About Broken Hill Gold

Broken Hill Gold (formerly Pacgold) is an ASX-listed gold development and exploration company focused on generating near-term revenue and cash flow.

Following the strategic demerger of its highly prospective North Queensland exploration portfolio, which included the Alice River and St George projects, the Company is now exclusively focused on its flagship White Dam Gold Project in South Australia.

White Dam provides Broken Hill Gold with a clear, accelerated pathway to production. The project features established infrastructure, including open-pit mines, a heap leach facility, and a fully operational gold extraction plant, positioning the company to rapidly unlock value and fund future growth.

Enhancing this production profile is the recent gold and copper discovery at White Dam North. This exciting new development offers significant upside potential, further solidifying the Company's strategy to expand its resource base and drive long-term value from its South Australian operations.
