1. Reporting scope is for retail assets under management.
2. Third party assurance has been undertaken for this dataset.
3. Square metres (sqm) refers to retail footprint – square metres of gross lettable area (GLA).
4. Tonnes carbon dioxide equivalent.
5. Data has been restated from the figures previously reported, based on receipt of invoices and changes in portfolio (e.g. divestment or acquisitions in the previous year). Refer to ESG Reporting Criteria.
6. For asset level data for FY26, go to 'Asset environmental data' tab.
7. Waste data have been restated to exclude grease trap and cooking oil waste from total waste generation and diversion rates. Certain organic waste streams previously classified as recycling have been reclassified to composting to better reflect final treatment. Energy recovery from cooking oil is excluded.
