Pinnacle Well Heritage Survey Completed

- **First Heritage Survey completed at Pinnacle Well Project with Watarra Aboriginal Corporation RNTBC (Watarra)**
- **Survey conducted over two days, 16 -17 July 2026**
- **Drilling will commence pending receipt of the Heritage Survey Report**

Legend Mining Limited (Legend) is pleased to announce that a Heritage Survey (Survey) at the Pinnacle Well Project located 25km NNE of Leonora, Western Australia has been completed. The Survey was designed to provide area clearance for ground disturbing activities at the Alpha North and Pyrophyllite Hill prospects (see Figures 1 and 2).

The Survey was conducted over two days (16-17 July 2026) and a Heritage Survey Report (Report) is expected to be provided by Watarra to Legend in August-September 2026. Receipt of the Report will satisfy prerequisite statutory approvals for a maiden drilling campaign at the Pinnacle Well Project.

The completion of the Survey follows Legend entering into a Heritage Protection Agreement with Watarra, the prescribed Body Corporate for the Darlot People (see ASX announcement 8 December 2025). This Survey is the first step in building a long lasting and mutually beneficial relationship with the Darlot People and we look forward to working together over the years to come.

Pinnacle Well Heritage Surveys

Two Survey areas were completed at Alpha North (1300m x 700m) and Pyrophyllite Hill (1000m x 500m) prospects (see Figure 1).

The Pinnacle Well Project comprises of four exploration licences of 128km² and is located 25km NNE of Leonora in Darlot country (see Figure 2).

Future Programmes

- Complete final drillhole design utilising PDIP modelling, rockchip/soil geochemistry and results from recent geological reconnaissance.
- Undertake drilling programme pending receipt of the Report.
