Economic Outlook.

Papua LNG – FID in sight

Development Forum opened Jul-26. Capex cut US$18bn → US$14bn. FID targeted Q4-26; may extend to ~Apr-27, still ahead of the 2027 elections.

Fuel & fiscal support

PGK1bn stabilisation package holds pump prices at Mar-26 levels; ~PGK630m disbursed by mid-year. To be formalised in a supplementary budget.

Watch: El Niño risk

Dry conditions could disrupt Ok Tedi and Porgera operations entering Q4-26, a downside risk to mining export volumes.

*compared against June 2025

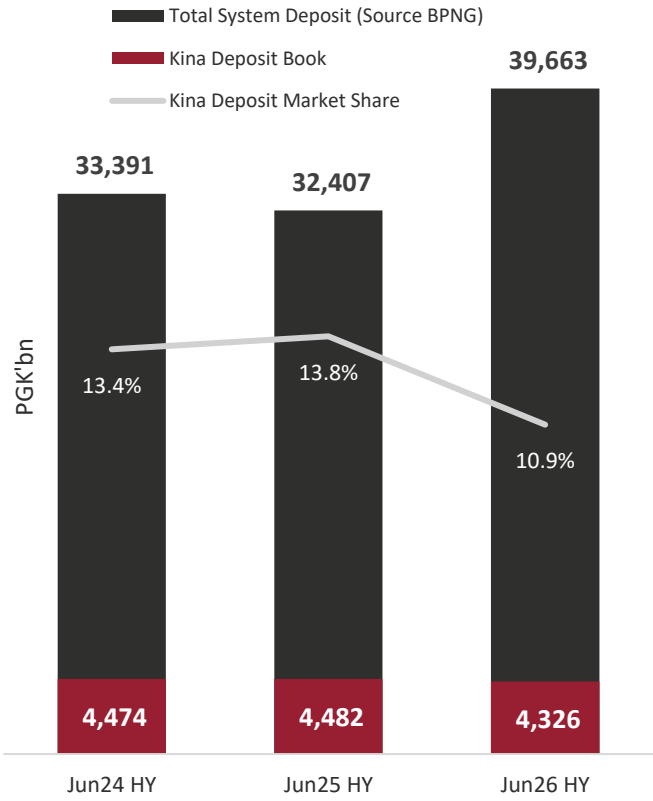

Market Share.

- Maintained market share of lending at 16.9%, June 26 vs. June'25
- Deposits market share declined to 10.9% due to the intentional run-off of higher-cost Fixed Deposits and CMA balances, reflecting our focus on optimizing funding costs and enhancing margin performance.
- The growth in total industry deposits is largely attributable to increased government deposits.

*impact of depreciation of PGK rate vs AUD rate

Revenue +2%.

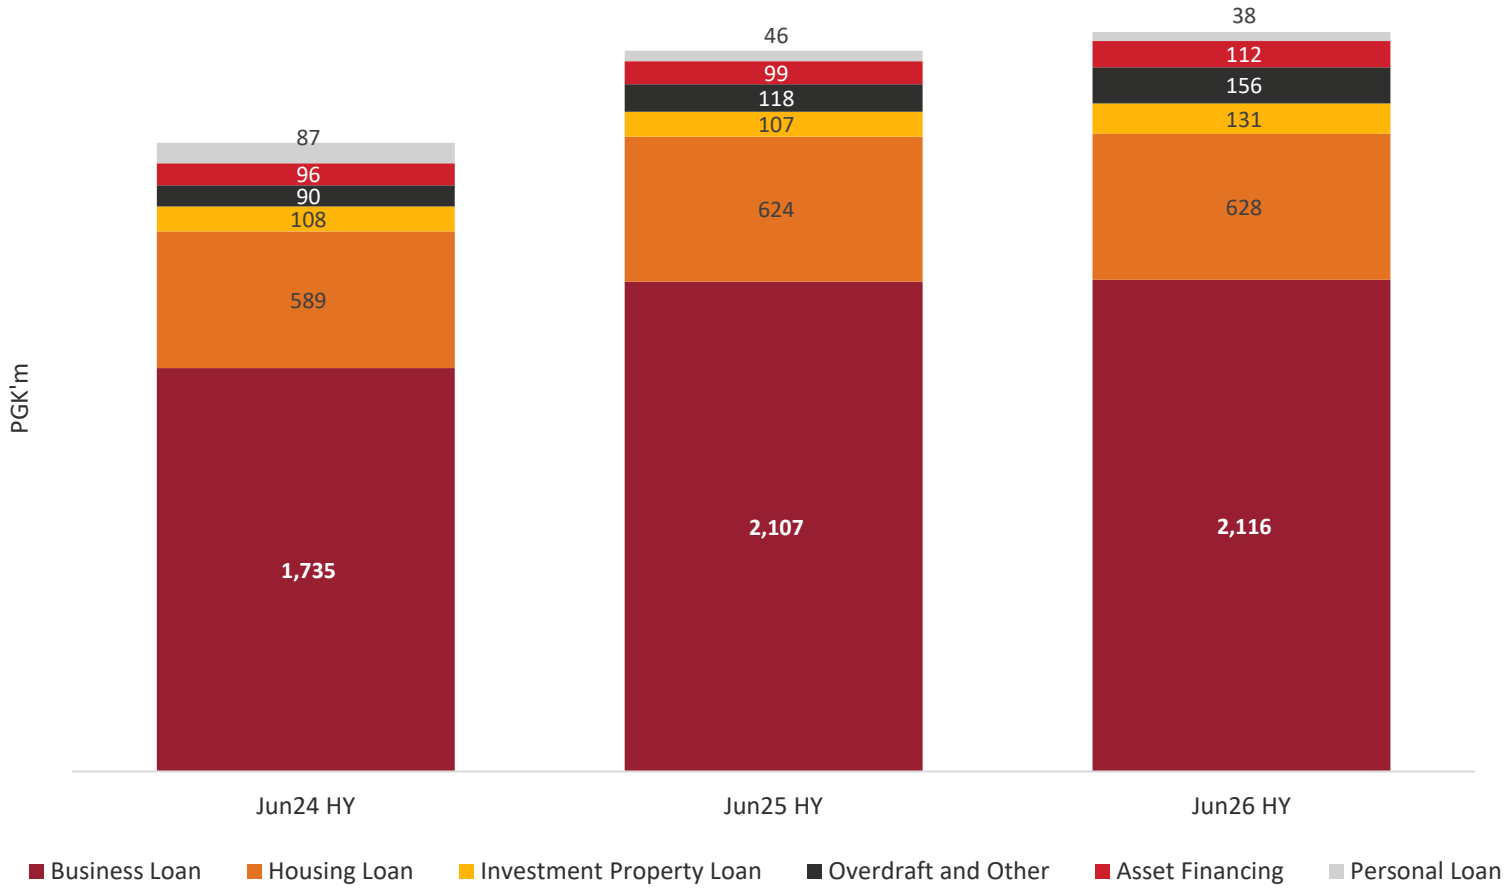

- Key revenue drivers:
  - Loan Interest Income +12%.
  - Digital income stable YoY.
  - Wealth income + 11%, driven by growth increase in client funds and FuA membership.

Loan Book growth of +2% vs PCP.

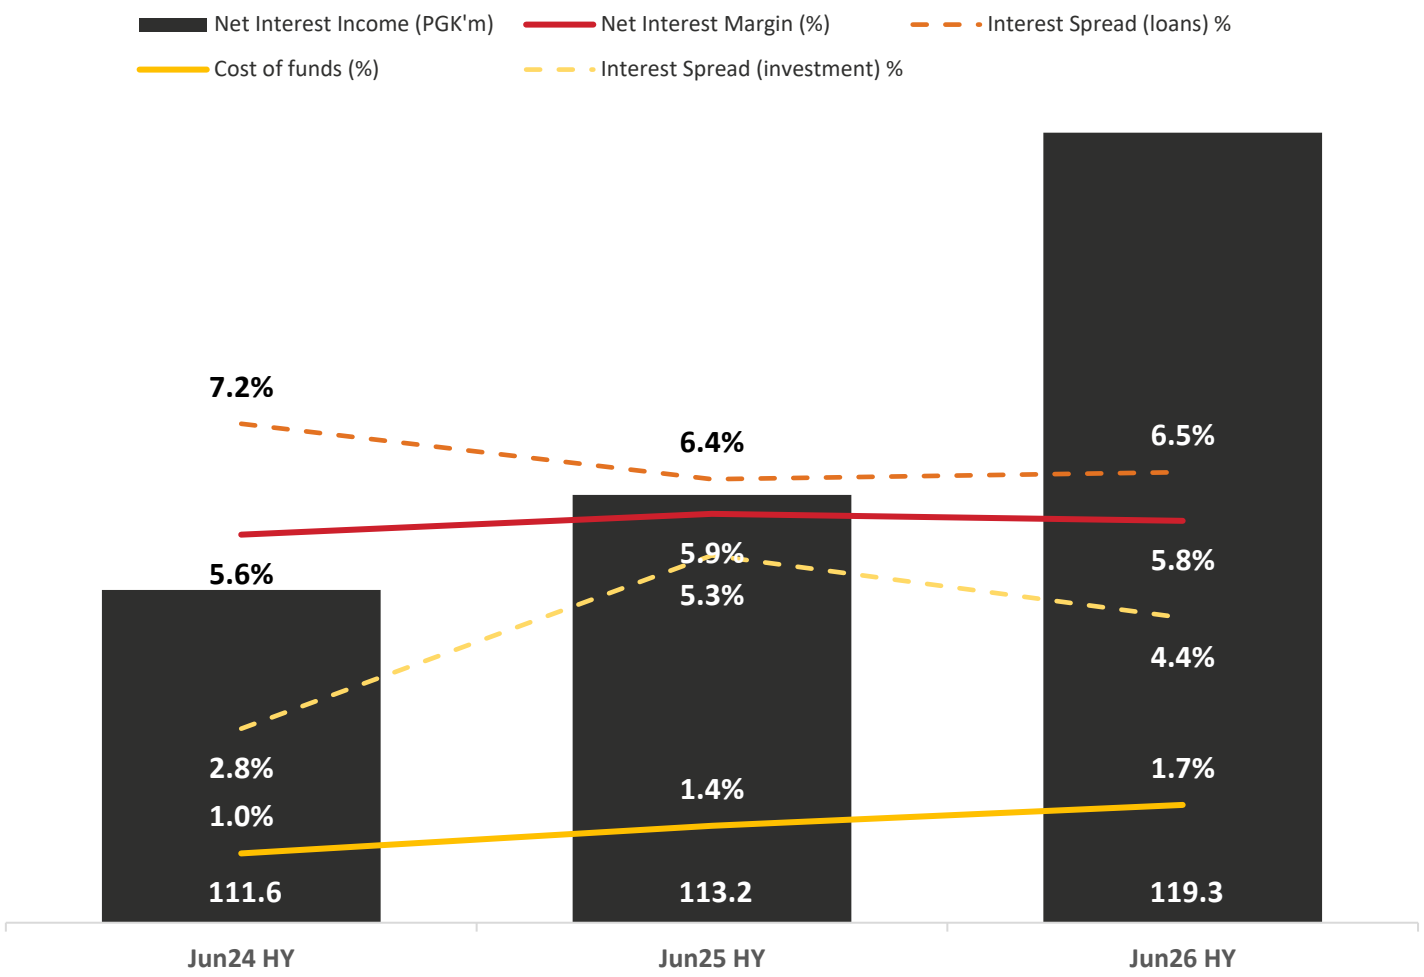

Modest loan book growth over PCP reflects deliberate balance sheet optimisation and de-risking initiatives, including the targeted reduction of selected lending exposures.

Excluding these strategic actions the underlying growth would have been 7% vs PCP.

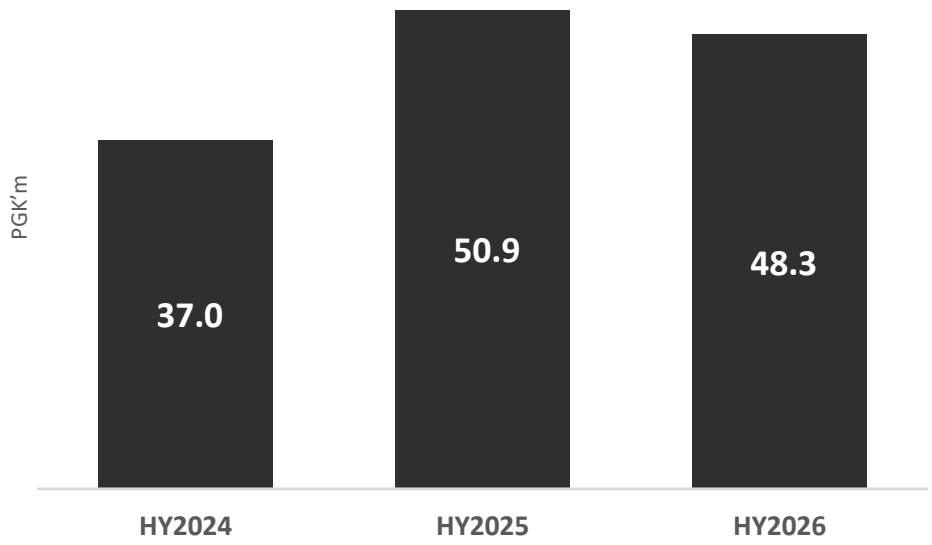

Net Interest Income.

- Net Interest Margin declined nominally by 10bps to 5.8% compared to June 2025.
- Interest spread on investments at 4.4% reflected declining yields on government securities in line with our forecast.
- Interest spread on loans slightly increased to 6.5%
- Net interest income gains were partly offset by a planned increase in the cost of funds associated with the corporate bond.

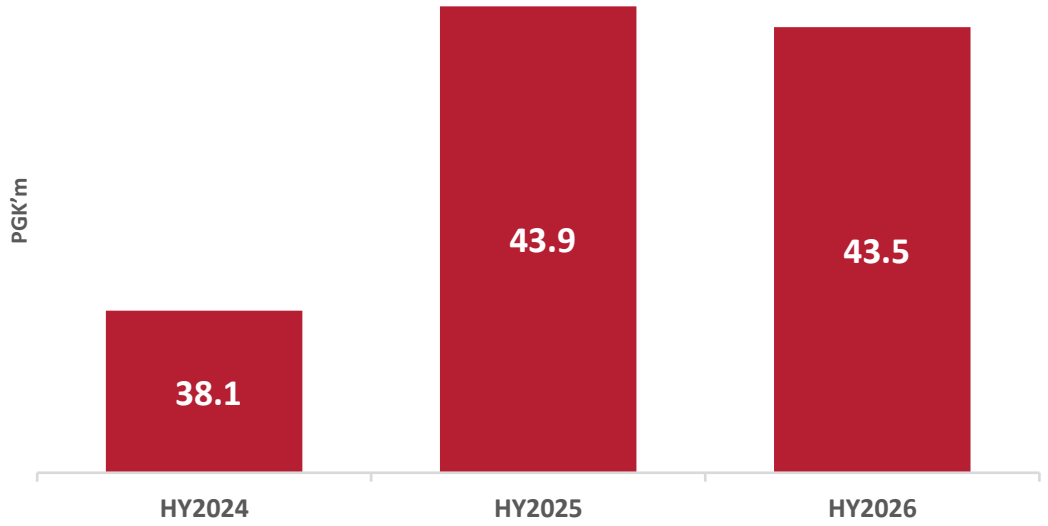

Non-Interest Revenue.

Foreign Exchange Income

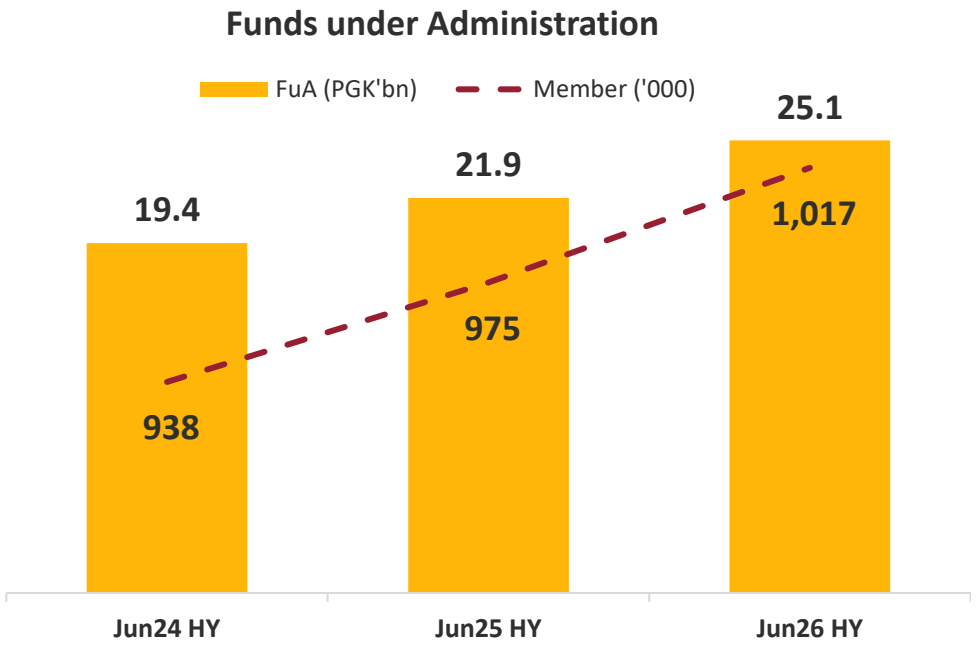

- FX revenue of PGK48.3m, down 5% from 1H 2025, including a one-off PGK2.4m FX loss on the FY2025 final dividend payment.
- Increased interbank FX activity and reduced central bank intervention continue to reshape the market.
- Higher FX volumes largely offset margin compression, supporting revenue resilience.

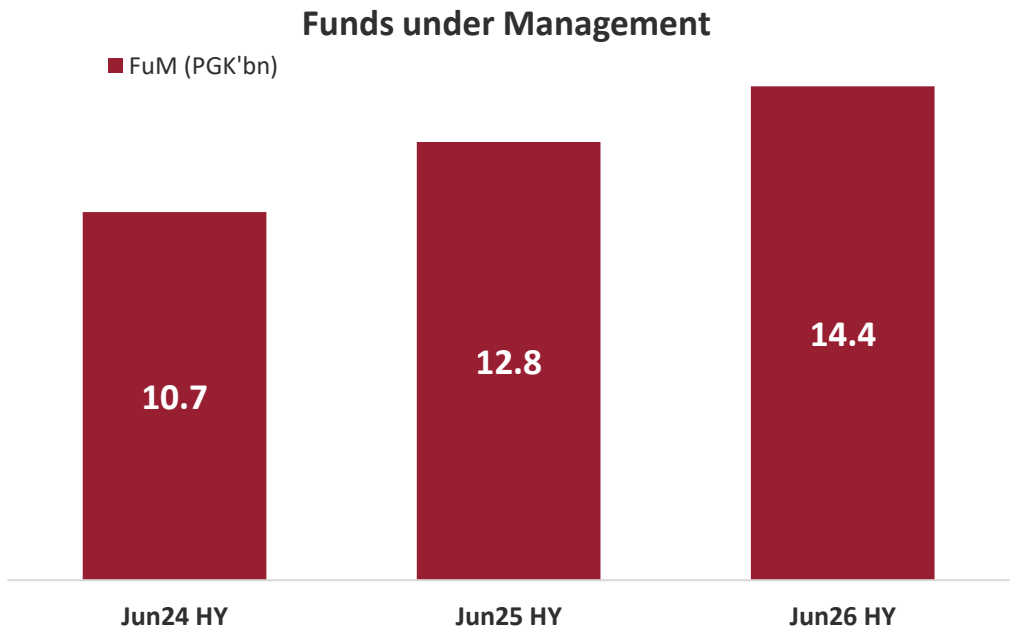

Digital Revenue

- Digital revenue growth was constrained by interoperability issues affecting a major PNG bank's new debit cards, delaying income from KSL's payment acquiring business (EFTPOS, e-Commerce and ATMs).
- The issue was external to Kina Bank and is expected to be resolved through industry-wide system upgrades before the end of H2 2026.
- The competitive changes in the payments acquiring market resulting from this issue may mean that a full revenue recovery extends into 2027.

Wealth.

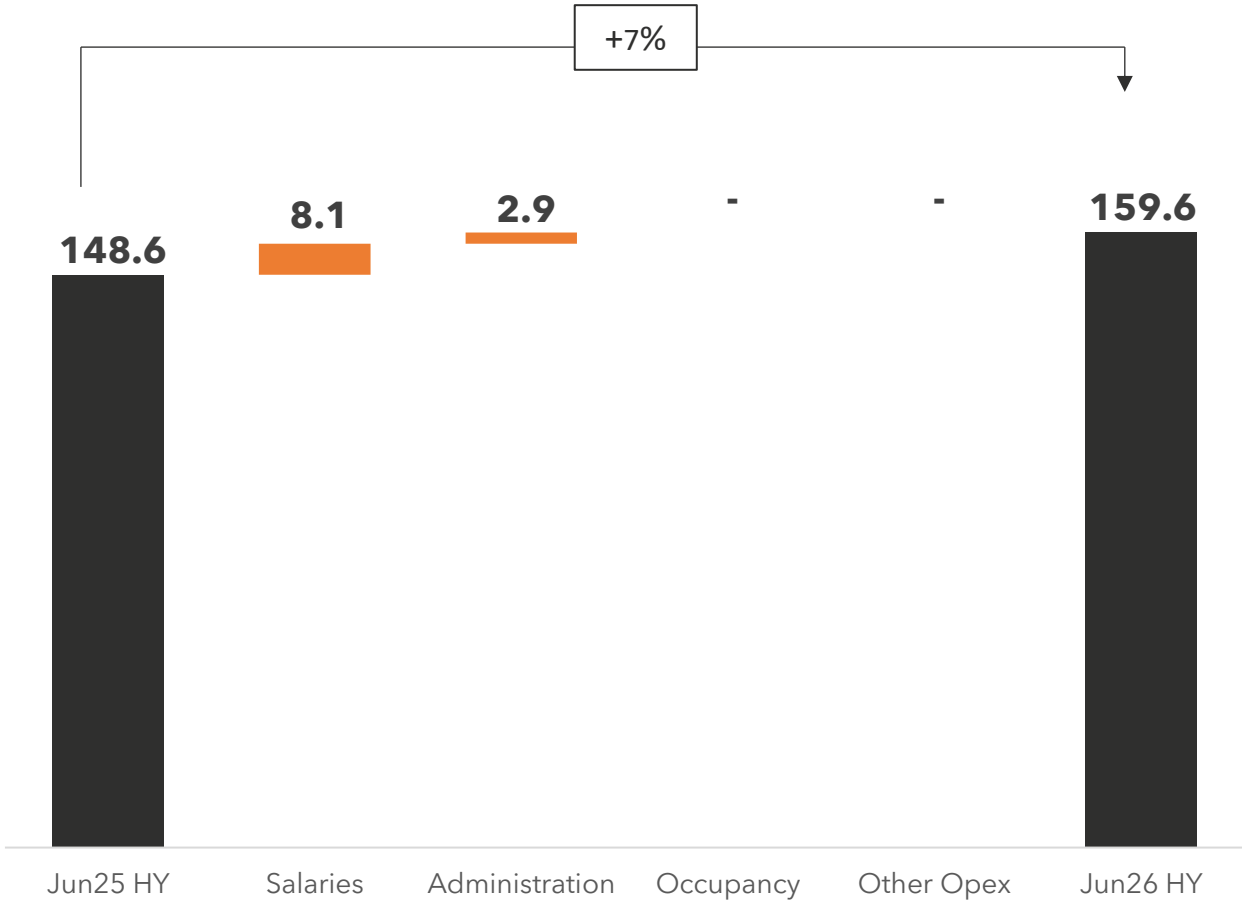

- Funds under Administration (FuA) increased by 15% to PGK25.1bn, up from PGK21.9bn in the prior period.
- Growth was driven by continued expansion in superannuation membership, increasing funds managed on behalf of members.
- The increase reflects strong inflows and the growing scale of the superannuation business, further strengthening FuA levels.

- Funds Under Management (FuM) increased 16% to PGK14.4bn, up from PGK12.8bn in the prior period.
- Recurring revenue increase reflects growth in FuM.

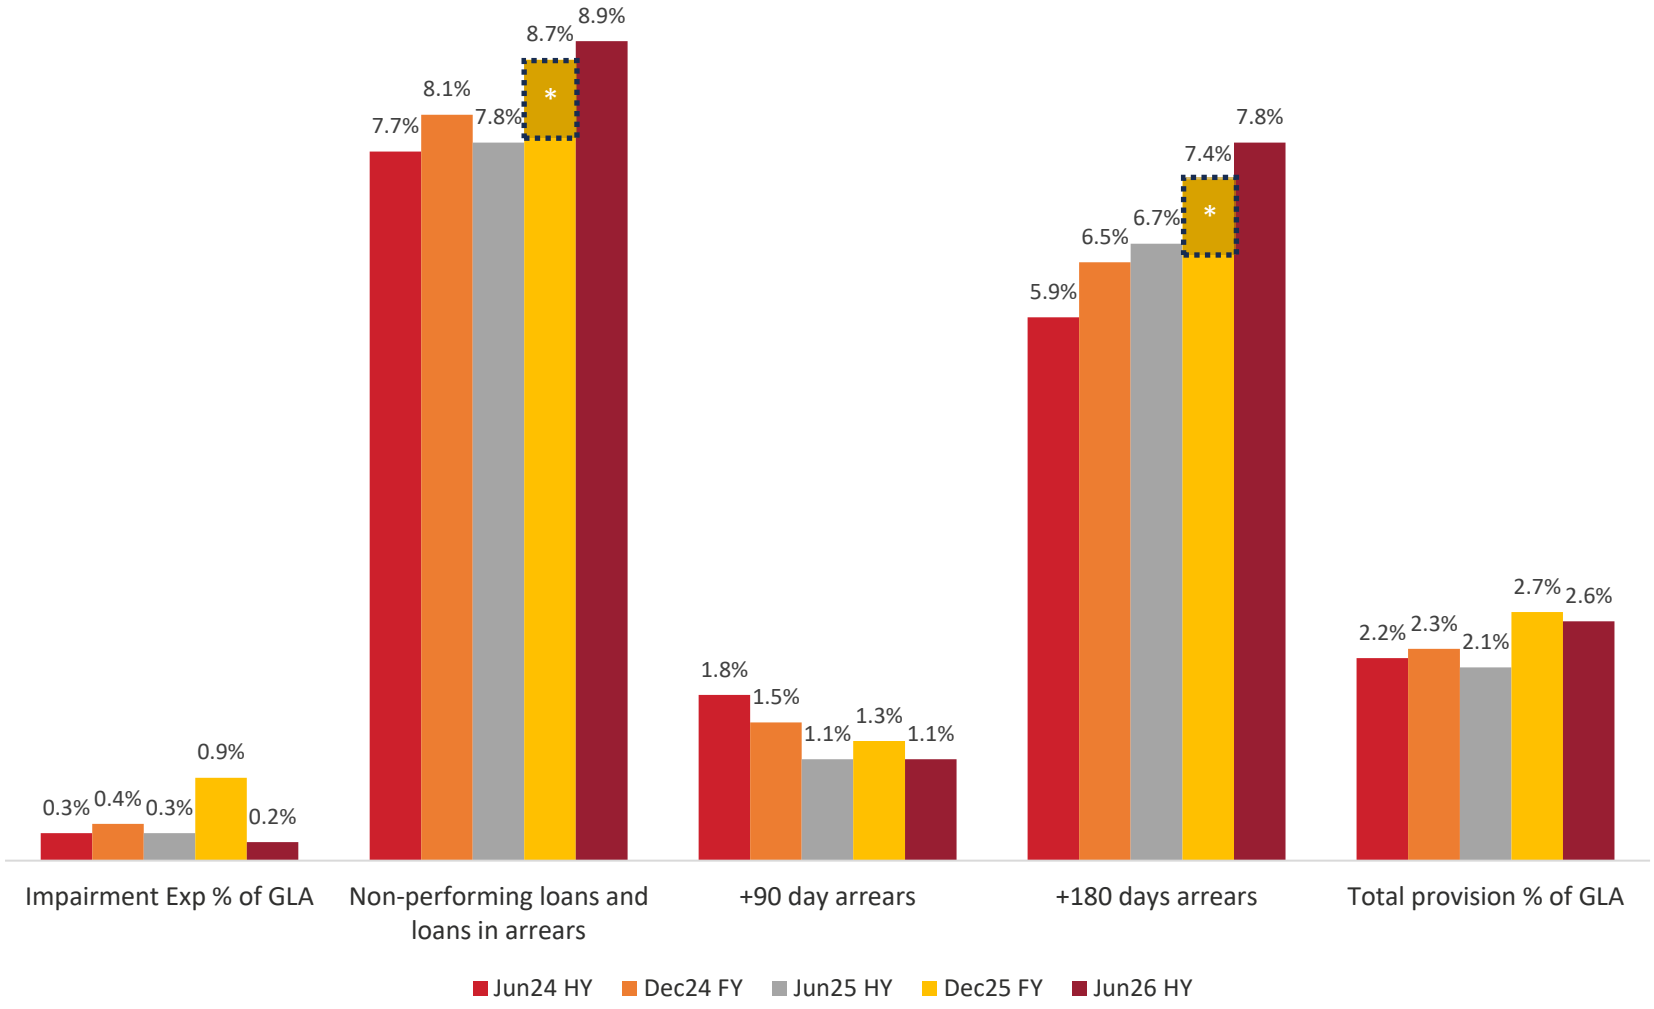

Modest increase in Operating Cost.

- Operating costs increased 7% to PGK159.6m, reflecting a modest rise despite ongoing inflationary pressures and currency depreciation of the PGK against the USD and AUD, which impacts 30% of the cost base.
- Cost growth was driven by continued investment in core capabilities and early phases of our digitisation program, while maintaining disciplined expense management.
- FTE remained stable, while salary cost increase is attributable to a 4% CPI increase in local team member salaries and FX impact on AUD denominated salaries.
- Cost to income of 62.6%, reflecting revenue growth timings. Kina maintains its medium to long term objective to reduce CTI through efficiency, digitisation, and organic growth in its target segments.

Asset Quality.

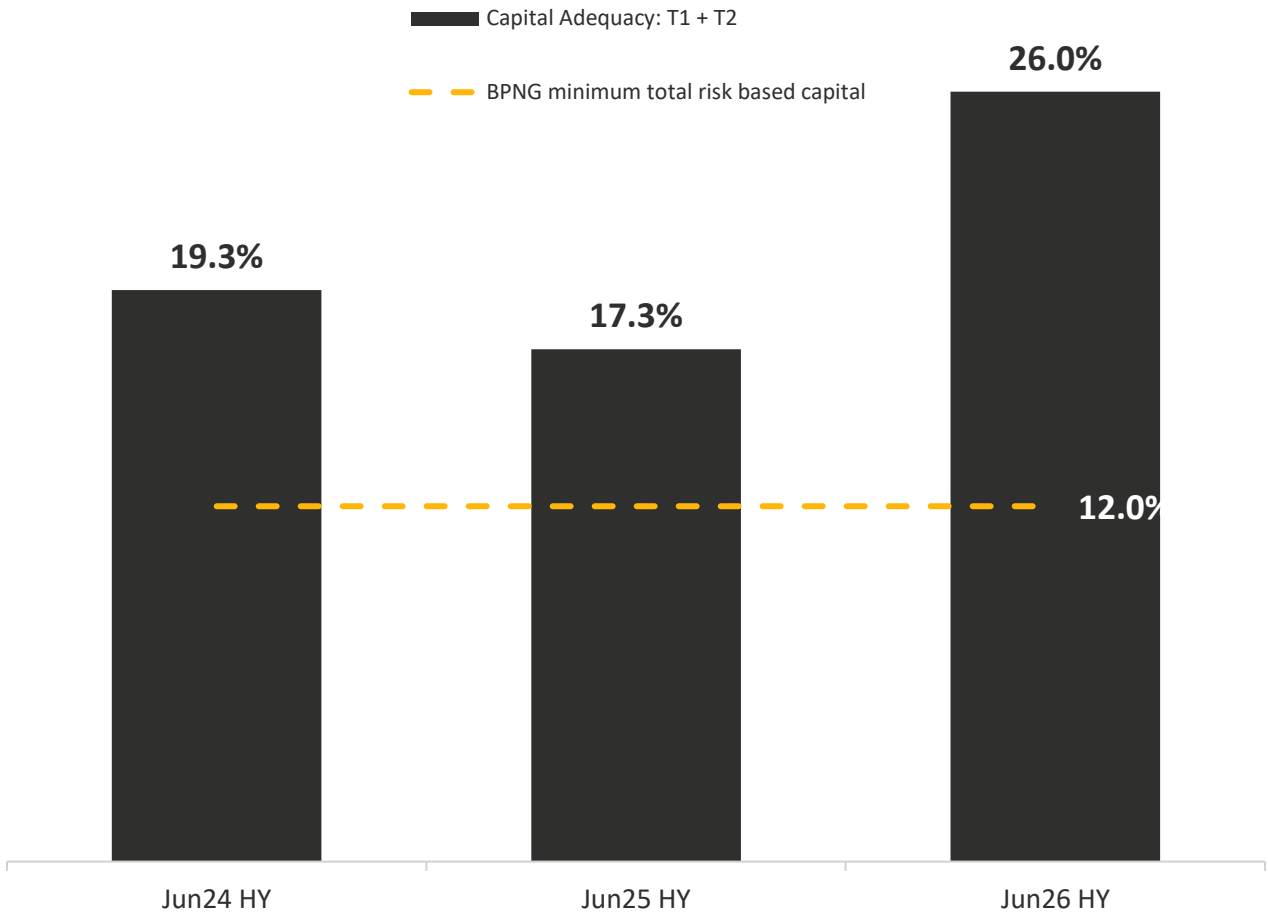

- Provision coverage strengthened to 2.6% of gross loans at June 2026 (June 2025: 2.1%), reflecting a continued prudent approach to credit risk management.
- Gross NPL balances reduced slightly by 0.9% from December 2025; the 0.2% movement in the NPL ratio from December to June reflects the 3% decline in the loan book size.
- NPL reporting has been updated to include suspended interest on credit impaired loans, raising the December 2025 figure from 7.7% to 8.7%, with the June 2026 figure at 8.9% using the same methodology. Accordingly, the movement against prior periods does not represent a decline in credit quality but a reporting realignment under IFRS9.

Suspended Interest realignment under IFRS9 in 2H25 increased total NPL from 7.7% to 8.7% (+180 days arrears from 6.4% to 7.4%).

Capital Adequacy.

- Capital adequacy increased to 26.0% (Dec 2025: 17.4%) following the successful PGK235m Tier 2 Bond issuance.
- The strengthened capital position enhances KSL's capacity to support future lending and growth.
