ASX: TSL

Sri Lankan Mineral Sands Conference

Titanium Sands Limited ("TSL" or "the Company") is pleased to confirm the Company has committed to be a Gold sponsor of the Mineral Technologies Heavy Mineral Sands Technical Conference, to be held in Colombo on 17 June 2026.

The Heavy Mineral Sands Technical Conference is Sri Lanka's first dedicated technical forum for the mineral sands sector. The conference will bring together industry participants, senior government decision-makers, industry leaders, international technical experts, investors, mineral sands companies and service providers.

As outlined in the sponsorship prospectus prepared by Mineral Technologies and The Ceylon Chamber of Commerce "Sri Lanka holds substantial mineral sands deposits with strong potential for export growth, industrial development, and foreign direct investment. This conference has been designed to accelerate that potential by presenting international best practice across the full project lifecycle – from exploration and resource definition through to processing, ESG compliance, rehabilitation, and market positioning".

The conference is also presented with the support of the Australian High Commission in Colombo. Speakers are drawn from Australia, South Africa, India, the Netherlands, the United States, Canada, and Sri Lanka.

TSL's sponsorship of the conference is a strategic investment, as the event brings together, for the first time in one room, every stakeholder with the power to advance Sri Lanka's mineral sands industry: the government officials who issue licences and set policy, the project developers seeking approvals, the service providers and OEM suppliers building the supply chain, and the investors evaluating the opportunity.

For sponsors, this represents a rare opportunity to be seen not merely as a commercial participant, but as a foundational partner in the sector's development, which TSL has been for many years now.

COMPLIANCE STATEMENTS

Forward-Looking Statements

This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning the Company's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "expect," "intend," "may", "potential," "should," "further" and similar expressions are forward-looking statements. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that further exploration will result in additional Mineral Resources.

Competent Persons

Except where indicated, exploration and technical information above have been reviewed and compiled by James Searle BSc (hons), PhD, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy, with over 37 years of experience in metallic and energy minerals exploration and development, and as such has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Searle is the Managing Director of Titanium Sands Limited and consents to the inclusion of this technical information in the format and context in which it appears.

Previously Reported information foot notes for reference

This report includes information that relates to announcements previously made to the ASX. The information was extracted from the Company's previous ASX announcements as follows:
