Two Nevada Silver-Gold Projects
Firenze Project Drilling Sept-October

- Firenze - never previously drilled
- W-Project - demonstrated mineralisation, untested structures

FIRENZE – NEVADA - SILVER & GOLD OPPORTUNITY

Never been drilled silver & gold epithermal system – 100% owned

DRILL READY

SILVER & GOLD TARGETS

- **Firenze is a completely undrilled silver & gold system** released by the BLM from wilderness zoning in 2022 – **creating a genuine first-pass drill opportunity**
- Exceptional *historical rock chip assays include:
    - **1,825 g/t Ag with 22.5 g/t Au**
    - **1,250 g/t Ag with 9.3 g/t Au**
    - **534 g/t Ag with 43.9 g/t Au**
    - **600 g/t Ag with 2 g/t Au**
- Outcropping low-sulfidation epithermal Ag-Au veins 1,200m in strike
- Company interpretation suggests epithermal system is preserved with potential bonanza-grade boiling zone and feeder veins 100m to 250m below surface

FIRENZE DRILL TARGET SELECTION CRITERIA

Altitude Minerals applies strict investment gates before committing drilling capital

Firenze Project

- ✓ in-demand strategic and precious metals - (Au-Ag)
- ✓ profitable mines in same geological region – (Multiple)
- ✓ favorable jurisdictions - (Nevada, #1 Ranked in the World - Fraser Institute)
- ✓ economic scale potential – (1,200m strike, two parallel structures, rock chips)

Capital is allocated where drilling materially improves the discovery case or ATT divests our interest

ALTITUDE MINERALS

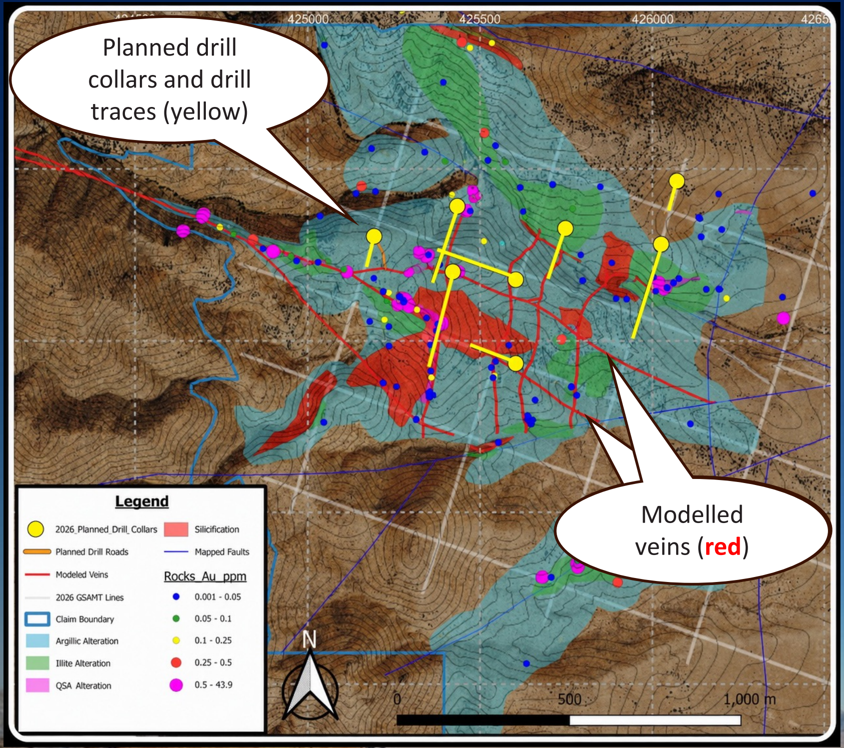
WHY NEVADA?

- Established profitable mines, producing 70% of the USA's annual gold production
- On its own, Nevada is the fifth largest gold producer globally – behind China, Russia, Australia and Canada.
- Nevada is ranked #1 in the World by the Fraser Institute for mining (2026)
- Good access and infrastructure – most projects have major Interstate highways nearby and major service providers throughout the state
- 63% of Nevada is under the Federal Bureau of Land Management (BLM), providing a well-established pathway for exploration authorisation and mine permitting.

WHY NOT NEVADA!

DRILL READY

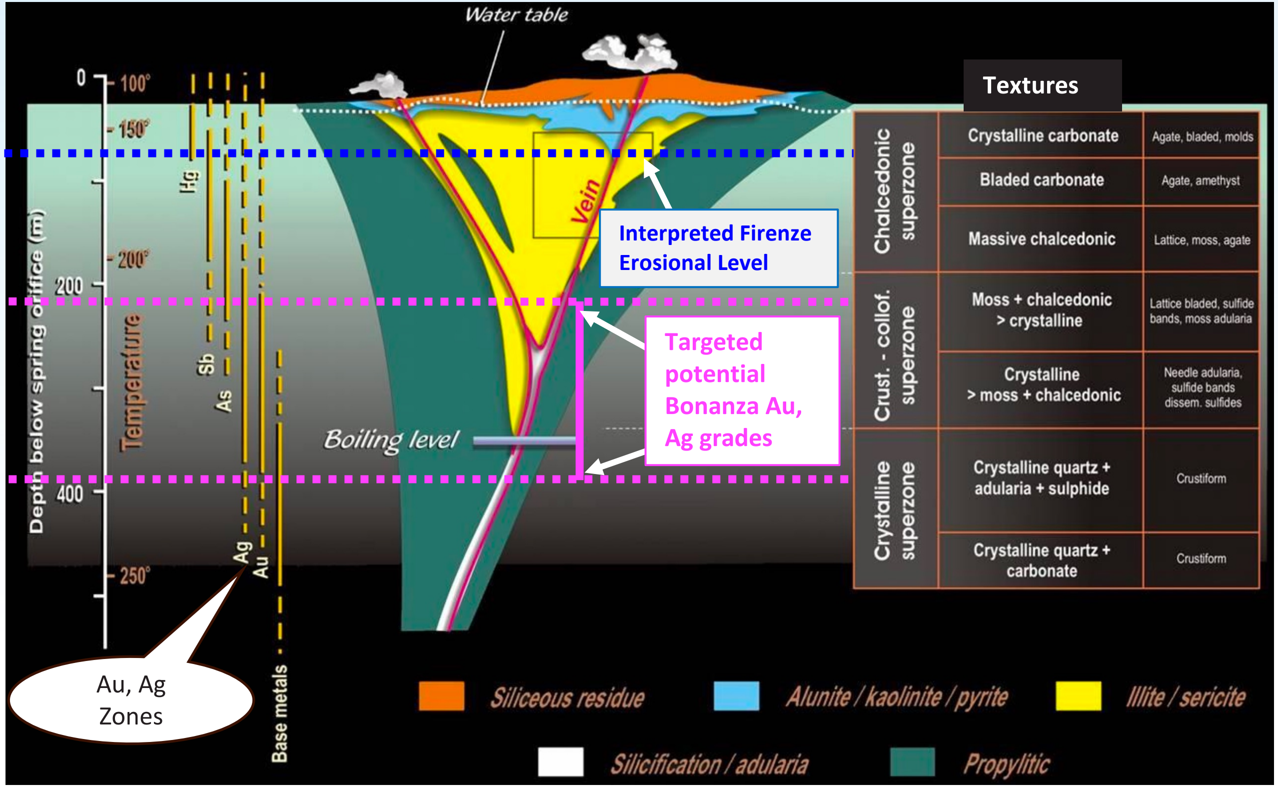
DRILL TARGETING - FIRENZE



Drill Targeting

- 9 holes ~2600m of reverse circulation drilling
- Testing multiple structures validated by CSAMT & magnetic geophysics and mapping of structures and alteration
- Targeting potential bonanza-grade boiling zone and feeder veins **100m – 250m below surface** (see epithermal system slide)

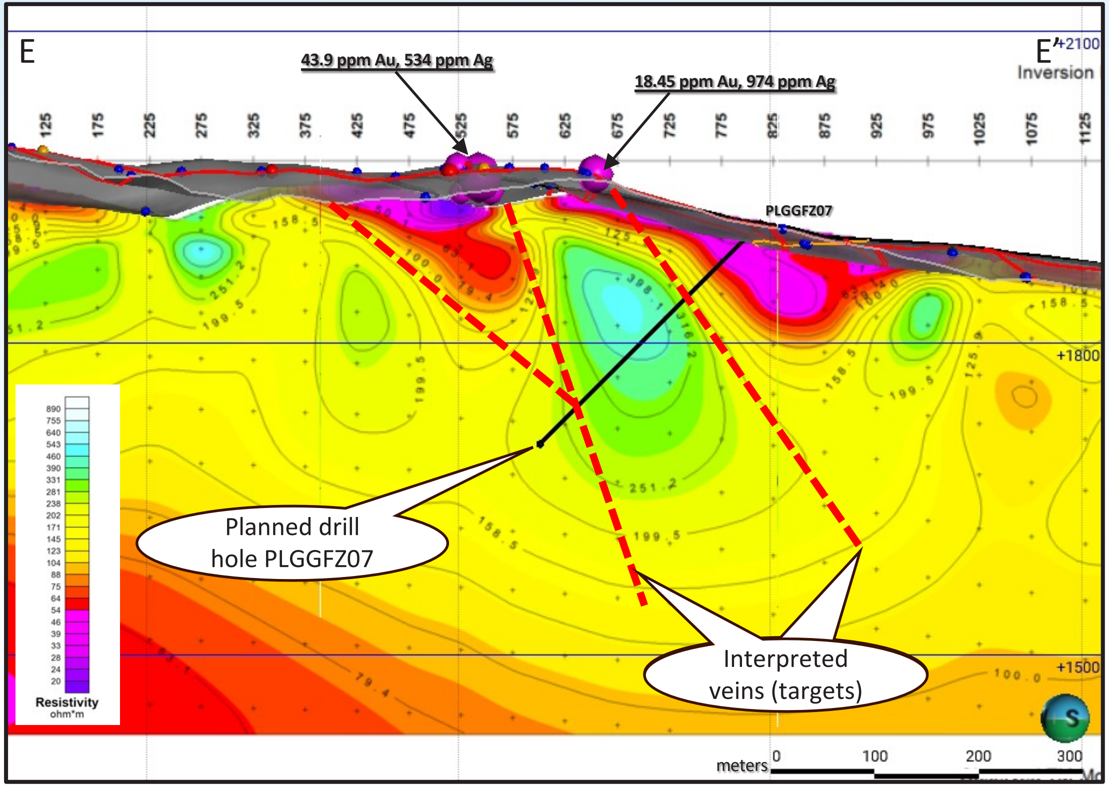
ABOUT EPITHERMAL MINERAL SYSTEMS



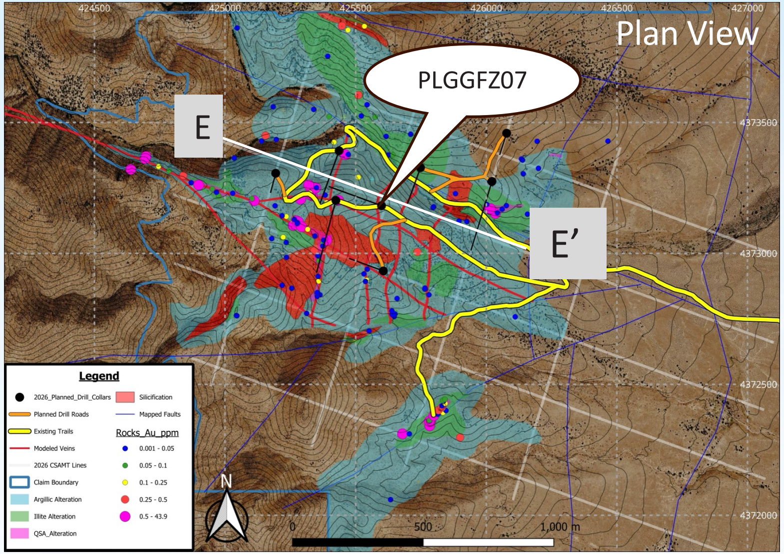
Firenze Project Field Observations of textures supporting the interpreted erosional level. *Moss, massive chalcedony, adularia, bladed calcite (replaced with quartz), cockade, comb, colloform textures.*

Diagram After Buchanen (1981), Morrison et al (1990) and Corbett & Leach (1997)

Drill Section E-E’ (PLGGFZ07)



Apparent resistivity section - CSAMT geophysics and planned drill section E-E’ and hole plan, rock chips at surface; Red dashed line interpreted veins from surface mapping and CSAMT results; Black line planned drill hole



AZI (T): 290°

DIP: 45°

Hole Depth: 300m (100m & 200m below surface)

Target: NE-SW striking orthogonal vein to main NW-SE vein. Targeting under high grade surface samples and under historic workings

Target Depth: ~250m

Target Elevation: ~1725m (~200m below surface)

ALTITUDE MINERALS

“Firenze Drill Targets Confirmed” - Announced 22 April 2026

W-PROJECT: DEMONSTRATED MINERALISATION, UNTESTED STRUCTURAL TARGETS

- **40 of 43 holes intersected gold mineralisation**
- **Seven holes ended in mineralisation**
- Significant Historical Intersections include:
    - **37m @ 1.30 g/t Au, 9.8g/t Ag from 31m (W87-1)**
    - **3m @ 3.75 g/t Au, 4.2 g/t Ag from 73m (W87-6)**
- Up to 30m wide outcropping epithermal textured veins
- Historical Shively Silver Mine (c1910) was untested by any geophysics (prior to ATT CSAMT & Magnetics)

Historical drilling demonstrated mineralisation but did not systematically test the structural intersections or the system at depth; and no CSAMT geophysics was deployed to identify drill targets prior to ATT work.

ALTITUDE'S PIPELINE OF NEVADA DRILL TARGETS

Drill Ready

Firenze Project, Nevada

- **Drill permits secured**
- **Drill pads and access tracks completed**
- **Drilling Sept-Oct**; (pending rig completing 3rd-party program)

Final Validation

W-Project, Nevada

- **Outcrop sampling, geophysics & mapping completed**
- **3D Drill targeting underway and final decision to drill**
- **Drill permit expected late Sept**

Nevada – Arizona, USA

Epithermal Silver & Gold Opportunities +/- Strategic Minerals

ATT continually screens opportunities against the same disciplined acquisition and drilling criteria.
