G360 Secures Improved Contractual Terms With Long-Term Major Customer

- **G360 customer Boyer Paper Mill Ltd commits to minimum 4,000 tonne take or pay agreement for FY27**
- **Contracted unit pricing increases 19%, with annual revenue expected to be approximately $2.5-$2.9 million**
- **Revised agreement expected to deliver a material improvement in FY27 turnover and provide a stable production base to support operating efficiencies**

Green360 Technologies Limited (ASX:GT3) ("GT3" "G360" or "the Company") is pleased to announce it has executed a revised supply agreement with major customer Boyer Paper Mill Ltd. The agreement provides for a minimum take or pay commitment of 4,000 tonnes for the 12-month period to 30 June 2027 with parties to negotiate an extension beyond this period. Unit pricing under the revised agreement represents a 19% increase on the existing contract. The total contract value is estimated at approximately $2.5m-$2.9m for the twelve-month period, with a binding commitment for the customer to purchase the minimum quantity. The contract allows annual purchases of more than 6,000 tonnes, with a tiered rebate of up to 8% applying to volumes above 5,000 tonnes per annum.

The revised contractual terms provide certainty on base load production at the Pittong facility, which is expected to drive operational efficiencies throughout FY27. This, in conjunction with significant operational changes and cost reductions implemented by management during 4Q FY26, is expected to support a return to positive operating cash flow in FY27.

Executive Chairman Aaron Banks said:

"Boyer has been an important customer of the Pittong Plant for many years and we're pleased to have agreed revised terms that deliver higher pricing together with a committed minimum purchase volume.

Importantly, this agreement strengthens the earnings profile of our established industrial minerals business by providing greater production certainty while we continue scaling our MKX product portfolio. Together with the operational improvements implemented over recent months, we believe this positions the business well for improved financial performance during FY27."

Approved for release by the Board

About Green360 Technologies Limited
Green360 Technologies (ASX:GT3) is an Australian-based building materials supplying Kaolin products to blue chip customers in the concrete, paint, paper, adhesives, pharmaceuticals and cosmetics industry.

G360 was the first company to commercialise metakaolin (calcined kaolin) as a supplementary cementitious material (SCM) in the Australian concrete market. The product, known under the platform of MKX, is a low carbon partial cement replacement product which reduces the embodied carbon in concrete, the world's second largest cause of CO2 emissions.

The Australian concrete industry is facing an imminent supply shortage of existing SCMs (predominately fly ash, blast furnace slag and silica fume) and MKX is strategically positioned to replace these products in the market.

Our objective is not simply to sell another SCM. It is to help build the next generation supply chain for the concrete industry.

Forward-Looking Statements

This release may contain certain forward-looking statements with respect to matters including but not limited to the financial condition, results of operations and business of GT3 and certain of the plans and objectives of GT3 with respect to these items. These forward-looking statements are not historical facts but rather are based on GT3's current expectations, estimates and projections about the industry in which GT3 operates and its beliefs and assumptions.
Words such as "anticipates," "considers," "expects," "intends," "plans," "believes," "seeks," "estimates", "guidance" and similar expressions are intended to identify forward-looking statements and should be considered an at-risk statement. Such statements are subject to certain risks and uncertainties, particularly those risks or uncertainties inherent in the industry in which GT3 operates.
These statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties, and other factors, some of which are beyond the control of GT3, are difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements. Such risks include, but are not limited to, resource risk, product price volatility, currency fluctuations, increased production costs and variances in product grade or recovery rates from those assumed in mining plans, as well as political and operational risks in the countries and states in which we sell our product to, and government regulation and judicial outcomes.
GT3 cautions shareholders and prospective shareholders not to place undue reliance on these forward-looking statements, which reflect the view of GT3 only as of the date of this release. GT3 will not undertake any

obligation to release publicly any revisions or updates to these forward-looking statements except as required by law or by any appropriate regulatory authority.
