

AIRBORNE MAGNETIC SURVEY COMPLETE

MALDON GOLD PROJECT – EXPLORATION UPDATE

Kaiser Reef Limited (ASX: KAU) (Kaiser or the Company), a profitable, multi-asset Australian gold producer with operations in Tasmania and Victoria, is pleased to announce that the close-spaced helicopter magnetic survey at Maldon has been completed successfully.

HIGHLIGHTS

GEOPHYSICAL SURVEY COMPLETE

- 🌀 Low-altitude, helicopter-supported, magnetic and radiometric survey
- 🌀 Close-spaced, 35m line spacing, targeting greater resolution of data
- 🌀 Coverage area of 59km²
- 🌀 Targeting greater understanding of structural architecture and lithology
- 🌀 Follows on from soil survey work, which identified multiple gold and arsenic (pathfinder) anomalies ⁷
- 🌀 The survey will aid targeting of the next series of surface drill targets, used in combination with recent soil survey work and mapping activities

Kaiser's Managing Director, Brad Valiukas, comments:

"It's great to have this survey completed at Maldon. This survey will provide magnetic and radiometric data at a much greater resolution than we currently have available, and it is expected to be an invaluable tool for targeting future drilling."

"In the soils, we see some gold trends heading off the north-south alignment, and we are looking for the helicopter-based geophysics survey to confirm, and better define, the cross-cutting structures intersecting the multiple north-south reefs. This will be key to locking in the next series of surface targets for drill testing."

"The heli-mag survey is a continuing part of a comprehensive works program to unlock the Maldon district after decades of exploration neglect. Maldon represents a district-scale gold opportunity for Kaiser, with numerous historical mines and lines of working that remain substantially underexplored, despite having historically produced an enviable 1.75Moz at 28g/t. We are committed to generating the most value from the entire project, and are undertaking works that will both grow the Project as a whole and advance towards expanding production."

"Kaiser is a profitable gold miner with a robust balance sheet and a strong pipeline of exploration and development opportunities. We are well-positioned to both capitalise on a robust gold price and add significant further value to our assets with targeted investment."

ABOUT KAISER REEF LIMITED

Kaiser Reef Limited (ASX: KAU) is an established Australian gold producer operating the Henty Gold Mine in Tasmania and advancing the high-grade Maldon Gold Project in Victoria.

Henty is an established underground operation underpinned by a 199koz Au Ore Reserve ², a conventional +300ktpa processing plant, and a targeted production profile of approximately 30,000 ounces per annum. Ongoing development and drilling are focused on reserve growth and mine-life extension.

The Maldon Gold Project in Victoria's historic Golden Triangle provides strategic growth optionality, with a fully permitted and operating 200ktpa CIL processing facility, existing underground access, and high-grade exploration potential. The Maldon Gold Project has historically produced 1.75Moz at 28g/t ³.

Kaiser Reef is focused on disciplined production growth, reserve expansion, and leveraging its dual processing infrastructure in Tier-1 Australian jurisdictions to deliver sustainable cash flow and long-term shareholder value.

FUTURE PERFORMANCE

This announcement may contain certain forward-looking statements and opinions. Forward-looking statements, including projections, forecasts and estimates, are provided as a general guide only and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainties, assumptions, contingencies and other important factors, many of which are outside the control of the Company and which are subject to change without notice and could cause the actual results, performance or achievements of the Company to be materially different from the future results, performance or achievements expressed or implied by such statements. Past performance is not necessarily a guide to future performance, and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward-looking statements or other forecast. Nothing contained in this announcement, nor any information made available to you is, or shall be relied upon as, a promise, representation, warranty or guarantee as to the past, present or future.

COMPETENT PERSON STATEMENTS

The information in this release that relates to exploration results, data quality, geological interpretations and Mineral Resources and Ore Reserves for the Henty Gold Mine were first released in the Company's announcements dated 24 March, 16 and 26 May, 8 July, 4 August, 6, 20 and 23 October 2025. The Company confirms that it is not aware of any new information or data that materially affects the information included in the announcement and confirms that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed, except as updated in this announcement.

The information in this release that relates to exploration results, data quality, geological interpretations and Mineral Resources for the Maldon Gold Project were first released in the Company's announcements dated 1 October, 7 December 2020, 15 November 2021, 9 February, 1 March, 2 May, 5 and 21 July 2022, 18 April, 3 December 2024, 28 October, 25 November, 16 December 2025, 11 February, 22 April, 18 May, 24 June and 28 July 10 and 17 August 2026. The Company confirms that it is not aware of any new information or data that materially affects the information included in the announcement and confirms that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.
