About Montaka Global Extension Fund – Complex ETF

Investors in the Fund benefit from our deep expertise, fundamental research and detailed analysis to identify high-conviction, long-duration opportunities through a concentrated global equities portfolio.

The Fund is focussed on investing in long-term winners in attractive transforming markets when they are undervalued and offer outsized return potential.

The Fund also short-sells single stocks and ETFs to make additional investments in these winners with the proceeds and as an absolute profit centre. Put options can be used to hedge tail risks.

Investors benefit from an easily accessible listed structure with 'live' pricing and sufficient liquidity around 'fair value'. Investors can buy and sell units on ASX (ticker: MKAX) in the same way as other listed securities, through a broker or trading account or choose to invest directly with the Fund.

The Fund aims to provide Unitholders with long-term capital growth and targets distributions of 5% p.a. which can be automatically reinvested.
