PIPED GAS

Piped gas can provide your home with instant hot water, and is an efficient way to heat multiple rooms. You can add piped gas to your current electricity plan at the same address, and get a 17.25 cents per day (incl. GST) Dual Fuel Discount applied to the gas charges section of your bill each month. Plus, all your services are on one bill!

Piped gas is distributed through pre-installed pipelines in your area, which are connected to your property. It's available across much of the North Island including Auckland, Tauranga, Hamilton and Wellington. If you already have a piped gas connection, it's easy to switch from your previous energy provider.

LPG GAS

For customers living in areas outside of the natural gas network, Mercury provides bottled LPG gas deliveries and collections in many areas.

Bottled gas (LPG) is great for heating, cooking and hot water. Whether you're switching bottled gas suppliers, moving to a new place or need to arrange a refill, we make it easy.

LPG stands for Liquefied Petroleum Gas. It is generally a mix of propane and butane, sold as bottled gas. LPG is manufactured during the refining process of petroleum, and is stored and supplied in cylinders.

ARE YOU CONNECTED TO PIPED GAS?

If you're unsure if you have a gas connection or not, click below to find out. All you need to do is fill in your address.
