Kalgoorlie Gold Mining

Heritage Protection Agreement with Kakarra Aboriginal Corporation, covering Pinjin and Bulong Taurus gold projects

Kalgoorlie Gold Mining (**ASX:KAL**) ('KalGold' or 'the Company') is pleased to announce that it has executed a comprehensive Heritage Protection Agreement (HPA) with the Kakarra Aboriginal Corporation RNTBC (KAC) over Kakarra Country east of Kalgoorlie in Western Australia. The agreement provides a framework to protect Kakarra heritage for future generations while supporting KalGold's gold exploration and discovery work at the Pinjin and Bulong Taurus Gold Projects.

Discussing the updated and expanded Kakarra HPA, **KalGold MD and CEO Dr Matt Painter** said:

> *"Executing a comprehensive Heritage Protection Agreement with the Kakarra Traditional Owners is a significant milestone for KalGold. We sincerely thank the Kakarra people for their constructive and proactive engagement to produce an agreement that benefits both organisations and the people of the land.*
>
> *While cultural heritage protection is foremost for the Kakarra Aboriginal Corporation, the pragmatism and enthusiasm shown in meetings and on-country is very encouraging for KalGold's exploration programs.*
>
> *We are very much looking forward to continuing to work with the Kakarra people, both personally and directly with the elders and the board, as well as on-country with the mining professionals and people of this land, as we accelerate our exploration efforts towards discovery and success at Pinjin and Bulong Taurus."*

Determination of title, new tenements, and gold rights necessitated an update

The updated agreement supersedes an earlier limited agreement covering tenement E28/3134 where KalGold recently completed the Laverton Tectonic Zone (LTZ) Flexure aircore drill program. That agreement itself was modified from earlier versions related to tenements that the Company no longer holds. Building on the most recent agreement, a Deed of Assignment, Assumption, and Variation was required for the following reasons:

- **Determination of native title –** On 30 April, 2025, the Federal Court of Australia issued a consent determination recognising the native title rights of the Kakarra people over lands and waters in the Goldfields and Great Victoria Desert region, north-east and south-east of Kalgoorlie-Boulder, covered by the Kakarra Part A Native Title Claim (Figure 1).
- **Amalgamation of former claims –** Following determination, the Kakarra Part A and Part B claims were amalgamated under the KAC.
- **Updated tenement coverage –** The new HPA is now with KAC and has been updated to include:
    - All of KalGold's tenements on which it is listed as a tenement holder.
    - All tenure where KalGold holds secure, long-standing gold rights by agreement with the tenement holder (Bulong Taurus Gold Project).

KalGold's original HPA required fundamental and wide-ranging modification to reflect these substantial changes. It also required adjustment for the Company's current tenement holdings within Kakarra country.

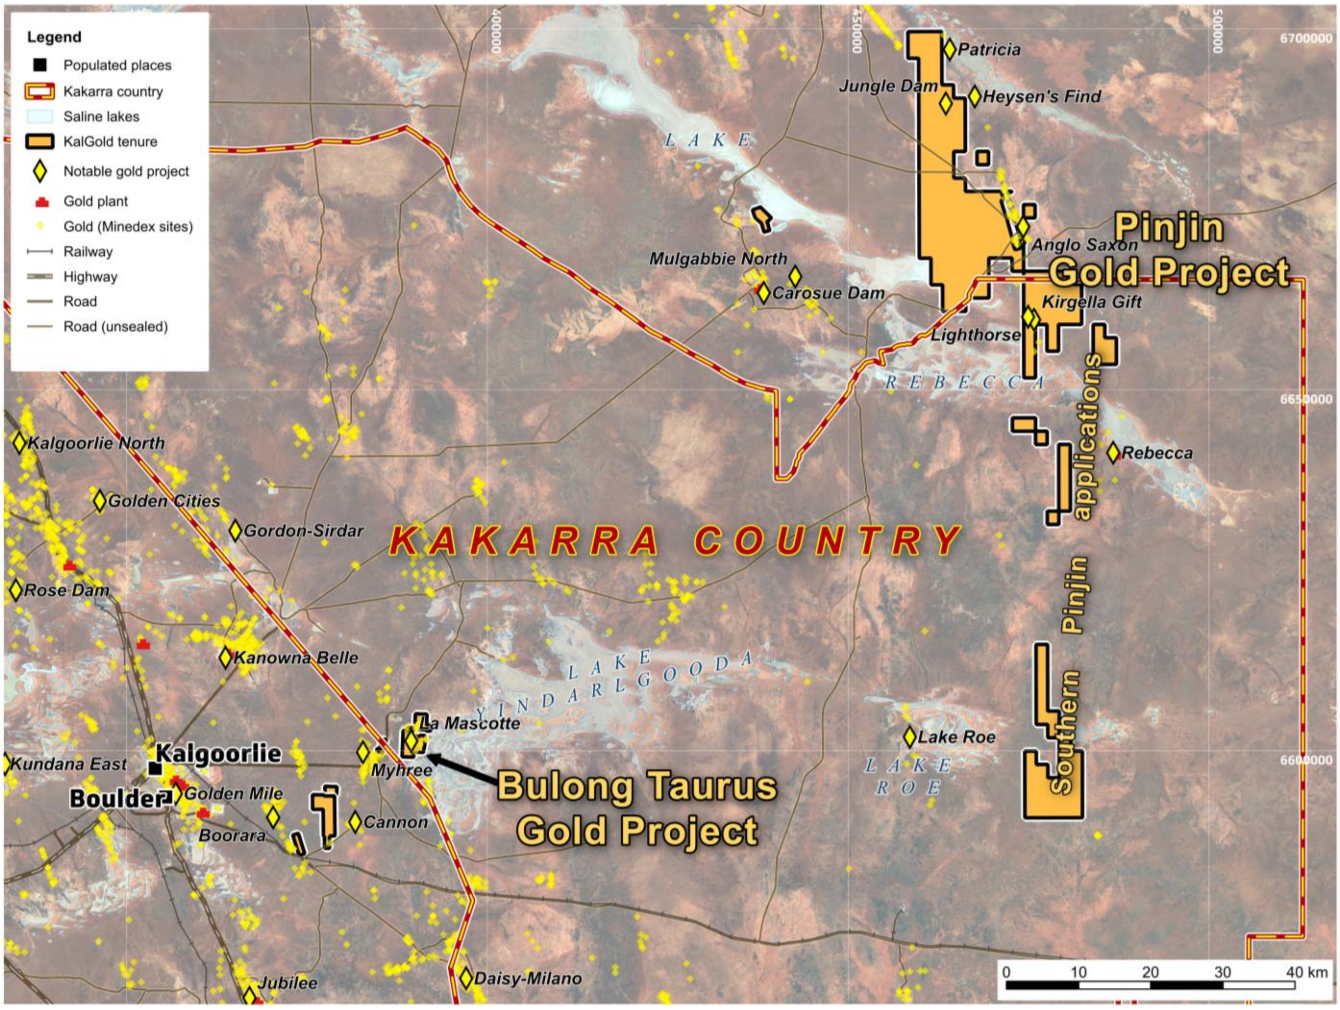

Figure 1 – Kakarra country in relation to KalGold's projects, covering the entire Taurus Goldfield in the Bulong Taurus Gold Project, and the southern, most active part of the contiguous Pinjin Gold Project containing, Providence, Lighthorse and other targets. A series of exploration tenement applications south of Pinjin along the southern extension of the LTZ also lie within Kakarra country. Projection: MGA 94 Zone 51.

Streamlining effects of the agreement

The updated HPA will have a positive material impact on KalGold operations within Kakarra country. At the Pinjin Gold Project, containing the Kirgella Gift-Providence gold deposit and the Lighthorse gold prospect, the agreement is expected to assist:

- Implementation of timely heritage surveys;
- Prompt clearance for forthcoming exploration and resource drill programs; and
- Streamlining application processes for new Exploration (E) and Prospecting (P) licences.

At the Bulong Taurus Gold Project, which includes the outcropping La Mascotte gold deposit, 35km east of Kalgoorlie Boulder, the agreement is expected to facilitate:

- Timely site-appropriate heritage surveys; and
- Heritage clearances for proposed work programs near the culturally significant Lake Yindarlgooda (via either the Western Australian Department of Planning, Lands and Heritage (DPLH) or by collaborative Section 18 application).

Other prospective areas within Kakarra Country remain a focus for KalGold as the Company applies its exploration experience from Pinjin and Bulong Taurus to identify and assess new gold targets. The HPA is expected to support future exploration and grant of new tenure by providing:

- A streamlined application process where the Western Australian Department of Mines, Petroleum and Exploration (DMPE) can reference the HPA as a requirement for grant, potentially leading to quicker granting and access to new project areas.
- Automatic inclusion of newly granted tenements within the agreement.

Figure 2 – Kakarra and KalGold at the recent Diggers and Dealers conference in Kalgoorlie (4 Aug 2026), with (l-r) KAC Director Nakisha Smith, KalGold Chair Pauline Gately, Kakarra Elder Floyd Barnes, and KalGold MD & CEO Matt Painter.

KalGold looks forward to continuing to build a strong and enduring relationship with KAC and the Kakarra people supporting responsible exploration and discoveries that will benefit KalGold shareholders and stakeholders.

About KalGold

ASX-listed resources company Kalgoorlie Gold Mining (KalGold, ASX: KAL) is a proven, low-cost gold discoverer with a large portfolio of West Australian projects and a total gold resource in excess of 214,000 oz. KalGold prides itself on defining shallow, potentially open-pittable gold resources at very low costs, currently less than A$4.60 per ounce of gold[2]. Current focus includes:

- The **Pinjin Project** within the **30 Moz Laverton Tectonic Zone** (host to Sunrise Dam, Granny Smith, Rebecca, Anglo Saxon, and Wallaby projects) is located only 25 km north along strike from Ramelius Resources (ASX: RMS) **Rebecca Gold Project**. A first JORC Code (2012) Inferred Mineral Resource Estimate at Kirgella Gift and Providence (2.34 Mt @ 1.0 g/t Au for 76,400 oz[1]) represents the first area targeted at Pinjin, with many more targets scheduled for testing. The company aims to define further resources as these targets are tested. Some tenure is the subject of a farm-in over two years. Between this tenure and KalGold's own tenure and applications, the Company has established a significant presence in a strategic and important gold producing region.
- The **Bulong Taurus Project**, 35 km east of Kalgoorlie-Boulder. Contains the outcropping **La Mascotte** gold deposit where KalGold has defined a JORC Code (2012) Inferred Mineral Resource Estimate of 3.61 Mt @ 1.19 g/t Au for 138,000 oz[2], plus a series of satellite prospects and historic workings of the **Taurus Goldfield**. Work continues at the project.
- The **Central Yandal Gold Project**, 45 km east of Wiluna and in the heart of the prolific Yandal Greenstone Belt that is home to some of the world's greatest gold discoveries since the 1990s. Some tenure remains in application and assessment is ongoing.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING INFORMATION

This news release contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this news release.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's exploration, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability and mobility of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, restrictions caused by COVID-19, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information. Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time.

Forward-looking information involves significant risks, uncertainties, assumptions, and other factors that could cause actual results, performance, or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors, including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

No stock exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this news release.

COMPETENT PERSON STATEMENT

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr Matthew Painter, a Competent Person who is a Member of the Australian Institute of Geoscientists. Dr Painter is the Managing Director and Chief Executive Officer of Kalgoorlie Gold Mining Limited (KalGold) and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Painter consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. Dr Painter holds securities in Kalgoorlie Gold Mining Limited.

EXPLORATION RESULTS

The references in this announcement to Exploration Results were reported in accordance with Listing Rule 5.7 in the announcements titled:

- *Kirgella Gift diamond drilling intersects thick gold mineralisation, confirms primary gold extends at depth, 13 February 2026.*
- *New RC drilling extends primary gold at Lighthorse, 19 December 2025*
- *Sub-Audio Magnetics (SAM) geophysical data guides upcoming RC drill program at Pinjin. Diamond Drilling at Kirgella Gift and Providence to commence soon, 26 August 2025*
- *Lighthorse Strike Extended to 1,450m. Extensive RC Program Beginning Shortly, 15 July 2025*
- *SAM geophysical survey commencing around Lighthorse, and exploration update, 6 June 2025*

- *Farm-in at Pinjin Gold Project completed, 29 May 2025*
- *Quarterly activities report for the quarter ending 31 March 2025, 30 April 2024*
- *Lighthorse RC program confirms primary gold mineralisation at depth, follow up drilling imminent, 15 April 2025*
- *Aircore drilling to test Lighthorse strike extensions in April, 10 March 2025*
- *Multi-kilometre target areas along strike at KalGold's Lighthorse discovery, 17 February 2025*
- *Lighthorse gold discovery follow-up RC drilling to commence first week of March, 13 February 2025*
- *'Lighthorse' gold discovery at Pinjin: thick, high-grade gold intercepted at new greenfields find, 7 February 2025*
- *First-pass aircore drilling at Kirgella West: broad gold anomalism and mineralisation over 1,200m strike, 18 December 2024*
- *Quarterly activities report for the quarter ending 30 September 2024, 30 October 2024*
- *More thick, shallow gold intercepts at Pinjin extend Wessex target to 2 km strike length, 9 October 2024*
- *Thick gold intercepts from initial drilling at Wessex near Anglo Saxon gold mine, 23 May 2024*
- *Providence: North plunging shallow gold mineralisation has significant potential, 7 December 2023*
- *Shallow, high-grade results extend Kirgella Gift and Providence corridor to over 1,150m of strike, 25 October 2023*
- *Thick, shear-hosted gold mineralisation intercepted at Kirgella Gift, 8 June 2023*
- *KalGold farms-in to Kirgella gold tenements and acquires Rebecca West tenure at Pinjin, 23 May 2023*

The Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcements noted above.

MINERAL RESOURCE ESTIMATES

The references in this announcement to Mineral Resource estimates were reported in accordance with Listing Rule 5.8 in the following announcements:

- *La Mascotte gold deposit: First JORC (2012) Mineral Resource of 138,000 oz Au, 7 March 2023.*
- *First Kirgella Gift Inferred Resource of 76,400 oz from 3m, 5 July 2024.*

In accordance with ASX Listing Rule 5.23, the Company confirms that it is not aware of any new information or data that materially affects the information included in the previous market announcement noted above and that all material assumptions and technical parameters underpinning the Mineral Resource estimates in the previous market announcements continue to apply.
