Transform your technology burden
into a growth enabler with a single
provider.

Talent Shortages

Critical skills gaps and high IT turnover leave your business vulnerable
when expertise walks out the door.

Rising Cyber Threats

Evolving security risks and compliance demands overwhelm internal
teams lacking specialised security capabilities.

Cost Pressures

Shrinking budgets force impossible choices between maintaining systems and funding innovation.

OUR MANAGED SERVICES

Managed Services that move you from maintenance to modernisation.

Our comprehensive range of Managed Services allows you to transform, close workforce gaps, stay secure, and free up budget and resources to drive business growth at a pace that is right for you.

Built around standard Project Management methodologies and the IT information Library (ITIL) framework, our approach focuses on integrating industry innovation and vendor-developed technologies into your environment through local presence and national capability.

Enterprise Application Services

Proactive, onshore managed services that keep your enterprise applications secure, stable and continually improving.

Managed Cloud

Keep your private and public cloud secure, stable, and sovereign through cost-effective and flexible pay-as-you-go models.

Cybersecurity Services

Empower your people wherever and whenever they work through seamless technology, device lifecycle management and high-quality 24/7 support, customised to your needs.

Network Services

Modern high-performance network services with enterprise-grade security. Local support, hybrid cloud connectivity, and managed solutions.

CLIENT TESTIMONIAL

"Atturra helped Icon Water migrate its ICT and network environment and services to a managed services model, enabling the company to achieve its strategic goals and deliver sustainable value to the business. The project included managing its network, data centre, unified communications, ICT, cloud, and security".
