

ASX ANNOUNCEMENT 7TH MAY 2026

ASX:VTX

ORE PRODUCTION UPDATE, REWARD GOLD MINE

Operational Milestones

- ✓ Strong emphasis on development throughout April with 78 metres of advance development achieved and an additional 42 metres of development rehabilitation completed during the month.
- ✓ 53 oz of gold sold in April, with approximately another 32 oz of gold on hand and available for sale.
- ✓ Vertex has placed an order, with construction commencing on a Muki LHBP from Resemin, a narrow vein long hole rig. This machine will allow accurate blast hole drilling to support production activities using the new smaller drive sizes. (Figure 2)
- ✓ The second Aramine loader has arrived onsite at the Reward Gold Mine and is now underground and fully operational with Teleremotes (Figure 3).
- ✓ The second Bird underground truck is under construction. The second truck will remove a critical production bottleneck.
- ✓ Decline 3 flatback lift two has commenced (Figure 1), with ore to commence processing in early May.
- ✓ Two new air-leg stopes, targeting our high grade Paxtons Reef on the 671 and 677 levels have commenced.
- ✓ Scheduling improvements continues to be implemented to improve the number of production mining fronts in our LOM. Accessing from Decline 2 will allow a centre retreat mining sequence from the 600 level and set up for mining below the current known resource.
- ✓ DA modification to change work hours and blasting time, which has been limiting underground work hours, has been progressing.

Vertex Minerals Limited (ASX: VTX) (“Company”) is pleased to announce that it has progressed with underground development, whilst remaining on track to commence mining the first long hole in October 2026.

The emphasis remains on prompt rehabilitation of the declines to get to the lower levels, so long hole stope mining can commence from bottom up.

April 2026 has seen lower production of gold compared with March, which was expected and in line with the current mine plan, as all ore processed throughout the month came from development ore with no airleg or jumbo flatback stopes online throughout the month.

The current restrictions around both work hours and blasting times have been identified as significant factors in limiting available underground working hours. DA modifications to change the working and blast hours for the Reward Gold Mine are currently assessed by Bathurst Regional Council.

Going forward, the Company expects to see the benefits from the establishment of multiple mining areas and development levels for underground mining production.

Vertex Minerals Limited

ASX Code: VTX

ABN: 68 650 116 153

Vertex Flagship Project

- ✓ Commenced gold processing in new Gekko gravity gold plant
- ✓ 100% owned mining operation
- ✓ No hedge
- ✓ High grade gold resource and reserve 225 ozs at 16.7g/t + more
- ✓ Inherited AU\$25 million of underground development at Reward
- ✓ 1.8m Au ozs historic mining
- ✓ Reward sits just under the historic Hawkins Hill mine - 435kozs at 309 g/t Au
- ✓ Production has commenced on stockpiles.
- ✓ Underground development underway
- ✓ Up to 95% recovery by gravity processes only
- ✓ Big gold system – 25km + strike

Mineral Resource Estimate (MRE) for the Reward gold deposit at Hill End now stands at 419,000t at 16.72g/t Au for 225,200oz Au¹:

Classification	Cut-off	Tonnes	Au (g/t)	Ounces
Indicated	4	141,000	15.54	70,500
Inferred	4	278,000	17.28	154,700
Total	4	419,000	16.72	225,200

Global Mineral Resource estimate for the Hill End & Hargraves Gold Project

Hill End Project Mineral Resource Estimate				
Deposit	Classification	Tonnes (kt)	Grade Au (g/t)	Contained Au (koz)

FORWARD LOOKING STATEMENTS AND IMPORTANT NOTICE

This report contains forecasts, projections and forward-looking information. Although the Company believes that its expectations, estimates and forecast outcomes are based on reasonable assumptions it can give no assurance that these will be achieved. Expectations and estimates and projections and information provided by the Company are not a guarantee of future performance and involve unknown risks and uncertainties, many of which are out of Vertex Minerals' control.

Actual results and developments will almost certainly differ materially from those expressed or implied. Vertex Minerals has not audited or investigated the accuracy or completeness of the information, statements and opinions contained in this announcement. To the maximum extent permitted by applicable laws, Vertex Minerals makes no representation and can give no assurance, guarantee or warranty, express or implied, as to, and takes no responsibility and assumes no liability for the authenticity, validity, accuracy, suitability or completeness of, or any errors in or omission from, any information, statement or opinion contained in this report and without prejudice, to the generality of the foregoing, the achievement or accuracy of any forecasts, projections or other forward looking information contained or referred to in this report. Investors should make and rely upon their own enquiries before deciding to acquire or deal in the Company's securities.

JORC COMPLIANCE STATEMENTS

Where statements in this announcement refer to exploration results which previously been reported, the Company confirms that it is not aware of any new information or data that materially affects the information included in the original announcements, and in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not materially modified from the original market announcements.

COMPETENT PERSON'S STATEMENT

The information in this report that relates to Exploration Results and Exploration Targets is based on information compiled by Mr. Roger Jackson, a Director and Shareholder of the Company, who is a 25+ year Fellow of the Australasian Institute of Mining and Metallurgy (FAusIMM), Fellow of the Australian Institute of Geoscientists (FAIG) and a Member of Australian Institute of Company Directors. Mr Jackson is the Executive Chairman and a full-time employee of Vertex Minerals Limited ("Company"), and a shareholder of the Company. Mr. Jackson has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration results, Mineral Resources and Ore Reserves". Mr. Jackson consents to the inclusion of the data contained in relevant resource reports used for this announcement as well as the matters, form and context in which the relevant data appear.
