

27 JULY 2026

## Crawford Site Preparation Works Underway

### Highlights

- Site preparation activities have commenced at the Crawford Gold Project
- Early works include access track improvements, initial site infrastructure, site rehabilitation and water bore drilling
- Activities represent the commencement of the Company's broader site preparation program ahead of Stage 1 development

**Daniel Tuffin, Executive Technical Director and Interim CEO, commented:**

*"It's great to have site preparation now underway for Stage 1 at the Crawford Gold Project.*

*The capital raised earlier this year has allowed us to commence these important early works while we continue progressing our broader project financing process.*

*Site preparation is the first step in our staged development plan; we look forward to updating shareholders as works continue to progress towards mining over the coming months."*

### Site Preparation Works Update:

The Company is pleased to advise that site preparation activities have commenced at its 100%-owned Crawford Gold Project near Leonora, Western Australia.

Initial works are focused on preparing the site for Stage 1 development and include access track improvements, establishment of initial site infrastructure, site rehabilitation and water bore drilling.

These activities form part of the Company's staged development program and have been made possible through funds raised earlier this year. Site preparation works are expected to continue over the coming months while the Company progresses its broader project financing process.
