

## Change of Company Name and ASX Code

**Adelong Gold Limited (ASX:ADG) (Adelong Gold or the Company)** is pleased to advise that, in accordance with a resolution passed by shareholders at the General Meeting held earlier today, the change of Company name to “Amara Minerals Limited” has been processed by the Australian Securities and Investments Commission (ASIC).

The new name reflects the Company’s strategic repositioning into the Apollo and Lauriston gold and antimony projects in Victoria, beyond the Adelong gold field from which the original name was drawn.

The effective date for the change of Company name on the Australian Securities Exchange (ASX) will be from the commencement of trading on Friday 15 May 2026. The Company’s ASX ticker codes following the change of Company name will be as follows:

ASX Code	Security Full Name
	<u>Listed Securities</u>
AM3	ORDINARY FULLY PAID
AM3O	OPTION EXPIRING 30-JUN-2026
AM3OA	OPTION EXPIRING 01-MAY-2029
	<u>Unlisted securities</u>
AM3AI	OPTION EXPIRING 24-MAY-2027 EX \$0.02
AM3AJ	OPTION EXPIRING 24-MAY-2028 EX \$0.02
AM3AK	PERFORMANCE RIGHTS

Shareholders are not required to take any action. Existing holdings will be unaffected by the name change. Holding statements and HIN/SRN details remain valid.

-Ends-

Released with the authority of the board of Adelong Gold Limited.

## ABOUT ADELONG GOLD

---

**Adelong Gold Limited (ASX:ADG)** is an Australian mineral exploration company advancing high-grade exploration at the recently acquired Apollo and Lauriston Gold Projects in Victoria. The Company also holds a highly prospective lithium portfolio in Brazil.

The **Apollo Gold and Antimony Project**, acquired in 2025, lies within Victoria's highly prospective Melbourne Zone and demonstrates strong bulk-tonnage gold potential, with mineralisation open at depth and along strike. The project also hosts antimony-bearing stibnite, similar to that at the nearby Costerfield and Sunday Creek deposits.

The **Lauriston Gold and Antimony Project**, also acquired in 2025, is a 28,700-hectare tenement adjacent to the Fosterville Mine. It hosts the high-grade Comet discovery, with drill results including 8.0m at 104 g/t Au and 5.9m at 15.3 g/t Au. With minimal historical drilling and a structural setting comparable to Fosterville's Swan Zone, Lauriston offers strong near-term exploration upside.

Complementing its gold strategy, Adelong also holds a strategic lithium portfolio in Brazil, including tenements in the renowned 'lithium valley' and the Borborema region. These assets provide significant exposure to the global energy transition, with early exploration already identifying promising lithium pegmatite targets. With a diversified portfolio and a clear path to production, Adelong Gold is well-positioned for growth and long-term value creation.
