

ASX Announcement

14 May 2026

\$500k sold in first month of OPAL Real World Asset (RWA) Tokenised sales, with over 130 distributors signing up.

14 May 2026. Hong Kong, China. Xenitra Limited (ASX:XEN) (the “Company”) is pleased to advise shareholders that sales of products through the OPAL Real World Asset (“RWA”) tokenised sales ecosystem have **surpassed \$500,000** within the first month of launch, with **more than 130 distributors onboarded** into the ecosystem.

Highlights

- **More than \$500,000 in sales** generated within the first month of launch.
- **More than 130 distributors** onboarded into the OPAL ecosystem.
- More than **12,000 livestream viewers** attended the launch event.
- Xenitra is strategically positioned as an **early mover in commercial RWA tokenisation** for FMCG products in China.
- The OPAL ecosystem is **designed to scale across multiple brands**, product categories and geographic markets.
- Xenitra is currently engaged in discussions with **additional global brands to be integrated into the OPAL ecosystem**.

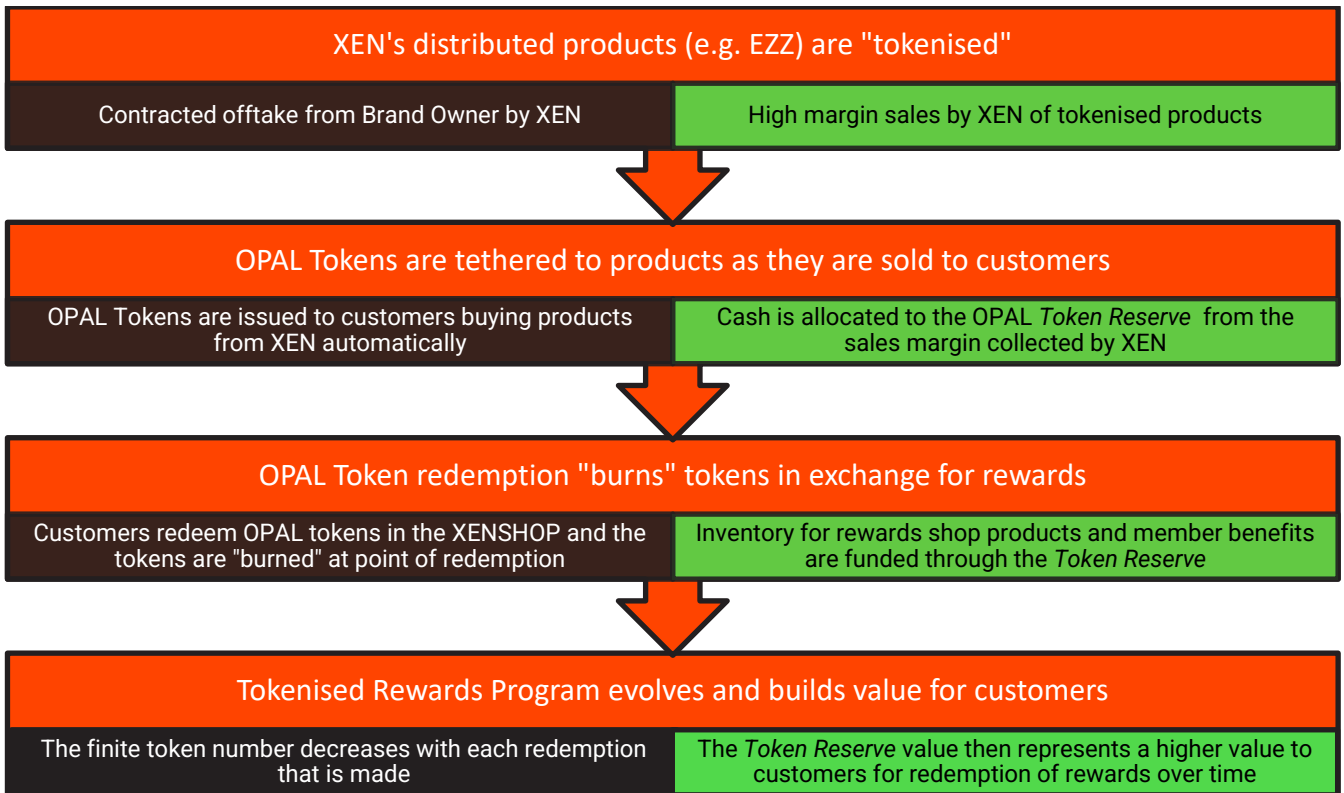

Xenitra specialises in fast-moving consumer goods (FMCG), nutraceuticals, over-the-counter (OTC) medicines and personal care products distributed through a channel-optimised sales ecosystem incorporating blockchain-enabled tokenised distribution channels spanning Business-to-Business (B2B) trading, retail distribution and ecommerce platforms in China. Xenitra is one of the first Australian companies to commercially deploy Real World Asset (“RWA”) tokenisation integrated directly into mainstream FMCG sales channels in China. The Company’s established ecommerce, livestream commerce and distributor infrastructure across China and Australia provides a scalable platform to onboard additional international and domestic brands into the OPAL ecosystem.

Tokenised Sales Ecosystem

The OPAL ecosystem links blockchain tokenisation directly to real product sales, with OPAL tokens automatically distributed when customers purchase products. The Company believes this creates a differentiated commercial model supported by recurring FMCG purchasing behaviour, customer loyalty incentives and scalable distribution infrastructure. A portion of sales revenue contributes to the OPAL Token Reserve, while tokens can be redeemed within the ecosystem for rewards and member benefits. Xenitra believes the combination of tokenisation, ecommerce distribution and customer rewards creates a scalable commercial ecosystem capable of expanding across multiple brands and markets.

Chairman Anthony Noble said: *"The launch of our first tokenised products marks a significant milestone for Xenitra and provides strong early validation of the commercial potential of our OPAL ecosystem. We believe Xenitra is strategically positioned to become one of the first Australian companies to scale Real World Asset tokenisation integrated directly into mainstream FMCG distribution channels in China. Our model is supported by real product sales, established supply chains and a growing distributor network across China. We believe this provides Xenitra with a significant first-mover advantage in the emerging RWA commerce sector. We are currently in discussions with additional brands across Australia and Asia regarding integration into the OPAL ecosystem as we continue to scale the platform."*
