ASX Announcement

28 July 2026

RC1 Company Update

Redcastle Resources Ltd (**RC1** or the **Company**) provides an update on the Redcastle–BML Ventures Joint Venture (RB JV) at the Redcastle Gold Project.

As previously announced, ore from the RB JV mining operations is scheduled to be processed at the Wiluna Gold Mine processing plant. BML has advised the Company that processing operations at the plant have been temporarily suspended. Refer to attached announcement released by Wiluna Mining Corporation. The Company is awaiting further information from BML regarding any potential impact on the RB JV activities. Mining and stockpiling operations at the Redcastle Reef and Queen Alexandra gold deposits are continuing.

About Redcastle Resources Limited

Redcastle Resources Ltd (ASX: RC1) is a WA-based emerging gold company focused on building value across a strategically located Eastern Goldfields tenement portfolio. The Company's activities combine targeted drilling, development studies, near-term mining and development planning, and value-accretive regional consolidation.

The Company's portfolio includes the Redcastle Project Area, the TBone Belt and the Kilkenny Belt Package. Within the Redcastle Project Area, Queen Alexandra and Redcastle Reef host the Company's current Mineral Resources reported in accordance with the JORC Code, while nearby targets including Morgan's Castle East, Sligo, Coronation, South Queen and Battery Lode provide additional exploration and development upside.

RC1's Eastern Goldfields portfolio of interests comprises 85 exploration and mining tenement interests, including granted tenements, pending applications and tenements subject to the Kilkenny Earn-In and Joint Venture Agreement, covering approximately 150 km^2.

This announcement has been approved for release to ASX by the Board of Redcastle Resources Ltd

TEMPORARY SUSPENSION OF PROCESSING OPERATIONS

Wiluna Mining Corporation (**WMC. Wiluna** or **the Company**) advises that just prior to 10:00am on Saturday, 25 July 2026, one of the Carbon-in-Leach (CIL) tanks at Wiluna Gold Mine's processing plant ruptured, spilling the tank's slurry into the plant containment bund and processing area. The spill was contained, with no impact on the adjacent environment.

The site emergency plan was immediately activated, and all personnel were withdrawn from the affected area and accounted for. There were no injuries sustained or personnel physically impacted by the incident.

As a result of the tank rupture, all processing operations have been temporarily suspended and the affected area isolated and barricaded. The incident has been reported to all relevant authorities.

An investigation has commenced and, as an initial step, structural engineers are scheduled to arrive on site on Monday, 27 July 2026, to conduct a full assessment and evaluation.

Surface operations, underground rehabilitation and diamond drilling continue as normal, and the processing plant staff are being directed to other tasks within the operation.

The Company will update on the timing of a restart of processing operations once the site has been fully assessed. In the meantime, the safety of WMC's personnel and contractors onsite remains the Company's highest priority.
