Important Information

DISCLAIMER

This document is confidential and may not be reproduced, redistributed or passed on, directly or indirectly. This document is neither a prospectus nor an offer to subscribe for Shares. QMines Limited ACN 643 212 104 (QMines) and its directors, officers, employees, advisers, agents and consultants make no representations or warranties as to the accuracy, reliability or completeness of this document including the accuracy or attainability of any forward-looking statements, and have no liability, including liability to any person by reason of negligence of, or contained in or derived from, or for any omissions from this document, except liability under statute that cannot be excluded.

COMPETENT PERSON (EXPLORATION)

The information in this document that relates to mineral exploration at the Mt Chalmers, Develin Creek, and Mt Mackenzie projects is based on work compiled under the supervision of Mr Tom Bartschi, a member of the Australian Institute of Geoscientists (AIG). Mr. Bartschi is QMines' principal geologist and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity that he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC 2012 Mineral Code). Mr. Bartschi consents to the inclusion in this document of the exploration information in the form and context in which it appears.

COMPETENT PERSON (MT CHALMERS, DEVELIN CREEK, & MT MACKENZIE RESOURCES)

The information in this report that relates to mineral resource estimation is based on work completed by Mr. Stephen Hyland, a Competent Person and Fellow of the AusIMM. Mr. Hyland is Principal Consultant Geologist with Hyland Geological and Mining Consultants (HGMC), who is a Fellow of the Australian Institute of Mining and Metallurgy and holds relevant qualifications and experience as a qualified person for public reporting according to the JORC Code in Australia. Mr Hyland is also a Qualified Person under the rules and requirements of the Canadian Reporting Instrument NI 43-101. Mr Hyland consents to the inclusion in this report of the information in the form and context in which it appears.

COMPETENT PERSON (MT CHALMERS ORE RESERVE)

The information in this Report that relates to Ore Reserve Estimate is based on information compiled by Mr Gary McCrae, a Competent Person who is a Member of the Australasian Institute of Mining and Metallurgy. Mr McCrae is a full-time employee of Minecomp Pty Ltd. Mr McCrae has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr McCrae consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

COMPLIANCE STATEMENT

QMines confirms that it is not aware of any new information or data that materially affects the information included in the "Resource Increases by 104% at Mt Chalmers Project" ASX announcement lodged on 22 November 2022 or the "QMines Delivers Fifth Resource at Develin Creek" ASX announcement lodged on 18 September 2023 (Announcements) and that all material assumptions and technical parameters underpinning the estimates in the Announcement continue to apply and have not materially changed.

MT CHALMERS PROJECT

The historical exploration results in relation to the Mt Chalmers project contained in this document have been reported in accordance with the JORC 2012 Mineral Code and the Competent Person has undertaken sufficient work to disclose the historical exploration results in accordance with the JORC 2012 Mineral Code.

DEVELIN CREEK PROJECT

The historical exploration results in relation to the Develin Creek project contained in this document have been reported in accordance with the JORC 2012 Mineral Code and the Competent Person has undertaken sufficient work to disclose the historical exploration results in accordance with the JORC 2012 Mineral Code.

MT MACKENZIE PROJECT

The historical exploration results in relation to the Mt Mackenzie project contained in this document have been reported in accordance with the JORC 2012 Mineral Code and the Competent Person has undertaken sufficient work to disclose the historical exploration results in accordance with the JORC 2012 Mineral Code.

FUTURE PERFORMANCE

This document contains references to certain targets and plans of QMines which may or may not be achieved. Any forward-looking statements are necessarily based upon a number of estimates and assumptions that, whilst considered reasonable by QMines and the Competent Person, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies, involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements.

The performance of QMines may be influenced by a number of factors, risks and uncertainties, many of which are outside the control of QMines and its directors, officers, employees, advisers, agents and consultants.

BOARD APPROVAL

This presentation has been approved by the Board for release to the ASX.

The Case for Copper

Global Copper Demand is Rising...

Copper is the metal of electrification, with global demand forecast to rise by 50% by 2040, driven by expanding power grids, renewable energy, electric vehicles, AI and data centres.¹

Energy / Data / AI
Require Copper

Supply Chain &
National Security

Strong Demand,
Tight Supply¹

2nd Largest
Global Reserves²

² 2017-2018 Minerals Yearbook, USGS, 2018.

Queensland's Opportunity

Large Copper Resources & Low Exports = **OPPORTUNITY!**

Australia holds the world's second largest copper resources but ranks only eighth in exports — a clear opportunity to capture more value via local processing, right here in Queensland!

A Family of “Builders”

Big Vision. Hard Work. Build Something of Lasting Value.

I grew up watching my dad build three family homes from the ground up. He taught me that you need to think big, work hard and build something tangible that creates lasting value.

ARCHITECTURE FOR SUCCESS

Project Delivery

Management That Delivers!

Stay Small To Move Fast!

Copper mines typically take 15–20 years from discovery to production. QMiners is targeting construction at Mt Chalmers just six years after acquisition. Driven by a small, experienced team that moves fast!

We Own A “District”

Ten Deposits. Nine Still To Unlock.

By investing early to consolidate the region, QMiners now controls **ten** known deposits. Importantly, nine are not currently in the Mt Chalmers mine plan, providing significant potential for future growth and value creation.

TEN Regional
Deposits!

Focus!**

Commitment To Drilling

Management That Delivers!

Exploration drilling has been a fundamental part of QMines' organic growth strategy, with ongoing programs focused on expanding resources, extending mine life and discovering new deposits.

Organic Growth Strategy

Making New Discoveries

Expanding Resources

Extending Mine Life

Rapid Resource Growth

Management That Delivers!

The QMines team have delivered **nine** resources since listing on the ASX in May 2021. The Company has a further **two upgrades planned** following the upcoming drilling at the Woods Shaft and Botos deposits.
