

US Joint Interagency Task Force 401 Contract

DroneShield Limited (ASX:DRO) (DroneShield or the Company) is pleased to announce that it has received a \$24.9 million contract supporting the mission of the US Department of War's Joint Interagency Task Force 401 (**JIATF-401**). The contract has an initial value of \$19.3 million, with an additional \$5.6 million in options of the end-user over a 5-year period.

The contract is for the supply of mobile and fixed site counter-drone solutions, comprising hardware, subscriptions, warranties and services. DroneShield hardware is available from existing planned production, with a series of deliveries in 2026 and 2027.

Alongside DroneShield's products, the contract requires DroneShield to purchase and install third-party interoperable solutions. Payments will be received for the initial value from second half of 2026 through the first half of 2027.

This contract's initial value of \$19.3 million, of which at least \$10 million is anticipated to be Committed Revenue¹ for FY2026, with the balance for recognition in FY2027.

DroneShield CEO, Angus Bean, commented:

"This contract demonstrates the growing requirement for counter-drone capabilities across complex operational environments. Customers are increasingly seeking solutions that combine rapid deployment with persistent airspace security, and DroneShield is well positioned to support these requirements through its range of mobile and fixed-site systems."

"The award builds on DroneShield's continued momentum in the US market and reinforces the Company's role in supporting organisations tasked with protecting personnel, assets, infrastructure, and operations against emerging aerial threats."

JIATF-401 is the US Department of War's premier organisation to synchronise C-UAS efforts across the Joint Force, helping allies and partners rapidly acquire state-of-the-art C-UAS capability to respond to the evolving threat of drones.

DroneShield US President, Ray Fitzgerald, commented:

"This contract represents another important milestone in DroneShield's growth within the United States and demonstrates continued confidence in our ability to deliver operationally relevant counter-drone capabilities at scale."

DroneShield continues to experience strong demand across military, government, and critical infrastructure sectors globally, supported by increasing awareness of drone threats and the need for scalable counter-drone capability.

¹ Committed Revenue is the value of hardware, services, warranties and subscriptions scheduled for delivery within the period, based on confirmed purchase orders. All figures in A\$ converted from US\$ at current exchange rates

About DroneShield Limited

DroneShield (ASX:DRO) is a global leader in AI-powered counter-drone and uncrewed, autonomous systems defence. We develop and deploy integrated sensing, electronic warfare and command-and-control solutions that detect, track, identify and defeat drone threats across fixed-site, dismounted and on-the-move operations. Trusted by military, government, law enforcement, critical infrastructure and commercial customers and active globally, DroneShield combines operationally proven technology with continuous R&D and AI-software driven innovation. We master complexity to protect the people, places and assets that matter.
