---

## INVESTMENT IN SAVANNAH GOLDFIELDS ROYALTY AND SHARE PLACEMENT

DGR Global Ltd (ASX: DGR) ("**DGR**" or "**the Company**") is pleased to advise that the Company has entered into an agreement to invest a total of \$3 million in Savannah Goldfields Pty Ltd ("Savannah") through:

- a gold production royalty investment; and
- a share placement.

### **Royalty Investment**

DGR has invested \$1.5 million in exchange for a variable-rate royalty over gold production from Savannah's Georgetown, Agate Creek and environs tenements and operations in North Queensland.

The royalty structure is as follows:

- 3.0% of gross gold receipts for the first 15,000 ounces produced (Tier 1);
- 1.5% of gross gold receipts for the second 15,000 ounces produced (Tier 2); and
- 1.0% thereafter in perpetuity (Tier 3).

The royalty also provides for a 1% gross royalty from any production from third party tolling ores treated at Savannah's facilities.

The royalty package is to be secured by mortgage security over Savannah's assets and remains subject to approval from Savannah's convertible noteholders regarding priority security arrangements.

The royalty also provides for a minimum repayment to DGR of \$100,000 per fortnight during the first 15,000-ounce production (Tier 1), providing DGR with a stable return profile on its overall investment in Savannah.

### **Share Placement**

DGR has also invested \$1.5 million via a placement at \$0.015 per share, resulting in the issue of 100 million Savannah shares to DGR, representing approximately 4.5% of Savannah's issued capital.

**Managing Director Commentary:**

DGR Global CEO and Managing Director, Mr Nick Mather, commented:

“We are encouraged by the production status at Savannah and the excellent opportunity for growth through additional mining sources and exploration upside within Savannah’s portfolio of mining leases and exploration licences in North Queensland.

“The region has the potential, in our view, to host significant gold deposits of up to two million ounces. In the short term, Savannah’s production operations around Georgetown and Agate Creek from a current resource base of approximately 700,000 ounces provides the opportunity to generate approximately \$70 million net cash flow for Savannah over the next two years.

“This cash flow opportunity provides, in our view, a significant source of funding for an intensive exploration effort by Savannah, aimed at unlocking the region’s broader and under explored potential.”

Following the sale of its interest in SolGold PLC last month, DGR expects to provide a substantive market update regarding its future resource exploration and discovery strategy for DGR in due course.

## **ABOUT DGR GLOBAL LIMITED**

DGR Global's business involves the creation of resource exploration development and mining companies. The business uses the skills of a core team of talented geoscientists to identify resource projects capable of yielding world class discoveries of attractive commodities.

This is achieved through:

- The identification of commodities with a favourable 20-year price outlook.
- Geological terranes with:
  - A demonstrated strong endowment for that commodity.
  - An under-explored history.
  - Opportunity for the application of recently developed exploration techniques.
  - Jurisdictions with improving socio-economic and regulatory frameworks.
  - Extensive available tenures.
