## \$22 Million Contract Win for Major Retailers New HQ

SKS Technologies Group Limited (ASX: SKS) has received written confirmation from Buildcorp Group Pty Ltd for the award of a contract to supply and install a fully integrated electrical technology solution for a major retailing group for its new headquarters in Melbourne’s Docklands precinct. The project is valued at approximately \$22 million.

SKS Technologies Chief Executive Officer, Matthew Jinks, said, “The awarding of this project reflects our reputation and position in the market for quality and capability, reinforcing our business as a trusted partner for complex, large-scale commercial developments. It also further strengthens market confidence in our team’s ability to execute critical infrastructure with precision, safety and efficiency.

“Boosting our traditional work on hand, the project validates our continued focus on securing work in non data centre sectors and advances our strategy to build relationships with end-user clients.”

The project scope includes the provision of a complete electrical ecosystem, from core electrical infrastructure and distribution systems to advanced lighting, communications and IT, and smart building system integration.

The project is due for completion in 1Q28.

With this project win, the business’ order book now sits at a total of \$355 million, of which approximately \$270 million of work extends beyond the traditional 12-month horizon into 2H27. The longer-tailed work on hand profile is a result of larger contract values with more complex technical requirements that span longer periods of time.

Since February 2026, the pipeline of work currently under tender has increased by almost 120% from \$572.26 million to \$1.25 billion. Data centre tenders comprise just over \$1 billion of the total pipeline compared with \$423.56 million in February 2026.
