

ASX RELEASE

3 September 2026

Acusensus enters Victorian road safety camera test sites agreement

Highlights

- Agreement signed with the Victorian Government to install two fixed road safety camera systems for the purpose of testing and evaluation
- Total contract value of approximately \$1.7 million (excluding GST) over an initial term of 2 years, with options to extend up to a total of 10 years

Acusensus Limited (ASX:ACE) (**Acusensus** or the **Company**), a technology company designing and developing artificial intelligence enabled road safety solutions, is pleased to announce that Acusensus Australia Pty Ltd, a wholly owned subsidiary of Acusensus, has signed an agreement with the State of Victoria (**State**), acting through the Department of Justice and Community Safety, for the design, supply, installation and commissioning of road safety camera systems at nominated sites in Victoria (**Test Site Agreement**).

Under the Test Site Agreement, Acusensus will deliver infrastructure at two test sites along a Victorian freeway. The infrastructure will allow Acusensus's equipment to be tested for instantaneous speed and average speed enforcement. The sites are for testing only and will not be issuing infringements.

The agreement has an initial term of two years, with the State able to extend the term on up to four further occasions of up to two years each, representing a potential total term of up to 10 years. The total contract value is approximately \$1.7 million for the two year term, with the majority of the pricing related to supply and installation of the infrastructure (excluding GST). The systems are expected to be installed by mid-2027.

Acusensus Founder and Managing Director, Alexander Jannink, said:

"We are delighted to have the opportunity to bring Acusensus technology into our home state of Victoria. We look forward to growing our relationship with the Department of Justice and Community Safety over time and to a future in which we are contributing to saving lives with our advanced technologies on Victorian roads."

About Acusensus

Acusensus is a technology company that was founded in 2018 with a mission to design and develop artificial intelligence enabled road safety solutions. Collaborating with governments and commercial stakeholders to tackle distracted driving globally is Acusensus' first priority. Acusensus has pioneered intelligent solutions that provide anywhere, anytime digital evidence that can be used in conjunction with law enforcement to drive behavioural change and improve road safety. Acusensus technology is used to detect and provide prosecutable evidence of distracted driving (mobile phone use), seatbelt compliance, speeding, railway crossing compliance and the monitoring of vehicles of interest.

Leveraging AI and sensing expertise, Acusensus also provides technology that protects workers in live traffic environments. The Forsite by Acusensus road worker safety system integrates roadside sensors, connected wearables and real time analytics to give crews early warning of approaching vehicle risks, delivering the vital seconds needed to avoid harm while generating data that helps make worksites safer over time.

Acusensus listed on the Australian Securities Exchange in January 2023. Acusensus is headquartered in Melbourne, Australia, with offices also in Sydney, Brisbane, Perth, Auckland (New Zealand), Christchurch (New Zealand), London (United Kingdom), Las Vegas Nevada (United States) and Hartford Connecticut (United States).
