

# WEST AFRICA'S GROWING MID TIER PRODUCER

TARGETING +500,000 oz pa GOLD PRODUCTION FROM 2027

ANNUAL GENERAL MEETING - 8 MAY 2026

# IMPORTANT NOTICE

## DISCLAIMER

The following notice and disclaimer apply to this presentation (**Presentation**) and you are advised to read this carefully before reading or making any other use of this Presentation or any information contained in this Presentation.

This Presentation is dated 8 May 2026 and has been prepared by West African Resources Limited ABN 70 121 539 375 (**WAF** or the **Company**). The Company together with its subsidiaries are referred to in this Presentation as **West African** or the **Group**.

The Company and its subsidiaries and each of their respective directors, agents, officers, employees and advisers expressly disclaim, to the maximum extent permitted by law, all liabilities (however caused, including negligence) in respect of, and make no representations or warranties regarding this Presentation or any part thereof. In particular, this Presentation does not constitute, and shall not be relied upon as, a promise, representation, warranty or guarantee as to the past, present or the future performance of any member of the Group.

## SUMMARY INFORMATION

This Presentation is a summary only, containing summary information about West African and remains subject to change without notice. The information in this Presentation is general in nature and does not purport to be accurate nor complete, nor does it contain: all of the information that an investor may require in evaluating a possible investment in WAF; or all the information which would be required in a disclosure document or prospectus prepared in accordance with the requirements of the *Corporations Act 2001* (Cth). This Presentation has been prepared by WAF with due care but no representation or warranty, express or implied, is made in relation to the accuracy, reliability, fairness or completeness of the statements, information, opinions or conclusions in this Presentation. The information set out in this Presentation is current as at the date of the Presentation (unless otherwise indicated). WAF has no obligation to finalise, correct or update the content of this Presentation except as required by law and WAF does not undertake to update this Presentation. Certain data used in this Presentation may have been obtained from research, surveys or studies conducted by third parties, including industry or general publications. This Presentation should be read in conjunction with WAF's other periodic and continuous disclosure announcements lodged with the ASX, which are available at [www2.asx.com.au](http://www2.asx.com.au) or at <https://www.westafricanresources.com/investor-centre/announcements/>.

## NOT AN OFFER

Neither this Presentation nor any of its contents will form the basis of any understanding, proposal, offer, invitation, contract or commitment. This Presentation does not constitute or contain an offer, invitation, solicitation or recommendation to subscribe for, acquire or sell any securities in WAF or any other financial products or securities, in any place or jurisdiction. This document is not a prospectus, product disclosure statement or other offering document under Australian law or any other law, and it will not be lodged with the Australian Securities and Investments Commission.

## NOT FINANCIAL PRODUCT ADVICE

This Presentation, and the information provided in it, does not constitute, and is not intended to constitute, financial product or investment advice, financial, legal, tax, accounting or other advice, or a recommendation to acquire any securities of WAF. It has been prepared without taking into account the objectives, financial or tax situation or particular needs of any individual. Before making an investment decision, prospective investors should consider the appropriateness of the information having regard to their own objectives, financial and tax situation and needs and seek professional advice from their legal, financial, taxation or other independent adviser (having regard to the requirements of all relevant jurisdictions). WAF is not licensed to provide financial product advice in respect of an investment in shares.

## FINANCIAL DATA

All dollar values in this Presentation are in either Australian Dollars (A\$) or United States Dollars (US\$) as indicated.

## PAST PERFORMANCE

Past performance metrics and figures (including past share price performance of WAF), as well as pro forma financial information, included in this Presentation are given for illustrative purposes only and should not be relied upon as (and are not) an indication of the views of the Company or any of its directors, agents, officers, employees or advisers on WAF's future financial performance or condition or prospects. Investors should note that past performance of WAF, including in relation to the historical trading price of WAF securities, production, mineral resources and ore reserves, costs and other historical financial information cannot be relied upon as an indicator of (and provides no guidance, assurance or guarantee as to) future WAF performance. The historical information included in this Presentation is, or is based on, information that has previously been released to the market.

## NON IFRS FINANCIAL MEASURES

The Company has included certain non-IFRS financial measures in this Presentation, including adjusted cash costs, site sustaining costs (**SSC**) and all-in sustaining costs (**AISC**) per ounce of gold produced. These non-IFRS financial measures do not have any standardised meaning. Accordingly, these financial measures are intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with International Financial Reporting Standards (**IFRS**). Operating cash costs, site sustaining costs and all-in-sustaining cash costs are a common financial performance measure in the mining industry but have no standard definition under IFRS. Operating cash costs are reflective of the cost of production. AISC include operating cash costs, net-smelter royalty, corporate costs, sustaining capital expenditure, sustaining exploration expenditure and capitalised stripping costs. SSC are similar to AISC but do not include corporate costs. EBITDA also has no standard definition under IFRS. The Company calculates EBITDA as net profit or loss for the period excluding finance costs, income tax expense and depreciation. EBITDA excludes the impact of cash costs of financing activities and taxes and the effects of changes in working capital balances and therefore is not necessarily indicative of operating profit or cash flow from operations as determined under IFRS. Other companies may calculate these measures differently.

## FORWARD LOOKING STATEMENTS

This Presentation contains "forward-looking information" including information relating to WAF's future financial or operating performance. All statements in this presentation, other than statements of historical fact, that address events or developments that WAF expects to occur, are "forward-looking statements". Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "does not expect", "targets", "plans", "anticipates", "does not anticipate", "believes", "intends", "estimates", "projects", "potential", "scheduled", "forecast", "budget" and similar expressions, or that events or conditions "will", "would", "may", "could", "should" or "might" occur. All such forward-looking statements are based on the opinions and estimates of the relevant management as of the date such statements are made and are subject to important risk factors and uncertainties, many of which are beyond WAF's ability to control or predict. Forward-looking statements are necessarily based on estimates and assumptions that are inherently subject to known and unknown risks, uncertainties and other factors that may cause actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking statements.

# IMPORTANT NOTICE

## FORWARD LOOKING STATEMENTS continued

In the case of WAF, these facts include, in particular operating cashflows, net profit after tax (**NPAT**) and future production estimates which are based on assumptions including, but not limited to: meeting production estimates; mineral resource and ore reserve estimates not having to be re-estimated; no unexpected costs arising; the availability of future funding for the development of projects; and no adverse circumstances from risks and uncertainties eventuating. This information relates to analyses and other information that is based on expectations of future performance and planned work programs. Statements concerning mineral resource and ore reserve estimates and future production may also be deemed to constitute forward-looking information. Other forward-looking information includes: estimates of internal rates of return; net present value; future production; estimates of cash cost; assumed long term price for gold; proposed mining plans and methods; mine life estimates; cashflow forecasts; metal recoveries; and estimates of capital and operating costs.

Forward-looking information is subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking information, including, without limitation, risks and uncertainties related to: exploration hazards; exploration and development of natural resource properties; uncertainty in ability to obtain funding; the adequacy of infrastructure; gold price fluctuations; market events and conditions; the uncertainty of mineral resource calculations and the inclusion of inferred mineral resources in economic estimation; unforeseen changes in geological characteristics; metallurgical characteristics of mineralisation, costs of consumables and mining and processing equipment; unforeseen technological and engineering problems; the business being subject to laws and regulations (including in relation to the environment) and their interpretation which may be subject to change; the availability and productivity of skilled labour; the regulation of the mining industry by various governmental agencies; in country risks and political factors; results of drilling; metallurgical testing and other studies; proposed mining operations, including dilution; the evaluation of mine plans subsequent to the date of any estimates; obtaining required permits, approvals and licences and the possible failure to receive or changes in any of them; the mineral properties being subject to prior unregistered agreements, transfers, or claims and other defects in title; competition from larger companies with greater financial and technical resources; the inability to meet financial obligations under agreements to which it is a party; ability to recruit and retain qualified personnel; and directors and officers becoming associated with other natural resource companies which may give rise to conflicts of interests. This list is not exhaustive of the factors that may affect WAF's forward-looking information. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the forward-looking information.

WAF's forward-looking information is based on the reasonable beliefs, expectations and opinions of the relevant management on the date the statements are made and WAF does not assume any obligation to update forward looking information if circumstances or management's beliefs, expectations or opinions change, except as required by law. For the reasons set forth above, investors should not place undue reliance on forward-looking information. For additional information, please refer to WAF's financial statements and other filings all of which are filed on the ASX at [www.asx.com.au](http://www.asx.com.au) and the Company's website [www.westafricanresources.com](http://www.westafricanresources.com).

## MINERAL RESOURCES, ORE RESERVES AND PRODUCTION TARGETS

The Company's estimate of Mineral Resources and Ore Reserves and the production target for the Group are set out in the announcement titled "WAF 10-year gold production to average 533,000 oz per annum" released 31 March 2026. The Company confirms it is not aware of any new information or data that materially affects the information included in that announcement and that all material assumptions and technical parameters underpinning the estimates of Mineral Resources and Ore Reserves for the Group and all the material assumptions underpinning the production target and forecast financial information derived from it continue to apply and have not materially changed.

Rounding is applied for all Mineral Resources and Ore Reserves figures in this Presentation.

## EXPLORATION RESULTS

The exploration results referred to in this Presentation were reported in the announcement titled "WAF 10-year gold production to average 533,000 oz per annum" released 31 March 2026. The Company confirms it is not aware of any new information or data that materially affects the information included in those announcements.

## JORC CODE

It is a requirement of the ASX Listing Rules that the reporting of Ore Reserves and Mineral Resources in Australia comply with the JORC Code. Investors outside Australia should note that while the Company's estimates of Ore Reserves and Mineral Resources in this Presentation comply with the JORC Code (such JORC Code-compliant Ore Reserves and Mineral Resources being referred to as **Ore Reserves** and **Mineral Resources** respectively), they may not comply with the relevant guidelines in other countries and, in particular, do not comply with: (i) NI 43-101; or (ii) Item 1300 of Regulation S-K, which governs disclosures of mineral reserves in registration statements filed with the SEC. Information contained in this Presentation describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws.

# WEST AFRICA'S GROWING MID-TIER GOLD PRODUCER

100% UNHEDGED MINERAL RESOURCES AND ORE RESERVES

2026 Guidance	Mineral Resources	Ore Reserves	10 Year Production Target	Exploration Permits	Market Capitalisation

## GROUP 10-YEAR PRODUCTION TARGET

There is a low level of geological confidence associated with Inferred Mineral Resources, and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised.

- Mineral Resources increased to 13.7 Moz gold
- Ore Reserves increased to 7 Moz gold
- Production target:
  - 533,000 oz pa average 2026 – 2035
  - 596,000 oz pa peak in 2030
- 10-year production target based on 82% Ore Reserves, 3% Indicated Mineral Resources and 15% Inferred Mineral Resources at gold price of US\$2000/oz (open pit and underground)
- +100,000m exploration drilling planned for 2026, including:
  - 21,000m underground drilling at M5 to convert inferred resources in the 10-year mine plan
  - 11,000m surface drilling at M5 North targeting additional resource and reserve growth
  - 13,500m drilling at Toega converting the inferred resource and extending resource at depth
  - 7,500m drilling at Kiaka testing cut-back or underground potential
  - 7,000m drilling at MV3 deposit to assess underground potential

Refer to ASX announcement titled “WAF 10-year gold production to average 533,000 oz per annum” released 31 March 2026.

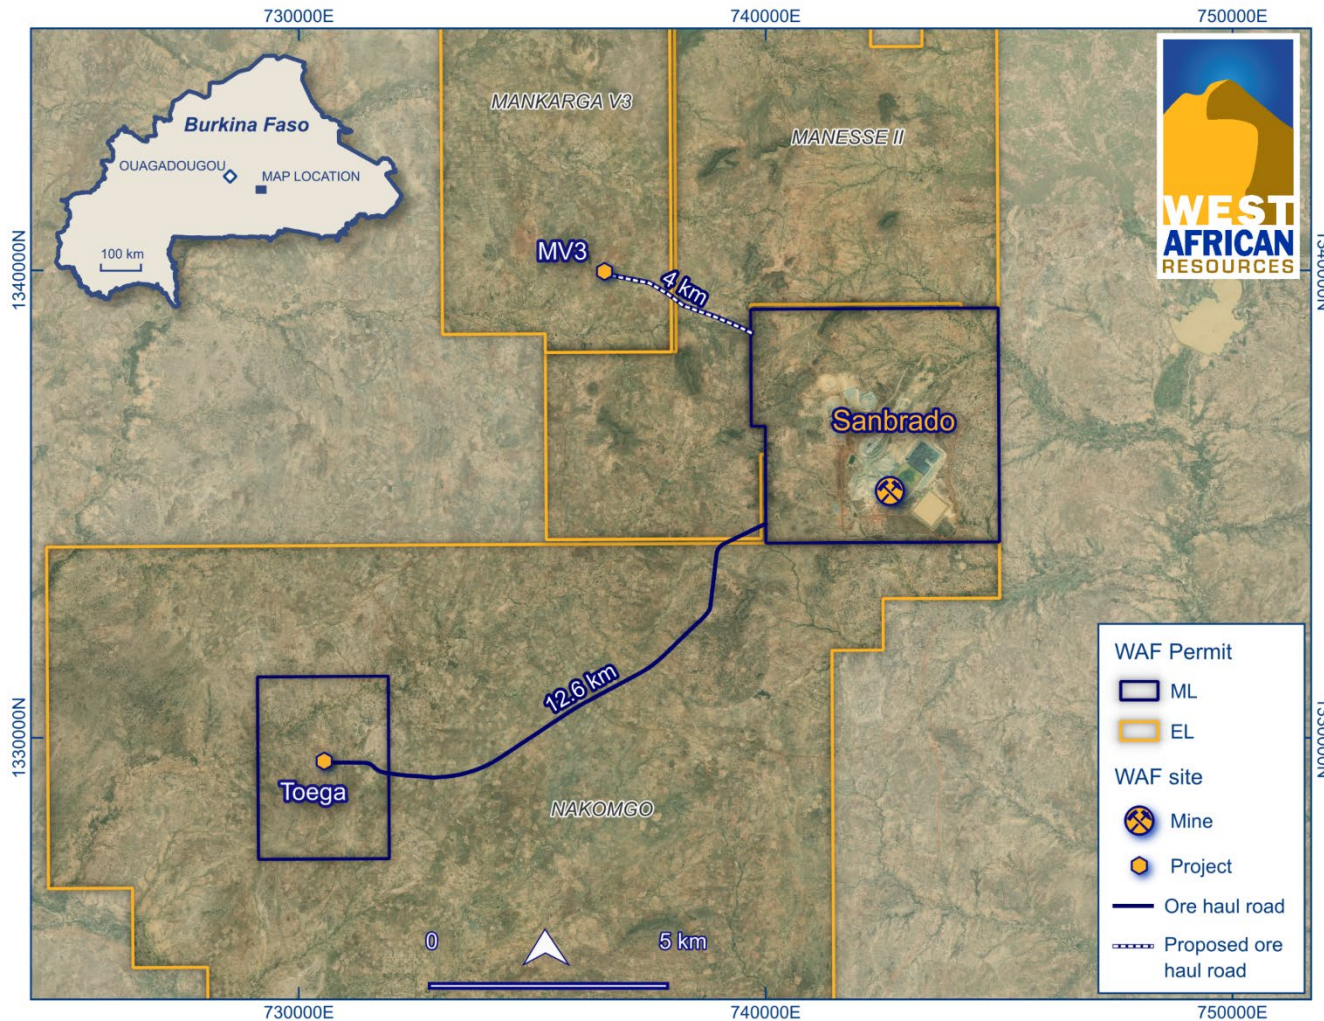

# WEST AFRICAN RESOURCES LTD

## SANBRADO GOLD PRODUCTION CENTRE

# SANBRADO GOLD OPERATIONS

## KEY PROJECT METRICS

<b>Location</b>	South-central Burkina Faso, West Africa
<b>Ownership</b>	WAF 85%; Burkina Faso government 15%
<b>Type</b>	Open-pit and underground mining
<b>Resources</b>	67 Mt at 2.0 g/t for 4.4 Moz gold (US\$3,000)
<b>Reserves</b>	37 Mt at 1.9 g/t for 2.3 Moz gold (US\$2,000)
<b>Mine life</b>	+11 years
<b>Processing</b>	Conventional 3.2 Mtpa CIL + gravity
<b>Recovery LOM</b>	92%
<b>First production</b>	March 2020
<b>Production</b>	2026 to 2035 average 256,000 oz per annum
<b>Workforce</b>	95% Burkinabe including 55% from local region
<b>Tax</b>	27.5%
<b>Gov. participation</b>	15% equity, 11% royalty*+ 1% community fund

There is a low level of geological confidence associated with Inferred Mineral Resources, and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised.

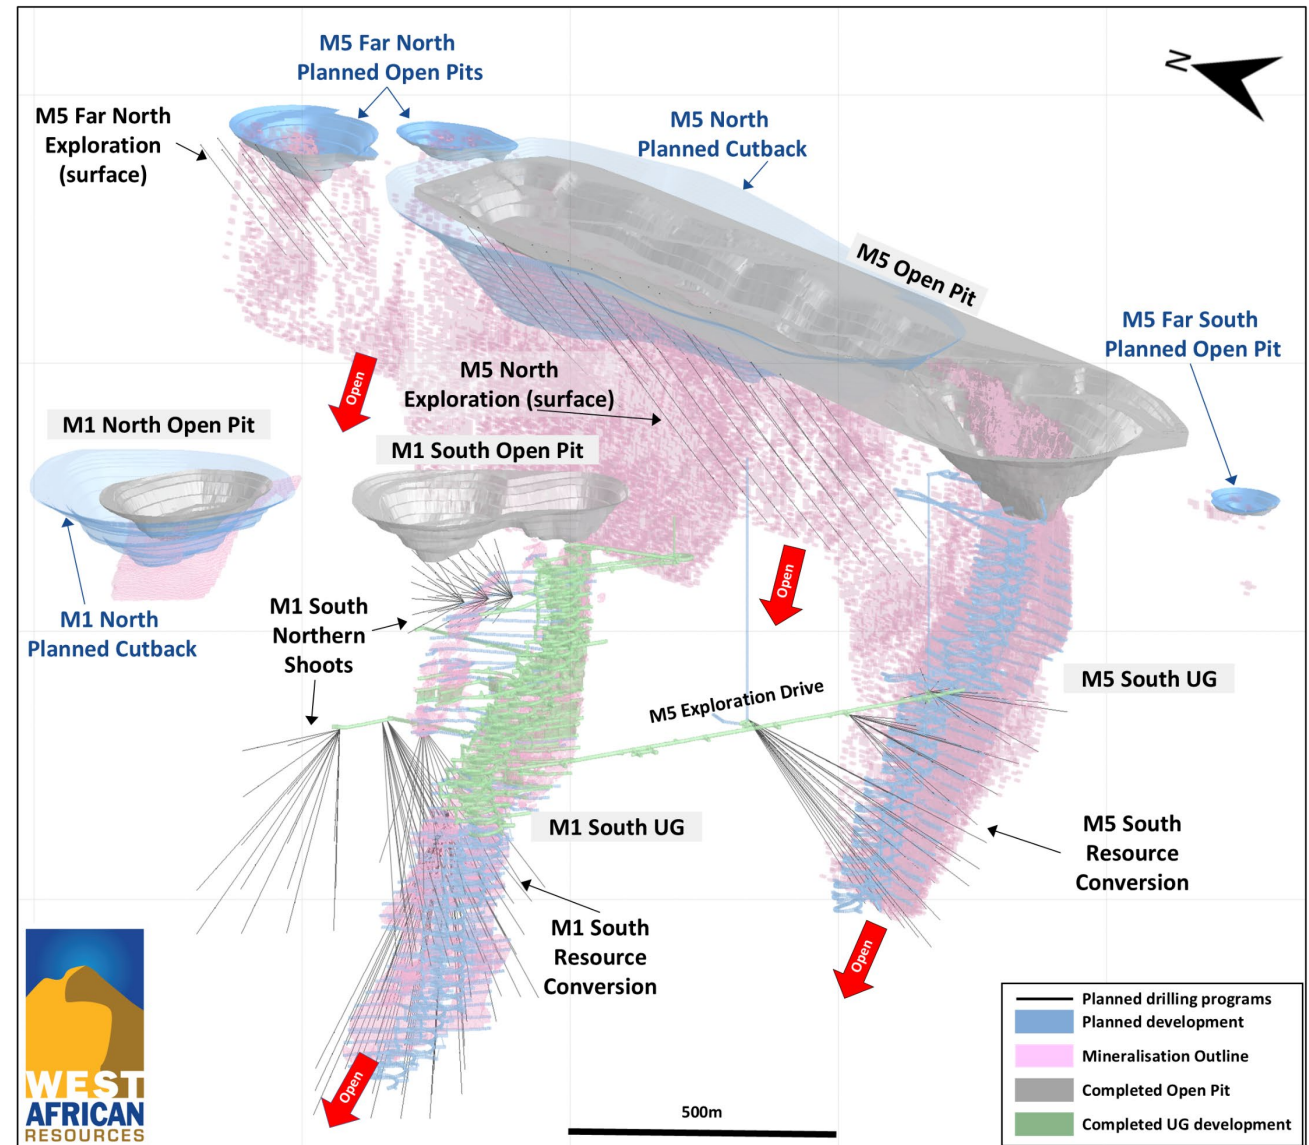

Refer to ASX announcement titled "WAF 10-year gold production to average 533,000 oz per annum" released 31 March 2026. Figures above include Sanbrado, Toega and MV3.

\* Assuming a gold price of US\$4,900/oz. Government royalty rate is an uncapped sliding scale from 3% based on US\$/oz gold price.

# NEAR MINE GROWTH

## SANBRADO EXPANSION POTENTIAL

- Over +60,000m of surface and underground drilling in progress with potential to deliver significant resource and reserve growth
- Mineralisation at M1 South and M5 remains open at depth supporting potential to lift annual production and extend mine life at Sanbrado
- Drilling is ongoing at the M5 South Underground, with recent results extending mineralisation by approximately 400m below the current resource
- Surface drilling to date at M5 North has resulted in an increase in open pit reserves with a cutback included in the 10-year mine plan and additional drilling planned targeting further resource and reserve growth
- M1 North drill program completed, cutback potential confirmed

# WEST AFRICAN RESOURCES LTD

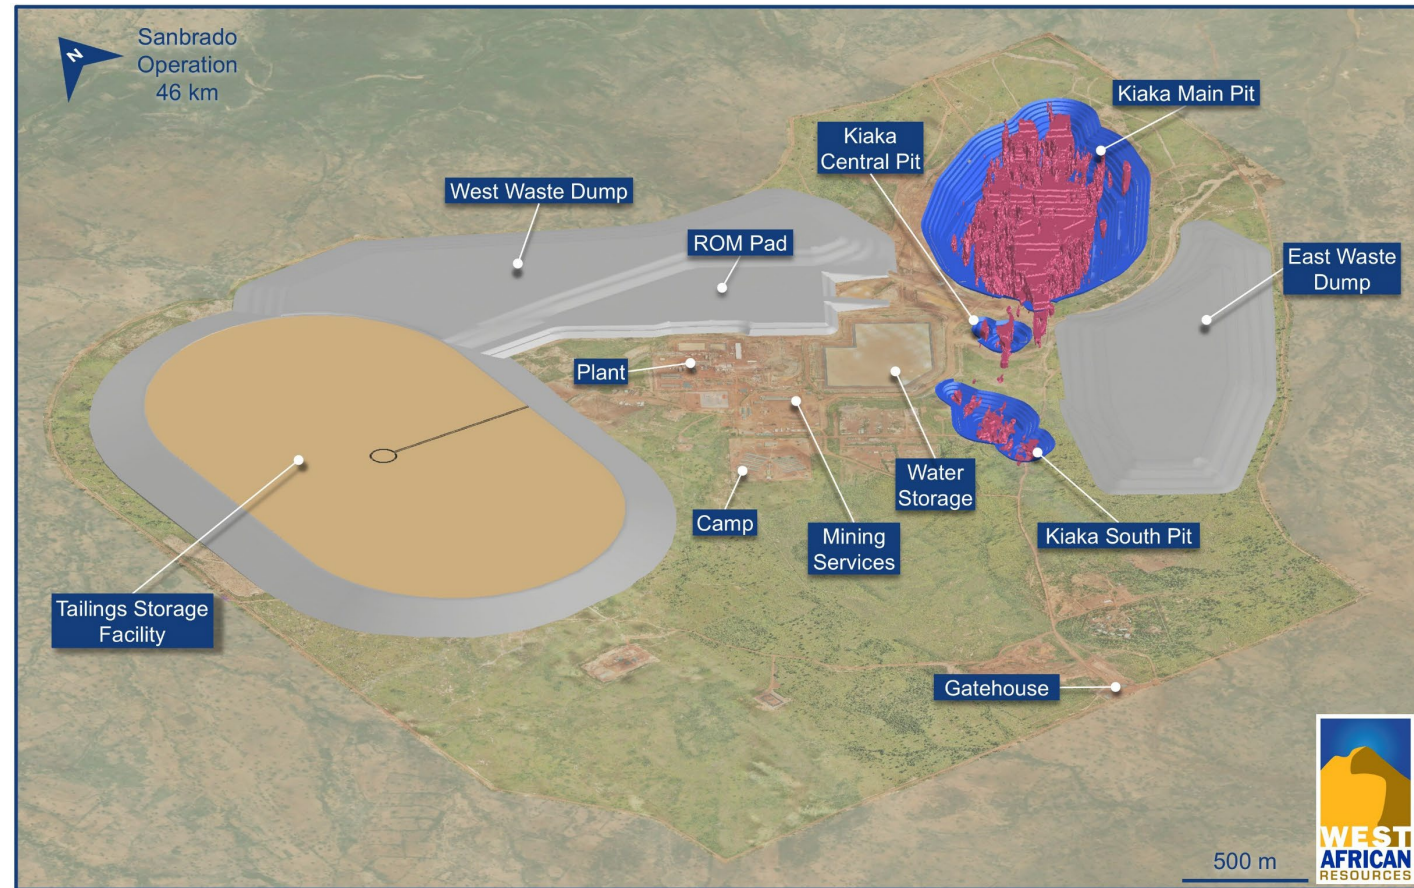

## KIAKA GOLD PRODUCTION CENTRE

# KIAKA GOLD PRODUCTION CENTRE

## KEY PROJECT METRICS

<b>Location</b>	South-central Burkina Faso, West Africa
<b>Ownership</b>	WAF 85%; Burkina Faso government 15%*
<b>Type</b>	Open-pit, low strip ratio 1.4 : 1 LOM
<b>Resources</b>	391 Mt at 0.7 g/t for 9.2 Moz gold (US\$3000)
<b>Reserves</b>	177 Mt at 0.8 g/t for 4.7 Moz gold (US\$2000)
<b>Mine life</b>	16 years
<b>Processing</b>	Conventional 10 Mtpa CIL + gravity increasing to 12 Mtpa in 2028
<b>Recovery LOM</b>	92%
<b>First production</b>	June 2025
<b>Production</b>	2026 to 2035 average 277,000 oz per annum
<b>2026 Q1 Production</b>	65,704 oz
<b>Workforce</b>	95% Burkinabe including 30% from local region
<b>Tax</b>	27.50%
<b>Gov. participation</b>	15% equity*, 11% royalty** + 1% community fund

There is a low level of geological confidence associated with Inferred Mineral Resources, and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised.

Refer ASX announcements titled “WAF 10-year gold production to average 533,000 oz per annum” released 31 March 2026 and “Production update – March 2026 Quarter” released 9 April 2026.

\* The Burkina Faso Government has published a decree authorising acquisition of an additional 25% shareholding in Kiaka SA, refer ASX announcement titled “Burkina Government decree to acquire 25% of Kiaka for \$175m” released 21 April 2026.

\*\* Assuming a gold price of US\$4,900/oz. Government royalty rate is an uncapped sliding scale from 3% based on US\$/oz gold price.

# OUR PEOPLE

## ÉQUIPE WAF

### Building a strong local workforce

- **3,622** total workforce across all operations (Burkina Faso)
- **2,350** WAF group employees, **95%** Burkinabe
- **>70,000 hours** of personnel training and skills development delivered
  - Induction and competency-based training
  - Cross-site training for project personnel
  - Creation of government recognised trades accreditation program delivering on-the-job training
- **161** internships supporting future talent

# PROTECTING OUR WORKFORCE

## HEALTH, SAFETY AND SECURITY

WAF operates a comprehensive Occupational Health and Safety Management System (OHSMS) based on ISO 45001 standards

### OHSMS key aspects

- 500 days LTI free to end Q1 2026
- WAF TRIFR: 1.64 v Western Australian Gold Industry IFR: 5.0\*
- Vigorous critical risk management program of assurance safeguarding each work front
- External ISO 45001 annual audits
- Sanbrado and Kiaka operations each have:
  - Dedicated OHS teams
  - Dedicated ERT teams
  - Fully operational medical centres

### Providing for the protection of people and assets

- Multi-layered strategy aligning company security, community relations and government

# INVESTING IN OUR COMMON FUTURE

## DRIVING SUSTAINABLE GROWTH AND SUPPORTING SHARED VALUE

### Contributions since mining operations began in 2020

- ✓ US\$644 million contributed to Burkina Faso in taxes and royalties
- ✓ US\$13 million invested in community projects and donations
- ✓ US\$37 million contributed to local development mining fund - 1% of revenue
- ✓ US\$6 million contributed to mine rehabilitation and closure fund

**SUSTAINABLE  
DEVELOPMENT  
GOALS**

# ESG

## BUILDING LASTING VALUE

### Education & Training

- Building and refurbishing schools, with solar power and learning resources
- IT access in high schools and vocational training for local youth
- Scholarship Programs expanding to support more students in 2026

### Livelihoods & Local Economic Development

- Livelihood Restoration Programs supporting agriculture, livestock and small business development
- Farmer training, irrigation management and food security initiatives
- Targeted support for vulnerable households and women's cooperatives

### Improving health status of the local communities

- Reducing child malnutrition through school lunch programs
- Construction and refurbishment of local health centres
- Malaria awareness campaigns and mosquito net distribution

### Environmental Stewardship

- >80,000 trees planted through community and site programs
- Seed collection from locally valued or medicinal plant species to ensure future production
- Diversion of non-mineral waste from disposal
- A\$538,000 generated for community initiatives through local recycling partnerships

# WEST AFRICAN RESOURCES LTD

## LOOKING AHEAD +100,000M DRILLING

- Q1 2026 ✓ 2026 Production Guidance
- Q1 2026 ✓ 10-Year Production Outlook
- Q2 2026 M5 North surface drilling results
- Q2 2026 M5 UG portal establishment
- Q2 2026 M5 South UG drilling results
- Q3 2026 Toega OP first ore production
- Q3 2026 Toega UG drilling results
- Q4 2026 M1 South UG drilling results
- Q4 2026 M5 South UG stoping ore

# WEST AFRICAN RESOURCES LTD

## FLIGHT TO 500

### TEAM

- Quality team aligned with shareholders
- 5 years of meeting or beating production guidance

### GOLD EXPOSURE

- 7 Moz unhedged gold reserves
- 13.7 Moz unhedged gold resources

### ESG

- Building community acceptance by creating jobs, supporting local businesses and investing in community projects
- Environmental and social programs aligned with international standards

### GROWTH

- Strong cashflow from unhedged gold production
- +1,100km<sup>2</sup> of permits covering prospective greenstone belts
- +100,000m of exploration drilling planned in 2026
- WAF aiming to be a sustainable +500koz producer by 2027

Refer to ASX announcement titled “WAF 10-year gold production to average 533,000 oz per annum” released 31 March 2026.
