Notes:

¹ Information provided for the Exchange Traded Fund only. In certain cases, the Exchange Traded Fund is a class of units in a managed fund that has other classes of units on issue. In that case, the information provided is for the Exchange Traded Fund class only.

* Information on derivatives exposure only provided for Funds that are 'OTC Derivatives Based ETFs' under the ASX AQUA Operating Rules.

Includes the notional exposure of all derivatives held by the Fund, only excluding derivatives used solely for the purpose of managing the foreign exchange risk of the Fund. This means that the figure report includes derivatives used for the purposes of managing interest rate or credit risk.

¹The swap costs figure shown is an estimate of the transaction costs (as a percentage of Fund NAV) that will be incurred by the Fund in connection with swaps for the current financial year. The swap costs incurred for the current month may be higher or lower than the costs figure provided.

**The total values of new unit issues and unit redemptions, and the difference between those values, reflects the price (exclusive of transaction costs) at which the units were issued and redeemed during the reporting month. That is, the values have been calculated using the relevant net asset value unit price before the addition/subtraction of the buy/sell spread.
