecast.

The Scoping Study is a preliminary technical and economic study of the potential viability of the Project. In accordance with the ASX Listing Rules, the Company advises it is based on low-level technical and economic assessments that are not sufficient to support the estimation of Ore Reserves. Further evaluation work including infill drilling and appropriate studies are required before Stellar will be able to estimate any Ore Reserves or to provide any assurance of an economic development case.

Approximately 97% of the total production targets are in the Indicated Mineral Resource category with 3% in the Inferred Mineral Resource category. 97% of the production target in the first 12 years is in the Indicated Mineral Resource category. The Company has concluded that it has reasonable grounds for disclosing a production target which includes an amount of Inferred Mineral Resource. However, there is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work (including infill drilling) on the Heemskirk Project will result in the determination of additional Indicated Mineral Resources or that the production target itself will be realized.

The Scoping Study is based on the material assumptions outlined elsewhere in this announcement. These include assumptions about the availability of funding. While Stellar considers all the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the Scoping Study will be achieved.

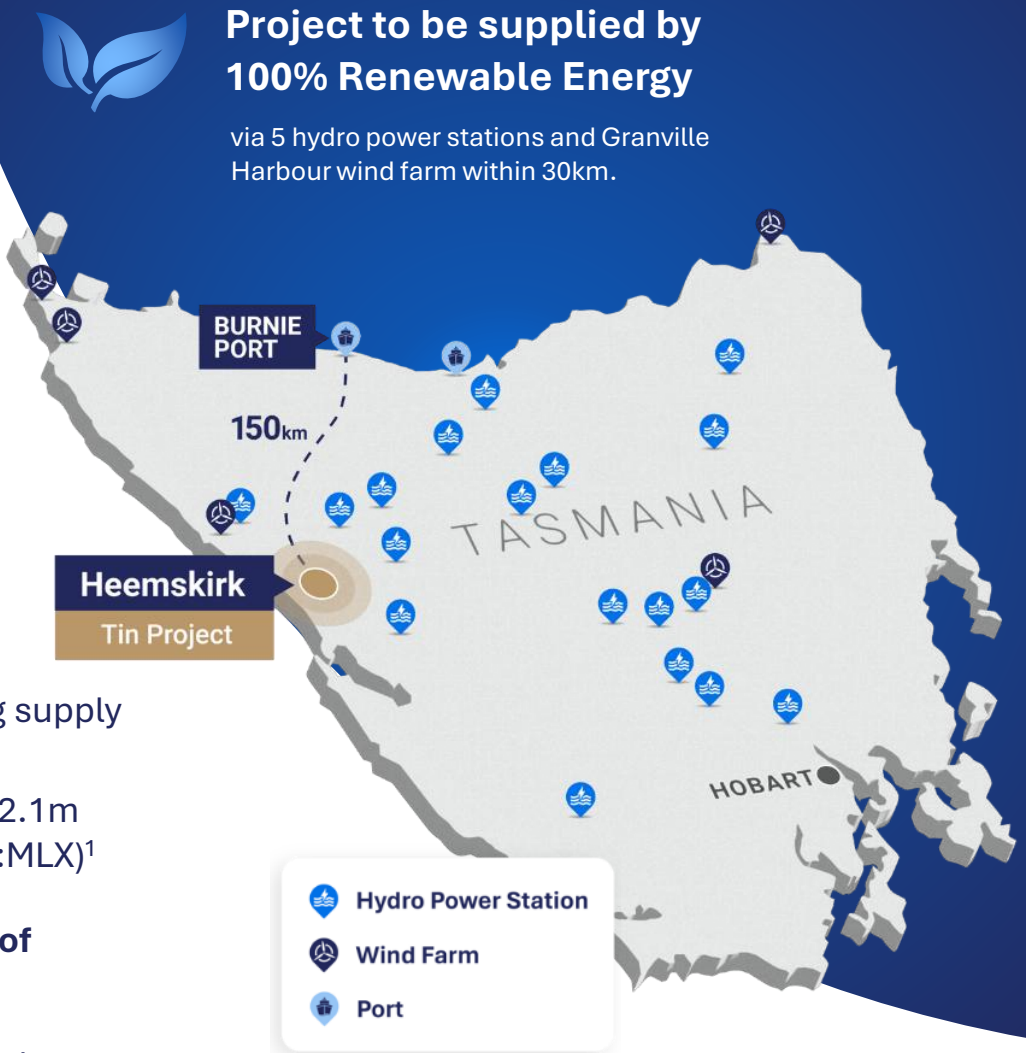

To achieve the range outcomes indicated in the Scoping Study, additional funding will likely be required. Investors should note that there is no certainty that Stellar will be able to raise funding when needed. It is also possible that such funding may only be available on terms that dilute or otherwise affect the value of Stellar's existing shares. It is also possible that Stellar could pursue other 'value realisation' strategies such as sale, partial sale, or joint venture of the Project. If it does, this could materially reduce Stellar's proportionate ownership of the Project.

The Company has concluded it has a reasonable basis for providing the forward-looking statements included in this announcement and believes that it has a reasonable basis to expect it will be able to fund the development of the Project. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the Scoping Study.

Heemskirk is the highest-grade undeveloped tin project in Australia and third highest globally

- 
Potential to rank as a top 10 global producer* and the second largest in Australia
- 
Stable tier-1 jurisdiction, strong mining history, significant processing capacity and infrastructure, 100% renewable energy
- 
Project economics poised for significant growth through PFS due in Q3 2026
- 
Positive metallurgy - sought after **unencumbered, clean, low contaminant concentrate for offtake** against a backdrop of falling supply
- 
Robust balance sheet with pro forma **A\$33m in cash** following \$22.1m capital raising incl. \$17m Strategic Placement to Metals X Ltd (ASX:MLX)¹
- 
Focused on the aim of becoming a material standalone producer of 3,000 – 3,500 tpa of payable tin (~1% global production*)

Cautionary Statement - This is an aspirational statement and SRZ does not have reasonable grounds to believe the statement can be achieved

TAYLOR COLLISON

Board

Mark Connelly | **NON-EXECUTIVE CHAIR**

Corporate executive with over 35 years in mining and a wealth of leadership experience in the resources sector. Mr Connelly has an outstanding track record for deal making and was responsible for the USD\$570M merger of Papillon Resources and B2 Gold Corp in Oct 2014, as well as the key person responsible for the USD\$597M merger of Adamus Resources Limited and Endeavour Mining in Sep 2011.

Simon Taylor | **MANAGING DIRECTOR AND CEO**

Resource executive with over 30 years' experience including technical, CEO and Board roles. Former Managing Director of Oklo Resources prior to takeover by B2Gold Corp. Sept 2022 and Non-Exec Director of Chesser Resources prior to takeover by Fortuna Mining Corp Sept 2023.

Andrew Boyd | **EXECUTIVE DIRECTOR**

Geophysicist with over 25 years of exploration and mining experience, including General Manager Geoscience with ASX Companies Oklo Resources and Papillon Resources, acquired by B2Gold in 2022 and 2014 for ~\$90M and ~\$570M respectively, and Mantra Resources, acquired by ARMZ in 2011 for ~\$1Bn.

Simon O'Loughlin | **NON-EXECUTIVE DIRECTOR**

Founder of O'Loughlins Lawyers, an Adelaide based specialist commercial law firm. Extensive Experience of equity capital markets, ASX and ASIC rules. Has held many Non-Exec Directorships on ASX listed companies.

MLX – On Placement Completion will appoint one NON-EXECUTIVE DIRECTOR*

* Refer to SRZ ASX Announcements on 30 April 2026 - \$17 Million Strategic Placement to Metals X and 4 May 2026 - \$22.1m Placement Completed

Differentiated Growth on a Global Scale

Path to becoming a global top 10 tin producer

**Tier 1
Jurisdiction**

**Mining Licence
granted**

Stable production is rare in this industry; **100% of Heemskirk product offtake currently unencumbered**

Potential to be a **top 5 producer of tin concentrate outside of Asia and Africa**

Tin concentrate producers ranked by 2024 tin output (tonnes)

Rank	Company Name	2024 Prod. (t Sn)	Global Prod. %	Location of primary asset	Market cap (AUD\$)#	Notes
1	Minsur S.A.	39,851*	14.3%	Peru	A\$8.38B	
2	Yunnan Tin	29,000*1	10.4%	China	A\$12.49B	
3	PT Timah	19,703*	7.0%	Indonesia	A\$2.60B	
4	Alphamin Resources	17,324	6.2%	DR Congo	A\$1.80B	DRC conflict uncertainty risk Bisie mine hiatus Mar/Apr 2025
5	COMIBOL	12,560	4.5%	Bolivia	N/A	State owned
6	Yinman Mining Co	9,500	3.4%	China	N/A	
7	Guangxi Huaxi Group	7,000	2.5%	China	N/A	
8	Metals X Ltd	5,503	1.9%	Australia	A\$1.23B	Renison allocation via 50/50 JV
9	Mining Mineral Resources	4,530	1.6%	DR Congo	N/A	DRC conflict uncertainty risk
Heemskirk has potential to rank as a Top 10 producer						
10	Malaysian Smelting Corporation (MSC)	2,676*	0.9%	Malaysia	A\$1.51B

Australia's largest Tin producer with a 50% equity interest in the Renison Tin Operation

"We have been closely monitoring the steady progress the Stellar team has achieved at the Heemskirk Tin Project.

"Their recent resource upgrade and the notable metallurgical improvements at Queen Hill highlight the underlying quality of the asset, and we are very pleased to formalise this Strategic Placement."

– Metals X's Executive Director, Brett Smith

Strong Industry Endorsement

\$17m Strategic Placement¹ to Metals X is a tremendous endorsement of the Heemskirk Tin Project

Development Funding Pathway

Provides capital injection to advance Heemskirk through Q3 2026 PFS and into DFS

Potential Strategic Synergies

Heemskirk is located ~15km from Metals X's flagship Renison Tin Operation with logical synergies

Access to Proven Expertise

Stellar to leverage Metals X's deep regional knowledge and technical expertise

1. ASX Announcement 23 February 2026 - Queen Hill Resource Up 41%, Heemskirk Tin Inventory over 100kt
 2. ASX Announcements 6 March 2014 & 12 March 2014 - New Open Pit Table Resource at St Dizier
 3. Metals X Limited - 2024 Annual Report
 4. 2025 International Tin Association. All rights reserved.

¹ SRZ ASX Announcement 30 April 2026 - \$17 Million Strategic Placement to Metals X

Global Tin Supply Falling

Unencumbered offtake in a tier 1 jurisdiction (Australia) likely to be highly sought after

2025 Tin Concentrate Production Percentage

2025 Tin Production

Tin Concentrate Total

↓ **284,059*** tonnes
-0.3% down from 2024

Refined Tin Total

↓ **371,232** tonnes
-0.57%, flat from 2023

Tin production is declining in existing mines due to diminishing reserves and lower grades.

Global growth in demand from electrification, electronics and semiconductors to support rising tin market deficits

Minimal investment in tin exploration results in limited viable projects to fill forecast tin deficit.

LME Spot Tin Price and Stock Levels

Heemskirk Tin Project

Strategic location with development optionality

Ideal location to be developing Australia's next tin mine

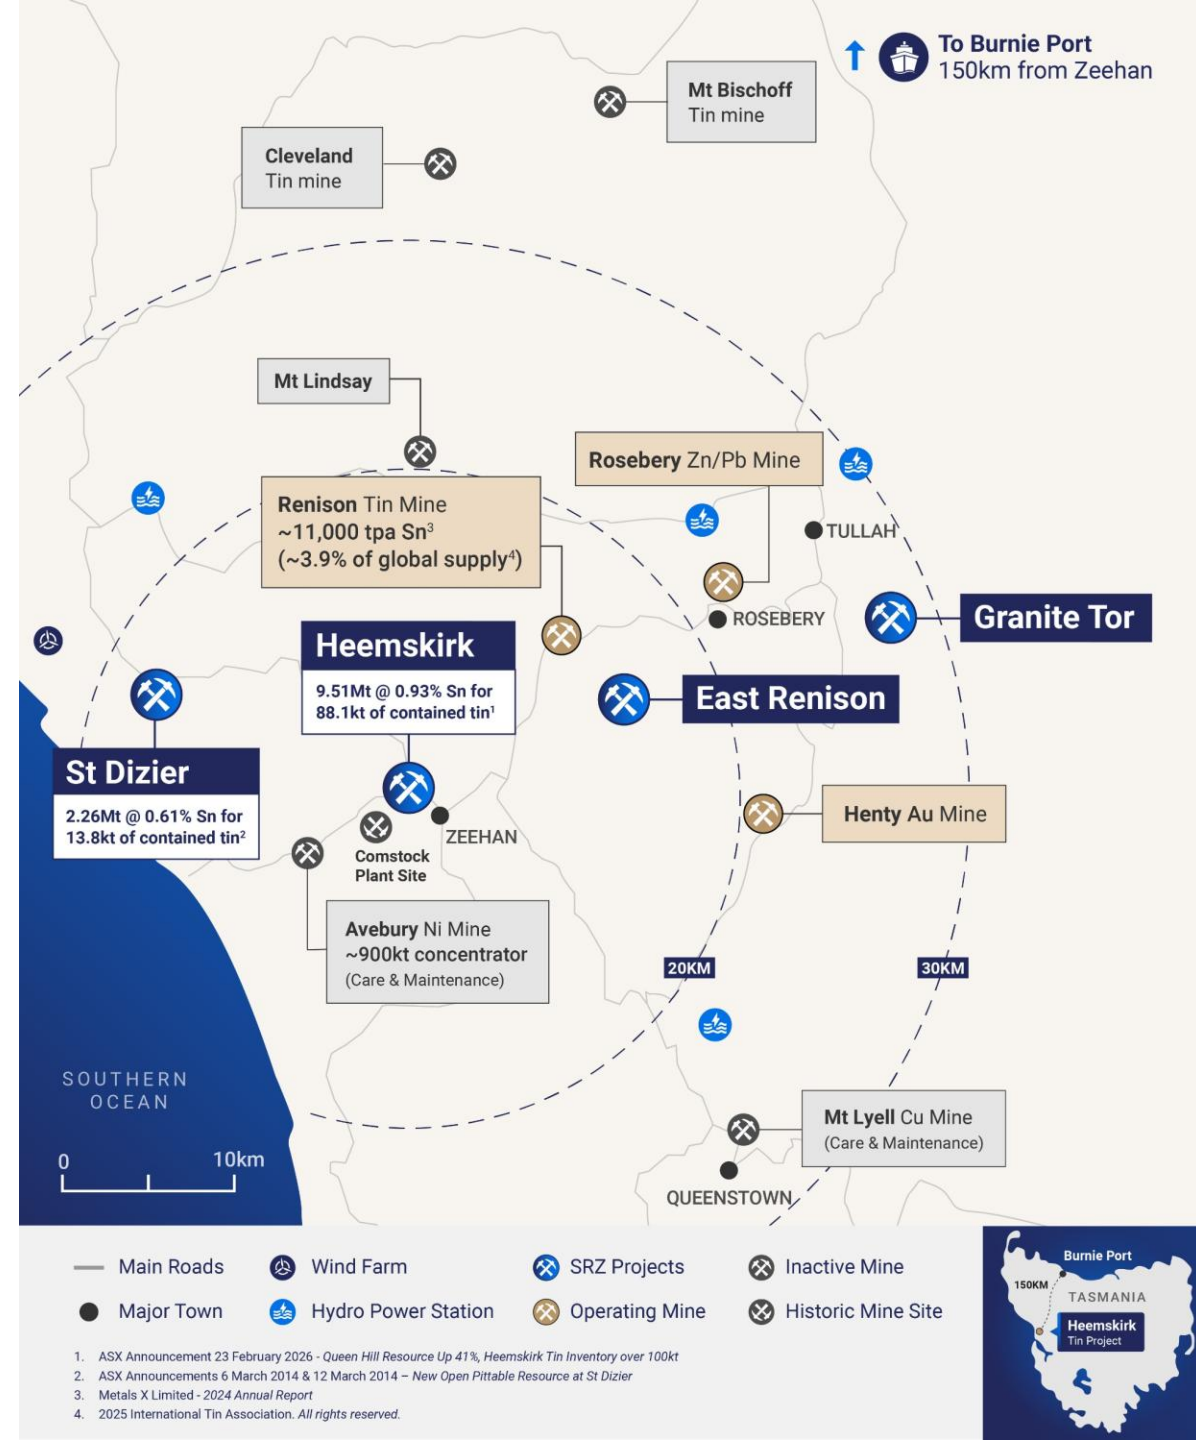

- ★ **World class fertile metal province** → Over 100 years of mining with significant production of Tin, Lead, Silver, Nickel and Gold.
- ★ **Major underground operating mines** → Renison, Rosebery, Henty and processing infrastructure nearby
- ★ **Growth potential** → Renison's 4.0Mt tin reserve in 1968 supported a 5-year LOM and still mining today.
- ★ **'Green tin' potential** → 5 Hydro power stations and Granville Harbour wind farm within 30km
- ★ **Latent infrastructure** → Including adjacent Avebury Plant & Comstock site
- ★ **Strong community and regulatory support** → Engaged with MRT, EPA and West Coast Council, positive support and feedback

Heemskirk Mineral Resource

Highest grade undeveloped project in Australia with clear scope for resource growth

High Grade	Attractive metallurgy	Resource upside	Advanced permitting
<p>High-grade zones defined in all deposits</p> <p>Low footprint underground mining</p>	<p>98% tin contained in cassiterite</p> <p>Highly amenable to conventional processing</p>	<p>Deposits open at depth and along strike</p> <p>Severn Resource upgrade targeted Q3 2026</p>	<p>Project is on a granted ML</p> <p>Simplifying regulatory approvals pathway</p>

Global tin development projects (Measured, Indicated and Inferred)²

Total Mineral Resource Base ¹				
Project	Tonnes (Mt)	Sn (%)	Sn Tonnes (kt)	Cassiterite %
Heemskirk	9.51	0.93%	88.1	98
St Dizier	2.26	0.61%	13.8	75
Total	11.77	0.87%	101.9	95

51% of Total Resource Base in Indicated Category

¹ Refer to ASX Announcements 4 September 2023 – Heemskirk Tin Project MRE Update & 23 February 2026 – Queen Hill Resource Up 41%

² Refer to appendix 3 for peer company tin project benchmark assumptions

Positive Metallurgical Results

Strong tin recoveries and clean concentrate quality

Potential for a highly sought-after unencumbered product from a stable Tier-1 jurisdiction

Robust metallurgical performance

Results **demonstrate pathway to strong tin recoveries and low-impurity concentrates**

High tin recoveries at both deposits

Severn - **75% recovery**

Queen Hill – increased to **>70% recovery**

Producing **tin concentrates grading 42-49% Sn**

Nearby Renison Bell Tin Operations reported tin recoveries of **79.9% tin for 12 months to Dec 2025¹**

Favourable ore mineralogy

Sulphides dominated by pyrite with **only trace penalty elements**

Supports potential for a premium low-impurity concentrate

Clean concentrate and effective sulphide rejection

Sulphide flotation removed **72–93%** of sulphides providing a clean gravity-feed product

¹ Metals X Ltd (ASX:MLX) – 2025 Annual Report

Refer to ASX Announcements 9 December 2025 – Positive Metallurgical Results for Heemskirk Tin Project & 22 April 2026 – Increased Metallurgical Results for Queen Hill

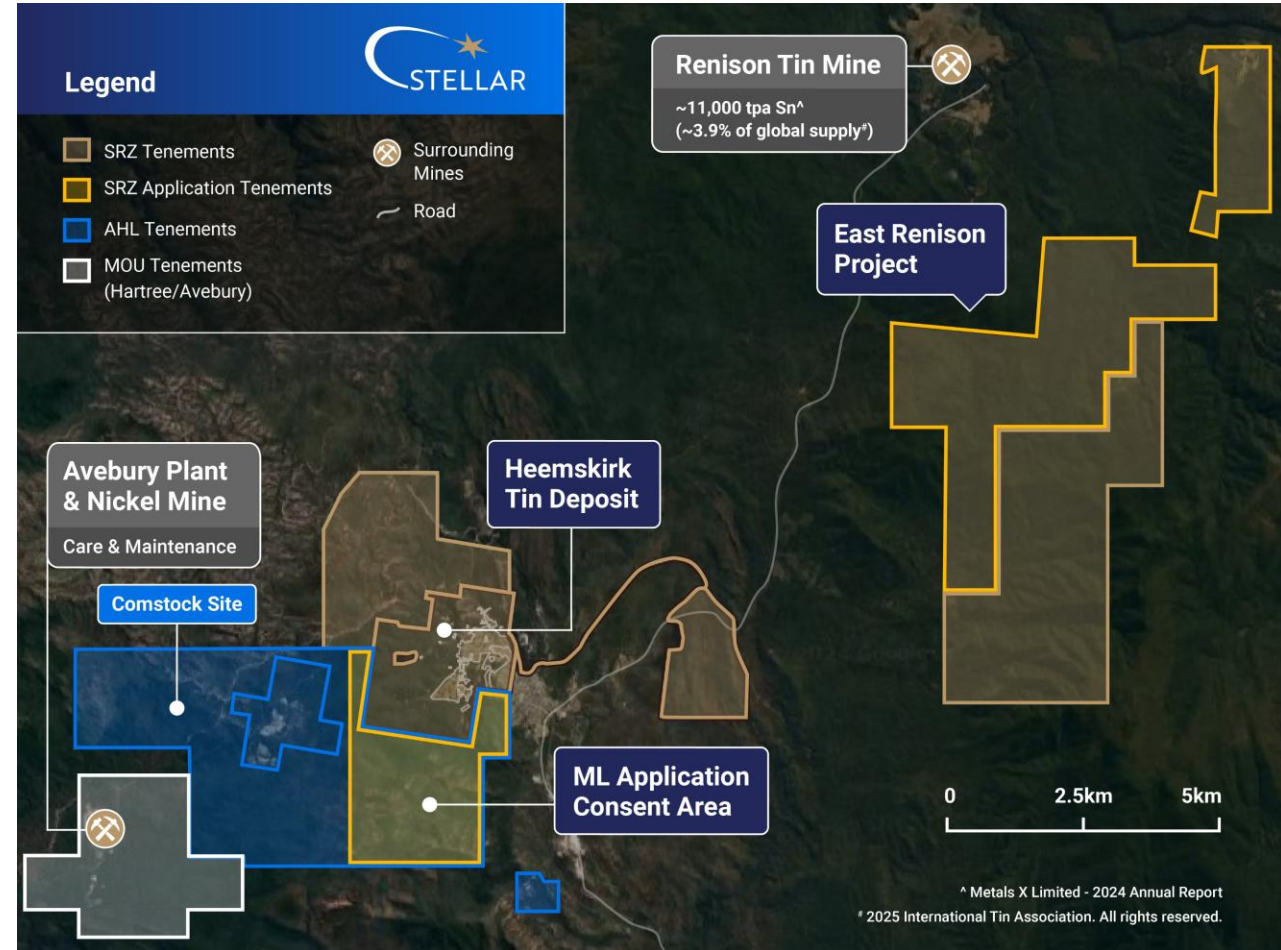

Development Options

Targeting reductions in cost, time and environmental impact

Evaluating nearby infrastructure as part of PFS

- ★ **Comstock Mine Site** closed in 1990's
 - ★ **Agreement signed to lodge Mining Licence application** over area adjacent to Heemskirk
 - ★ **Detailed assessment** by reputable engineering firm **confirms potential for a Tailings storage facilities (TSF)** within ML application area
- ★ **Avebury Plant** in care and maintenance
 - ★ **<10km** on sealed bitumen from Heemskirk
 - ★ **Nameplate production capacity 900ktpa**
 - ★ **TSF potential and environmental advantages**
 - ★ **Discussions ongoing under prior MOU**

Refer to ASX Announcements:

- Comstock - 3 December 2024 - MOU Signed on Nearby Infrastructure at Heemskirk, 14 July 2025 – Stellar Signs MOU Extension on Adjacent Mine Infrastructure & 5 February 2026 – Consent to Apply for Mining Licence at Heemskirk
- Avebury - 25 August 2025 - Stellar Signs MOU on Avebury Plant and Mine Infrastructure

Mineral Resource Driving Upside Potential

Increase in mining inventory

Scoping Study used Indicated Resource (2023) only, **upside** into Prefeasibility Study

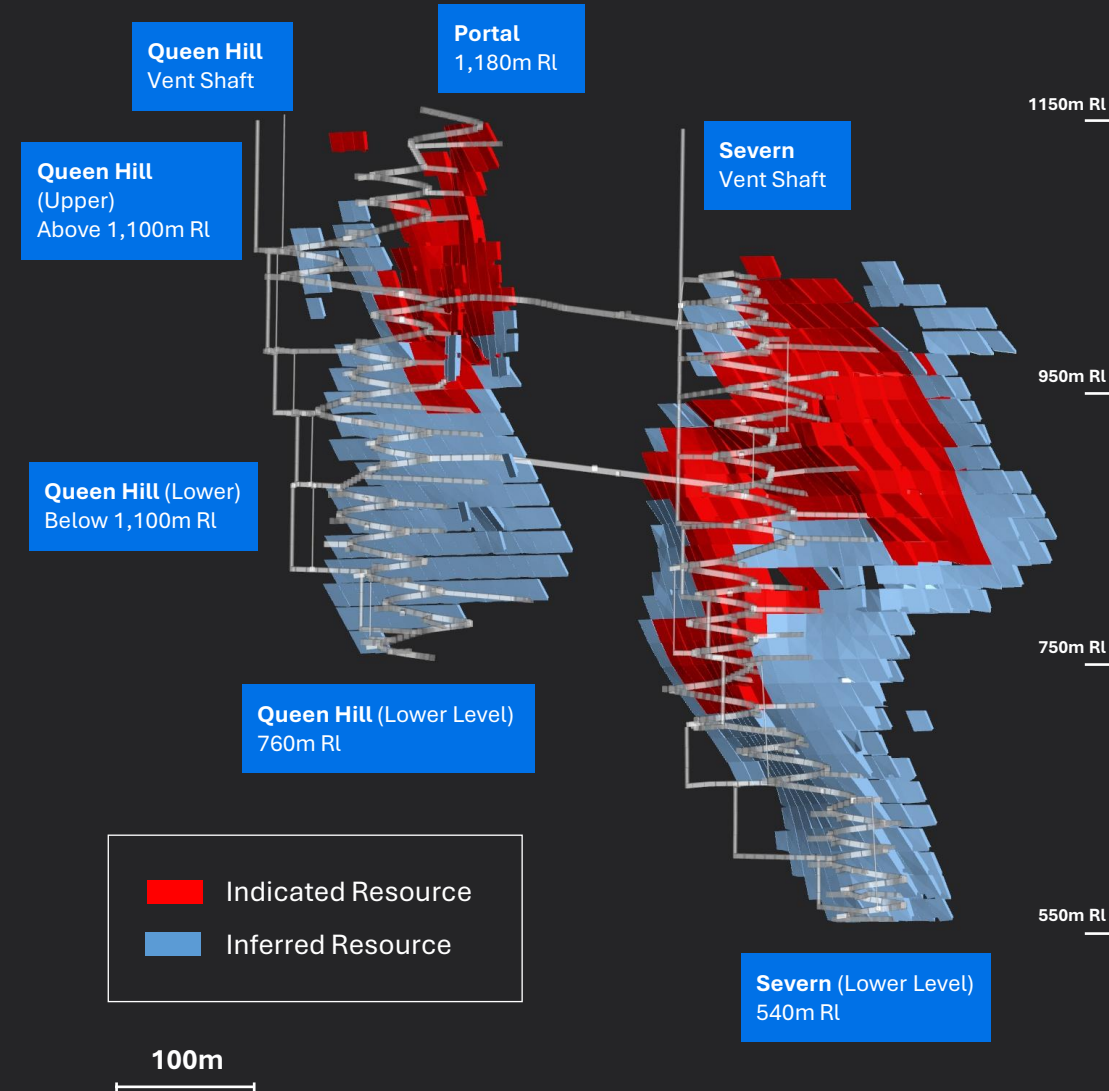

- ↑ Increase Indicated Resource through drilling, allows an:
- ↑ Increase in mining inventory
- ↑ Increase in mining rate up to 750,000 tpa, as confirmed in Scoping Study

Queen Hill Mineral Resource up 41% and Severn upgrade due 3Q 2026

Refer to: ASX Announcement, 3 September 2024, Updated Heemskirk Tin Scoping Study Confirms Attractive Economics
 1 – Mining schedules utilised Indicated Resource material and only incorporated Inferred material when encountered as part of development
 2 - All in Sustaining Costs (AISC) includes mining, processing, concentrate transport and smelting, sustaining capital and royalties

Conceptual Mine Plan

Scoping Study – The Base Case...

Expanded PFS expected to materially improve economics and development optionality

Proposed Heemskirk Tin Processing Plant

2024 Base Case (pre-tax) ~1,900 tpa payable tin

Initial Mine Life	12 year
Average Annual Production	350kt
LOM Tin in Concentrate	+22kt
Capex	A\$71M
Total Ore Mined Indicated Category ¹	97%
AISC (LOM) to Sold Product ²	US\$18,260/t

	Base Case	Spot Price
Tin Price per tonne	US\$28,000	US\$36,000
NPV _{8%}	A\$122M	A\$259M
IRR	33%	59%

Refer to: ASX Announcement 3 September 2024 - Updated Heemskirk Tin Scoping Study
 1 – Mining schedules utilised Indicated Resource material and only incorporated Inferred material when encountered as part of development
 2 - All in Sustaining Costs (AISC) includes mining, processing, concentrate transport and smelting, sustaining capital and royalties

Resource Upgrade – Drilling Ongoing at Severn

Growth and high-grade tin potential

- ★ **Queen Hill**
Resource increased by 41% in February 2026
- ★ **Severn**
Resource upgrade due 3Q 2026
- ★ **Montana**
First drilling since 2012 underway
- ★ **Growth potential**
Depth extensions confirmed and open

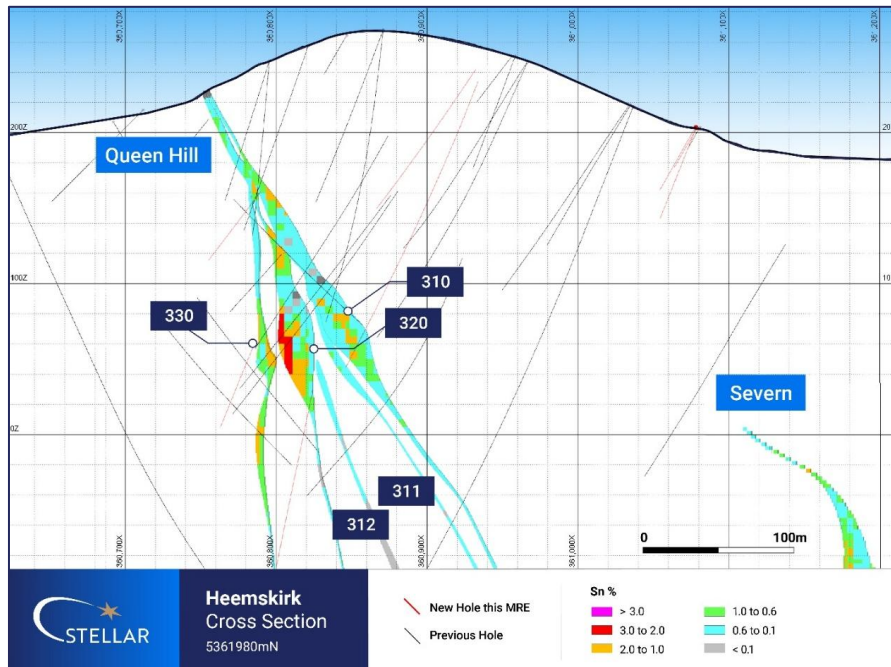

Resource Upgrade Success

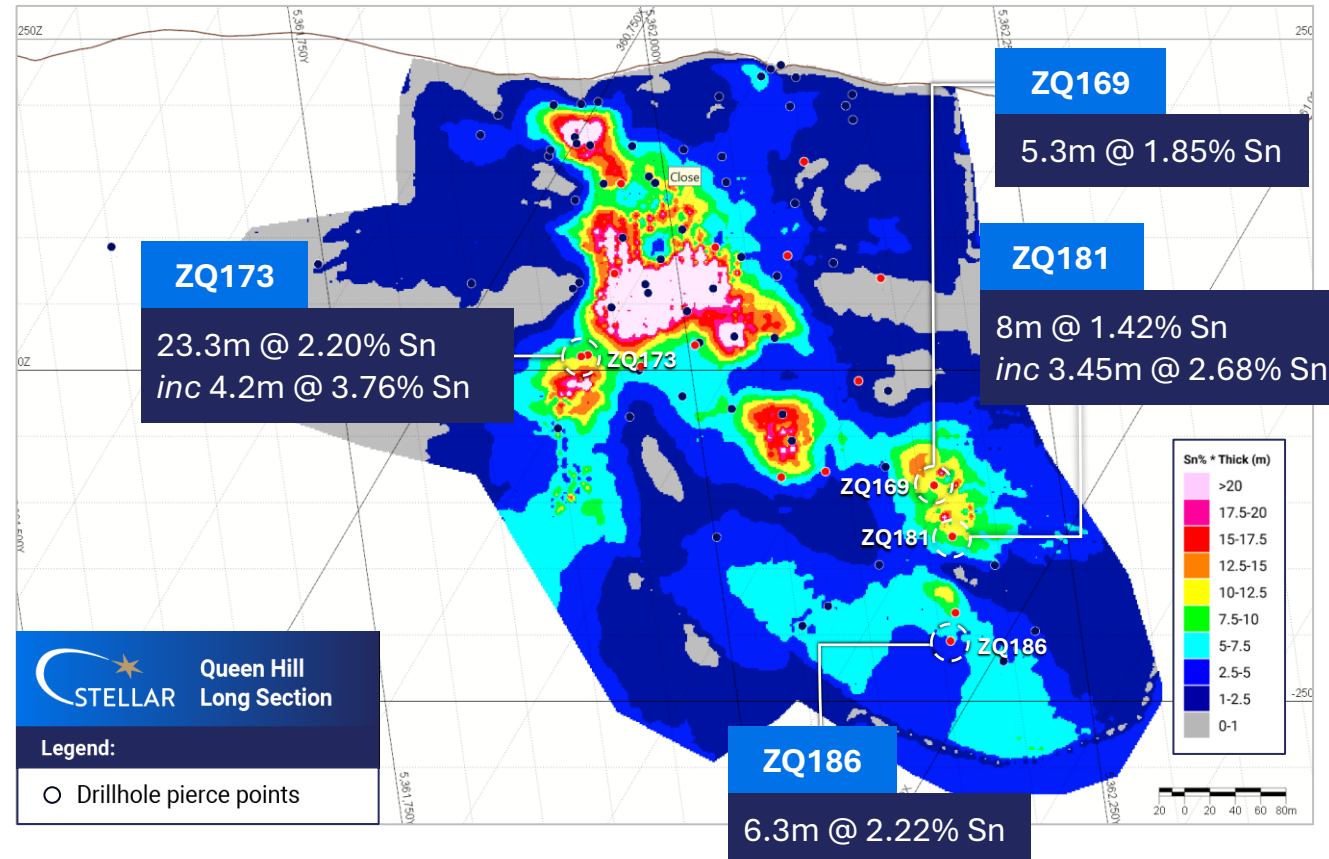

Queen Hill deposit – growth and high-grade tin potential

Updated MRE February 2026

- ★ 41% increase in Total Resource
- ★ 46% increase in Indicated Category

Refer to SRZ ASX Announcements:
 19 November 2024 – Record High-Grade Tin Intersection From Severn Deposit at Heemskirk
 11 February 2025 – Outstanding Wide High-Grade Tin Intersection
 5 May 2025 - High Grade Tin Intercepts at Queen Hill Confirm Heemskirk Resource Extension Potential
 23 February 2026 – Queen Hill Resource Up 41%

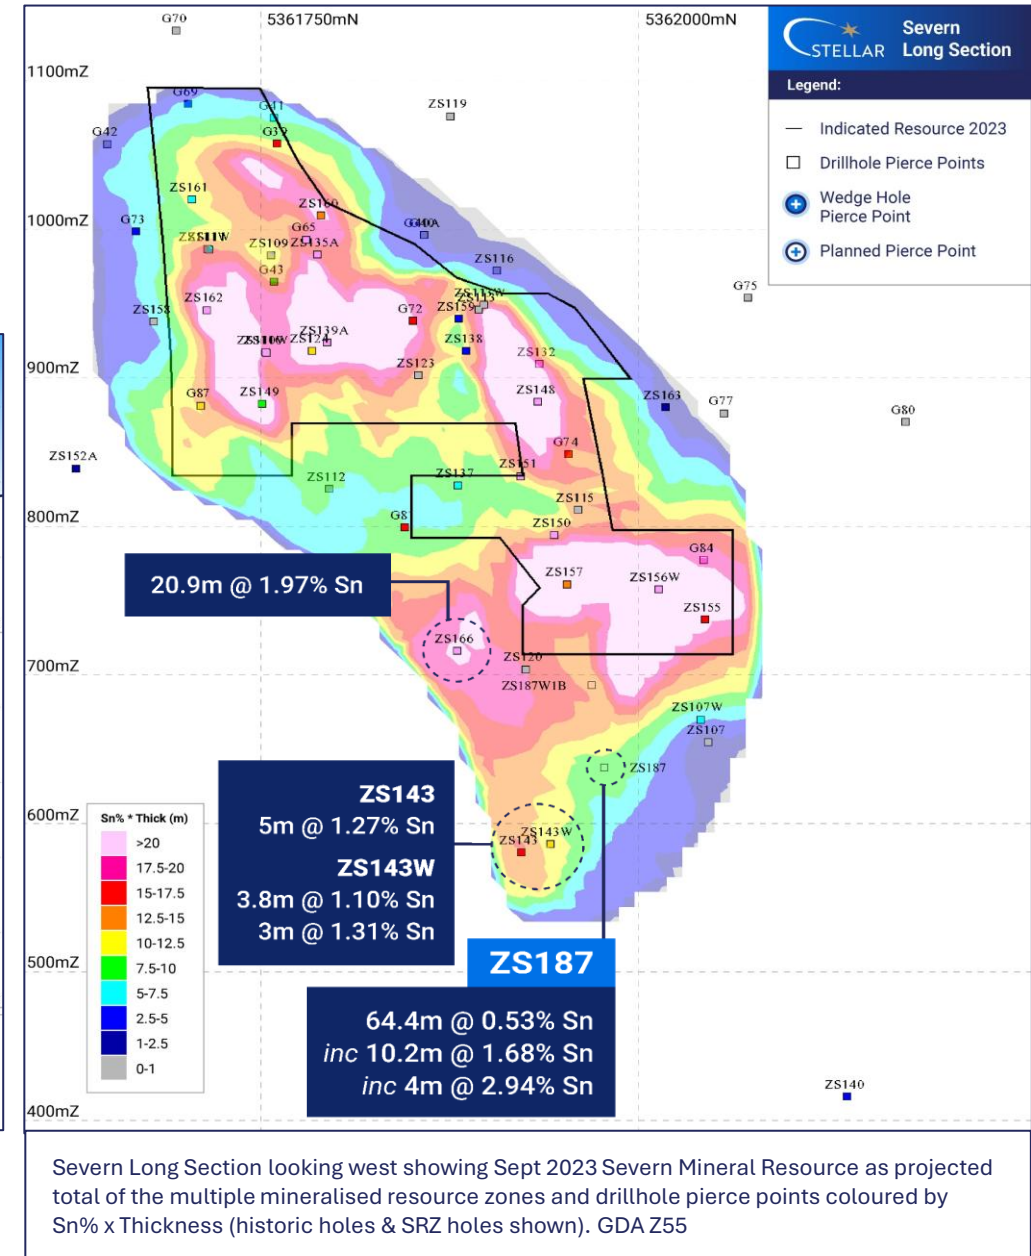

Queen Hill Long Section looking west and the February 2026 Queen Hill Mineral Resource as projected total of the multiple mineralised resource zones and drillhole pierce points coloured by Sn % * Thickness (historic holes & SRZ holes shown). GDA Z55

Refer to ASX Announcements:

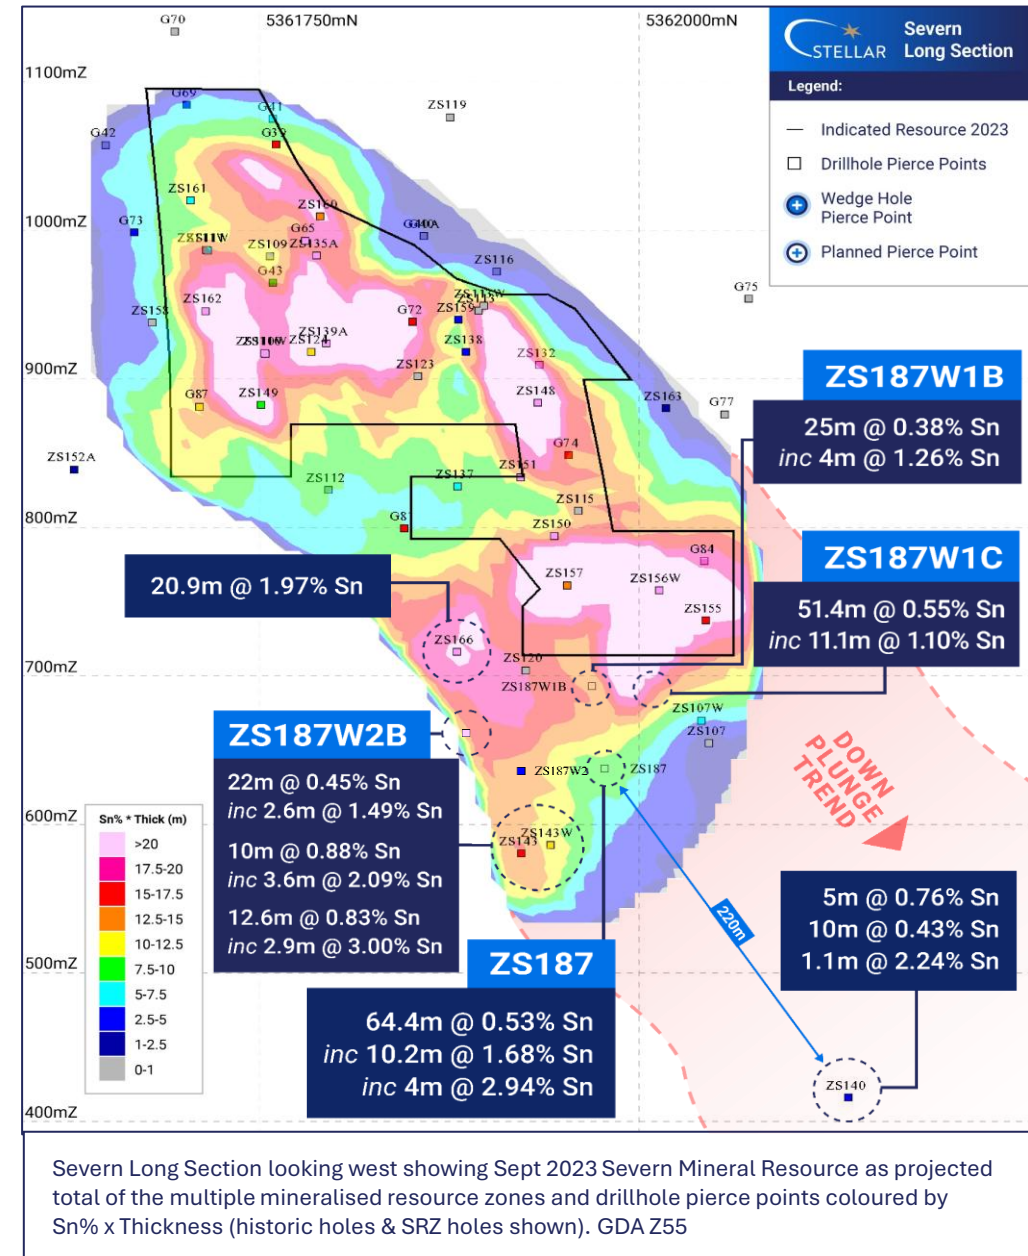

4 September 2023 – Heemskirk Tin Project MRE Update, 19 November 2024 – Record High-Grade Tin Intersection From Severn Deposit at Heemskirk, 28 August 2025 – 64m Tin Intercept at Severn Signals Heemskirk Growth and 14 October 2025 - First Wedge Hole at Severn Returns High-Grade Tin

Resource Upgrade – Drilling Success

Severn deposit – growth and high-grade tin potential

Drillhole Cross Section, showing drillhole results for ZS166, ZS143, ZS143W, and ZS187W2B including the New Zone, Indicated and Inferred Resource blocks from the 2023 MRE.

Severn Long Section looking west showing Sept 2023 Severn Mineral Resource as projected total of the multiple mineralised resource zones and drillhole pierce points coloured by Sn% x Thickness (historic holes & SRZ holes shown). GDA Z55

Refer to ASX Announcements:
 4 September 2023 – Heemskirk Tin Project MRE Update, 19 November 2024 – Record High-Grade Tin Intersection From Severn Deposit at Heemskirk, 28 August 2025 – 64m Tin Intercept at Severn Signals Heemskirk Growth and 14 October 2025 - First Wedge Hole at Severn Returns High-Grade Tin

Ore Sorting – Excellent Results Across Severn Deposit

Ore Sorting XRT Flow Sheet

- ★ High-grade product generated:
 - Head grade increased to **1.65% Sn** from 0.70% Sn average (**2.4 x uplift**)
 - **84.7% Sn recovery** achieved
 - **64.2% of the mass** rejected

- ★ Optimised product generated:
 - Feed grade increased to **0.97% Sn** (**1.4 x uplift**)
 - **96.0% recovery** achieved
 - **28.9% mass** rejected

Refer to: ASX Announcement 28 January 2025 – Ore Sorting Demonstrates Excellent Results at Heemskirk

Ore Sorting – Strong Large-Scale Results at Queen Hill

Waste

Product

High-grade product generated:

- **Head grade increased to 1.50% Sn** from 0.91% Sn average (**1.6 x uplift**)
- **82.4% Sn recovery achieved**
- **50.0% mass rejected**

Optimised product generated:

- **Feed grade increased to 1.13% Sn** (1.2 x uplift)
- **97.2% recovery achieved**
- **21.2% mass rejected**

Ore Sorting – Major Economic Benefits

Waste

Product

- ★ Reduce **plant capital costs and optimise size**
- ★ Lower **operating and processing costs**
- ★ Reduce **tailings volumes**
- ★ Produce **coarse backfill material** for underground mining
- ★ Improved **grade blending** strategies across mine life

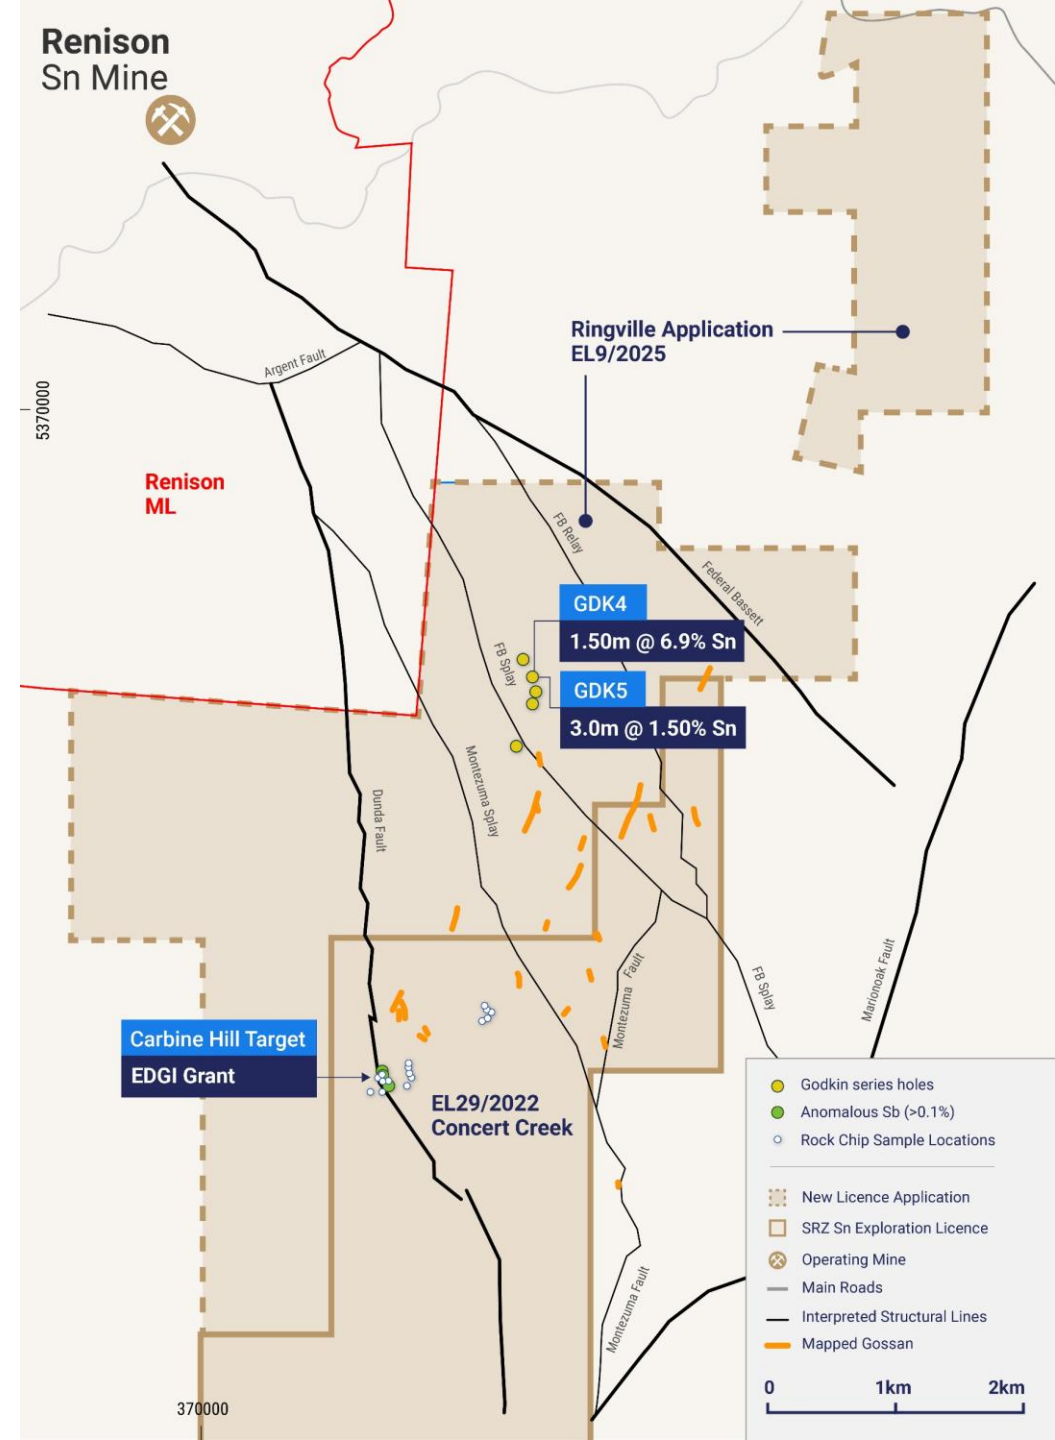

East Renison Project

- ★ Adjoins the Renison Tin Mine mining lease¹ and **covers the interpreted continuation of the Federal-Bassett and Montezuma Faults.**
- ★ These faults are main conduits for hydrothermal fluids that play an important part in the localisation of significant mineralisation in the district.
- ★ **Historical rock chip sampling** has defined a **~3x3km mineralised zone** containing high levels of tin, antimony, gold, silver, copper, bismuth, zinc and lead.
- ★ EDGI co-funding awarded to test **Carbine Hill Target**

Selected Historic rock chip sample highlights¹

Mineral	Sample Results		
Tin (Sn)	2.24%	1.49%	1.34%
Antimony (Sb)	15.5%	11.1%	6.1%
Silver (Ag)	7,751g/t	4,660g/t	3,370g/t
Gold (Au)	0.9g/t	0.8g/t	0.6g/t
Bismuth (Bi)	2.0%	1.6%	1.5%
Base Metals (Cu + Zn + Pb)	49.7%	37.5%	35.1%

¹ SRZ ASX Announcement 29 July 2025 – East Renison Project Update

Granite Tor Project

Strategic location with development optionality

Consolidates Stellar's land holding in Tasmania's World Class Tin Province

- ★ **Acquired Granite Tor Project**
- ★ **Tin potential** – Stream sediment sampling has returned up to **8.1% Sn** with follow up **soil sampling delineating a 4km long >100 ppm Sn anomaly** untested by drilling.
- ★ **REE potential** - Stream and soil sampling results indicate potential for **REE mineralisation returning up to 9.5% Ce.**
- ★ **Large Exploration holding of 156km² through combined East Renison and Granite Tor Projects**

North Scamander

High-grade discovery

- ★ Located in the Scamander Mineral Field in Northeast Tasmania.
- ★ Numerous high-priority drill ready targets including North Scamander and Pinnacles.
- ★ Stream sediment and soil Geochem returned significant rock-chip results up to 1.1% tin.
- ★ Outcropping mineralised gossan and a coincidental regional magnetic anomaly.
- ★ Drilling in 2023 made a significant new high-grade polymetallic discovery.

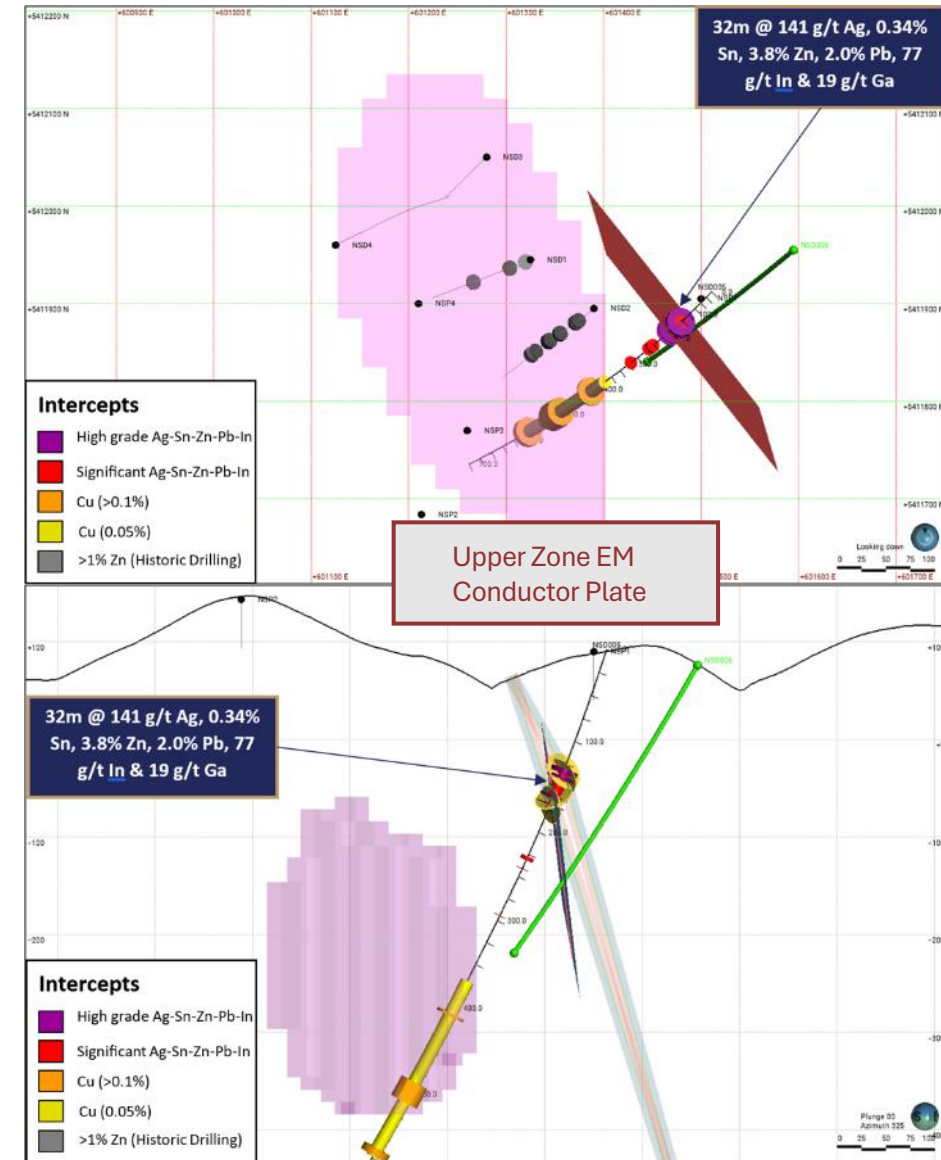

Massive Vein Mineralisation in NSD005 Core from 160.0m to 160.5m

North Scamander Project

High-grade discovery

- ★ Exploration drill hole (NSD005) returned a significant new high-grade Ag-Sn-Zn-Pb-In polymetallic discovery.
- ★ **32.0m @ 141 g/t Ag, 0.34% Sn, 3.8% Zn, 2.0% Pb, 77 g/t In, 19 g/t Ga** from 130.0m inc.
 - **5.0m @ 495 g/t Ag, 1.04% Sn, 5.2% Zn, 7.1% Pb, 113 g/t In, 23 g/t Ga** from 130.0m and
 - **1.4m @ 353 g/t Ag, 2.29% Sn, 14.2% Zn, 8.8% Pb, 594 g/t In, 29 g/t Ga** from 159.7m
- ★ Results include up to; **1,035 g/t Ag, 5.75% Sn, 27.6% Zn, 21.2% Pb, 1,070 g/t In and 37 g/t Ga.**
- ★ Downhole electromagnetic (DHEM) survey completed in Oct 23 has identified multiple downhole conductors in discovery hole NSD005.

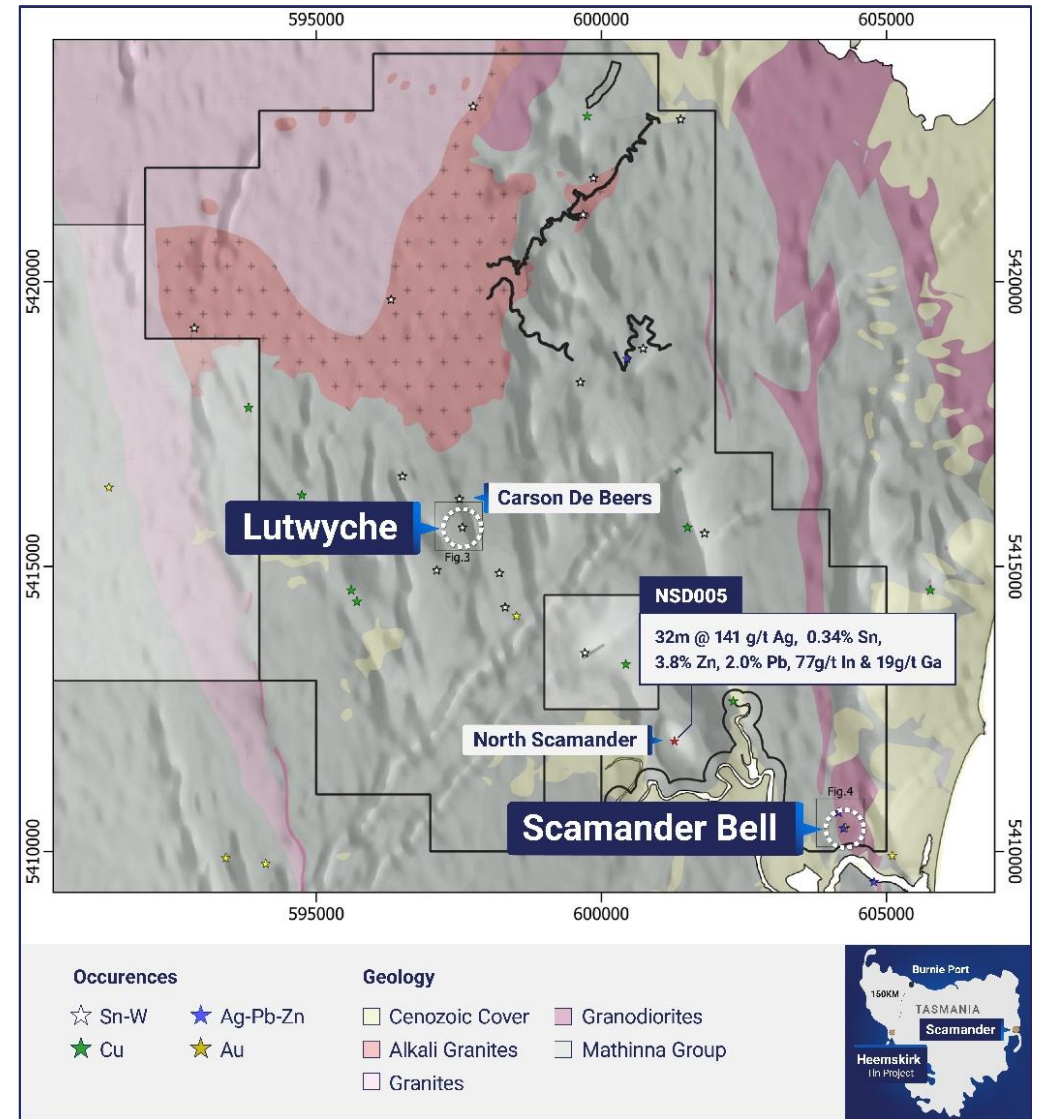

Scamander Project

High-Grade Tungsten and Silver Results

- ★ Reconnaissance rock chip sampling returned high-grade tungsten, bismuth and silver results across multiple prospects.
- ★ The Lutwyche prospect returned high-grade tungsten and bismuth including;
 - ★ **6.91% WO₃, 4.28% WO₃ 4.22% WO₃ and 0.2% Bi**
- ★ Scamander Bell sampling returned very high silver grades;
 - ★ **2,730 g/t Ag, 1,410 g/t Ag and 1,040 g/t Ag**

Coarse wolframite crystals hosted by quartz veins at the Lutwyche Prospect, Scamander Project (Samples **LW26013** (Left) and **LW26006** (Right))

Appendix 1 – 2024 Scoping Study

Summary of Technical and Financial Parameters

	Unit	Total LOM
Ore Production	(kt)	3,894
Sn Grade (LOM Ave)	(%)	0.78
Tin Recovery (LOM Ave)	(%)	75
Tin Produced	(Tonnes)	22,818
Mine Life	(Yrs)	12
Tin Price	(US\$/t)	28,000
Exchange rate	USD:AUD	0.67
Tin Price	(A\$/t)	41,791
Gross Revenue	(A\$M)	877
Total Operating Costs (AISC)	(A\$M)	489
Total Operating Costs (AISC)	(US\$/t Sn)	18,260
Operating Cash Flow	(A\$M)	389
Operating Margin	(%)	44%
Capital Cost	(A\$M)	71
Net Cash Flow (Pre-Tax)	(A\$M)	267
Pre-Tax NPV _{8%}	(A\$M)	122
Post-Tax NPV _{8%}	(A\$M)	75
IRR (Pre-Tax)	(%)	33
Payback Period	(Yrs)	3.5
Pre-Tax NPV / Capex		1.7

Capital Cost Summary

	(A\$M)	(US\$M)
Mining	11	7
Processing & Surface Infrastructure	40	27
Tailings	6	4
Working Capital	12	8
Contingency	2	1
Total Development Capital Cost	71	48

Tin Price Sensitivity

	Tin Price (US\$/t Sn)				
	26,000	28,000	30,000	32,000	34,000
NPV Pre Tax	87	122	156	190	225
IRR Pre Tax	26%	33%	39%	46%	52%
NPV Post Tax	51	75	99	123	147
IRR Post Tax	20%	26%	31%	36%	41%
Payback	4.25	3.50	3.00	2.75	2.50

Average Head Grade, Recovery and Concentrate Grade by Deposit

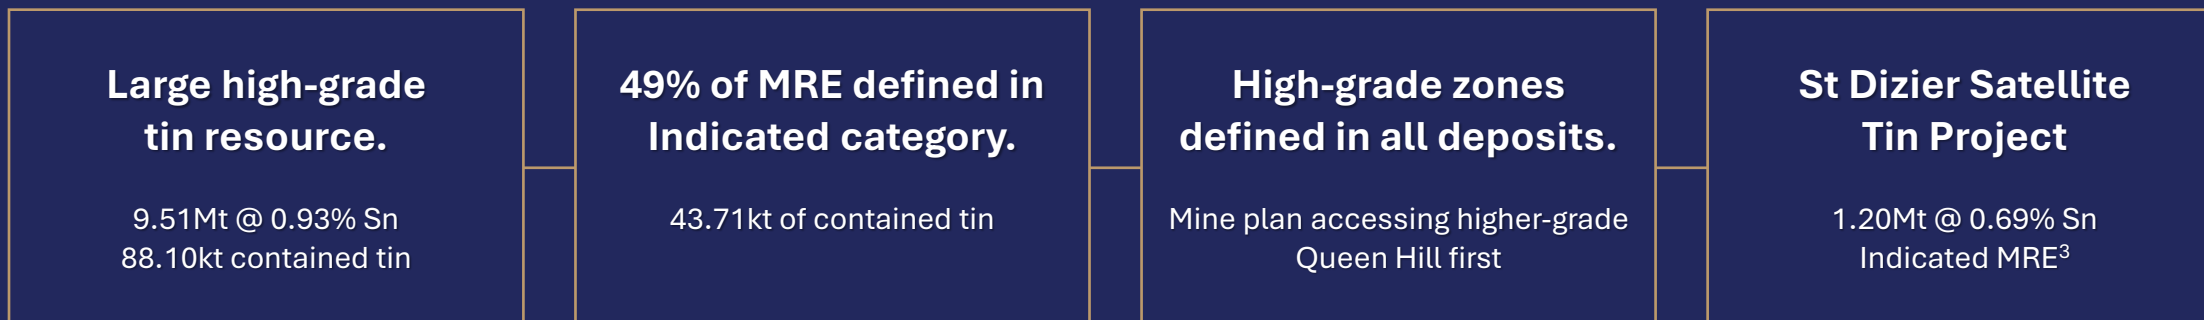

Parameter	Unit	Upper	Lower	Severn	LOM
		Queen Hill	Queen Hill		Schedule
Head Grade	% Sn	0.99%	1.04%	0.71%	0.78%
Recovery	%	53%	66%	80%	75%
Conc Grade	% Sn	48%	48%	49%	49%

Operating Costs Summary

	Total LOM (A\$M)	Annual Ave (A\$M)	A\$/t Ore	A\$/t Sn	US\$/t Sn
Mining	303	25.3	78	13,288	8,903
Processing	169	14.1	43	7,406	4,962
Concentrate transport & smelting	83	7.0	21	3,657	2,450
Sustaining Capital	9	0.7	2	378	253
Royalties	57	4.8	15	2,518	1,687
Total All In Sustaining Cash Costs (AISC)	622	52	160	27,247	18,256

Appendix 2 – Heemskirk Mineral Resource Estimate

February 2026

Classification	Deposit	Tonnes (Mt)	Sn (%)	Sn Tonnes (kt)	Cassiterite % of Total Sn (%)	Cu (%)	Pb (%)	Zn (%)	Year

^{1,2} Cautionary Statement

In the peer resources disclosed in table above:

Footnoted item 1 was reported by the relevant company under the Canadian NI 43-101 and is a qualifying foreign estimate of mineralisation.

Footnoted items 2

- the data are not reported in accordance with the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (referred to as the "JORC Code (2012)");
- a Competent Person has not done sufficient work to classify the historical estimates or foreign estimates as Mineral Resources or Ore Reserves in accordance with the JORC Code (2012); and
- it is uncertain that following evaluation if the historical estimates or foreign estimates will be able to be reported as Mineral Resources or Ore Reserves in accordance with the JORC Code (2012).

Mr Andrew Boyd (BSc), a Competent Person, who is an Executive Director of Stellar Resources, and a member of the Australasian Institute of Geologists, has considered the information for the foreign estimates of mineralisation for the peer resources disclosed in the table above and considers that the information disclosed is an accurate representation of the available data for the peer resource.

Mr Boyd consents to the inclusion in this Study of the matters based on this information in the form and context which it appears, with relevant links provided for each resource embedded as a hyperlink.
