Dear Jakub,

## **DECIDR AI INDUSTRIES LTD (ASX: DAI) - TRADING HALT REQUEST**

Decidr AI Industries Ltd (ASX: DAI) (“Decidr” or “the Company”) requests an immediate trading halt be granted by the ASX with respect to the Company’s securities quoted on the Australian Securities Exchange.

In accordance with Listing Rule 17.1 the Company advises that:

- a) the reason for the request is pending an announcement in relation to a material capital raise;
- b) it anticipates that the trading halt will remain in place until the earlier of the commencement of normal trading on Thursday, 7 May 2026 or the release of an announcement by the Company in relation to the material capital raise;
- c) the Company is not aware of any reason why the trading halt should not be granted;
- d) the capital raising is material to the Company; and
- e) there is no other information necessary to inform the market about the trading halt.

This ASX release and request has been authorised for release by the Board of DAI.

Yours faithfully,

David Hwang  
Company Secretary

## About Decidr AI Industries (ASX:DAI)

Decidr AI Industries (ASX: DAI) is an agentic transformation group building and scaling portfolio companies that enable organisations to systematically organise, execute, and distribute work using enterprise-grade agentic systems. The Company's strategy addresses the full agentic lifecycle, including organisational self-knowledge, human and agentic role definition, data and schema normalisation, task orchestration, and the distribution of work across teams, partners, and labour markets.

DAI's portfolio includes Decidr.ai, developer of the Decidr Agentic Operating System, which provides an enterprise-grade platform for orchestrating agentic workflows and decision-making, and Sugarwork, a knowledge-capture and workflow-automation platform that strengthens the group's capabilities in organisational intelligence and enterprise AI adoption.

Through its portfolio companies, DAI supports organisations as they transition from fragmented AI experimentation to coordinated, scalable, and commercially deployable agentic systems across industries and geographies.
