About Neu Horizon Uranium Limited

Neu Horizon is focussed on identifying and exploring district-scale uranium opportunities, with the core focus in Sweden where the Company is targeting high-grade structurally-controlled and high-tonnage black-shale uranium deposits across 5 district-scale projects covering more than 110,000 Ha. In addition, Neu Horizon is exploring for high-grade basement-hosted uranium deposits over 35,000 Ha along the underexplored northern rim of the Athabasca Basin - the leading source of high-grade uranium supplying ~20% of the world's uranium.

Given the positive political outlook towards uranium coupled with the lack of uranium exploration across Sweden since the mid-1980's, there is a significant opportunity for Neu Horizon to discover multiple economic uranium deposits over their large landholding through the application of modern exploration techniques.

Further information on Neu Horizon's Swedish and Canadian projects can be found in the Independent Technical Reports prepared as part of the Company's IPO Prospectus, available online at https://neuhorizonuranium.com.au/.
