About Saluda Medical

Saluda Medical, Inc. (ARBN 691 140 360) is a commercial-stage medical device company focused on developing treatments for chronic neurological conditions using its novel neuromodulation platform. The Company’s closed-loop, dose-control platform senses and measures neural responses to stimulation and automatically adjusts therapy based on real-time neurophysiological feedback. The Company’s first product, the Evoke® System, is indicated as an aid in the management of chronic intractable pain of the trunk and/or limbs, including unilateral or bilateral pain associated with failed back surgery syndrome, intractable low back pain, and leg pain, and is designed to treat chronic neuropathic pain by providing spinal cord stimulation (SCS) therapy that senses and measures neural activation to optimize therapy and reduce patient and clinician burden. 12-month results from the EVOKE study, the first and only prospective, multi-center, parallel-arm, double blind, randomized controlled pivotal study with a voluntary crossover arm in SCS, that demonstrated clinically superior pain relief to open-loop therapy, were published in The Lancet Neurology, 24-month results were published in JAMA Neurology, and 36-month data, that demonstrated sustained pain relief, were published in Regional Anesthesia and Pain Medicine.
