ASX Announcement

Technical Appointments to Drive Production

Lotus Resources Limited (ASX: LOT, OTCQX: LTSRF) (Lotus or the Company) wishes to announce the appointment and commencement of consultant, Sam Penglis, to the role of Interim Chief Operating Officer (COO) following the departure of Mike Da Costa who has left the Company as of Friday 15 May.

Mr Penglis is a highly experienced chemical engineer and minerals processing leader. Working across operations readiness, production, planning and integrated operations, including two decades working at BHP, he has a demonstrated track record of successfully delivering production performance and flowsheet optimisation.

Mr Penglis will support the enhanced site leadership team and technical capability established at Lotus' Kayelekera Uranium Mine over the past 4-5 months.

In addition, Lotus is finalising the appointment of a Technical Services Manager at Kayelekera, focused on life of mine planning and operational excellence, including mine to mill reconciliation processes.

Lotus Managing Director Greg Bittar said: *"We welcome Sam to the Lotus team who, with his wealth of experience across mining and processing will support the Kayelekera team to drive production and technical improvement. We are focussed on delivering the production optimisation plan being executed by the technical team onsite at Kayelekera."*

This ASX announcement was approved and authorised by the Managing Director of Lotus Resources Limited.

¹ See ASX announcement dated 15 February 2022 entitled "Kayelekera mineral resource increases by 23%" for information on the Kayelekera Mineral Resource Estimate. The competent person for that announcement was David Princep.

² The Kayelekera Mineral Resource Estimate is inclusive of the Kayelekera Ore Reserves.

³ See ASX announcement dated 9 June 2022 entitled "Uranium Resource Increases to 51.1Mlbs" for information on the Livingstonia Mineral Resource Estimate. The competent person for that announcement was David Princep.

⁴ See ASX Announcement dated 6 December 2024 for information on the Letlhakane Mineral Resource Estimate.

⁵ Lotus confirms that it is not aware of any new information or data that materially affects the information included in the respective Mineral Resource announcements of 15 February 2022, 6 June 2022 and 6 December 2024 and that all material assumptions and technical parameters underpinning the Mineral Resource Estimates in those announcements continue to apply and have not materially changed. Lotus confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from those market announcements.

⁶ RoM stockpile has been mined and is located near mill facility.

⁷ Low-grade stockpiles have been mined and placed on the medium-grade stockpile and are considered potentially feasible for blending or beneficiation, with initial studies to assess this optionality already completed.

⁸ Ore Reserves are reported based on a dry basis. Proved Ore Reserves are inclusive of RoM stockpiles and are based on a 200ppm cut-off grade for arkose and a 390ppm cut-off grade for mudstone. Ore Reserves are based on a 100% ownership basis of which Lotus has an 85% interest. Except for information in the Accelerated Restart Plan announced on the ASX on 8 October 2024 and the ramp-up progress stated in its March 2026 Quarterly Activities Report released on the ASX on 30 April 2026, Lotus confirms that it is not aware of any new information or data that materially affects the information included in the announcement of 11 August 2022 and that all material assumptions and technical parameters underpinning the Ore Reserve Estimate in that announcement continue to apply and have not materially changed. Lotus confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the 11 August 2022 announcement.
