ASX release

APA Group awards engineering services agreement for gas transmission and storage projects

Worley Limited (ASX: WOR) (“Worley”) has been awarded an engineering services framework agreement by APA Group to provide support to their gas transmission and storage assets in Australia.

Work on APA’s gas transmission and storage assets will include supporting a program of works to expand capacity on gas infrastructure assets nationally. Worley will provide services on an exclusive single contractor partnering model. The agreement has an initial term of three years.

Worley will leverage digital enablement and standardized reference designs to support replicated delivery across the portfolio. Services will be delivered primarily from Worley’s Brisbane office, with specialist support from Melbourne, and in close collaboration with the Global Integrated Delivery (GID) team in India.

“Long-term portfolio partnerships are an important part of how Worley works with customers to deliver value over time. We are pleased to support the APA team with this portfolio of assets and to continue building our relationship with APA across Australia’s energy infrastructure sector,” said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O’Leary, Group Company Secretary.
