19th June 2026 **ASX ANNOUNCEMENT**

Investor Webinar – 22 June 2026
Tungsten Mining to present highlights from the Watershed PEE study

Tungsten Mining NL (ASX: TGN, OTCQB: TGNMF) ("Tungsten Mining," "TGN," or "the Company") is pleased to advise that on Monday 22 June 2026, TGN Chairman Gary Lyons will host an investor webinar to provide shareholders with an overview of the Watershed Preliminary Economic Evaluation (PEE) study.

The Watershed PEE[1] confirms the strong technical and economic potential of the project at a time of tightening global tungsten supply. With granted mining leases and primary approvals already in place for the project, the Company is advancing toward a Final Investment Decision (FID) in September 2026 and a first production target in 2027.

The webinar will also provide the opportunity to discuss recent corporate milestones and planned activities over the coming months.

Webinar Details

- Date: Monday, 22 June 2026
- Time: 9:00 AM WST / 11:00 AM AEST
- Registration: https://us02web.zoom.us/webinar/register/WN_FDT9CfAGTvyfHCKu6UpLWw

Upon registering, attendees will receive a confirmation email with details on how to join the webinar. A replay of the webinar will be made available following the event via the Company's website and social media channels.

Questions can be submitted in advance to: aiden@nwrcommunications.com.au

This ASX announcement was authorised for release by the Board of Tungsten Mining NL.

[1] Refer ASX Announcement dated 18th June 2026 "Strong Economic Evaluation Outcomes Position Watershed for Rapid Development"

Previously Reported Results

Tungsten Mining NL confirms that it is not aware of any new information or data that materially affects the information included in the ASX announcements and that all material assumptions and technical parameters underpinning the estimates of Mineral Resources in original ASX announcements continue to apply and have not materially changed. Tungsten Mining NL confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original ASX announcements.

This announcement and presentation should be read in conjunction with the ASX announcement dated 18 June 2026, "Strong Economic Evaluation Outcomes Position Watershed for Rapid Development" (the "PEE Announcement"), which sets out in full the material assumptions underpinning the Watershed PEE, including the production target and forecast financial information. The Company confirms that all material assumptions underpinning the production target and forecast financial information in the PEE Announcement continue to apply and have not materially changed. The FID timing and first production target referenced above are forward-looking statements and are subject to risks and uncertainties. Actual results may differ materially from those anticipated.

Cautionary Statement

This announcement and presentation contains forward-looking statements, including forecasts, projections and statements of opinion or expectation. These statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors, many of which are outside the Company's control. Actual results, performance and developments may differ materially from those expressed or implied.

There are a number of risks, both specific to Tungsten Mining NL and of a general nature, that may affect the Company's future operating and financial performance and the value of an investment in Tungsten Mining NL. These include, without limitation: exploration risk (including the inherently speculative nature of exploration activities and the possibility that exploration results may not lead to the delineation of mineral resources or reserves or support further studies or development); study risks (including assumptions, outcomes and timing of Scoping Studies, Pre-Feasibility Studies and Definitive Feasibility Studies); mining and project development risks; construction and commissioning risks; geological, mining and processing risks; the timing and outcome of licences, permits and other regulatory approvals; operational, environmental and safety risks; access to, and timing of, infrastructure; native title and cultural heritage considerations; commodity demand and price volatility; foreign currency and interest rate fluctuations; market liquidity and equity capital market conditions; competition for capital, reserves, land and skilled personnel; reliance on key personnel; reserve and resource estimation uncertainty; potential disruptions to operations or logistics (including labour stoppages and severe weather); the availability and cost of transport services; and the ability to secure adequate financing, including offtake on acceptable terms.

Forward-looking statements can be identified by terminology such as "planned", "expected", "aims", "projected", "estimated", "may", "scheduled", "intends", "anticipates", "believes", "potential", "could", "nominal", "conceptual" and similar expressions. Indications or guidance on future earnings, financial position or performance, as well as statements regarding Tungsten Mining NL's operations, strategy and potential U.S. listing, are forward-looking statements. Such statements are based on assumptions and judgements current as at the date of this announcement and are subject to change without notice. Readers should not place undue reliance on forward-looking statements, and the Company does not undertake any obligation to update or revise them except as required by law.

About Tungsten Mining NL

Critical minerals developer, Tungsten Mining NL is an Australian-headquartered resources company listed on the Australian Securities Exchange (ASX:TGN) and US OTCQB (OTCQB:TGNMF). Its prime focus is the exploration and development of tungsten and critical minerals projects.

Through exploration and acquisition, the Company has established a globally significant tungsten resource inventory in its portfolio of advanced mineral projects across Australia. This provides a platform for the Company to become a major player within the global primary tungsten market through the development of low-cost tungsten concentrate production.

About tungsten

Tungsten (chemical symbol W), occurs naturally on Earth, not in its pure form but as a constituent of other minerals, only two of which support commercial extraction and processing - wolframite ((Fe, Mn) WO_4) and scheelite ($CaWO_4$).

Tungsten also has the highest melting point of all elements except carbon – around 3400°C - giving it excellent high temperature mechanical properties and the lowest expansion coefficient of all metals. It is a metal of considerable strategic importance, essential to modern industrial development (across aerospace and defence, electronics, automotive, extractive and construction sectors) with uses in cemented carbides, high-speed steels and super alloys, tungsten mill products and chemicals.
