

Our steel

Our steel story – what we do

BlueScope makes and supplies steel for some of the most beautiful, essential and enduring buildings and structures in the world. We manufacture painted and coated steel products, and design, fabricate and supply custom-engineered building solutions for small to industrial sized warehouses.

Learn more about why we are optimistic about the future of steel.

Working locally for markets globally

Headquartered in Australia, we bring our steel to market in building and construction and other industries through operations spread across North America, Australia, New Zealand, Pacific Islands and throughout Asia. Over many years, BlueScope has built a strong foundation for growth with a diverse portfolio of regional businesses in some of the largest and fastest growing economies of the world.

Our track record of successful global partnerships enables us to prosper in widely diverse markets. Our joint venture with Nippon Steel – NS BlueScope - has opened exciting new markets and opportunities across South East Asia and on the West Coast of the United States.

Our strong partnerships & networks

Our strong partnerships and networks are built on BlueScope's most loved and recognised product brands, such as COLORBOND® steel and ZINCALUME® steel, COLORSTEEL®, BlueScope ZACS®, LYSAGHT® steel building products, Butler® and Varco Pruden® pre-engineered buildings.

Our global networks are another great strength at BlueScope. With more than 160 operations and locations across 14 countries, we employ over 16,500 people and serve thousands of customers every day.

Maintaining responsible products

We build our contribution to global [sustainability](#) through everything we do; planning for innovation and development, sourcing materials, operating our facilities, caring for our people, engaging with those we do business with and supporting our local communities. We consider the lifecycle of our steel products from manufacturing, marketing, distribution through to recycling.

Our products and solutions stand strong at the heart of our communities. With that responsibility, we place a high priority on our product quality assurance programs which ensure we can repeatedly meet the needs and expectations of customers and communities.

Creating strength along the steel value chain

Guided by the values of [Our Bond](#) and the intent of [Our Purpose](#), our contribution to sustainability extends beyond our own operations and includes the way we source materials, engage with all those we do business with and support our local communities.

How to become a supplier

We recognise that our partnerships with suppliers are crucial in sustainably managing the social, environmental and ethical risks inherent in our global supply. We seek to work with suppliers and partners who share similar values and take a similar approach to protecting human rights, caring for people and the environment, and creating a strong, sustainable future.
