INCEPTION: 20 JANUARY 2022

Differences in performance between the Munro Climate Change Leaders Fund and MCCL (ASX quoted fund) may be due to cashflow movements, the buy/sell spread of the iNAV for MCCL.ASX, the timing difference between the issuing of units during the day on the ASX for MCCL and the purchase of units in the Munro Climate Change Leaders Fund at the end of the day. This may result in variances in performance.

MONTHLY SUMMARY

- The Munro Climate Change Leaders Fund returned -11.4% net for July, underperforming the benchmark return of -1.3% by 10.2%.
- July was marked by a sharp selloff and pullback across the AI and semiconductor complex, as investors reassessed valuations following an exceptional run over the past year. Munro views the recent AI weakness as a healthy correction within an ongoing secular bull market, rather than the start of a structural downturn. We have followed our standard risk management processes around stock stop losses. For companies that we have maintained in the funds we remain broadly confident that their strong earnings trends remain in place across a range of different Aols and structural growth trends.
- Key contributors to performance for the month were Clean Harbors (Circular Economy), Johnson Controls (Energy Efficiency) and RWE (Clean Energy).
- Key detractors from performance for the month were GE Vernova (Clean Energy), Infineon Technologies (Clean Transport) and Solstice Advanced Materials (Clean Energy).
