

**Notice under section 708A(5)(e) of the Corporations Act 2001 (Cth)**

Yandal Resources Limited (ASX:YRL) ('the Company'), has settled some of the amounts owing for drilling services rendered pursuant to a drill-for-equity agreement (DFE) as disclosed in the March 2026 Quarterly Activities Report. The DFE allows YRL to issue up to \$250,000 worth of YRL shares to settle amounts owing, and as a result, it has issued and allotted 1,130,954 shares at an issue price of 22.1c. Refer to the application for quotation of securities notification dated 9 June 2026 for further details of the share issue.

Accordingly, the Company gives notice under section 708A(5)(e)(i) of the Corporations Act 2001 (Cth) ('Act') that:

1. the abovementioned Shares were issued without disclosure to investors under Part 6D.2 of the Act;
2. as at the date of this notice the Company has complied with the provisions of Chapter 2M of the Act as they apply to the Company and with section 674 of the Act, and
3. as at the date of this notice there is no information to be disclosed which is "excluded information" as defined in subsection 708A(7) of the Act that is reasonable for investors and their professional advisors to find in a disclosure document.

## **About Yandal Resources Limited**

Yandal Resources has a portfolio of advanced gold exploration projects in the highly prospective Yandal and Norseman-Wiluna Greenstone Belts of Western Australia.

## **Ironstone Well-Barwidgee Gold Project**

The 100% owned Ironstone Well-Barwidgee (IWB) Gold Project covers approximately 370km<sup>2</sup> of highly prospective and under-explored tenure located between the Jundee and Bronzewing mines in the northern Yandal Greenstone Belt. Yandal has an established Resource of 268,000oz of gold at Flushing Meadows (within IBW) and considers there to be strong potential to make new discoveries and expand this resource base within its extensive tenure holding. (Refer to the ASX announcement of 4 November 2020 for details of the Flushing Meadows Resource).

The IWB project area also includes two new gold discoveries, the Arrakis and Siona Prospects, both made within the last eighteen months. These outcomes were driven by the execution of a targeted exploration program that followed a systematic, geologically driven strategy that was developed in early 2023. The Arrakis prospect is hosted within the Caladan fold, and the Siona prospect is hosted within the New England Granite.

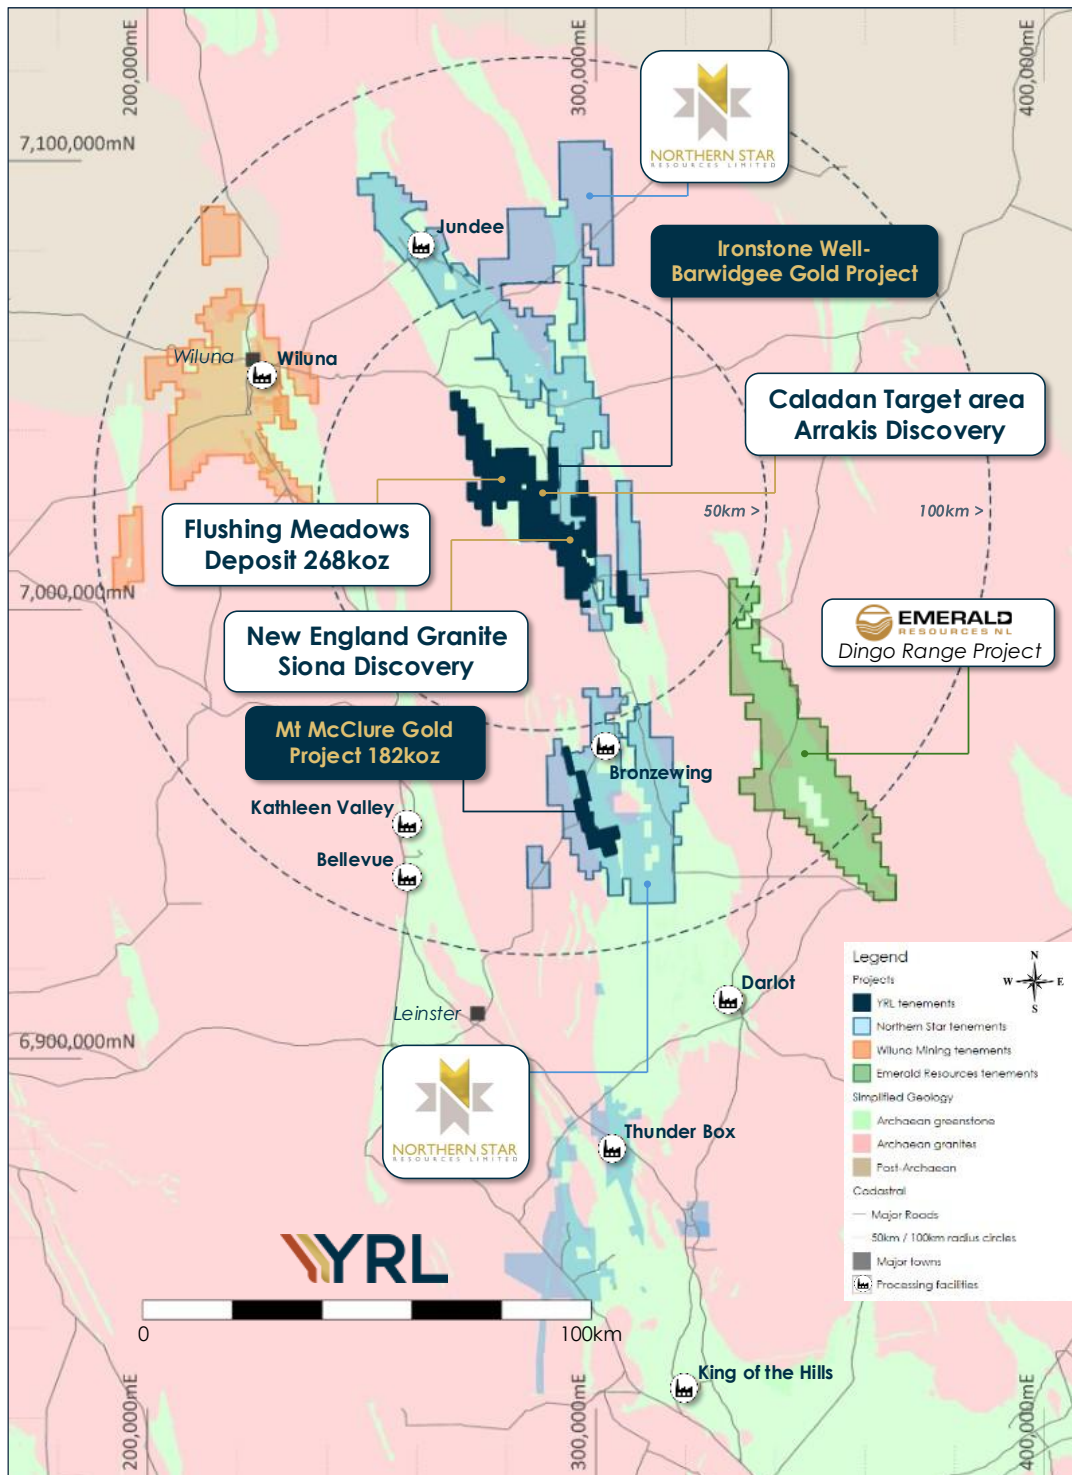

Both discoveries are currently at an early stage but progressing well, with future activities focused on delineating the scale of each of the newly defined mineralised systems.

The IWB Gold Project also includes several advanced prospects, where limited historic and YRL drilling has returned robust gold intercepts, indicating the potential for shallow oxide mineralisation. Both the early-stage and more advanced prospects are the focus of ongoing exploration.

## **Mt McClure**

The Mt McClure Gold Project, acquired in August 2022, is located ~15km southwest of the historic Bronzewing Mine and includes three mining leases with JORC 2012 Resources totalling 182,200oz Au.

The project has prospectivity for new shallow gold deposits adjacent to current Resources and in the footwall and hanging wall of the stratigraphy. Ground gravity survey data from the prior Quarter support ongoing structural/stratigraphic interpretations for 2026 targeting.
