DURATEC SECURES ~$70M IN CONTRACT AWARDS

HIGHLIGHTS

- **Duratec awarded a construction management contract at Orica's Hunter Valley Hydrogen Hub**
- **Secured three additional contract awards across Energy, Marine, and Mining & Industrial sectors, with the four awards representing a combined value of approximately $70m**
- **Includes aviation fuel infrastructure ECI for Perth Airport Pty Ltd (PAPL) (via the Duratec West Coast Civil Joint Venture), wharf remediation for Fremantle Ports, and remediation works for Rio Tinto at Gove**

Australian engineering, construction, and remediation contractor Duratec Limited (**Duratec** or the **Company**) (ASX: **DUR**) is pleased to announce it has been awarded a construction management contract at Orica's Hunter Valley Hydrogen Hub (HVHH), alongside three additional contract awards across its core Energy, Marine, and Mining & Industrial sectors. The four contract awards represent a combined value of approximately $70m.

The HVHH contract represents a key step in Duratec's expansion into future energy and fuel infrastructure markets, positioning the Company to support the broader energy transition and decarbonisation of industrial operations. The award leverages Duratec's recent acquisitions in the Hunter Region, which establishes a local workforce, supply chain access and delivery capability in a critical energy corridor, enhancing the Group's ability to self-perform and capture greater value across the project lifecycle.

In addition to the HVHH award, Duratec has secured the following contracts:

- **Perth Airport (Jet Fuel Expansion Program)** – Duratec, through its 50:50 Joint Venture with West Coast Civil (DWJV), has been awarded a contract to deliver ECI services as part of the design of the Jet Fuel Expansion Program (JFEP) on behalf of Perth Airport. The DWJV scope includes design of fuel farm facilities and hydrant lines. The ECI phase will commence immediately and run for approximately six months.

- **Fremantle Ports (Kwinana Bulk Jetty)** – Duratec has been awarded a wharf infrastructure remediation project by Fremantle Port Authority as part of the Kwinana Bulk Jetty (KBJ) upgrade. Located in Kwinana, the KBJ facilitates the import and export of bulk cargoes and liquids and is one of three port facilities operated by Fremantle Ports. The scope awarded to Duratec includes design, construction and commissioning works comprising cathodic protection and concrete repairs to extend the operational life of the asset. The project will commence immediately and is expected to run for approximately 30 months.

- **Rio Tinto (Gove, NT)** – Duratec has secured the Gove Structural Integrity Remediation Services project at Rio Tinto's bauxite export facilities in Nhulunbuy, Northern Territory. The project has been awarded under a new MCSA for a three-year contract term. The scope includes remediation and structural strengthening of the wharf infrastructure to ensure the continued operation of existing assets. The first package of work is scheduled to commence in June 2026, with completion anticipated in late 2026.

These awards reflect continued demand for Duratec's specialist remediation, infrastructure and engineering capabilities across key sectors.

Duratec Managing Director, Chris Oates, commented:

"The Hunter Valley Hydrogen Hub is an important project within Australia's emerging hydrogen industry, and we are pleased to partner with Orica to support its delivery. This award reflects Duratec's ongoing expansion into the energy and decarbonisation sector, building on our recently established presence in the Hunter Region and demonstrating our ability to deliver complex infrastructure projects through a combination of self-perform and local capability.

While the Perth Airport ECI is strategically important, it may provide access to additional downstream work packages. These opportunities, if secured, have the potential to deliver broader and more meaningful value across the Group through our subsidiaries and integrated capability offering.

Together with the additional contract awards across our marine, defence and mining sectors, these projects highlight the breadth of our capabilities and position Duratec to capture further opportunities across both established infrastructure markets and emerging energy markets."

Authorised for release to ASX by the Managing Director of Duratec Limited.
