

# Commencement of Trading as Amara Minerals Limited (ASX:AM3)

ASX Announcement | 15 May 2026

Amara Minerals Limited (ASX:AM3) (formerly Adelong Gold Limited) (Amara Minerals or the Company) commences trading on the Australian Securities Exchange today under its new name and ASX code (ASX:AM3).

The change of name was approved by shareholders at the General Meeting held on 12 May 2026 and processed by the Australian Securities and Investments Commission. The Company's ticker codes are now:

ASX Code	Security Full Name
	<u>Listed Securities</u>
AM3	ORDINARY FULLY PAID
AM3O	OPTION EXPIRING 30-JUN-2026
AM3OA	OPTION EXPIRING 01-MAY-2029

The Amara Minerals name reflects the Company's strategic repositioning into the Apollo and Lauriston gold and antimony projects in Victoria, acquired in 2025. Both projects sit in highly prospective belts, with Lauriston adjacent to Agnico Eagle's Fosterville Mine and hosting the high-grade Comet discovery.

## Commenting on the change, Managing Director Ian Holland said:

*"Trading as Amara Minerals marks a clear shift in where the Company is now focused. Apollo and Lauriston sit at the centre of our work, with the Comet discovery at Lauriston offering near-term exploration upside in a setting comparable to Fosterville's Swan Zone. The new name gives shareholders and the market a clearer picture of the portfolio we are building."*

Shareholders are not required to take any action. Existing holdings are unaffected by the change. Holding statements and HIN/SRN details remain valid.

-Ends-

Released with the authority of the board of Amara Minerals Limited.

## ABOUT AMARA MINERALS

**Amara Minerals Limited (ASX:AM3)** is an Australian mineral exploration company advancing high-grade exploration at the recently acquired Lauriston and Apollo Gold and Antimony Projects in Victoria. The Company also holds a highly prospective lithium portfolio in Brazil.

The **Lauriston Gold and Antimony Project**, acquired in 2025, is a 28,700-hectare tenement adjacent to the Fosterville Mine. It hosts the high-grade Comet discovery, with drill results including 8.0m at 104 g/t Au and 5.9m at 15.3 g/t Au. With minimal historical drilling and a structural setting comparable to Fosterville's Swan Zone, Lauriston offers strong near-term exploration upside.

The **Apollo Gold and Antimony Project**, also acquired in 2025, lies within Victoria's highly prospective Melbourne Zone and demonstrates strong bulk-tonnage gold potential, with mineralisation open at depth and along strike. The project also hosts antimony-bearing stibnite, similar to that at the nearby Costerfield and Sunday Creek deposits.

Complementing its gold strategy, Amara Minerals also holds a **strategic lithium portfolio in Brazil**, including tenements in the renowned 'lithium valley' and the Borborema region. These assets provide significant exposure to the global energy transition, with early exploration already identifying promising lithium pegmatite targets. With a diversified portfolio and a clear path to production, Amara Minerals is well-positioned for growth and long-term value creation.
