The Entitlement Offer is a non-renounceable rights issue of 1 New Share for every 4 Shares held at an issue price of \$0.035 per New Share (**Issue Price**), to raise approximately \$8.47 million (before costs of the Entitlement Offer). The Issue Price represents a 12.5% discount to the Share price of \$0.04 as at the close of trading on Thursday, 11 June 2026, being the last trading day prior the Company's announcement on 18 June 2026 of the Placement and its intention to carry out the Entitlement Offer.

Accordingly, the Shortfall Offer will also ensure that in addition to the Shortfall Shares, the Ineligible Shareholder Shares are appropriately cleansed under the operation of section 708A(11) of the Corporations Act for the purposes of the secondary trading provisions of the Corporations Act.

1.4. Purpose of this Prospectus

The purpose of this Prospectus is to:

- (a) make the Entitlement Offer;
- (b) make the Top-Up Offer;
- (c) make the Shortfall Offer; and
- (d) ensure that the on-sale of the Placement Shares and the Ineligible Shareholder Shares after the date of this Prospectus does not breach section 707(3) of the Corporations Act in accordance with the exemption to the secondary trading provisions in section 708A(11) of the Corporations Act.

1.5. Minimum subscription

There is no minimum subscription to the Entitlement Offer.

The Entitlement Offer is fully underwritten.

1.6. Purpose of the Entitlement Offer

The Directors intend to apply the proceeds from the Entitlement Offer (together with its existing cash reserves, the proceeds of the Placement and deferred consideration from the Misima sale) towards:

- (a) Drilling, Resource & Reserve Estimates and Plant Expansion Studies, comprising:
 - (1) extensive underground and surface drilling program of 25,000m upgrade the Measured and Indicated Resources and pursue high priority exploration targets; and
 - (2) studies to consider expansion of the existing processing facility which has key permits in place to increase the processing rate up to 700ktpa, these studies will consider the optimal processing rate for the life of mine, consistent with the expected underground mining rates;
- (b) Redundancy & Fleet Demobilisation Costs;
- (c) Care & Maintenance Costs;
- (d) the costs of the Entitlement Offer and the Placement; and
- (e) general working capital.

The proceeds from the Entitlement Offer (assuming it is fully subscribed) will be added to the Company's existing cash resources, the proceeds of the Placement and incoming cash payment from the Misima sale to provide total available funds of \$32.3 million as follows:

Source of funds	\$ million	%
Current Cash - 11 June 2026	9.4	29.1%
Placement Proceeds (before costs)	4.4	13.6%
Entitlement Offer Proceeds (before costs)	8.5	26.3%

Deferred Cash Consideration – 11 July 2026*	10.0	31.0%
Total sources	32.3	100%

* See KSN ASX announcement dated 11 July 2025 (*Kingston Receives \$50 million from Misima Divestment*) - the additional milestone payments; \$10 million (one year post completion, due 11 July 2026), \$10 million (FID) and \$25 million (royalty buy-back option)

These total funds are proposed to be allocated in the following manner:

Proposed use of funds	\$ million	%
Drilling, Resource & Reserve Estimates and Plant Expansion Studies	12.2	37.8%
Redundancy & Fleet Demobilisation Costs	5.0	15.5%
C&M Costs	6.7	20.7%
Estimated costs of the Placement and the Offer (including legal fees, Lead Manager's fees, Share Registry fees, ASIC and ASX fees and other miscellaneous costs associated with the Offer)*	0.8	2.5%
Working capital and corporate costs	7.6	23.5%
Total Use of Funds	32.3	100%

* Assumes that the Offer is fully subscribed, and does not take account of brokerage (if any) discussed at section 3.1.

However, in the event that circumstances change or other better opportunities arise the Directors reserve the right to vary the proposed uses to maximise the benefit to Shareholders.

The Company's requirement for urgent funds to be raised under the Placement and Entitlement Offer arises out of the Company's requirement to have the cash reserves available such that it can pay for drilling, Mineral Resource and Ore Reserve estimates and plan expansion studies, redundancy and demobilisation costs, and care and maintenance costs that have arisen as a consequence of the incident at the Company's open pit mine that resulted in a decision to cease open pit mining, as announced by the Company on the ASX on 11 June 2026. The open pit wall failure resulted in a gross revenue reduction of ~\$39 million and the Placement and Entitlement Offer provides immediacy of sufficient funding to carry out a strategic pivot towards a focused drilling program for its future underground mining restart plans and study work to evaluate expansion of its processing plant.

1.7. Investment highlights

A summary of the investment highlights of the Company are as follows:

- (a) strategically positioned with a fully permitted, 350ktpa polymetallic plant in the South Cobar Basin;
- (b) plant expansion studies to investigate right sizing and configuration of the Mineral Hill processing facility;
- (c) 25,000m drilling program over the next 12 months to unlock the potential of Mineral Hill via Resource and Reserve expansion;
- (d) assessing all strategic avenues to maximise value for shareholders;
- (e) extensive underground development and infrastructure in place; and
- (f) strong balance sheet to execute the drilling strategy with \$35.0m in additional value to be received from the Misima sale.

Further details of the planned activities of the Company can be found in the announcement by the Company "*Investor Presentation – Unlocking Mineral Hill Potential*" lodged with the ASX on 16 June 2026.

1.8. Risk factors

Investing in the Company involves risk. There are factors, both specific to the Company and of a general nature, which may affect the future operating and financial performance of the Company. Some of these factors can be mitigated by appropriate commercial action. However, many are outside the control of the Company, dependent on the policies adopted and approaches taken by regulatory authorities or cannot otherwise be mitigated.

Prior to making any decision to subscribe for New Shares, you should carefully consider the risk factors applicable to the Company which are set out below. If you are unsure about subscribing for New Shares, you should first seek advice from your stockbroker, accountant, financial or other professional adviser.

The following sets out a summary of some of the key risks relevant to the Company and its operations. Further details regarding risks which may affect the Company in the future are set out in section 6. The risks described below are not to be taken as exhaustive. The specific risks considered, and others not specifically referred to, may in the future materially affect the financial performance of the Company and the value of the New Shares offered under this Prospectus.

(a) Exploration risks

Exploration is a high-risk activity that requires large amounts of expenditure over extended periods of time. The Company's exploration activities are subject to all the hazards and risks normally encountered in the exploration of minerals, including climatic conditions, hazards of operating vehicles and plant, risks associated with operating in remote areas and other similar considerations. Conclusions drawn during mineral exploration are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geochemical, geophysical, drilling and other data.

Further, the costs of the Company's exploration activities may materially differ from its estimates and assumptions. No assurance can be given that the Company's cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability. There is no certainty that exploration carried out by the Company will result in the discovery of mineralisation that has economic value.

The Company recently announced that the closure of its Pearse South open pit as a result of tension cracks in the access ramp rendering it unsafe to use. As a result, the Company has determined to strategically pivot its operational plans to infill and extensional drilling of its tenements with the objective of growing its underground Measured and Indicated Resources to support processing plant restart and to support a larger operation with an extended mine life at Mineral Hill. There is no certainty that exploration undertaken will be able to support these strategic objectives.

(b) Operational risk

Drilling, mining and processing activities carry risk and as such, activities may be curtailed, delayed or cancelled as a result of a number of factors outside KSN's control. These include geological conditions, technical difficulties, securing and maintaining tenements, weather, residue storage and tailings dam failures and construction of efficient processing facilities. The operation may be affected by force majeure, changes in geology, fires, labour disruptions, landslides, and the inability to obtain adequate machinery, engineering difficulties and other unforeseen events. As with most mines, reserves, resources and stockpiles are based on estimates of grade, volume and tonnage. The accuracy and precision of these estimates will depend upon drill spacing and other information such as continuity, geology, rock density, metallurgical characteristics, mining dilution, costs, etc. which evolve as the mine moves through different parts of the ore body. KSN will endeavour to take appropriate action to mitigate these operational risks (including by properly documenting arrangements with counterparties and adopting industry best practice policies and procedures) or to insure against them, but the occurrence of any one or a combination of these events may have a material adverse effect on KSN's performance and the value of its assets.

(c) Mineral Resources and Ore Reserves

The Company's Mineral Resources estimates for its existing projects are expressions of judgement based on industry practice, experience and knowledge and are estimates only, which are necessarily imprecise and depend to some extent on interpretations which may prove inaccurate. No assurance can be given that the estimated Mineral Resources and/or Ore

Reserves are accurate or that the estimated level of copper or any other mineral will be produced. Such estimates are, in large part, based on interpretations of geological data obtained from drill holes and other sampling techniques. Actual mineralisation or geological conditions may be different from those predicted. No assurance can be given that any or all of the Company's Mineral Resources constitute or will be converted into Ore Reserves. Actual Mineral Resources and/or Ore Reserves may differ from those estimated, which could have a positive or negative effect on the Company's operational or financial performance.

Commodity price fluctuations as well as increased production costs may render the Company's Mineral Resources and/or Mineral Resources or Ore Reserves unprofitable to develop at a particular site or sites for periods of time or may render Ore Reserves containing relatively lower grade mineralisation uneconomic. Estimated Mineral Resources and/or Ore Reserves may have to be recalculated based on actual production experience. Any of these factors may require the Company to reduce its Mineral Resources and/or Ore Reserves, which could have a negative impact on the Company's financial results and the expected operating life of their operations.

(d) Tenement Titles

The Company could lose title to its mineral tenements if insufficient funds are available to meet the relevant annual expenditure commitments, as and when they arise. The Company closely monitors its compliance with licence conditions, including expenditure commitments and rents, and maintains a dialogue with the relevant government representatives who are responsible for enforcing licence conditions. Most tenements have a long history, with multiple previous title holders. While registration on the Mineral Titles Register is evidence of ownership, it is not definitive. The registration is subject to prior registered dealings and encumbrances which may be incomplete or have not been identified and may materially affect the value of the relevant tenements and/or the Company's intended operations on those tenements.

(e) Commodity Prices

The success of the projects held by the Company will be dependent on the price of gold copper, silver, lead and zinc. The ability to raise additional funding for future exploration activities could be impacted if the price of gold, copper, silver, lead and zinc fell materially below current levels causing the Company to cease exploration activities. The ability to develop an economically viable mining operation based on currently identified resources or gold, copper, silver, lead and zinc resources discovered through future exploration could be impacted if the price of gold or copper falls below the level required to ensure viability. Commodity prices are volatile and may fluctuate as a result of numerous factors, which are beyond the control of the Company.

(f) Cash flow risk

The Company's estimated expenditure is based on current assumptions and best estimates. There is a risk that actual costs may exceed these estimates, which may result in the Company requiring additional funding. The closure of the Pearse South open pit has resulted in an estimated gross revenue reduction of approximately \$39 million for the period from June – September 2026. The Company has existing cash reserves together with a scheduled payment and contingent payments from the sale of its Misima Gold Project in Papua New Guinea. The Company may also seek to access additional funding from equity and debt transactions, such as the Placement and this Entitlement Offer, but cannot guarantee access to sufficient capital or funding as and when required (see section 6.3.7 for further information).

(g) Financing risks and capital requirements

The Company's capital requirements will depend on a number of factors. As an exploration company, Kingston may, in the future, require further equity financing which may dilute shareholders and may be undertaken at lower prices than the current market price. No assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. In the ordinary course of business, the Company is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments, to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.

(h) Underwriting risk

The Company has entered into an Underwriting Agreement in respect of the Entitlement Offer to which only the Underwriter and the Company are a party (refer to section 7.11). Prior to settlement of the Entitlement Offer, there are certain events which, if they were to occur, may affect the obligations of the Underwriter to underwrite the Offer. If certain conditions are not satisfied or certain events occur under the Underwriting Agreement, the Underwriter may terminate the Underwriting Agreement which may require the Company to search for alternative financing.

The ability of the Underwriter to terminate the Underwriting Agreement in respect of some events will depend (amongst other things) on whether the event has or is likely to have a material or adverse effect on the success, settlement or marketing of the Entitlement Offer, or could reasonably be expected to give rise to a contravention by, or a liability of, the Underwriter under applicable law. If the Underwriting Agreement is terminated for any reason, then the Company may not receive the full amount of the proceeds expected under the Entitlement Offer, the Company's financial position might change and it might need to take other steps to raise capital. Refer to section 7.11 of this Prospectus for a summary of the termination events set out in the Underwriting Agreement.

Other risks which may affect the Company include:

- Dilution risk;
- Share price risk;
- Economic risk;
- International conflicts;
- Regulatory risk;
- Environmental risk; and
- Key personnel risk.

The New Shares offered under this Prospectus carry no guarantee of profitability, dividends, return of capital or the price at which they may trade on ASX. The past performance of the Company should not necessarily be considered a guide to its future performance.

1.9. New Share terms

Upon issue, each New Share will rank equally with all existing Shares then on issue. A summary of the rights attaching to the New Shares is set out in section 7.4.

1.10. Acceptance of Entitlement to New Shares

The number of New Shares to which an Eligible Shareholder is entitled and the total amount an Eligible Shareholder would have to pay if they choose to take up all of their rights to subscribe for New Shares is shown on the Entitlement and Acceptance Form accompanying this Prospectus. This Prospectus is for the information of Eligible Shareholders who are entitled and may wish to apply for the New Shares. Fractional entitlements will be rounded up to the nearest whole number.

Acceptance Money should be rounded up to the nearest cent.

Eligible Shareholders can also apply for additional New Shares, up to a maximum of 100% of their Entitlements, as Top-Up Shares under the Shortfall Offer in the event that a Shortfall exists.

Subscription moneys for the New Shares must be received by the Company at its Share Registry by the Closing Date. Please refer to the timetable for the important dates of the Entitlement Offer.

1.11. Directors' intentions in respect of Entitlements

As at the date of this Prospectus, some of the Directors of KSN have either a direct or indirect interest in Shares. Set out below is a table summarising the Entitlement of each Director (based on their current holding) and how they intend to treat their Entitlement.

Andrew Corbett	9,370,715	2,342,679	Not to take up Entitlement
Anthony Wehby	3,044,223	761,056	Undetermined, may take none, some or all of Entitlement
Stuart Rechner	2,102,676	525,669	To take up Entitlement

Note: Details of Existing Options held by the Directors are contained in section 4.7. Directors do not intend to exercise any Existing Options before the Record Date.

The Company notes that no Director has participated in the Placement.

1.12. Lead Manager

Argonaut Securities Pty Limited has been appointed as the lead manager to the Entitlement Offer and the Placement. Further details of the terms of appointment of the Lead Manager are set out in section 7.10.

1.13. Underwriter

Argonaut Corporate Finance Limited has been appointed as the underwriter to the Entitlement Offer. Further details of the terms of appointment of Argonaut Corporate Finance Limited as underwriter are set out in section 7.11.

The Underwriter has entered into a Sub-Underwriting Agreement with Farjoy and has informed the Company that it has entered into sub-underwriting arrangements with other institutional, professional and sophisticated investors identified by the Underwriter and will be responsible for any fees that it may have to pay out to them.

1.14. Shortfall and dilution of Shareholder's interests

Entitlements not taken up under the Entitlement Offer will form the Shortfall and become available as Shortfall Shares under the Top-Up Facility and the Shortfall Offer.

Eligible Shareholders may, in addition to applying for their full Entitlements, apply for additional New Shares under the Top-Up Facility, up to a maximum of 100% of their Entitlement, as Top-Up Shares at the Issue Price, to be issued in accordance with the allocation policy set out in section 3.4.

Eligible Shareholders who apply for Top-Up Shares will be bound to accept a lesser number of Top-Up Shares allocated to them than applied for. If a lesser number is allocated to them, excess Acceptance Money will be refunded without interest. There is no guarantee that such Eligible Shareholders will receive the number of additional Top-Up Shares applied for under the Top-Up Facility, or indeed, any Top-Up Shares at all. The number of Top-Up Shares issued under the Top-Up Facility will not exceed the Shortfall. The Company reserves the right to scale back any applications for Top-Up Shares in their absolute discretion.

Other institutional investors may also participate in the Shortfall Offer upon invitation by the Company, Lead Manager or Underwriter by following the directions given by the Company in consultation with the Lead Manager and the Underwriter (including, by completing any such application form as reasonably requested) (see section 3.2 and 3.4 for further details). It is an express term of the Shortfall Offer that applicants for Shortfall Shares) will be bound to accept a lesser number of Shortfall Shares allocated to them than applied for. If a lesser number is allocated to them, excess Acceptance Money will be refunded without interest. There is no guarantee that such Applicants will receive the number of Shortfall Shares

applied for under the Shortfall Offer, or indeed, any additional Shortfall Shares at all. The number of New Shares issued under the Shortfall Offer will not exceed the Shortfall. The Company reserves the right to scale back any applications for Shortfall Shares in their absolute discretion.

As the Entitlement Offer is fully underwritten, the Directors, in conjunction with the Lead Manager and Underwriter, shall allot and issue Shortfall Shares in accordance with the allocation policy for the Shortfall set out in section 3.4.

Shareholders should be aware that to the extent that they do not accept their Entitlements in full, a Shortfall will arise and that Shortfall will be placed by the Company pursuant to the Shortfall Offer, in consultation with the Lead Manager and Underwriter pursuant to the Underwriting Agreement (and sub-underwriting arrangements), to other parties, in which case, their interest in the Company may be significantly diluted (see section 5.3 for further details). This will be in addition to the dilution of the interests of Shareholders as a result of the Placement (assuming non-participation). Further, neither the Entitlement Offer or the Shortfall Offer are being extended to Shareholders with registered addresses outside of Australia, New Zealand, Singapore, Hong Kong and the European Union (excluding Austria) and the holdings of those Shareholders in the Company will be diluted by the Entitlement Offer. Given the terms of the Entitlement Offer and Shortfall Offer and the conduct of the Placement, the interests of a Shareholder in the Company may be diluted by up to 13% as a consequence of the Placement and by 30.4% as a result of the Entitlement Offer in the event that they are not eligible to participate or elect not to accept their Entitlement in full.

Acceptance of Entitlements or the placement of any Shortfall may also result in existing Shareholders or new investors significantly increasing their interest in the Company or obtaining a substantial interest in the Company. However, the Shortfall will only be placed to the extent that such placement is in compliance with the takeover provisions of the *Corporations Act*, which restrict a person and their associates from having a relevant interest in the Company of not more than 20.0%, subject to a number of exemptions.

The statement will also advise holders of their holder identification number. Further statements will be provided to holders which reflect any changes in their holding in the Company during a particular month.

2.6 No rights trading

2.10 Option Holders and Warrant Holders

Option Holders and Warrant Holders will not be entitled to participate in the Entitlement Offer unless they:

- 2.10.1 have become entitled to exercise their Existing Options and Existing Warrants under the terms of their issue and do so prior to the Record Date; and
- 2.10.2 participate in the Entitlement Offer as a result of being an Eligible Shareholder at 7.00pm (AEST) on the Record Date.

The Directors of the Company together hold 3,185,261 vested Existing Options and have advised that they do not intend to exercise any of those Existing Options before the Record Date. Having regard to the exercise price of the Existing Options and Existing Warrants and the Issue Price, the Directors believe that it is unlikely that any of the other Existing Options or the Existing Warrants will be exercised prior to the Record Date.

2.11 Overseas shareholders

The Company has not made investigations as to the regulatory requirements that may prevail in the countries outside of Australia, New Zealand, Hong Kong, Singapore and the European Union (excluding Austria) in which the Company's Shareholders reside.

This Prospectus and accompanying forms do not, and are not intended to, constitute an offer of New Shares in any place outside of Australia, New Zealand, Hong Kong, Singapore and the European Union (excluding Austria) in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Offer or that Form.

The distribution of this Prospectus in places outside of Australia, New Zealand, Hong Kong, Singapore and the European Union (excluding Austria) may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe those restrictions. Any failure to comply with those restrictions may violate applicable securities laws.

The Company has decided that it is unreasonable to make the Entitlement Offer to Shareholders with registered addresses outside of Australia, New Zealand, Hong Kong, Singapore and the European Union (excluding Austria) (**Ineligible Shareholders**) having regard to the number of Shareholders in those places, the number and value of the New Shares they would be offered and the legal and regulatory requirements in those places and costs of complying with those requirements. Accordingly, the Entitlement Offer is not being extended to and does not qualify for distribution or sale by Ineligible Shareholders and no New Shares will be issued to Ineligible Shareholders.

In particular this Entitlement Offer is not made in the United States or to persons (including nominees or custodians) acting for the account or benefit of a person in the United States, or to any person who is ineligible under applicable securities laws in any country to receive an offer under the Prospectus without any requirement for a prospectus to be lodged or registered.

Pursuant to a nominee mandate, the Company has appointed the Lead Manager to act as nominee for the purposes of section 615 of the Corporations Act (**Nominee**). The Company must issue to the Nominee those New Shares that would otherwise have been issued to Shareholders who are Ineligible Shareholders on the Record Date. As required by section 615 of the Corporations Act, the Company has applied to ASIC for the approval of the Nominee to act as nominee for the Ineligible Shareholders, which approval is expected to be finalised prior to the Closing Date of the Entitlement Offer.

The Nominee will attend to the sale of the New Shares issued to it by the Company and direct the net proceeds (if any, after deduction of the Issue Price and all reasonable costs incurred with the sale) to the Share Registry to facilitate pro rata payments of any net proceeds to the Ineligible Retail Shareholders.

The Nominee will endeavour to dispose of the Ineligible Shares as soon as reasonably practicable and within six weeks of the Closing Date and will endeavour to achieve the best price that is reasonably obtainable on market at the time of the relevant sale. However, the Nominee does not guarantee that the sale of the New Shares issued to it by the Company will be capable of being executed within any specified price or timing, or at all. The proceeds of the sale (if any) will be paid to those Ineligible Shareholders for whose benefit the New Shares are sold in proportion to their shareholdings as at the Record Date (after deducting the Issue Price and all reasonable costs incurred with the sale). Notwithstanding that the Nominee may sell the New Shares, Ineligible Shareholders may nevertheless receive no net proceeds if the Issue Price plus the costs of the sale are greater than the sale proceeds. Neither the Company nor the Nominee will be liable for a failure to obtain any net proceeds, or to sell the New Shares at any particular price or at any particular time.

2.12 Notice to nominees, trustees and custodians

Nominees and custodians may not distribute this document, and may not permit any beneficial shareholder to participate in the Offer, in any country outside Australia, New Zealand and Singapore except, with the consent of the Company, to beneficial shareholders resident in certain other countries where the Company may determine it is lawful and practical to make the Offer. In addition, nominees, trustees and custodians must not apply on behalf of any beneficial holder that would not itself be an Eligible Shareholder. The Company is not required to determine whether or not a registered holder or investor is acting as a nominee, trustee or custodian or the identity or residence of any beneficial holder of Shares. Where any person is acting as a nominee, trustee or custodian for a foreign person, that person, in dealing with its beneficiary, will need to assess whether indirect participation in the Entitlement Offer by the beneficiary complies with applicable laws. By applying for New Shares under this Prospectus, including by making a payment using BPAY® or EFT, a nominee, trustee or custodian represents and warrants this is the case. Company reserves the right to reject any Acceptance which it believes comes from a person who is not an Eligible Shareholder.

2.13 Electronic prospectus

An electronic version of this Prospectus is available on the Internet at www.kingstonresources.com.au.

The Entitlement and Acceptance Form may only be distributed together with a complete and unaltered copy of the Prospectus. The Company will not accept a completed Entitlement and Acceptance Form if it has reason to believe that the investor has not received a complete paper copy or electronic copy of the Prospectus or if it has reason to believe that the Entitlement and Acceptance Form or electronic copy of the Prospectus has been altered or tampered with in any way.

While the Company believes that it is extremely unlikely that in the Entitlement Offer period the electronic version of the Prospectus will be tampered with or altered in any way, the Company cannot give any absolute assurance that it will not be the case. Any investor in doubt concerning the validity or integrity of an electronic copy of the Prospectus should immediately request a paper copy of the Prospectus directly from the Company or the Share Registry.

3.4 Allotment and allocation policy

- 3.4.1 A Shortfall will exist if any Eligible Shareholder does not take up their full Entitlement. Shortfall Shares applied for will only be allocated and issued if a Shortfall exists - resulting in the Entitlement Offer being undersubscribed.
- 3.4.2 Allocation and allotment of any Shortfall Shares applied for will be made in accordance with the following policy:
 - 3.4.2.1 The Directors will allocate the Shortfall Shares to Eligible Shareholders that have applied to take up their full Entitlements and in addition have indicated that they wish to take up additional New Shares as Top-Up Shares under the Top-Up Facility as provided for in section 3.1. Top-Up Shares will only be issued to Eligible Shareholders up to a maximum of 100% of an applicant's Entitlements and otherwise to the extent there is a sufficient number of Shortfall Shares and applications may be scaled back in accordance with the policy set out in this Prospectus;

 - 3.4.2.3.3 finally, the Company will call on the Underwriter to subscribe for or procure the subscription for the remaining balance of New Shares under the Shortfall in accordance with its underwriting obligations under the Underwriting Agreement. These remaining New Shares may be allocated by the Underwriter to any third party or nominee nominated by the Underwriter.
- 3.4.3 The Company will not allocate or issue Shortfall Shares where it is aware that to do so would result in a breach of the Corporations Act, the Listing Rules or any other relevant legislation or law (including FATA). Eligible Shareholders wishing to apply for additional Shortfall Shares must consider whether or not the issue of the additional Shortfall Shares applied for would breach the Corporations Act or the Listing Rules or any other relevant legislation or law (including FATA) having regard to their own circumstances.
- 3.4.4 There is no guarantee that Eligible Shareholders will be successful in being allocated any of the Shortfall Shares that they apply for. The Company may reject any application for Shortfall Shares or allocate fewer Shortfall Shares than applied for by Applicants for Shortfall Shares in accordance with the policy set out above. The Directors reserve the right at their discretion to

place a maximum on the number of Shortfall Shares that will be issued to Eligible Shareholders who apply for Top-Up Shares.

- 3.4.5 Specifically, the Directors will seek to ensure that no person (other than Farjoy, to the extent that Farjoy is issued Shortfall Shares pursuant to its Sub-Underwriting Agreement) will be issued Shortfall Shares if such issue will result in that person's Voting Power in the Company exceeding 20% or increasing at all, if they already hold Voting Power in the Company above 20%.
- 3.4.6 In accordance with the Listing Rules, the Shortfall Shares allocated pursuant to the allocation policy detailed above will be issued within 15 Business Days of the Closing Date for the Entitlement Offer. If there is remaining Shortfall due to a default under or termination of the Underwriting Agreement, the Company reserves the right to proceed to allocate the New Shares under the Entitlement Offer and to issue the remaining Shortfall Shares within three months after the Closing Date of the Entitlement Offer at its absolute discretion.

4 Company Information

4.1 Introduction

Kingston owns 100% of the Mineral Hill Project located in the South Cobar Basin in New South Wales.

Mineral Hill

In late 2021, Kingston acquired the Mineral Hill project located 65km north of Condobolin.

Mineral Hill comprises brownfields open pit and underground mines which have produced doré (Au-Ag) and concentrate (Cu-Zn-Pb) via a Carbin-In-Leach and flotation circuits, capable of processing 350ktpa.

The Company up until recently had been completing the mining at the Pearse South open pit ahead of transitioning to underground mining sources.

The Pearse open pits are separate to the underground portals and do not impede access.

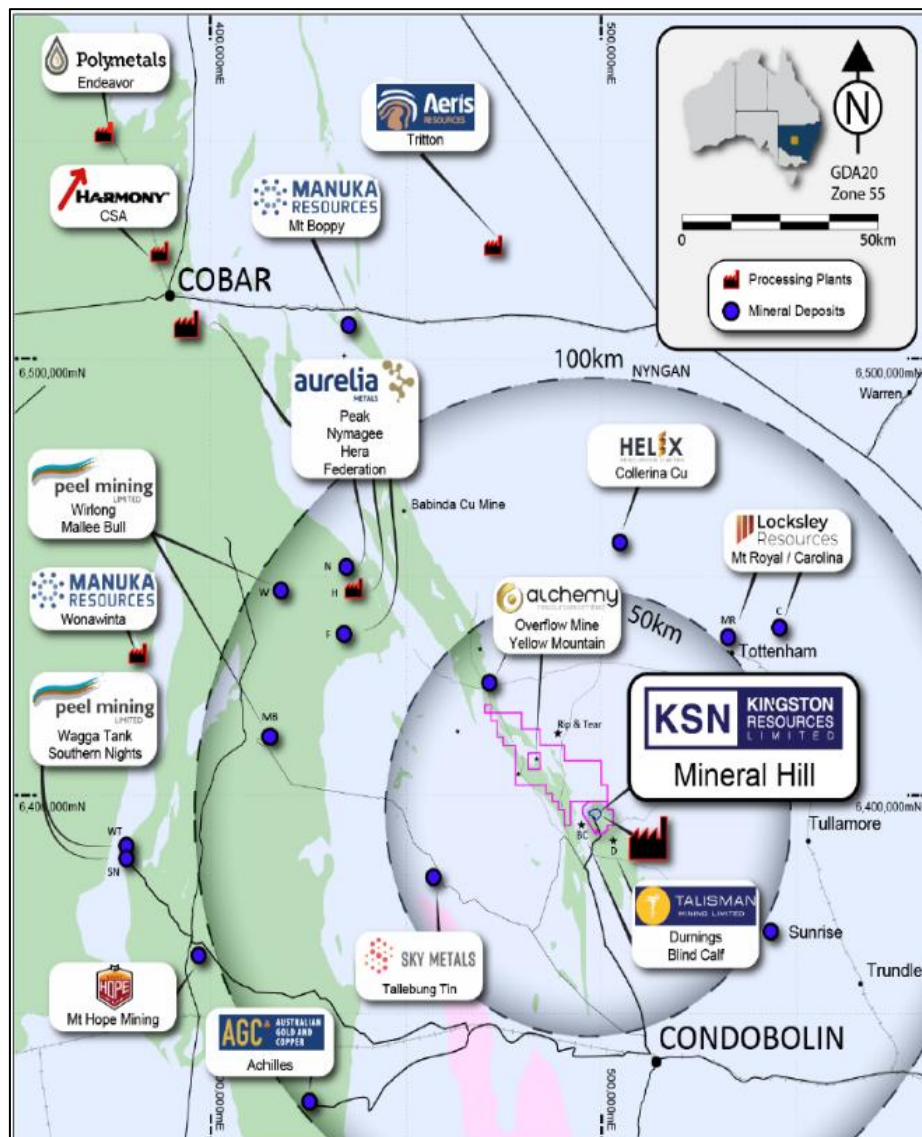

Figure 1: Mineral Hill Operation Location and Surrounding Projects and Project Owners.

Highlights

- A. Strategically positioned with a fully permitted, 350ktpa polymetallic plant in the South Cobar Basin - Existing CIL and flotation processing facility with the ability to treat polymetallic ores.
- B. Plant expansion studies to investigate right sizing and configuring the Mineral Hill processing facility - Key permits in place to enable processing up to 700ktpa, studies to commence on evaluating a higher throughput rate.
- C. 25,000m drilling program over the next 12 months to unlock the potential of Mineral Hill via Resource and Reserve expansion – increase the mining inventory, Measured and Indicated Resources, mine life and higher production base.
- D. Extensive underground development and infrastructure in place - Two declines and associated underground development, vent rise and company owned underground fleet to support an aggressive exploration program.

Figure 2: Mineral Hill ROM Pad and Processing Plant (June 2026).

4.2 Mineral Hill Processing Plant

Significant Existing and Permitted Infrastructure

Existing 350ktpa processing facility with CIL and flotation capabilities - to enable processing of polymetallic ores from Mineral Hill and the region to produce doré and concentrates.

Mineral Hill is the only operational polymetallic processing plant - in the South Cobar Basin.

Successful recent trial copper concentrate production - de-risking event for recommencing future base metal concentrate production.

Key permits in place to expand to the plant to 700ktpa - plant studies to be undertaken to right size, configure and optimise the plant to support natural underground mining rates.

Figure 3: Mineral Hill Processing Plant and overview.

4.3 Mineral Hill Underground Mine development

Southern Ore Zone (SOZ)

Accessed via the Eastern decline, with development down to approximately 280 vertical metres.

Primary ventilation raise bore (240m) completed in 2026.

Underground fleet largely in place (12 units on site).

Current resource of 6.5Mt with extension and infill/grade control drilling ongoing, recent high-grade intercepts included:

- **7.70m @ 2.46g/t Au, 0.78% Cu, 1.9% Pb, 1.27% Zn, 41g/t Ag** from 10m¹
- **29.70m @ 2.63% Pb, 4.25% Zn, 28g/t Ag** from 30.3m.

Drilling continues to confirm the geological model and extended mineralisation into new areas.

Figure 4: Extension targets at the Southern Ore Zone, Mineral Hill.

Jacks Hut – future underground mining

Jack's Hut has the potential to provide a second underground production area with a current Resource of 1.6Mt with a separate decline and infrastructure.

Historically mined in the 1990's for copper and gold - **705kt of ore mined at 6.76g/t Au and 0.74% Cu for 80.2koz of gold and 11.9kt of copper sold.**

High potential polymetallic mineralisation along trend with down dip extensions below historical mining.

Jack's Hut envisaged to be a key feed source for any future potential mill expansion post plant expansion studies and optimisation.

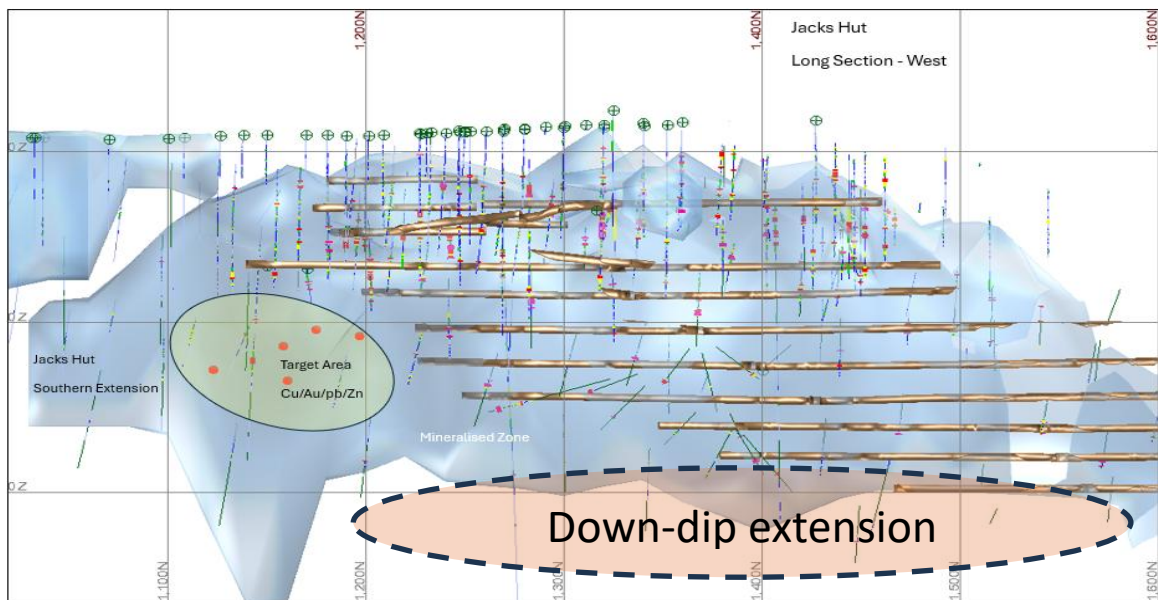

Figure 5: Drilling to target Southern and down dip extensions of Jacks Hut.

4.4 Growth strategy

Drilling to accelerate resource growth and launch Mineral Hill with a longer mine life, large production base to enable growth.

Drill High Impact Near Mine Extensions

- 25,000m underground and surface drill program
- Multiple targets to extend known mineralization and make new discoveries
- Substantially lift the Measured and Indicated resources and reserves
- Aiming to deliver a longer mine life with a higher production rate

Optimise the Mine Plan, Right Size and Configure the Plant

- Evaluate additional sources of ore within the mine area and optimise the mine schedule.
- Commencement of plant expansion studies to right size and configure the mill for the future
- Key permits in place to expand to the facility to 700ktpa
- Potential for reduced future operating costs by increasing from 350ktpa to 700ktpa

Near-Term Catalysts

- Ongoing drilling and assay result updates
- Exploration for additional near-mine deposits
- Mineral Resource and Ore Reserve updates to demonstrate scale capability.

As previously announced in the Company's investor presentation of 16 June 2026, the Company continually assesses and participates in discussions in respect of strategic corporate and other opportunities that may have the potential to create additional value for all Shareholders. Similarly, the Company is also approached from time to time by interested parties in relation to potential strategic corporate and other opportunities. Notes:

1. Trade creditors reduced to reflect the cash balance as of 10 June 2026 being \$9.46M.
2. The capital raise adjustment shows the effects of the Placement (\$4.4M) and the Entitlement Offer (\$8.47M). The proforma balance sheet assumes that the Placement and the Entitlement Offer are fully subscribed.
3. Contingent consideration on the Misima project has been measured at fair value, with discount rates of 6% and 7.5% applied for the FID linked payment and royalty buy back respectively. The resulting fair value of the contingent consideration recognised in the financial statements is \$23.95M.
4. The \$10M deferred consideration from OK Tedi is expected on 11 July 2026, during the entitlement offer period.
5. The \$5.18M impairment recognised in the proforma balance sheet relates solely to the closure of the Pearse pits and represents the only currently identified impairment at the date of this Prospectus. A comprehensive impairment assessment of the Group's mining and exploration assets, in accordance with AASB 136 Impairment of Assets and AASB 6 Exploration for and Evaluation of Mineral Resources, will be performed as part of the year-end 30 June 2026 financial reporting process. Further impairment charges, the quantum of which cannot currently be reliably estimated, may be required upon completion of that assessment. Such further impairments would reduce the Group's reported net assets but would not affect the cash position or the funding adequacy of the Offer.
6. Estimated cash balance of \$32.33M (before cost), driven by proceeds from the Placement, Entitlement Offer (assuming fully subscribed) and deferred Misima sale consideration. This balance is expected to fund future drilling activities, operating/corporate costs, working capital and offer costs.
7. Based on the equity raise currently assumed, one off raising costs of \$830k will be incurred.
8. Advance payment on concentrates totalling to \$2.29M and insurance funding of \$0.33M.
9. Subsequent to 31 May 2026, the Group has announced a redundancy & fleet demobilisation cost following the closure of the Pearse pits, which is expected to result in estimated payment of approximately \$5.0M. As the constructive obligation arose after the balance sheet date, no provision has been recognised in the proforma balance sheet as at 31 May 2026. These costs will be settled from the proceeds of the Placement and Entitlement Offer

5.2 Capital structure

The share capital structure of the Company as a result of the Placement and the Entitlement Offer will be as follows:

	Shares Number	%
Shares		
Ordinary Shares on issue prior to the Placement	841,929,455	69.61%
Shares issued pursuant to the Placement	125,714,286	10.39%
Maximum number of New Shares under Prospectus ¹	241,910,936	20.00%
Total:	1,209,554,677	100%
Options		
Existing Options and Existing Warrants on issue	155,842,747	100%
Maximum Total Options and Warrants on issue at completion of current proposed capital raisings	155,842,747	100%

Notes:

Assumes that the Entitlement Offer is fully subscribed (excluding rounding of Entitlements)

If any of the Existing Options and Existing Warrants which are vested and exercisable (being 135,747,935 of the Existing Options and Existing Warrants) are exercised prior to the Record Date, additional New Shares will be issued under the Entitlement Offer under this Prospectus. If all Existing Options and Existing Warrants on issue which are vested and exercisable as at the date of this Prospectus were exercised prior to the Record Date, the Company's issued shares would increase by 135,747,935 resulting in a further 33,936,984 New Shares being

issued pursuant to this Prospectus. This would increase the Company's total Shares on issue after completion of the Offer to 1,243,491,661 Shares. The Directors of the Company together hold 3,185,261 vested Existing Options and have advised that they do not intend to exercise any of those Existing Options before the Record Date.

As at the date of this Prospectus, the details relating to the Existing Options and Existing Warrants on issue are as follows:

5.3 Potential effect of the Placement and Entitlement Offer

Dilution

As a result of the Placement, the interests of Shareholders held prior to the capital raising will be diluted by approximately 13% upon completion of the Placement, which will occur before the Record Date and before the issue of the New Shares. This is notwithstanding the circumstance if all Eligible Shareholders take up their Entitlements (and assuming that none of the Option Holders or Warrant Holders exercise their Existing Options or Existing Warrants and participate in the Offer).

The Offer is a pro-rata offer so that if all Eligible Shareholders take up their Entitlements and none of the Option Holders or the Warrant Holders exercise their Existing Options and Existing Warrants and participate in the Offer, the Voting Power of all Eligible Shareholders would remain the same (outside of the impact of the Placement and assuming that none of the Option Holders or Warrant Holders exercise their Existing Options or Existing Warrants and participate in the Offer). As a consequence of the Placement, Eligible Shareholders will be diluted by approximately 13% in the event that they only accept their full Entitlement and do not apply for (and receive) a sufficient number of Shortfall Shares under the Shortfall Offer.

If an Eligible Shareholder does not take up their Entitlement in full it will result in their percentage holding in the Company being further diluted by the Entitlement Offer. Given the terms of the Entitlement Offer, which is fully underwritten, the additional dilution to an Eligible Shareholder's interest in the Company would be 20%, or an aggregate dilution of 30.4%, if they do not take up any of their Entitlements under the Entitlement Offer.

Shareholders who wish to minimise the dilution of their interest as a result of the Placement can apply for additional New Shares up to a maximum of 100% of their Entitlements as Top-Up Shares. In the event that a Shortfall exists, they will be entitled to receive Top-Up Shares (up to a maximum of 100% of their Entitlements), although the Company reserves the right to scale back any applications for Top-Up Shares in their absolute discretion and there is no guarantee that Eligible Shareholders will be successful in being allocated any of the Top-Up Shares that they apply for. In the event of a Shortfall, the Directors reserve the right to place the Shortfall at their sole discretion subject to the provisions of this Prospectus (including the Shortfall Offer), the Underwriting Agreement, any sub-underwriting arrangements, the *Corporations Act* and the Listing Rules.

Additionally, the Entitlement Offer and Shortfall Offer are not being extended to Shareholders with registered addresses outside of Australia, New Zealand, Hong Kong, Singapore and the European Union (excluding Austria) and the holdings of those Shareholders in the Company will be diluted by a maximum of 30.4% as a consequence of the Placement and the Entitlement Offer.

The final percentage interests held by Shareholders of the Company is entirely dependent on the extent to which they are Eligible Shareholders and to the extent to which the other Shareholders take up their Entitlements and apply for additional New Shares (as Shortfall Shares under the Shortfall Offer).

The interests of Shareholders will subsequently be further diluted to the extent that holders of Options and Warrants elect to exercise those Options and Warrants before the respective expiry dates.

Control

There will be no change of control to the control of the Company as a result of the Placement, although the largest Shareholder of the Company, Farjoy Pty Ltd, will have increased its interest in the Company from 17.56% (prior to the conduct of both the Placement and the Entitlement Offer) to 19.9% as a consequence of its participation in the Placement.

If all Shareholders take up their Entitlements under the Entitlement Offer, the issue of the New Shares will also not have any effect on the control of the Company. In these circumstances, Farjoy Pty Ltd will remain with an interest of 19.9% as a consequence of its participation in the Placement and the acceptance of its Entitlements under the Entitlement Offer.

To the extent that Entitlements are not taken up and a Shortfall arises, the potential control implications depend upon the extent of the Shortfall.

The Underwriter has no current interest in the Company and, if it was required to subscribe for all of the New Shares under the Entitlement Offer, its interest would increase to 20%. However, the Company advises that:

- Two Directors of the Company (**Accepting Directors**) have given a firm commitment to accept all of their Entitlement, representing 1,512,089 New Shares and a 0.13% of the Shares in the Company upon completion of the Entitlement Offer;
- As identified above, Farjoy has given a firm commitment to accept its Entitlement in full, representing 48,140,276 New Shares and 3.98% of the Shares in the Company upon completion of the Entitlement Offer;
- Farjoy has also entered into a Sub-Underwriting Agreement with the Underwriter (summarised in section 7.12) pursuant to which Farjoy has agreed to sub-underwrite up to \$4,315,090 of the Shortfall under the Entitlement Offer. If Farjoy is required to subscribe for the maximum number of 123,288,296 New Shares under its sub-underwriting agreement, representing 10.19% of the Shares in the Company upon completion of the Entitlement Offer, it will hold a new total of 363,989,676 Shares upon completion of the Entitlement Offer, representing a 30.1% interest in the Company;
- pursuant to the Underwriting Agreement, the Underwriter has authority to enter into sub-underwriting arrangements with institutional, professional and sophisticated investors identified by the Underwriter, where the Underwriter has informed the Company that it has sub-underwritten the entirety of the Shortfall; and

- the Company has appointed a nominee under section 615 of the Corporations Act to affect a sale of those New Shares which would otherwise be allocated to Ineligible Shareholders, which represents approximately 1.59% of the Shares on issue as at the date of this Prospectus and 0.32% of the Shares on issue upon completion of the Entitlement Offer.

This reduces the maximum potential interest of the Underwriter to 5.38%.

In addition:

- Eligible Shareholders can apply for additional New Shares as Top-Up Shares under the Shortfall Offer under this Prospectus (up to a maximum of 100% of their Entitlements); and
- the terms of the Underwriting Agreement expressly require the Company and Underwriter to follow an express dispersion strategy to having regard to the allocation of any Shortfall, including to other potential institutional investors, so as to minimise the number of New Shares which may be allocated to the Underwriter and sub-underwriters, including Farjoy. See sections 2.3 and 7.11 for further information. This may result in an additional portion of the Shortfall being issued to other third parties pursuant to the Shortfall Offer prior to Company determining the allocation to the Underwriter and sub-underwriters (including Farjoy). The Underwriter has informed the Company that it has entered into other sub-underwriting arrangements so that the Shortfall is fully sub-underwritten.

Accordingly, pursuant to the above arrangements, the Company, the Lead Manager and the Underwriter will manage the Entitlement Offer and allocation of any Shortfall so that no person will obtain a relevant interest in Shares of 20% or more, except for the potential of Farjoy to increase its relevant interest in the Company to greater than 20% (as described above). The Company, Lead Manager and Underwriter will also work to identify and engage with additional institutional investors during the conduct of the Shortfall Offer to reduce the allocation of the Shortfall that is taken up by the Underwriter and sub-underwriters (including Farjoy).

The potential Voting Power outcomes for Farjoy based upon the extent to which they are required to subscribe for New Shares under their Sub-Underwriting Agreement are as follows:

% of sub-underwriting allocated to Farjoy	Number of New Shares issued under sub-underwriting	Total Shares held by Farjoy	Voting Power	Entitlement take-up required by other parties (via Entitlements, Shortfall Offer or other underwriting/sub-underwriting)
100%	123,288,296	363,989,676	30.1%	29.1%
75%	92,466,222	333,167,602	27.5%	41.9%
50%	61,644,148	302,345,528	25.0%	54.6%
25%	30,822,074	271,523,454	22.45%	67.4%

Accordingly, in the event that there is a large Shortfall and Farjoy takes up a large amount under its Sub-Underwriting Agreement, Farjoy may hold a level of Voting Power that allows it to influence outcomes at general meetings of shareholders, such as the approval of future corporate transactions which require approval by special resolution. For Farjoy to hold less than a 25% interest in the Company upon completion of the Entitlement Offer, Farjoy would need to subscribe for less than 50% of their commitment under their Sub-Underwriting Agreement with the Underwriter. This would require at least 54.6% of Entitlements (excluding Farjoy, the Accepting Directors and Ineligible Shareholders) to be accepted by either Eligible Shareholders (by their Entitlements and as Top-Up Shares under the Shortfall

Offer), by institutional investors under the Shortfall Offer or taken up by the Underwriter or other sub-underwriters under the Underwriting Agreement.

The Company understands that Farjoy's basis for its participation as a key sub-underwriter to the Entitlement Offer is due to Farjoy's support of the Company and not an intention to take, or seek to take, control of the Company.

The above content assumes that none of the Option Holders or Warrant Holders exercise their Existing Options or Existing Warrants and participate in the Entitlement Offer. The content is also based upon estimated information only and actual outcomes may vary.

Takeover provisions

It is a general rule, subject to exceptions, under section 606 of the Corporations Act that a person cannot acquire a relevant interest in issued voting shares in a company if, because of the transaction in relation to securities, a person's Voting Power in the company increases from 20% or below to more than 20%, or from a starting point that is above 20% and below 90%.

One of the exemptions available which allows a person and their associates to acquire a relevant interest in the Company of more than 20% arises under Item 13 of section 611 of the Corporations Act 2001 (Cth), which provides an exemption where the acquisition results from an issue, under a disclosure document, of securities in the company in which the acquisition is made if:

- the issue is to a person as underwriter to the issuer or sub-underwriter; and;
- the document disclosed the effect that the acquisition would have on the person's voting power in the company.

The Company considers that the Sub-underwriting Agreement between the Underwriter and Farjoy satisfies the requirements of Item 13 to enable Farjoy to increase its relevant interest in the Company to greater than 20% as a consequence of sub-underwriting the Entitlement Offer and does not constitute a mechanism by which Farjoy is seeking to obtain control of the Company.

It is noted also that the Company has (subject to ASIC approval) appointed the Nominee pursuant to section 615 of the Corporations Act to sell the Entitlements of Ineligible Shareholders. Accordingly, the exemption under Item 10 of section 611 of the Corporations Act is also available to the Company if required.

6 Risk factors

6.1 Introduction

There are risks which may impact on the operating and financial performance of the Company and, therefore, on the value of the New Shares offered under this Prospectus. Some of these risks can be mitigated by the Group's systems and internal controls, but many are outside of the control of the Group and the Board. There can be no guarantee that the Company will achieve its stated objectives or that any forward-looking statements will eventuate. An investment in a business with limited operating history, such as KSN, is considered speculative and an investor could lose most or all of any investment. There are also general risks associated with any investment in shares.

More specifically, the risks are that:

- 6.1.1 the price at which the Applicant is able to sell the New Shares is less than the price paid due to changes in market circumstances;
- 6.1.2 the Applicant is unable to sell the New Shares; and
- 6.1.3 the Company is placed in receivership or liquidation making it reasonably foreseeable that Shareholders could receive none, or only some of their initial investment.

In the event of insolvency, the holders of fully paid ordinary shares would not normally be liable to pay money to any person. An exception could occur where a distribution, such as a dividend, has been made to Shareholders in circumstances where the Company was unable at that time to meet the solvency test set out in the *Corporations Act*. In that case, a liquidator may call for a return of such distributions.

Potential investors should therefore carefully consider all associated risks before applying for New Shares under this Prospectus and should consider their personal circumstances (including financial and taxation issues) and seek advice from their stockbroker, accountant, solicitor or other professional advisers before deciding whether to invest.

A number of material risk factors which may adversely affect the Group and the value of the New Shares offered under this Prospectus are set out in this section. This is not an exhaustive list and there may be other factors which have an adverse effect on the Group and the value of the New Shares offered under this Prospectus.

6.2 General Risks

The New Shares that are to be issued pursuant to this Prospectus are speculative because of the nature of the business of the Company. The Company has interests in the mineral industry which is highly speculative and no assurances can be made that the Company's particular interests or projects will be successful.

A summary of the major general risks are described below:

6.2.1 Dilution

Shareholders should be aware that to the extent that they do not accept their Entitlements in full, a Shortfall will arise and all or part of any Shortfall may be placed by the Company, in consultation with the Lead Manager and Underwriter pursuant to the Underwriting Agreement (and sub-underwriting arrangements), to other parties in which case their interest in the Company may be significantly diluted (see section 5.2 for further details). Further the Entitlement Offer is not being extended to Shareholders with registered addresses outside of Australia, New Zealand, Singapore, Hong Kong and the European Union (excluding Austria) and the holdings of those Shareholders in the Company will be diluted by the Offer. Given the terms of the Offer, which is fully underwritten, and the conduct of the Placement, the interests of a Shareholder in the Company may be diluted by up to 30.4% in the event that they are not eligible to participate or elect not to accept their Entitlement in full. This dilution will be 13% if they take up their Entitlement in full and do not apply for Top-Up Shares under the Shortfall Offer.

Acceptance of Entitlements or the placement of any Shortfall to the Underwriter and sub-underwriters may also result in existing Shareholders or new investors significantly increasing

their interest in the Company or obtaining a substantial interest in the Company. However, the Shortfall will only be placed to the extent that such placement is in compliance with the takeover provisions of the *Corporations Act*, which restrict a person and their associates from having a relevant interest in the Company of not more than 20.0%, subject to a number of exemptions.

The Company intends to actively work with the Lead Manager and Underwriter, pursuant to the Underwriting Agreement (and sub-underwriting arrangements) during, and after, the Entitlement Offer in order to secure commitments to place, and subsequently to place, any Shortfall of New Shares not subscribed for by Eligible Shareholders.

6.2.2 Share Market Risk

The market price of listed securities can be expected to rise and fall in accordance with general market conditions and factors specifically affecting the Australian resources sector and exploration companies in particular. The New Shares carry no guarantee in respect of profitability, dividends, return on capital, or the price at which they may trade on the ASX.

There are a number of factors (both national and international) that may affect the share market price and neither the Company nor its Directors have control of those factors.

6.2.3 General Economic Conditions

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that economic climate include the general level of economic activity, interest rates, inflation, supply and demand, industrial disruption and other economic factors. The price of commodities will also be of particular relevance to the Company. These factors are beyond the control of the Company and the Company cannot, with any degree of certainty, predict how they will impact on the Company.

6.2.4 International conflict

The ongoing military conflict between Russia and Ukraine, Israel and Gaza, and the recent conflict between the United States and Iran are having a material effect on the global economy.

These hostilities have created uncertainty for capital markets around the world, and this uncertainty may lead to adverse consequences for the Company's business operations. Measures taken by governments around the world to end these conflicts (such as imposing tariffs on exports and other economic sanctions) may cause disruptions to the Company's supply chains and adversely impact commodity prices. Such events may affect the financial performance of the Company, including post-completion of the Entitlement Offer. Further, there is no certainty that similar conflicts which impact global markets will not arise in the future.

6.2.5 Share price fluctuations

The market price of the Company's securities will be subject to varied and often unpredictable influences in the share market. Both domestic and world economic conditions may affect the performance of the Company. Factors such as the level of industrial production, inflation and interest rates impact all commodity prices.

6.2.6 Exchange rate risk

The revenues, earnings, assets and liabilities of the Company may be exposed adversely to exchange rate fluctuations. The Company's revenue may be denominated in Australian Dollars or a foreign currency, such as United States Dollars. As a result, fluctuations in exchange rates could result in unanticipated and material fluctuations in the financial results of the Company.

6.2.7 Legislative change

Changes in government regulations and policies may adversely affect the financial performance or the current and proposed operations generally of the Company.

6.2.8 Unforeseen expenses

While the Company is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were subsequently incurred, the expenditure proposals of the Company may be adversely affected.

6.3 Risks specific to an investment in the Company

In addition to the general market and economic risks noted in section 6.2, Applicants should be aware of risks specific to an investment in the Company, which may include, but are not limited to those risks described below.

6.3.1 Exploration risks

Exploration is a high risk activity that requires large amounts of expenditure over extended periods of time. The Company's exploration activities are subject to all the hazards and risks normally encountered in the exploration of minerals, including climatic conditions, hazards of operating vehicles and plant, risks associated with operating in remote areas and other similar considerations. Conclusions drawn during mineral exploration are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geochemical, geophysical, drilling and other data.

Further, the costs of the Company's exploration activities may materially differ from its estimates and assumptions. No assurance can be given that the Company's cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability. There is no certainty that exploration carried out by the Company will result in the discovery of mineralisation that has economic value.

The Company recently announced the closure of its Pearse South open pit as a result of tension cracks in the access ramp rendering it unsafe to use. This requires the Company to strategically pivot its operational plans to infill and extensional drilling of its tenements with the objective of growing its underground Measured and Indicated Resources to support processing plant restart and to support a larger operation with an extended mine life at Mineral Hill. There is no certainty that exploration undertaken will be able to support these strategic objectives.

6.3.2 Operational risk

Drilling, mining and processing activities carry risk and as such, activities may be curtailed, delayed or cancelled as a result of a number of factors outside KSN's control. These include geological conditions, technical difficulties, securing and maintaining tenements, weather, residue storage and tailings dam failures and construction of efficient processing facilities. The operation may be affected by force majeure, changes in geology, fires, labour disruptions, landslides, and the inability to obtain adequate machinery, engineering difficulties and other unforeseen events. As with most mines, reserves, resources and stockpiles are based on estimates of grade, volume and tonnage. The accuracy and precision of these estimates will depend upon drill spacing and other information such as continuity, geology, rock density, metallurgical characteristics, mining dilution, costs, etc. which evolve as the mine moves through different parts of the ore body. KSN will endeavour to take appropriate action to mitigate these operational risks (including by properly documenting arrangements with counterparties and adopting industry best practice policies and procedures) or to insure against them, but the occurrence of any one or a combination of these events may have a material adverse effect on KSN's performance and the value of its assets.

6.3.3 Mineral Resources and Ore Reserves

The Company's Mineral Resources estimates for its existing projects are expressions of judgement based on industry practice, experience and knowledge and are estimates only, which are necessarily imprecise and depend to some extent on interpretations which may prove inaccurate. No assurance can be given that the estimated Mineral Resources and/or Ore Reserves are accurate or that the estimated level of gold, copper or any other mineral will be produced. Such estimates are, in large part, based on interpretations of geological data obtained from drill holes and other sampling techniques. Actual mineralisation or geological conditions may be different from those predicted. No assurance can be given that any or all of the Company's Mineral Resources constitute or will be converted into Ore Reserves. Actual Mineral Resources and/or Ore Reserves may differ from those estimated, which could have a positive or negative effect on the Company's operational or financial performance.

Commodity price fluctuations as well as increased production and costs may render the Company's Mineral Resources and/or Mineral Resources or Ore Reserves unprofitable to develop at a particular site or sites for periods of time or may render Ore Reserves containing relatively lower grade mineralisation uneconomic. Estimated Mineral Resources and/or Ore

Reserves may have to be recalculated based on actual production experience. Any of these factors may require the Company to reduce its Mineral Resources and/or Ore Reserves, which could have a negative impact on the Company's financial results and the expected operating life of their operations.

6.3.4 Tenement Titles

The Company could lose title to its mineral tenements if insufficient funds are available to meet the relevant annual expenditure commitments, as and when they arise. The Company closely monitors its compliance with licence conditions, including expenditure commitments and rents, and maintains a dialogue with the relevant government representatives who are responsible for enforcing licence conditions. Most tenements have a long history, with multiple previous title holders. While registration on the Mineral Titles Register is evidence of ownership, it is not definitive. The registration is subject to prior registered dealings and encumbrances which may be incomplete or have not been identified and may materially affect the value of the relevant tenements and/or the Company's intended operations on those tenements.

6.3.5 Commodity Prices

The success of the projects held by the Company will be dependent on the price of gold, copper, silver, lead and zinc. The ability to raise additional funding for future exploration activities could be impacted if the price of gold, copper, silver, lead and zinc fell materially below current levels causing the Company to cease exploration activities. The ability to develop an economically viable mining operation based on currently identified resources or gold, copper, silver, lead and zinc resources discovered through future exploration could be impacted if the price of gold or gold was below the level required to ensure viability. Commodity prices are volatile and may fluctuate as a result of numerous factors, which are beyond the control of the Company.

6.3.6 Cash flow risk

The Company's estimated expenditure is based on current assumptions and best estimates. There is a risk that actual costs may exceed these estimates, which may result in the Company requiring additional funding. The closure of the Pearse South open pit has resulted in an estimated gross revenue reduction of approximately \$39 million for the period from June – September 2026. The Company has existing cash reserves together with a scheduled payment from the sale of its Misima Gold Project in Papua New Guinea. The Company will also seek to access additional funding from equity and debt transactions, such as the Placement and this Entitlement Offer, but cannot guarantee that access to sufficient capital or funding as and when required (see section 6.3.7 for further information).

6.3.7 Financing risks and capital requirements

The Company's capital requirements will depend on a number of factors. As an exploration company, Kingston may, in the future, require further equity financing which may dilute shareholders and may be undertaken at lower prices than the current market price. No assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all. In the ordinary course of business, the Company is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments, to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments, and its own financial position.

6.3.8 Asset carrying values and impairment risk

The pro forma balance sheet included in this Prospectus reflects an impairment recognised in respect of the Pearse pit only and does not reflect the outcome of any broader impairment or recoverability assessment across the Group's asset portfolio. The carrying values of the Company's mining and exploration assets are subject to periodic review for impairment in accordance with applicable accounting standards, including at the end of the financial year. These assessments require the exercise of significant judgement and are subject to a range of assumptions, including commodity prices, exchange rates, operating and capital costs, and estimates of reserves and resources. If these assumptions change or prove to be inaccurate, or if the anticipated performance of the assets is not achieved, the Company may be required to

recognise further impairment charges. Any such material write-downs may have a material adverse effect on the Company's financial position, financial performance and future prospects

6.3.9 Reliance on key personnel

The Company's success depends to a significant extent upon its key management personnel, as well as other management and technical personnel including sub-contractors. The loss of the services of any such personnel could have an adverse effect on the Company at this stage of its development.

6.3.10 Diversification Risk

The Company's operations are concentrated primarily on gold and base metals exploration. As such, the company's operations are not diversified. A negative impact which affects the Company's exploration activities may cause substantial damage to the Company, and a lack of diversification may adversely affect the potential damage caused to the Company, and the Company's ability to recover, from such an impact.

6.3.11 Environmental risks and hazards

There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include:

- the Company may be materially affected by adverse weather conditions and other environmental hazards such as fires, floods and water ingress which may delay or prevent exploration from taking place and cause the Company to incur significant costs to rectify any damage or consequences arising from those hazards;
- the emergence of new or expanded regulations associated with the transition to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.

6.3.12 Security of tenure

The Company cannot guarantee that all or any licences or permits in which it has interests will be renewed. Such renewals are at the discretion of relevant government bodies in the jurisdiction and often depends on the Company being successful in obtaining other required statutory approvals for its proposed activities. There is no assurance that such renewals or grants will be granted, nor that they will be granted without adverse conditions attached. There may be areas in relation to tenements which the Company has an existing interest in, or will acquire an interest in the future, over which common law Native Title rights exist or may be found to exist, which may preclude or delay exploration, or development activities. The Company must also comply with Aboriginal heritage legislation requirements which require heritage survey work to be undertaken ahead of the commencement of exploration or mining activities.

6.3.13 Regulatory requirements including exploration and mining permits and licences

The Company's operations are subject to various Federal, State, local laws and regulations, including those relating to mining, prospecting, development permit and licence requirements, industrial relations, environment, land use, royalties, water, native title and cultural heritage, mine safety and occupational health. These laws and regulations may become more restrictive, impose stricter standards and increase penalties for non-compliance, which may adversely affect the Company's financial performance.

Renewals are at the discretion of relevant government bodies in the jurisdiction and often depends on the Company being successful in obtaining other required statutory approvals for its proposed activities. There is no assurance that such renewals or grants will be granted, nor that they will be granted without adverse conditions attached.

There may be areas in relation to tenements which the Company has an existing interest in, or will acquire an interest in the future, over which common law native title rights exist or may be found to exist, which may preclude or delay exploration, or development activities. The Company must also comply with Aboriginal heritage legislation requirements which require heritage survey work to be undertaken ahead of the commencement of exploration or mining activities.

Additional capital may be required to ensure compliance with such laws and regulations, and operational activities may be delayed or prevented entirely.

6.3.14 Native Title

The tenements which the Company has an interest in or will in the future acquire such an interest, may be areas over which legitimate common law native title rights of Indigenous Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

6.3.15 Land access

KSN's projects are located in New South Wales. Access to land in New South Wales for mining and exploration purposes can be affected by land ownership, including private (freehold) land, pastoral lease and regulatory requirements within the jurisdiction where the Company operates.

6.3.16 Environment, rehabilitation and restoration

The operations and activities of the Company are subject to the environmental laws and regulations of Australia. These laws and regulations set standards regulating certain aspects of health and environmental quality and provide for penalties and other liabilities for the violation of such standards. They also establish, in certain circumstances, obligations to rehabilitate current and former facilities and locations where operations are or were conducted.

As with most exploration projects, the Company's operations and activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company will attempt to conduct its operations and activities to the highest standard of environmental obligation, including compliance with all environmental laws and regulations. Additionally, no assurance can be given as to the accuracy of the Company's current provisions for future rehabilitation and closure costs, and actual costs may be substantially greater.

There is also a risk that the environmental laws and regulations may become more onerous, making the Company's operations more expensive. Amendments to current laws, regulations and permits governing operations and activities of gold companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in exploration expenses, capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new properties.

6.3.17 Government policy

The availability and rights to explore and mine, as well as industry profitability generally, can be affected by changes in government policy that are beyond the control of the Company.

Changes in relevant taxation, interest rates, other legal, legislative and administrative regimes, and Government policies may have an adverse effect on the assets, operations and ultimately the financial performance of the Company. These factors may ultimately affect the financial performance of the Company and the market price of its securities.

In addition to the normal level of income tax imposed on all industries, the Company may be required to pay government royalties, indirect taxes, GST and other imposts which generally relate to revenue or cash flows. Industry profitability can be affected by changes in government taxation policies.

Changing attitudes to environmental, land care, cultural heritage or traditional religious artefacts and indigenous land rights issues, together with the nature of the political process, provide the possibility for future policy changes. There is a risk that such changes may affect the Company's exploration and development plans or, indeed its rights and/or obligations with respect to its projects.

6.3.18 Commercialisation, infrastructure access and contractual risks

The Company's potential future earnings, profitability, and growth are likely to be dependent upon the Company being able to successfully implement some or all of its commercialisation plans. The ability for the Company to do so is further dependent upon a number of factors, including matters which may be beyond the control of the Company. The Company may not be successful in securing identified customers or market opportunities.

Given the early stage of the Company's projects, there will be a complex, multidisciplinary process to be undertaken to complete a feasibility study to support any development proposal. There is a risk that the feasibility study and associated technical works will not achieve the results expected. There is also a risk that even if a positive feasibility study is produced, a project may not be successfully developed for commercial or financial reasons.

6.3.19 New projects and acquisitions

The Company may in the future actively pursue and assess other new business opportunities in the resources sector. These new business opportunities may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits, and/or direct equity participation.

The acquisition of projects (whether completed or not) may require the payment of monies (as deposit and/or exclusivity fee) after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If an acquisition is completed, the directors will need to reassess at that time, the funding allocated to current projects and new projects, which may result in the Company reallocating funds from other projects and/or raising additional capital (if available). Furthermore, notwithstanding that an acquisition may proceed upon the completion of due diligence, the usual risks associated with the new project/business activities will remain.

6.3.20 Joint Venture and other arrangements

The Company may hold assets, developments or undertake projects through incorporated and unincorporated joint ventures with third parties. There is a risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party. Disagreements between co-venturers or a failure of co-venturer to adequately manage a project poses a further risk of financial loss or legal or other disputes with the other participants in such a joint venture. Projects held and run through joint ventures impose a number of restrictions on the Company's ability to sell its interest in any assets held through such a structure and may require prior approval of the other joint venture partner or may be subject to pre-emptive rights.

The Company's ability to efficiently conduct its operations in a number of respects may depend upon its joint venturer and other third parties and contracts have, in some circumstances, been entered into by the Company and its subsidiary in this regard. As in any contractual relationship the ability for the Company to ultimately receive benefits from these contracts are dependent upon the relevant third party complying with its contractual obligations.

To the extent that such third parties default in their obligations, it may be necessary for the Company to enforce its rights under any of the contracts and pursue legal action. Such legal action may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms. Any future joint ventures entered into by, or interests in joint ventures assigned to the Company, could be affected by the failure or default of any of the joint venture participants.

Additionally, failure by contractors to perform in accordance with required timelines, may expose any project in which the Company, its subsidiaries or companies it has an interest in, to risk of forfeiture under applicable laws.

6.3.21 Litigation risk

In the ordinary course of business, the Company may be involved in litigation disputes from time to time. Litigation disputes brought by third parties including, but not limited to customers, business partners, employees and government bodies may adversely impact the financial performance and industry standing of the business, in the case where the impact of legal proceedings is greater than or outside the scope of the Company's insurance. Such litigation could negatively impact the industry standing of the Company, cause the Company to incur unforeseen expenses, occupy a significant amount of the Company management's time and attention and could negatively affect the Company's business operations and financial position.

Specifically, the Company may be at risk of claims arising out of or as a consequence of the closure of the Pearse South open pit. No claims have been made as at the date of this Prospectus.

6.3.22 Underwriting risk

The Company has entered into an Underwriting Agreement in respect of the Entitlement Offer to which only the Underwriter and the Company are a party (refer to section 7.11). Prior to settlement of the Entitlement Offer, there are certain events which, if they were to occur, may affect the obligations of the Underwriter to underwrite the Offer. If certain conditions are not satisfied or certain events occur under the Underwriting Agreement, the Underwriter may terminate the Underwriting Agreement which may require the Company to search for alternative financing.

The ability of the Underwriter to terminate the Underwriting Agreement in respect of some events will depend (amongst other things) on whether the event has or is likely to have a material or adverse effect on the success, settlement or marketing of the Entitlement Offer, or could reasonably be expected to give rise to a contravention by, or a liability of, the Underwriter under applicable law. If the Underwriting Agreement is terminated for any reason, then the Company may not receive the full amount of the proceeds expected under the Entitlement Offer, the Company's financial position might change and it might need to take other steps to raise capital. Refer to section 7.11 of this Prospectus for a summary of the termination events set out in the Underwriting Agreement.

Shareholders should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for the New Shares.
